INTRODUCTION

WELCOME TO DAGGERHEART

Daggerheart is a collaborative fantasy roleplaying game of incredible magic and heroic adventure. During your journeys, you may find yourself rubbing elbows with nobles to investigate and stop an assassination plot, delving into an ancient dungeon to prevent an apocalyptic creature from breaking free, sailing across a vast ocean to face a terrifying sea monster, or preventing a precious relic from falling into the hands of a dangerous enemy. No matter the adventure your party embarks upon, Daggerheart provides the tools to tell a story that is both heartfelt and epic.

WHAT IS A TABLETOP ROLEPLAYING GAME?

A tabletop roleplaying game, or TTRPG, is an interactive storytelling experience where players take on the roles of characters within a shared world and collaborate to tell a story about those characters. Daggerheart is meant to be played by three to six people—known as your group or table—with one person taking on the role of the game master (or GM) while the others each play a single character, referred to as a player character (or PC). The GM facilitates the story that takes shape around the PCs—they introduce rewards, complications, and consequences to the narrative, embody the story's other characters (also known as non-player characters or NPCs), and help the story progress each time you play together.

Like many roleplaying games, Daggerheart uses dice to determine the outcome of some uncertain events, providing an element of unpredictability to the results of choices you make. Even so, the game embraces player agency and imagination; the type of character you choose to play and the decisions you make about their background and experiences will make your odds better (or worse!) on those dice rolls.

WHAT KIND OF ROLEPLAYING GAME IS DAGGERHEART?

Daggerheart is a heroic, narrative-focused experience that features combat as a prominent aspect of play. The system facilitates emotionally engaging, player-driven stories punctuated by exciting battles and harrowing challenges. The game takes a fiction-first approach, encouraging players and GMs to act in good faith with one another and focus on the story they're telling rather than the complexity of the mechanics. The rules provide structure when it's unclear how actions or moments will resolve within that story. The system takes a free-flowing approach to combat to avoid slowing the game down with granular rounds, and it doesn't rely on grid-based movement for maps and minis. These aspects coalesce to create a game that allows for the terrain and map-building that miniature-based systems are known for while facilitating a streamlined, narrative experience for players.

If you're looking for a TTRPG that tells heroic fantasy stories with a modern approach to mechanics, focusing on both epic battles and the emotional narrative of the characters who fight in them, you've come to the right place.

Daggerheart also utilizes an asymmetrical design, meaning that it plays differently for the GM than it does for the players. Players roll two twelve-sided dice for their PCs' standard actions, including their attacks. The GM can make most moves without dice, but they roll a twenty-sided die for adversary moves that require a roll. This asymmetrical design is intended to help all participants contribute to a memorable experience for everyone at the table.

HEART OF THE GAME

In Daggerheart, you and your fellow players all take turns describing what your characters do. The GM determines the consequences of those actions, then guides the group into collaboratively evolving the narrative because of those consequences. When the rules call for it, or when a situation demands, you'll roll the dice to inform what happens next. Depending on the result of the roll, the events of the ongoing story will unfold in new and unexpected ways.

There is no winning or losing in Daggerheart in the traditional "gaming" sense. The game is a collaborative storytelling experience, where the goal is to play out an incredible story together. Even if the characters fail to achieve their goals right away, make big mistakes, or even die, they never "lose." If a character dies, the party can look for a way to bring them back to life, or that player can make a new character for the party to meet along their journey. If the group fails to stop the villain from enacting a terrible plan, they might face the consequences of that failure and try to make it right. If they succeed, they may triumphantly win the day—or they might anger or embolden an even stronger enemy who retaliates. No matter what happens during the story, as long as you're working together to craft a narrative that is fun and exciting to everyone, you've already won.
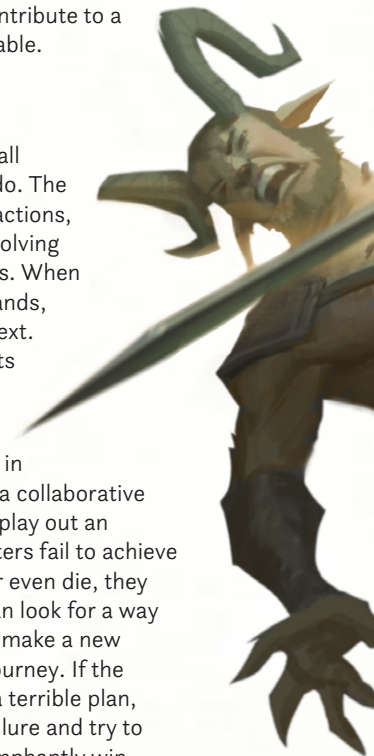

TOUCHSTONES

Daggerheart derives inspiration from a variety of sources. Below is an abridged list of media the design team drew from while crafting this game.

TTRPGs: *13th Age* from Pelgrane Press, *Apocalypse Keys* from Evil Hat Productions, *Apocalypse World* from Lumpley Games, *Blades in the Dark* from Evil Hat Productions, *City of Mist* from Son of Oak Game Studio, *Cortex Prime* from Fandom Tabletop, *Cypher System* from Monte Cook Games, *Dishonored* from Modiphius Entertainment, *Dungeons & Dragons* from Wizards of the Coast, *Flee, Mortals!* from MCDM Productions, *For the Queen* from Darrington Press, *Genesys* from Fantasy Flight Games, *Lady Blackbird* from One Seven Design, *Masks: A New Generation* from Magpie Games, *Pathfinder* from Paizo Publishing, *Shadowrun* from Catalyst Game Labs, *The Quiet Year* from Buried Without Ceremony, *The Wildsea* from Mythopoeia Games Publications, *Slugblaster* from Mythopoeia Games Publications.

Books: *Sabriel* by Garth Nix, *A Song of Ice and Fire* by George R.R. Martin, *The Lord of the Rings* by J.R.R. Tolkien, *The Wheel of Time* by Robert Jordan, *A Wizard of Earthsea* by Ursula K. Le Guin.

Films and Television: *The Dragon Prince*, *The Legend of Vox Machina*, *The Lord of the Rings*, *The Witcher*, *Guardians of the Galaxy*, *The Dark Crystal*.

Video Games: *Borderlands* from Gearbox Software, *Dragon Age: Inquisition* from BioWare, *The Elder Scrolls* series from Bethesda Game Studios, *Outriders* from People Can Fly.

Special Appreciation:

- *The Genesys System* from Fantasy Flight Games was a major inspiration for the two-axis results of the Duality Dice.

- *Cypher System* from Monte Cook Games and its GM Intrusions paved the way for spending Fear to interrupt a scene.

- Among many other things, Wizards of the Coast's *Dungeons & Dragons* advantage/disadvantage system was particularly inspirational in the dice mechanics of this game.

- *13th Age* from Pelgrane Press developed Backgrounds that heavily inspired the Experience mechanic.

- *Blades in the Dark* from Evil Hat Productions and *Apocalypse World* from Lumpley Games helped shape the narrative flow of the game, and their playbooks inspired a lot of the character sheet development.

- *The Wildsea* from Mythopoeia Games Publications and its phenomenal section on Reaches provided inspiration for the Campaign Frames section of this book.

- The design of Wizards of the Coast's *Dungeons & Dragons* fourth edition and the monster design of *Flee, Mortals!* from MCDM Productions informed the enemy types and ways of managing minions.

- *The Quiet Year* from Buried Without Ceremony inspired the map-building section of this book's campaign guidance.

- *Apocalypse Keys* from Evil Hat Productions informed the sample session zero structure.

CORE MECHANICS OVERVIEW

The dice players use in Daggerheart most commonly fall into two different categories—your Duality Dice and your damage dice. Your Duality Dice are two differently colored twelve-sided dice (or d12s) that represent Hope and Fear. These dice embody the fate of the world and its effect on the characters' success. Your damage dice correspond to the weapon or spell your character wields, expressing the deadliness of a successful attack.

When you roll to see whether your character succeeds or fails at a task or challenge, you roll your Duality Dice and take the sum of their results, then add any bonuses your character has that apply to the action. If that total is equal to or higher than the Difficulty set by the GM, your character succeeds. If it's lower, they fail. You'll also tell the GM whether your Hope or Fear Die rolled higher, as the situation around you changes based on that result. We'll discuss this more in-depth in the "Core Mechanics" section of chapter 2.

SESSIONS AND CAMPAIGNS

When the GM and players gather to play Daggerheart, that game is called a session. Each session is a small story, and if the group plays more sessions, those small stories become part of a larger narrative known as a campaign. Longer campaigns may be broken into arcs—multiple sessions collectively focused on a specific part of the story. If overthrowing a corrupt ruler is a campaign, recruiting allies from a neighboring kingdom is an arc within that campaign.

Daggerheart is built to accommodate many kinds of stories. Your group might enjoy playing an open-ended campaign that lasts months, meeting every week to continue your characters' stories indefinitely, or you could designate a set number of sessions and play with a definite end point. Your group might enjoy a short ten-session romp with a party of characters before making new ones, or you may only want to play one session, known as a "one-shot." All of those options are wonderful ways to play—do what works best for your group.

THE GOLDEN RULE

The most important rule of Daggerheart is to make the game your own. The rules included in this book are designed to help you enjoy the experience at the table, but everyone has a different approach to interpreting rules and telling stories. The rules should never get in the way of the story you want to tell, the characters you want to play, or the adventures you want to have. As long as your group agrees, everything can be adjusted to fit your play style. If there's a rule you'd rather ignore or modify, feel free to implement any change with your table's consent.

RULINGS OVER RULES

While playing Daggerheart, the GM and players should always prioritize rulings over rules. This book offers answers for many questions your table may have about the game, but it won't answer all of them. When you're in doubt about how a rule applies, the GM should make a ruling that aligns with the narrative.

For example, Daggerheart has a weapon called a grappler that lets you pull a target close to you. If you try to use it to pull an entire castle, the weapon text doesn't forbid you from doing that—but it doesn't make sense within the narrative. Instead, the GM might rule that you pull a few bricks out, or pull yourself toward the wall instead.

Similarly, if your character does something that would logically result in immediate death—such as diving into an active volcano without protection—you might not get to make one of Daggerheart's death moves, which normally give you control of your character's fate in their final moments. This kind of consequence should be made clear before the action is completed, and it should always follow the logic of the world. As a narrative-focused game, Daggerheart is not a place where technical, out-of-context interpretations of the rules are encouraged. Everything should flow back to the fiction, and the GM has the authority and responsibility to make rulings about how rules are applied to underscore that fiction.

USING THIS BOOK

The *Daggerheart Core Rulebook* is divided into five chapters.

CHAPTER ONE:
PREPARING FOR ADVENTURE

This chapter covers everything you need to know to make a character in the Daggerheart system.

CHAPTER TWO:
PLAYING AN ADVENTURE

This chapter details the core game mechanics you'll need to play a session, as well as how to level up your character, multiclass to access new domains, and use special equipment you might discover during play.

CHAPTER THREE:
RUNNING AN ADVENTURE

This chapter is specifically for the GM, giving you the tools you'll need to run sessions and campaigns. In addition to detailing the core GM mechanics, this chapter guides you on using safety tools, running session zero, customizing campaign maps, planning story arcs, and more.

CHAPTER FOUR:
ADVERSARIES AND ENVIRONMENTS

This chapter provides rules and stat blocks for filling your world with challenging adversaries and dynamic environments. You can use the pregenerated adversary and environment stat blocks, or follow this chapter's guidance to create your own.

CHAPTER FIVE:
CAMPAIGN FRAMES

This chapter provides campaign frame options you can use to structure long-term play.

APPENDIX

Lastly, this is where domain card text, character sheets, character guides, maps, and all other reference documentation for the game can be found.

WHAT DO YOU NEED TO PLAY?

Most of the tools required to play a session of Daggerheart are included with this book, but there are a few additional components you'll need to gather before you begin.

■ 2–5 PLAYERS

Daggerheart runs best with two to five players who are excited to collaborate and build a story together. If you're playing a PC, your responsibility is to adopt the mentality of your character and decide what they do. The GM will present problems and obstacles, and you'll figure out how to tackle those challenges in a way that makes your game most interesting. As a player, it's your job to shape your character's story through the choices you make and spotlight the other characters as they, too, grow on this journey.

■ A GAME MASTER

If you're taking on the role of the GM, you'll be playing the world as it responds to the PCs' actions. That means you'll set exciting scenes for the characters, manage the flow of the story, and play any NPCs, including the adversaries the characters will face. You'll also ask the players questions that drive the narrative forward. Often, you'll be the one who knows the rules and can answer questions about mechanics during play. If a judgment needs to be made during a session about a rule or mechanic that's not in the rulebook, you'll be the one to make that decision.

As a GM, it's important to remember that you're not an antagonistic force against the players. Though you're the one introducing the dangers and complications in a scene, the thrilling challenges you provide are meant to let the players showcase their characters' strengths and face their characters' flaws. Be a fan of the characters and a collaborator with the other players at your table.

■ GAME DICE

Daggerheart uses the full suite of polyhedral dice: d4, d6, d8, d10, d12, d20, and d100. When referring to a quantity of dice beyond a single die, the game indicates how many and which kind, such as 2d6 (two six-sided dice) or 3d8 (three eight-sided dice). Players will need 2d12 of different colors (your Duality Dice) and at least one set of polyhedral dice to share amongst the table. You may find it easier for each person to have their own set. As your character levels up, you'll be rolling more dice to represent those advancements, so it may be helpful to bring another set or two. The GM will also need their own set of dice to run adversaries.

■ TOKENS

Character tokens are small objects that represent the look and feel of your character. Gather about seven tokens per player to start. You will need more as your character levels up—while the amount varies depending on the character build, you likely won't need more than fifteen tokens at level 10.

As you play the game, you'll use these tokens to help track several things:

- When you roll dice, you'll add tokens to help you easily count the modifiers on the roll.
- To use certain features, you might be required to place tokens on the card or character sheet.

These tokens not only make your rolls easier to resolve, but they also provide an opportunity to further express the style and color palette of your character. You can use any small object (plastic gems, pennies, buttons), but we recommend something no larger than a quarter that can sit on the table without rolling away. Ideally, each player's tokens should be visually distinct to avoid confusion.

The GM can use tokens to track their accumulated Fear and as counters on adversary stat blocks.

■ GAME CARDS

Along with this rulebook, you'll also need the cards that come with the core set: ancestry, community, subclass, and domain cards. If you don't have a physical set of cards (or need extra copies), you can download and print the cards at home. The "Domain Card Reference" section in the appendix also contains the text for cards from the core set.

■ CHARACTER SHEETS AND NOTES

The appendix contains a general character sheet and the guides you can use to build your characters, but we recommend using the class-specific character sheets from www.daggerheart.com for the best experience. The remainder of this rulebook will assume you're using the class-specific sheets. If you're using pencil and paper, you'll want to have these materials printed out. If you're using a digital version instead, ensure you have a laptop or tablet available to view and edit your character sheet and guide during the game.

We also recommend paper and writing utensils (or a digital equivalent) to record important details that the GM or other players share.

■ OPTIONAL: MAPS AND MINIATURES

You can use maps and miniatures to represent the scenarios the players are facing, especially during battle, to more fully illustrate the scene, rather than relying on only narration and description. When drawing or building a map, the scale, distance, and details won't always be perfect, and that's okay. The maps and the miniatures should never limit your imagination—only provide extra spatial context so everyone can picture the scene clearly.

PLAYER PRINCIPLES

We recommend following these principles when engaging with Daggerheart as a player to get the most out of the system.

→ Be a fan of your character and their journey.
→ Spotlight your friends.
→ Address the characters and address the players.
→ Build the world together.
→ Play to find out what happens.
→ Hold on gently.

■ BE A FAN OF YOUR CHARACTER AND THEIR JOURNEY

Find ways to show off what your character does best and what they do worst. Strive to make interesting choices and learn more about who they are through play. Push your character's story forward and let them grow with the fiction.

■ SPOTLIGHT YOUR FRIENDS

Look for opportunities to put other characters in the spotlight. Provide them openings to do what they do best, ask them for help and offer yours freely, and prompt them to share more of their thoughts and feelings.

■ ADDRESS THE CHARACTERS AND ADDRESS THE PLAYERS

Speak to the other characters within the world of the fiction. Lean on the connections you build together, ask them questions, and create a story using your conversations as well as your actions.

Speak to the other players outside of the fiction. Ask them what their character might do and what they want to see happen in the narrative. As you play, be considerate of their preferences and desires.

■ BUILD THE WORLD TOGETHER

In Daggerheart, every participant is a storyteller, not just the GM. Daggerheart is a highly collaborative game and reaches its greatest potential when every player (including the GM) is working together. This means actively advocating for the story beats you want to see, offering suggestions to enrich the arcs of the other player characters, creating parts of the world with others at the table, and thinking deeply about your character's motivations.

■ PLAY TO FIND OUT WHAT HAPPENS

Everything you do at the table should flow from the fiction. Listen to your fellow players and the GM—then react to what their characters say and do to discover the story together as you build on each other's creativity. If you roll the dice, let the results lead you through what happens next. Embrace complications with the same vigor with which you celebrate victories.

■ HOLD ON GENTLY

Improvisational storytelling isn't always perfect, and that's okay. Hold on gently to the fiction—enough that you don't lose the pieces that matter, but not so tightly that the narrative has no room to breathe. Let yourself make mistakes and make changes. Smooth the edges and shape them to fit the story. Even if the story beats don't go the way you expect or a sudden twist catches you by surprise, trust that the GM and your fellow players will all create something beautiful and memorable by the end.

Following these principles will help guide you in telling exciting, unpredictable, and meaningful stories together at your table.

A TABLE FOR ALL

Daggerheart is a game for players of all races, ethnicities, genders, faiths, sexualities, and identities. It is the responsibility of each player in the game to ensure that the table you share is a place where everyone is empowered, respected, and safe.

Because of the nature of open-ended storytelling in roleplaying games, it's possible to touch upon topics that might be difficult or sensitive for some players. Subject matter that might just be an imaginary scenario for you could bring up a real-life topic that is personal or uncomfortable for somebody else. When you gather to play for the first time, make sure that you talk through what kind of experience you're all looking to have, and bring up any themes or topics you'd like to avoid. Everyone should abide by this social contract, and add to or modify it at any time as needed.

The "Session Zero and Safety Tools" section in chapter 3 presents resources you can use to help navigate difficult scenarios together.

CHAPTER ONE:
PREPARING FOR ADVENTURE

In this chapter, you'll prepare for your first game of Daggerheart. The upcoming sections describe Daggerheart's worldbuilding fundamentals, then walk you through creating a character while providing information on each of the classes, domains, ancestries, and communities.

WORLD OVERVIEW

Daggerheart encourages the exploration of worlds filled with great magic, wondrous landscapes, mythical beasts, dynamic factions, rousing mysteries, and powerful foes. While the world your table collaboratively creates will be your own, Daggerheart has established ancestries, communities, classes, abilities, and spells—so some worldbuiding aspects will exist similarly across every campaign.

The following section describes the core realms, where these shared details derive from. These details can always be reflavored or modified to match the style of game your group wants to play. When creating your table's unique world, you can use one of the following as a starting point: an existing location you're already familiar with, a supplemental setting book, the guide for creating your own world in the "Running a Campaign" section in chapter 3, or a campaign frame from chapter 5.

CORE REALMS

The **core realms** are the basis for the worldbuilding elements inherent to many of Daggerheart's mechanics, such as its ancestries and adversaries.

■ THE MORTAL REALM

Most adventures will likely take place in the Mortal Realm. This is the land, sea, and sky, where mortals live out the entirety of their lives—the plane where the majority of all material beings and objects exist. Stories say this realm was created by the Forgotten Gods during the Earliest Age and that these immortals traveled between the Hallows Above and this new plane as easily as waking from a dream. During this time, the gods were familiar to the mortals and acts of divinity were commonplace—be they wonderful or terrifying. When the Forgotten Gods were overthrown by the New Gods, many of these ancient deities were trapped within this plane eternally.

This realm is also occupied by the Faint Divinities, lesser deities created by both the Forgotten and the New Gods to oversee the Mortal Realm. Many are considered to be quite capricious, and though their spheres of influence are smaller than the gods who created them, they can greatly influence the lives of mortals.

■ THE HALLOWS ABOVE

The Hallows Above are the collection of deific territories that once belonged to the Forgotten Gods before the New Gods claimed it at the end of the Earliest Age. Because this place is closely connected with most other realms, the gods residing here can see and speak with the creatures of the Mortal Realm without leaving their domain, though those with whom the gods communicate may find their methods strange or obfuscated. There are ways by which the New Gods can leave the Hallows Above to occupy other realms, but in the current age they must always sacrifice something of personal importance to do so. It's rumored that this burden was necessitated by their desire to protect the Hallows from the Forgotten Gods should they rise again, as the Forgotten Gods (or any being from the Mortal Realm) would also have to forfeit much to enter the Hallows Above. These sacrifices have caused some of the great calamities that have befallen the Mortal Realm in recent millenia.

■ THE CIRCLES BELOW

The Circles Below are the collection of lower realms where many of the Forgotten Gods, those who fought the most passionately during the uprising, were banished. Known as "the Fallen Gods," these deities lost the Divine War with the New Gods during the Earliest Age and have since been deemed "evil practitioners of tainted magic." Thus the Faint Divinities who were banished alongside them are commonly referred to as "demons," and those that descended from these creatures also bear the weight of that identifier.

The Circles Below are considered places of corruption, destruction, and violence. Stories say this dominion is home to some of the most dangerous creatures in the core realms. Most other planes have safeguards against Fallen who wish to cross from the Circles Below. Within the Mortal Realm, the use of arcane magic in acts of great evil is said to open a temporary rift between the two planes, allowing Fallen to pass through.

■ THE REALMS BEYOND

The cosmos holds many realms beyond these—the Elemental Lands, the Astral Realm, the Valley of Death, and countless others. Accessing and traversing these places from the Mortal Realm requires specialized knowledge and hard-learned skills. Still, some of the beings in the core realms guard these secrets closely and could be persuaded to share them—for a price.

MAGIC AND SPELLS

Depending on the kind of character you play, they may or may not have the ability to use magic. Magic in Daggerheart is both very powerful and incredibly dangerous, permeating the land and manifesting within the people. It is both a force within you that can aid you throughout your journey and a force outside of you that affects the world.

If your character does have the power of spellcasting, you'll use magic through specific weapons, spells, and other means. As characters grow, the magic they can perform grows with them. Each level, you gain cards that describe the new, powerful magic they can wield and the specific parameters for using it.

FLAVORING YOUR GAME

If the default portrayal of your character's mechanical effects doesn't fit them and their style, you can always describe them in a way that does. This is often called "flavoring." However, unless your table agrees, that flavor shouldn't offer any mechanical effect beyond the effect's existing description.

For instance, you might say that your rogue's magic takes the form of gadgets and inventions, instead of magically creating a dark cloud, they drop a smoke grenade. Or perhaps your ranger's magic takes the form of ancestral spirits who draw forth the forces of nature. Perhaps magic works in an entirely different way in your lore, and you explain how every class's power emerges from a different source. As long as it abides by the mechanics of the game, you're encouraged to flavor your magic to suit your character.

You can reflavor items, as well. Your character might have a unique weapon from their heritage, but it uses the statistics of a longsword. Your wizard's armor might come in the form of a set of empowered runes instead of chainmail, but they still have Armor Slots you can spend to reduce damage. In this case, "repairing" your armor during a rest could mean replenishing the enchantment. The "Adjusting Abilities and Spells" section of this chapter suggests other ways you can tailor your spells and abilities to fit your character and comfort level.

CHARACTER CREATION

Unless you're the GM, the first step of Daggerheart is to create your character. In addition to choosing their class, community, and ancestry, you're also responsible for crafting their physical appearance, personality, and prior experience, as well as their relationships with the other characters. Some of these decisions are purely narrative, meaning they only appear in the game through your roleplaying, but others are mechanical choices that affect the actions you're more (or less) likely to succeed at when rolling your dice.

GETTING STARTED

Before you create your character, discuss the campaign with your table and begin brainstorming ideas.

> **Tip:** *There are many mechanics mentioned in the Character Creation section that will be fully covered in chapter 2.*

◼ HAVE A SESSION ZERO

If you're preparing to start a new campaign with your group, we recommend that you use your first session together to build characters and talk about the world you'll be playing in. This is often called a session zero (see the "Session Zero and Safety Tools" section on page 169) and is the best way to ensure that everyone is on the same page about the tone and feel of the campaign so you can create characters who work well together.

◼ THINK ABOUT CHARACTER CONCEPTS

Before you begin the character-building process, it can be helpful to review the materials and formulate an idea for what type of character you want to play. Your concept can be surface-level and general—such as "a circus performer who uses magic" or "a captain who lost their ship at sea"—but having even a basic starting point will help you make choices as you move through each of the following step.

STEP 1:
CHOOSE YOUR CLASS

The first step of character creation is to choose the **class** you want to play. Each class is a role-based archetype that determines what abilities you have access to throughout the campaign. For example, you might choose to play a guardian if you want to be the "tank" of your group who runs into fights headfirst and protects others with their own life. You might choose to be a wizard if you want to cast unique spells to solve problems, heal party members, and wield cunning battle magic.

Once you've chosen a class, you'll also choose a **subclass**. The subclasses are subsets of each class that further define your character's archetype.

CLASS OPTIONS

The following classes and subclasses are available in the core rulebook:

BARD

Subclasses: *Troubadour or Wordsmith*

Play the Troubadour if you want to play music to bolster your allies.

Play the Wordsmith if you want to use clever wordplay and captivate crowds.

DRUID

Subclasses: *Warden of the Elements or Warden of Renewal*

Play the Warden of the Elements if you want to embody the natural elements of the wild.

Play the Warden of Renewal if you want to use powerful magic to heal your party.

GUARDIAN

Subclasses: *Stalwart or Vengeance*
Play the Stalwart if you want to take heavy blows and keep fighting.

Play the Vengeance if you want to strike down enemies who harm you or your allies.

RANGER

**Subclasses:** *Beastbound or Wayfinder*

Play the Beastbound if you want to form a deep bond with an animal ally.

Play the Wayfinder if you want to hunt your prey and strike with deadly force.

ROGUE

**Subclasses:** *Nightwalker or Syndicate*

Play the Nightwalker
if you want to manipulate shadows to maneuver through the environment.

Play the Syndicate
if you want to have a web of contacts everywhere you go.

SERAPH

Subclasses: *Divine Wielder or Winged Sentinel*

Play the Winged Sentinel
if you want to take flight and strike crushing blows from the sky.

Play the Divine Wielder
if you want to dominate the battlefield with a legendary weapon.

SORCERER

Subclasses: *Elemental Origin or Primal Origin*

Play the Elemental Origin
if you want to channel the raw power of a particular element.

Play the Primal Origin
if you want to extend the versatility of your spells in powerful ways.

WARRIOR

Subclasses: *Call of the Brave or Call of the Slayer*

Play the Call of the Brave
if you want to use the might of your enemies to fuel your own power.

Play the Call of the Slayer
if you want to strike down adversaries with immense force.

WIZARD

Subclasses: *School of Knowledge or School of War*

Play the School of Knowledge
if you want a keen understanding of the world around you.

Play the School of War
if you want to utilize trained magic for violence.

You can learn more about these classes in the upcoming "Class" section.

■ CHARACTER SHEET, CHARACTER GUIDE, AND SUBCLASS CARD

Once you've chosen your class, grab the corresponding character sheet and character guide, then decide on a subclass and take that subclass's foundation card. The character sheet is for recording your character's details, so make sure you have paper or digital copies available. If you're filling out a hard copy, use a pencil, as you'll change details on the sheet as your character levels up. You can find a completed character sheet in the upcoming "Example Character" section.

Customized character sheets and character guides are available for download at www.daggerheart.com. A general character sheet is also available in the appendix.

■ RECORD YOUR LEVEL

Characters in Daggerheart start at level 1. Record your level in the appropriate section at the top of your character sheet, and make sure to change it every time you level up. We recommend starting your campaign at level 1, but a more experienced table can start at a higher level if the GM and players prefer.

■ RECORD CHARACTER DETAILS

At any point in the character creation process, feel free to fill out your character's name and pronouns on the top line, as well as the Character Description details on the character guide. For some people, their character's name and appearance come first, and for others, it takes time to discover what's right. As long as you have a name and description by the time your table is finished with character creation, it doesn't matter what order you complete these steps in.

■ CLASS FEATURE

Every class begins with a unique **class feature** (or several). You don't have to write these features down—they're provided at the bottom left of each class's character sheet. These are features available only to your class. If your class feature asks you to make a selection during character creation, make it before your first session.

STEP 2:
CHOOSE YOUR HERITAGE

Next, choose your character's **heritage**. This aspect of your character includes two elements—their ancestry and their community.

■ CHOOSE YOUR ANCESTRY

A character's **ancestry** reflects their lineage, impacting their physicality and granting them two unique features. Take the card for one of the following ancestries, then write its name in the Heritage field of your character sheet:

Clank	Firbolg	Human
Drakona	Fungril	Infernis
Dwarf	Galapa	Katari
Elf	Giant	Orc
Faerie	Goblin	Ribbet
Faun	Halfling	Simiah

You can learn more about these ancestries in the upcoming "Ancestry" section.

■ CHOOSE YOUR COMMUNITY

Next, you'll choose a **community** from the available community cards. Your character's community is influenced by its physical location, values, and goals. It informs the culture your character grew up in and might play a part in the way they look, act, or approach situations. Each community comes with a feature that you can utilize during the game. Take the card for one of the following communities, then write its name in the Heritage field of your character sheet:

Highborne	Ridgeborne	Underborne
Loreborne	Seaborne	Wanderborne
Orderborne	Slyborne	Wildborne

You can learn more about these communities in the upcoming "Community" section.

LANGUAGES

In Daggerheart, you're not asked to pick specific languages for your character. This game assumes that everyone speaks a common language (it's up to you whether that's through mundane or magical means) and that sign language is widely understood across cultures and communities. If you'd like to have specific regional languages in your campaign, discuss options with your table.

STEP 3:
ASSIGN CHARACTER TRAITS

Next, you'll assign values to the **character traits** on your character sheet. These values reflect your natural or trained ability in each of the core six stats: Agility, Strength, Finesse, Instinct, Presence, and Knowledge. Each trait lists verbs (such as Sprint, Leap, and Maneuver) that show the types of actions a character might perform that involve that trait. These examples are just inspiration—they shouldn't limit how each trait can be used.

AGILITY: Sprint, Leap, Maneuver

A high Agility means you're fast on your feet, nimble on difficult terrain, and quick to react to danger. You'll make an Agility Roll to scurry up a rope, sprint to cover, or bound from rooftop to rooftop.

STRENGTH: Lift, Smash, Grapple

A high Strength means you're better at feats that test your physical prowess and stamina. You'll make a Strength Roll to break through a door, lift heavy objects, or hold your ground against a charging foe.

FINESSE: Control, Hide, Tinker

A high Finesse means you're skilled at tasks that require accuracy, stealth, or the utmost control. You'll make a Finesse Roll to use fine tools, escape notice, or strike with precision.

INSTINCT: Perceive, Sense, Navigate

A high Instinct means you have a keen sense of your surroundings and a natural intuition. You'll make an Instinct Roll to sense danger, notice details in the world around you, or track an elusive foe.

PRESENCE: Charm, Perform, Deceive

A high Presence means you have a strong force of personality and a facility for social situations. You'll make a Presence Roll to plead your case, intimidate a foe, or capture the attention of a crowd.

KNOWLEDGE: Recall, Analyze, Comprehend

A high Knowledge means you know information others don't and understand how to apply your mind through deduction and inference. You'll make a Knowledge Roll to interpret facts, see the patterns clearly, or remember important information.

◼ DISTRIBUTE TRAIT MODIFIERS

Trait **modifiers** are the values associated with each trait. When you make an action roll using one of these traits, that trait's modifier is added to the roll to determine the final result (or subtracted from the roll for a negative modifier).

Distribute the following starting modifiers across your character's traits in any order you wish:
+2, +1, +1, 0, 0, −1.

When distributing these modifiers, consider what actions you want your character to be good at, what weapon you want to use for your attacks, and what kind of spellcasting you'll be doing, if any. Weapons and spells are covered in future sections, but the character guide for your class offers suggested placement for your modifiers if you want a starting point. You can also rearrange your modifiers as needed during character creation, as well as after your first few sessions of play.

If you ever need to refer to your trait modifiers as values (if a card or effect references your Agility, Presence, etc.) a +2 would be considered 2, and a −1 would still be considered −1. For example, if a domain card tells you to place a number of tokens equal to your character's Knowledge on that card, and their Knowledge is +3, you would place 3 tokens on the card. If they have a negative modifier in that trait, you instead would place no tokens on the card (unless otherwise noted).
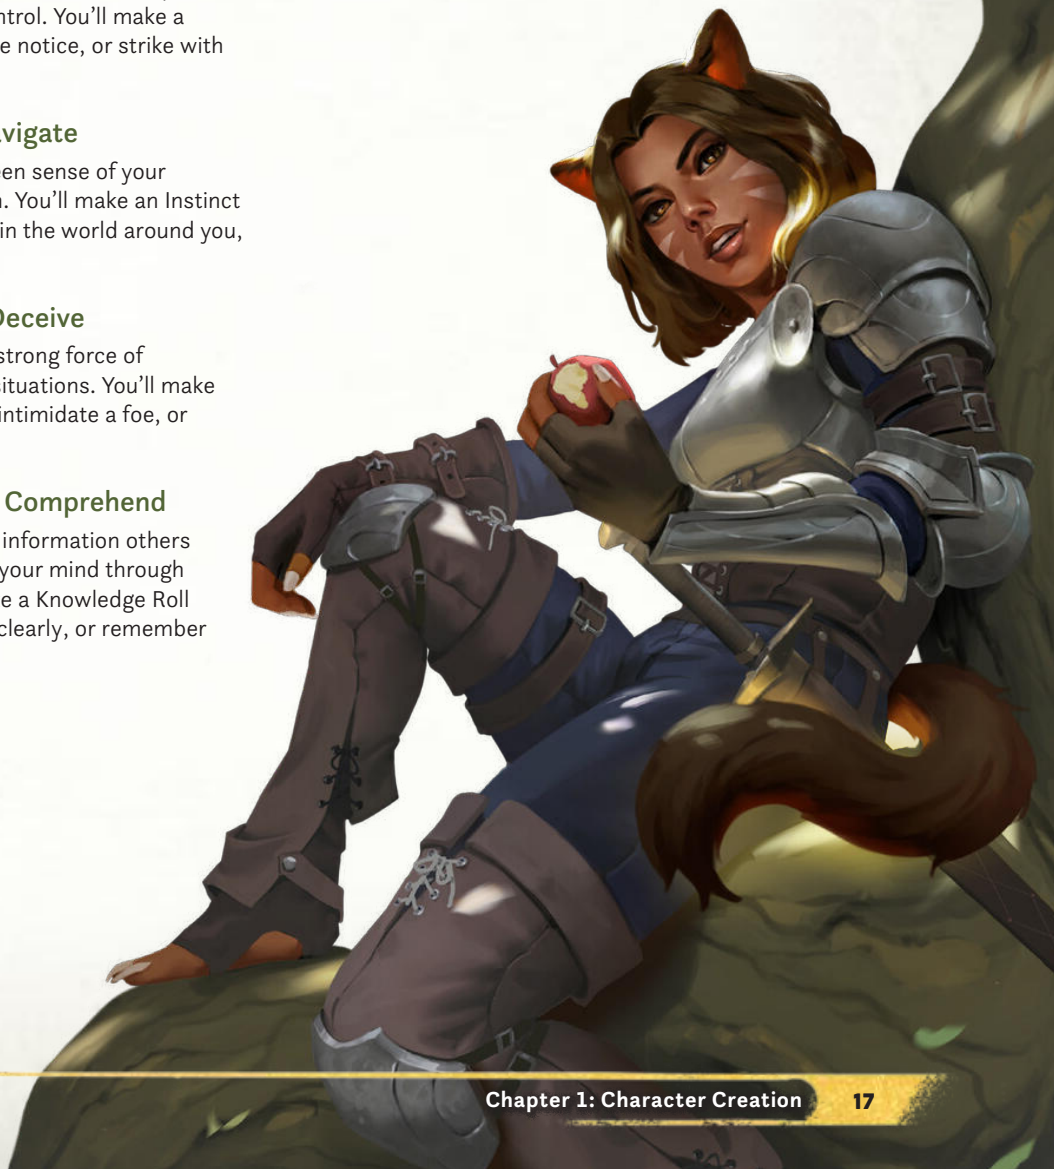

STEP 4:
RECORD ADDITIONAL CHARACTER INFORMATION

It's time to take a quick break from making choices and instead fill out a few sections of your character sheet.

■ EVASION

Your character's **Evasion** reflects how hard it is for adversaries to hit them. Your class's starting Evasion appears right beneath the Evasion field on your character sheet; copy this number into the Evasion field. When an adversary makes an attack against your character, the GM rolls against their Evasion to see if the adversary succeeds. You can choose how your character's Evasion manifests within the narrative—a wizard might avoid blows with shimmering arcane shields or bat away an adversary's spells, while a ranger nimbly dodges out of the way of attacks and a warrior parries, blocks, and dodges.

Your character's Evasion starts low, but that's because it's not their only means of avoiding damage. If they're hit, you'll also have the opportunity to reduce the incoming damage using armor.

■ HIT POINTS AND STRESS

Your character's health and well-being are represented by Hit Points and Stress. **Hit Points** (sometimes called HP) are an abstract reflection of your physical fortitude and ability to take hits from both blade and magic. Each class starts with a set number of Hit Points. **Stress** reflects your ability to withstand the pressures of dangerous situations and mental strain. Every class starts with 6 Stress.

You can describe your character's Hit Points and Stress any way you wish, but they generally represent your character's ability to get knocked down and keep coming back. You'll mark your character's Hit Points and Stress when these situations arise—and the fewer marks you have, the better.

■ HOPE AND FEAR

Hope and **Fear** are currencies used by the players and the GM to represent the way fate turns for or against the characters during the game. You start with 2 Hope; mark these in the Hope field of your character sheet.

Any time you **roll with Hope** on your Duality Dice—meaning your Hope Die rolled higher than your Fear Die—you gain a Hope (to a maximum of 6). During the game, you can spend Hope to help your character's allies, apply their life experiences to challenges, and empower their spells and abilities.

If you instead **roll with Fear** on your Duality Dice—meaning your Fear Die rolled higher than your Hope Die—the GM gains a Fear that they can spend on certain effects. Sometimes a Fear roll introduces other complications into a scene (even if you succeed on your roll).

STEP 5:
CHOOSE YOUR STARTING EQUIPMENT

Next, you'll choose starting weapons, armor, and other items for your character.

■ CHOOSE YOUR WEAPONS

You use **physical weapons** to attack your foes—and if you have a Spellcast trait (such as from your subclass), you can also wield **magic weapons**. At character creation, you can choose either a two-handed **primary weapon**, or a one-handed primary weapon and a one-handed **secondary weapon**, then equip them.

You can find weapon suggestions at the top of your character guide, but if you'd like to choose your own, you can find all starting (Tier 1) weapons in the "Primary Weapon Tables" and "Secondary Weapon Tables" sections in chapter 2. (These are also available as a separate sheet to print out from the Daggerheart website or in the appendix.)

At Level 1, your **Proficiency** is 1. This means you'll roll one damage die for your weapon attacks. In the Active Weapons area of your character sheet, this is recorded in the Proficiency field.

> **Tip:** *In the area of your character labeled Damage Dice & Type, record your damage dice with the Proficiency value already written in (like "1d6+3" instead of "d6+3"), to remind yourself how many weapon dice to roll. Whenever you increase your Proficiency, you also increase the number of dice in the damage dice field to reflect this change. For example, when your Proficiency becomes 2, you would change it to "2d6+3" instead.*

■ CHOOSE YOUR ARMOR

You use **armor** to reduce the severity of incoming attacks. At character creation, you can choose one set of armor and equip it. You can find armor suggestions at the top of your character guide, but if you'd like to choose your own, you can find all starting (Tier 1) armor in the "Armor Tables" section in chapter 2. (These are also available as a separate sheet to print out from the Daggerheart website or in the appendix.) When your character equips armor, record its details in the Active Armor fields of your character sheet.

An armor's **damage thresholds** (shown in the "Base Thresholds" column) indicate how much damage a character can endure before marking Hit Points. Add your character's level to both values and record the total for both numbers in the corresponding fields. In the "Hit Points and Damage Thresholds" section of chapter 2, you'll learn how many Hit Points to mark on your character sheet each time your character takes damage.

Then, in the Armor field at the top left of your character sheet, record your **Armor Score**. This score includes the armor's base value (shown in the "Base Score" column) plus any permanent bonuses your character has to their Armor Score from other abilities. When your character takes damage, you can mark one of the small shield symbols next to your Armor Score (called an **Armor Slot**), then reduce the severity of the damage by one threshold: Severe to Major, Major to Minor, or Minor to None. You can only mark one Armor Slot per attack, and you have a number of slots equal to your Armor Score.

◼ CHOOSE OTHER STARTING ITEMS

Your **inventory** includes anything else your character is carrying. The top of your character guide lists all their starting inventory items, which include the following:

- Torch (useful for illuminating a dark room)
- 50 feet of rope (useful for climbing a wall or rappelling down a cliff)
- Basic supplies (tent, bedroll, tinderbox, rations, etc.)
- A handful of gold (record this in the Gold field in the left-hand column of your character sheet)
- Your choice of a Minor Health Potion (clear 1d4 Hit Points) or a Minor Stamina Potion (clear 1d4 Stress)
- The "and either" option on your character guide is specific to your class. You might also be asked to choose what you use to carry your spells.

Record these items in the Inventory fields of your character sheet. This equipment is available to use during the party's adventures in any way that fits the shared story. We encourage you to use items creatively, as long as the GM agrees and it fits the rules of the world.

You can also talk to your GM about other items you'd like to have at the start of the game. There are no rules limiting the size of your inventory, so items that don't provide a mechanical benefit but make sense for your character to have are normally okay—but your GM always makes the final call.

STEP 6:
CREATE YOUR BACKGROUND

Next, explore your character's **background** by answering the background questions in your character guide. Several prompts are provided to jumpstart inspiration, but you or the GM can modify or replace these questions to fit the character you're looking to play. The prompts are a jumping-off point if you don't know where to start, but they should never inhibit your creativity.

The decisions you make about your character's background are purely narrative, but they deeply impact the character you're playing and the story the GM is preparing for your adventures. Over the course of character creation, feel free to adjust mechanical choices you made in earlier steps to better reflect this background as you shape your character.

If you're planning to play in a campaign, you can continue developing your character after the background questions in whatever way works best for you. Just remember to give the GM your backstory so they can work any people, places, or ideas from it into the campaign. You can also choose not to do any more background work, instead finding out more about your character as you play. Lean into a process that's fun for you.

STEP 7:
CREATE YOUR EXPERIENCES

In Daggerheart, your character's Experiences are one of the core ways you express their backstory and expertise through mechanics. An **Experience** is a word or phrase used to encapsulate a specific set of skills your character has acquired over the course of their exciting life.

Your character starts with two Experiences at character creation (each with a +2 modifier), and they'll earn more throughout your adventures. Before creating Experiences, you'll want to have a solid idea of who your character is; the background questions are especially helpful for this. When you're ready, work with your GM to create two Experiences that have shaped your character.

There's no set list of Experiences to choose from (though we offer options for inspiration under "Experience Examples"). Instead, find a word or phrase that embodies something distinctive about your character. Each Experience should be specific. For example, Talented or Focused are too broad, as they can be applied to almost any situation; instead you might use Swashbuckler or Magic Studies. Additionally, your character's Experience can't give them spells or specific game abilities. For example, Take Flight or One-Hit Kill are too mechanically oriented; you might consider Pilot or Assassin instead.

You are also encouraged to add flavor to your character's Experience to give it more varied use in play. For example, instead of just Assassin, you could choose Assassin of the Sapphire Syndicate. Details like this give your GM an exciting faction to weave into the campaign, and also make it easier to use this Experience outside combat. For example, if your character encounters an ally of the syndicate, they might be particularly adept at negotiating with that NPC based on their Experience.

Once you've decided on your character's two starting Experiences, record them in the Experience fields of your character sheet and assign +2 to both.

> **Tip:** *If you're not sure what Experiences to take, consider the style of the campaign you're playing in and the actions you'll want to perform. In a standard, battle-focused campaign, it's never a bad idea to take your character's first Experience in something that will help with combat and the second Experience in something useful outside of combat.*

EXPERIENCE EXAMPLES

Backgrounds: *Assassin, Blacksmith, Bodyguard, Bounty Hunter, Chef to the Royal Family, Circus Performer, Con Artist, Fallen Monarch, Field Medic, High Priestess, Merchant, Noble, Pirate, Politician, Runaway, Scholar, Sellsword, Soldier, Storyteller, Thief, World Traveler*

Characteristics: *Affable, Battle-Hardened, Bookworm, Charming, Cowardly, Friend to All, Helpful, Intimidating Presence, Leader, Lone Wolf, Loyal, Observant, Prankster, Silver Tongue, Sticky Fingers, Stubborn to a Fault, Survivor, Young and Naive*

Specialties: *Acrobat, Gambler, Healer, Inventor, Magical Historian, Mapmaker, Master of Disguise, Navigator, Sharpshooter, Survivalist, Swashbuckler, Tactician*

Skills: *Animal Whisperer, Barter, Deadly Aim, Fast Learner, Incredible Strength, Liar, Light Feet, Negotiator, Photographic Memory, Quick Hands, Repair, Scavenger, Tracker*

Phrases: *Catch Me If You Can, Fake It Till You Make It, First Time's the Charm, Hold the Line, I Won't Let You Down, I'll Catch You, I've Got Your Back, Knowledge Is Power, Nature's Friend, Never Again, No One Left Behind, Pick on Someone Your Own Size, The Show Must Go On, This Is Not a Negotiation, Wolf in Sheep's Clothing*

◼ USING EXPERIENCES

When one of your character's Experiences fits the situation at hand, you can use that Experience to showcase their expertise. Before you make an action or reaction roll, you can spend a Hope to add the Experience's modifier to the roll's result. Sometimes more than one of your character's Experiences is a good fit for the situation (for example, if your character is trying to sneak past a guard in the dark, your I Live in the Shadows and Stealthy Experiences would both apply). If it fits the story, you can add more than one experience modifier to a roll, spending a Hope for each.

◼ CHANGING EXPERIENCES

Your character has the opportunity to gain new Experiences as they gain levels. However, if you discover that your character has outgrown a previous Experience or it doesn't feel right anymore, you're not stuck with the ones you've already chosen. For example, you might find that your character's Stealthy Experience no longer matches the head-on way they've learned to solve problems. Or perhaps your group likes to try to solve things diplomatically first, so your character's Catch Them by Surprise Experience isn't a good fit for the table's collaborative story. That's totally okay! Work with your GM to find Experiences that better align with your storytelling goals, and with the actions your character would be good at.

STEP 8:
CHOOSE YOUR DOMAIN CARDS

Domains are the core building blocks of Daggerheart's classes. The following domains are included in this book: Arcana, Blade, Bone, Codex, Grace, Midnight, Sage, Splendor, and Valor. Each domain has a **domain deck**—a deck of cards containing abilities and spells with a central theme or focus. For details on what each domain represents and how to use your domain cards, see the upcoming "Domains" section.

Each class in Daggerheart is formed by combining two of these domains—for example, the warrior class comprises Blade and Bone, the druid comprises Arcana and Sage, and the rogue comprises Midnight and Grace. This combination is noted at the top of the character sheet for each class, and the colors and symbols are found on the subclass foundation card.

To start, look at all the level 1 cards from your class's two domains and choose two cards, returning the rest to their respective decks. You can take one from each domain or two from a single domain, whichever you prefer. These cards grant you special spells and abilities; you'll choose another card each time you level up.

> *Tip: All domain card text can also be found for reference on page 328.*

■ SHARED DOMAINS

Each class shares its domains with at least one other class. For example, Blade is shared by the guardian and the warrior, Sage is shared by the druid and the ranger, and Grace is shared by the bard and the rogue. If a fellow player's class has the same domain as yours, we encourage you to coordinate with them and choose different cards from that domain deck (even if your group has multiple copies). This way, each player feels distinct and shines when they bring their unique abilities to the story. However, if the GM and players agree, feel free to make an exception. Sharing cards is common when more than one player chooses the same class or when three (or more) players share the same domain. As always, it comes down to open communication between the players and the GM. If you need extra copies of a card, you can download and print them at home.

STEP 9:
CREATE YOUR CONNECTIONS

You've almost finished creating your character! Now it's time to forge their **connections**. These represent the relationships and personal history between your character and their fellow party members.

Once your group is comfortable with their finished (or almost-finished) PCs, summarize your characters for each other. At minimum, share their name, pronouns, character description, Experiences, and the answers to the background questions—but feel free to include any details you'd like the other players to know.

Then work together to decide how your characters are connected and how they feel about each other. The Connections section of your character guide provides inspiration—we recommend you pick at least one question to ask another player for their character to answer—but you're welcome to create new questions. You can always turn down a question or relationship suggested by another player if it's not a good fit or not a relationship you're interested in exploring. While it's great to create connections with every character, it's perfectly okay if you're not sure about some of them yet—and you can always discover your relationships through play. These connections are a starting point to build on during the game.

After the party's connections are complete, you're ready to play! The rest of this chapter contains resources to use when building your character, such as information on domains, classes, ancestries, and communities. Chapter 2 then presents the rules you'll use to play Daggerheart.

EXAMPLE CHARACTER

This section provides an example of how a finished character sheet might look. If you'd rather not go through all steps of character creation, feel free to use the details on this sheet as inspiration for your own character, changing anything you wish.

SORCERER
ARCANA & MIDNIGHT

NAME Marlowe Fairwind
PRONOUNS She/Her
HERITAGE Loreborne Elf
SUBCLASS Primal Origin

LEVEL 1

EVASION 10
Start at 10

ARMOR 3

AGILITY	STRENGTH	FINESSE	INSTINCT	PRESENCE	KNOWLEDGE
0	-1	+1	+2	+1	0
Sprint Leap Maneuver	Lift Smash Grapple	Control Hide Tinker	Perceive Sense Navigate	Charm Perform Deceive	Recall Analyze Comprehend

DAMAGE & HEALTH

Add your current level to your damage thresholds.

MINOR DAMAGE	7	MAJOR DAMAGE	14	SEVERE DAMAGE
Mark 1 HP		Mark 2 HP		Mark 3 HP

HP ☐☐☐☐☐☐ ┆☐☐☐☐☐☐┆

STRESS ☐☐☐☐☐☐ ┆☐☐☐☐☐┆

HOPE

Spend a Hope to use an experience or help an ally.

◆ | ◆ | ◆ | ◆ | ◆ | ◆

***Volatile Magic:* Spend 3 Hope** to reroll any number of your damage dice on an attack that deals magic damage.

EXPERIENCE

Royal Mage	+2
Not On My Watch	+2

GOLD

HANDFULS   BAGS   CHEST

CLASS FEATURE

ARCANE SENSE
You can sense the presence of magical people and objects within Close range.

MINOR ILLUSION
Make a **Spellcast Roll (10)**. On a success, you create a minor visual illusion no larger than yourself within Close range. This illusion is convincing to anyone at Close range or farther.

CHANNEL RAW POWER
Once per long rest, you can place a domain card from your loadout into your vault and choose to either:
• Gain Hope equal to the level of the card.
• Enhance a spell that deals damage, gaining a bonus to your damage roll equal to twice the level of the card.

SORCERER
CHARACTER GUIDE

*As a sorcerer, you were born with innate magical power,
and you've learned how to wield that power to get what you want.*

SUGGESTED TRAITS
0 Agility, −1 Strength, +1 Finesse,
+2 Instinct, +1 Presence, 0 Knowledge

SUGGESTED PRIMARY WEAPON
Dualstaff - Instinct Far - d6+3 mag - Two-Handed

SUGGESTED ARMOR
Gambeson Armor - Thresholds 5/11 - Score 3
Flexible: +1 to Evasion

INVENTORY
TAKE:
a torch, 50 feet of rope, basic supplies,
and a handful of gold

THEN CHOOSE BETWEEN:
a Minor Health Potion **OR**
a Minor Stamina Potion

AND EITHER:
a whispering orb **OR**
a family heirloom

CHARACTER DESCRIPTION
Choose one (or more) from each line,
or write your own description.

Clothes that are: always moving, flamboyant,
inconspicuous, layered, ornate, tight

Eyes like: carnations, earth, endless ocean, fire,
ivy, lilacs, night, seafoam, winter

Body that's: broad, carved, curvy, lanky, rotund,
short, stocky, tall, thin, tiny, toned

Skin the color of: ashes, clover, falling snow,
fine sand, obsidian, rose, sapphire, wisteria

Attitude like: a celebrity, a commander
a politician, a prankster, a wolf in sheep's clothing

BACKGROUND QUESTIONS

*Answer any of the following background questions.
You can also create your own questions.*

What did you do that made the people in your community wary of you?
I tried to harness raw magic before I knew what I was doing and I
destroyed a farm, ruining the harvest for that year. After that, I was
treated as an outcast.

**What mentor taught you to control your untamed magic, and
why are they no longer able to guide you?**
Yarrow, a great mage who served on behalf of King Emeris, heard of the
destruction I caused and sought me out. He taught me to harness magic.
When he died, I became the right hand to the king instead. I miss him.

**You have a deep fear you hide from everyone.
What is it, and why does it scare you?**
On his deathbed, Yarrow said I was the only person who could keep King
Emeris safe from the Harrows. I don't know what they are, and everytime
I've brought it up with the king, he refuses to tell me. I am afraid that in
protecting me, he is dooming himself.

Then work with the GM to generate two starting Experiences for your character.

CONNECTIONS

*Ask your fellow players one of the following questions for
their character to answer, or create your own questions.*

Why do you trust me so deeply?
Barnacle - He trusts me because I am the closest thing he's ever had to a mother.

What did I do that makes you cautious around me?
Varian - They had a falling out with the king and are worried I might side with
Emeris over them if it comes down to it.

Why do we keep our shared past a secret?
Garrick - The king does not allow his inner circle to have personal
relationships with anybody for fear they could compromise our work.
We broke that rule many, many times.

TIER 2: LEVELS 2–4

*At level 2, gain an additional
Experience at +2 and gain a
+1 bonus to your Proficiency.*

Choose two options from the list below and
mark them.

- ☐☐☐ Gain a +1 bonus to two unmarked character traits and mark them.
- ☐☐ Permanently gain one Hit Point slot.
- ☐☐ Permanently gain one Stress slot.
- ☐ Permanently gain a +1 bonus to two Experiences.
- ☐ Choose an additional domain card of your level or lower from a domain you have access to (up to level 4).
- ☐ Permanently gain a +1 bonus to your Evasion.

Update your level and adjust your damage
thresholds accordingly. Take an additional domain
card of your level or lower from a domain you
have access to.

Daggerheart © Darrington Press 2025

TIER 3: LEVELS 5–7

*At level 5, gain an additional
Experience at +2 and clear all marks
on character traits. Then gain a
+1 bonus to your Proficiency.*

Choose two options from the list below or any from
the previous tier and mark them.

- ☐☐☐ Gain a +1 bonus to two unmarked character traits and mark them.
- ☐☐ Permanently gain one Hit Point slot.
- ☐☐ Permanently gain one Stress slot.
- ☐ Permanently gain a +1 bonus to two Experiences.
- ☐ Choose an additional domain card of your level or lower from a domain you have access to (up to level 7).
- ☐ Permanently gain a +1 bonus to your Evasion.
- ☐ Take an upgraded subclass card. Then cross out the multiclass option for this tier.
- ☐☐ Increase your Proficiency by +1.
- ☐☐ Multiclass: Choose an additional class for your character, then cross out an unused "Take an upgraded subclass card" and the other multiclass option on this sheet.

Update your level and adjust your damage
thresholds accordingly. Take an additional domain
card of your level or lower from a domain you
have access to.

TIER 4: LEVELS 8–10

*At level 8, gain an additional
Experience at +2 and clear all marks
on character traits. Then gain a
+1 bonus to your Proficiency.*

Choose two options from the list below or any from
the previous tier and mark them.

- ☐☐☐ Gain a +1 bonus to two unmarked character traits and mark them.
- ☐☐ Permanently gain one Hit Point slot.
- ☐☐ Permanently gain one Stress slot.
- ☐ Permanently gain a +1 bonus to two Experiences.
- ☐ Choose an additional domain card of your level or lower from a domain you have access to.
- ☐ Permanently gain a +1 bonus to your Evasion.
- ☐ Take an upgraded subclass card. Then cross out the multiclass option for this tier.
- ☐☐ Increase your Proficiency by +1.
- ☐☐ Multiclass: Choose an additional class for your character, then cross out an unused "Take an upgraded subclass card" and the other multiclass option on this sheet.

Update your level and adjust your damage
thresholds accordingly. Take an additional domain
card of your level or lower from a domain you
have access to.

DOMAINS

Domains are the core themes of each class. The combination of two domains forms the basis for each class's abilities and spells, which you gain from your domain cards. Near the end of character creation, you'll pick your first cards from your chosen class's domains.

ARCANA

Arcana is the domain of innate and instinctual magic. Those who choose this path tap into the raw, enigmatic forces of the realms to manipulate both their own energy and the elements. Arcana offers wielders a volatile power, but it is incredibly potent when correctly channeled.

BLADE

Blade is the domain of weapon mastery. Whether by steel, bow, or perhaps a more specialized arm, those who follow this path have the skill to cut short the lives of others. Wielders of Blade dedicate themselves to achieving inexorable power over death.

BONE

Bone is the domain of tactics and the body. Practitioners of this domain have an uncanny control over their own physical abilities and an eye for predicting the behaviors of others in combat. Adherents to Bone gain an unparalleled understanding of bodies and their movements.

CODEX

Codex is the domain of intensive magical study. Those who seek magical knowledge turn to the equations of power recorded in books, written on scrolls, etched into walls, or tattooed on bodies. Codex offers a commanding and versatile understanding of magic to devotees who pursue knowledge beyond the boundaries of common wisdom.

GRACE

Grace is the domain of charisma. Through rapturous storytelling, charming spells, or a shroud of lies, those who channel this power define the realities of their adversaries, bending perception to their will. Grace offers its wielders raw magnetism and mastery over language.

MIDNIGHT

Midnight is the domain of shadows and secrecy. Whether by clever tricks, deft magic, or the cloak of night, those who channel these forces practice the art of obscurity and can uncover sequestered treasures. Midnight offers practitioners the power to control and create enigmas.

SAGE

Sage is the domain of the natural world. Those who walk this path tap into the unfettered power of the earth and its creatures to unleash raw magic. Sage grants its adherents the vitality of a blooming flower and the ferocity of a ravenous predator.

SPLENDOR

Splendor is the domain of life. Through this magic, followers gain the ability to heal and, to an extent, control death. Splendor offers its disciples the magnificent ability to both give and end life.

VALOR

Valor is the domain of protection. Whether through attack or defense, those who choose this discipline channel formidable strength to protect their allies in battle. Valor offers great power to those who raise their shields in defense of others.

READING DOMAIN CARDS

During character creation and as your character levels up, you'll gain increasingly powerful **domain cards**, which provide features you can utilize during your adventures.

Some domain cards provide moves you can make, such as a unique attack or a spell. Others offer passive effects (which always apply while you hold that card), new abilities to use during downtime or social encounters, or even one-time benefits.

Each domain card includes five elements:

1. **Level:** The number in the top left of the card indicates the card's level. You can only choose domain cards of your level or lower.

2. **Domain:** Beneath the card's level there is a symbol indicating its domain. You can only choose cards from your class's domains.

3. **Recall Cost:** The number and lightning bolt in the top right of the card shows its Recall Cost. This doesn't affect you at character creation, but once you reach level 5, you'll have more cards than space in your loadout (your set of five active cards; see the "Loadout and Vault" section on page 101). You can normally only move an inactive card from your vault to your loadout during downtime, but you can mark a number of Stress equal to a card's Recall Cost to swap it immediately.

4. **Type:** The card's type is listed in the center above the title. There are three types of domain cards: abilities, spells, and grimoires. **Abilities** are typically mundane in nature, while **spells** are magical. **Grimoires** are unique to the Codex domain and are a collection of smaller spells bundled together. Some game mechanics only apply to certain types of cards.

5. **Feature:** The text on the bottom half of the card describes its feature, including any special rules you need to follow when you use that card.

1 — **1**

4

3 — **0⚡**

SPELL

RUNE WARD

You have a deeply personal trinket that can be infused with protective magic and held as a ward by you or an ally. Describe what it is and why it's important to you. The ward's holder can spend a Hope to reduce incoming damage by **1d8**.

If the Ward Die result is 8, the ward's power ends after it reduces damage this turn. It can be recharged for free on your next rest.

CLASS

This section details each of Daggerheart's classes. Your chosen class grants the following:

Domains: Each class lists the two domains that serve as the basis for its abilities. You can choose cards from these domain decks during character creation and when leveling up.

Starting Evasion: Each class has its own starting Evasion.

Starting Hit Points: Each class has its own amount of starting Hit Points.

Class Items: Each class has a unique set of starter items.

Class Feature: Each class has a unique class feature (or set of features).

Class Hope Feature: Each class has a special move they can make by spending 3 Hope.

Your chosen **subclass** grants the following:

Spellcast Trait: If you're a spellcaster, this is the character trait your subclass uses any time you make a Spellcast Roll.

Foundation Feature: The foundation feature is the unique starting feature that establishes the identity and strengths of the subclass.

Specialization Feature: The specialization feature is a more advanced feature (or set of features) you can gain when you level up. For some subclasses, the specialization feature is a new ability; for others, it expands the abilities of the class or foundation feature, making it even more potent.

Mastery Feature: The mastery feature is your subclass's most powerful feature, which you can gain at higher levels. For some subclasses, the mastery feature unlocks an extraordinary new ability; for others, it's the impressive culmination of their subclass's core feature.

The foundation, specialization, and mastery features each come with a card that you can choose to take as one of the benefits from leveling up. The cards hold information about the feature for quick reference.

The following class sections refer to many mechanics and terms that will be taught throughout chapter 2. Use the index to navigate to these concepts as needed.
BARD

Bards are the most charismatic people in all the realms. Members of this class are masters of captivation and specialize in a variety of performance types, including singing, playing musical instruments, weaving tales, or telling jokes. Whether performing for an audience or speaking to an individual, bards thrive in social situations. Members of this profession bond and train at schools or guilds, but a current of egotism runs through those of the bardic persuasion. While they may be the most likely class to bring people together, a bard of ill temper can just as easily tear a party apart.

DOMAINS

Grace and Codex

STARTING EVASION SCORE

10

STARTING HIT POINTS

5

CLASS ITEMS

A romance novel or a letter never opened

BARD'S HOPE FEATURE

Make a Scene: **Spend 3 Hope** to temporarily *Distract* a target within Close range, giving them a -2 penalty to their Difficulty.

CLASS FEATURE

Rally

Once per session, describe how you rally the party and give yourself and each of your allies a Rally Die. At level 1, your Rally Die is a **d6**. A PC can spend their Rally Die to roll it, adding the result to their action roll, reaction roll, damage roll, or to clear a number of Stress equal to the result. At the end of each session, clear all unspent Rally Dice.

At level 5, your Rally Die increases to a **d8**.

BARD SUBCLASSES

Choose either the Troubadour or Wordsmith subclass.

TROUBADOUR

Play the Troubadour if you want to play music to bolster your allies.

■ **SPELLCAST TRAIT**

Presence

■ **FOUNDATION FEATURE**

Gifted Performer: Describe how you perform for others. You can play each song once per long rest:

- **Relaxing Song:** You and all allies within Close range clear a Hit Point.
- **Epic Song:** Make a target within Close range temporarily *Vulnerable*.
- **Heartbreaking Song:** You and all allies within Close range gain a Hope.

■ **SPECIALIZATION FEATURE**

Maestro: Your rallying songs steel the courage of those who listen. When you give a Rally Die to an ally, they can gain a Hope or clear a Stress.

■ **MASTERY FEATURE**

Virtuoso: You are among the greatest of your craft and your skill is boundless. You can perform each of your "Gifted Performer" feature's songs twice instead of once per long rest.

WORDSMITH

Play the Wordsmith if you want to use clever wordplay and captivate crowds.

■ SPELLCAST TRAIT

Presence

■ FOUNDATION FEATURES

Rousing Speech: Once per long rest, you can give a heartfelt, inspiring speech. All allies within Far range clear 2 Stress.

Heart of a Poet: After you make an action roll to impress, persuade, or offend someone, you can **spend a Hope** to add a **d4** to the roll.

■ SPECIALIZATION FEATURE

Eloquent: Your moving words boost morale. Once per session, when you encourage an ally, you can do one of the following:

- Allow them to find a mundane object or tool they need.
- Help an Ally without spending Hope.
- Give them an additional downtime move during their next rest.

■ MASTERY FEATURE

Epic Poetry: Your Rally Die increases to a **d10**. Additionally, when you Help an Ally, you can narrate the moment as if you were writing the tale of their heroism in a memoir. When you do, roll a **d10** as your advantage die.

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

- Who from your community taught you to have such confidence in yourself?
- You were in love once. Who did you adore, and how did they hurt you?
- You've always looked up to another bard. Who are they, and why do you idolize them?

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

- What made you realize we were going to be such good friends?
- What do I do that annoys you?
- Why do you grab my hand at night?
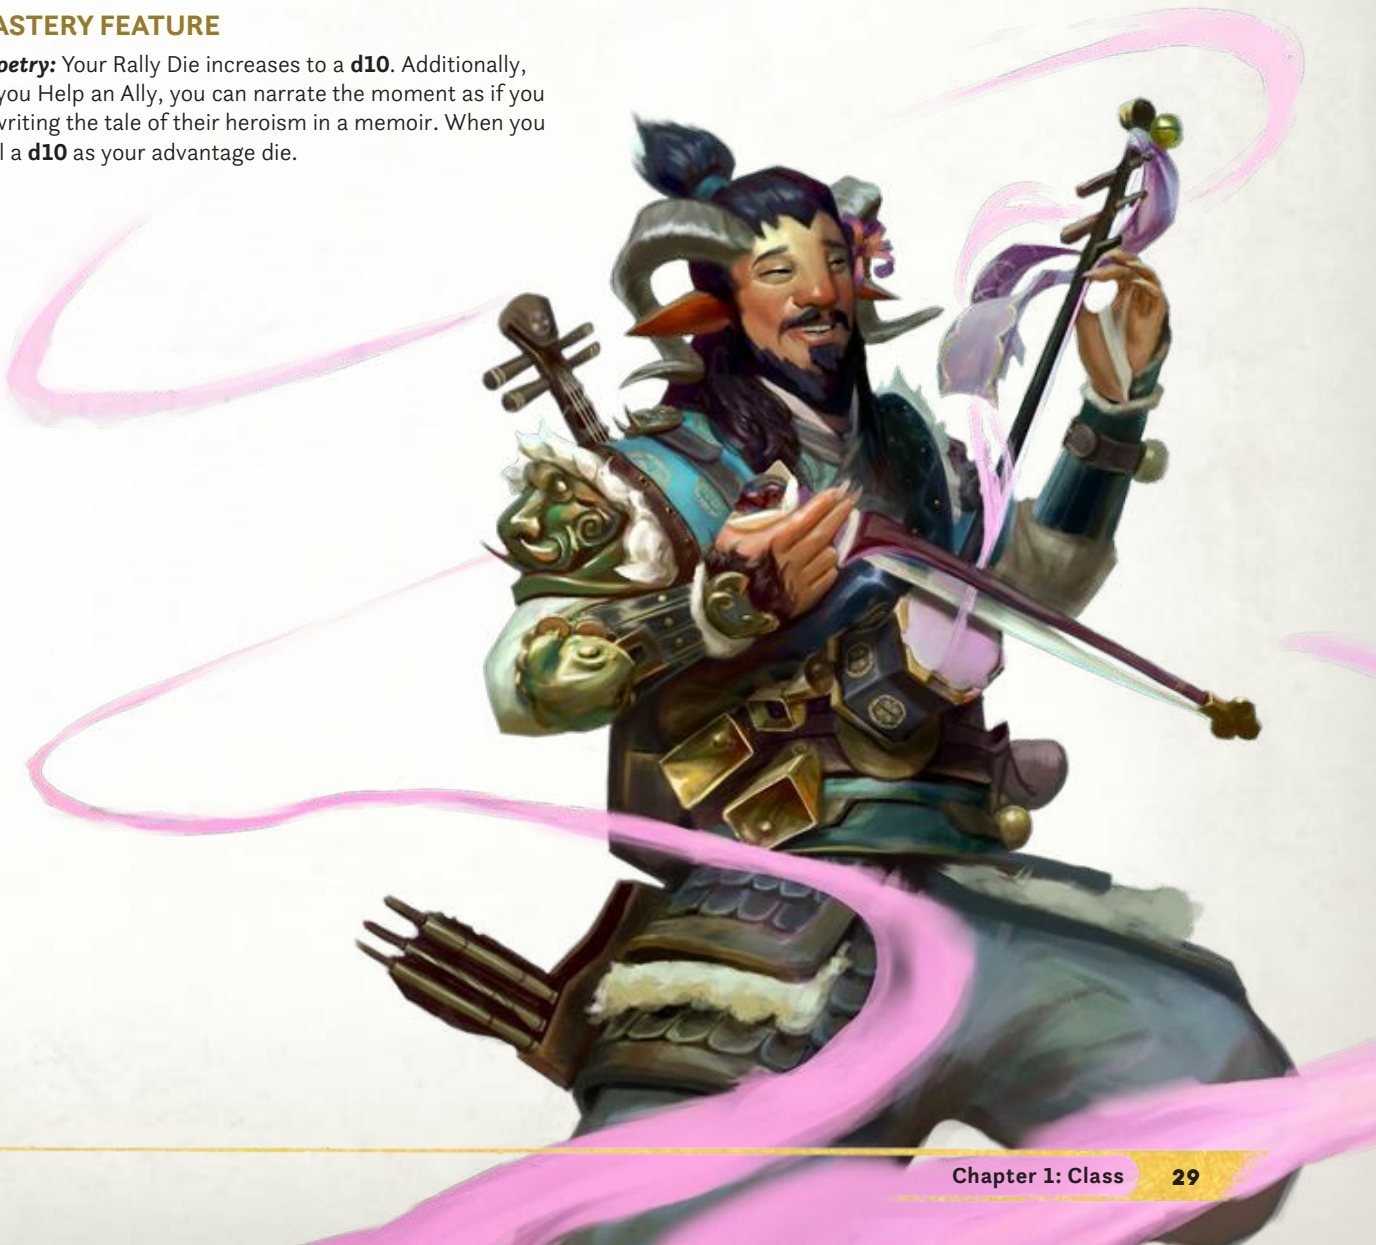

DRUID

Becoming a druid is more than an occupation; it's a calling for those who wish to learn from and protect the magic of the wilderness. While one might underestimate a gentle druid who practices the often-quiet work of cultivating flora, druids who channel the untamed forces of nature are terrifying to behold. Druids cultivate their abilities in small groups, often connected by a specific ethos or locale, but some choose to work alone. Through years of study and dedication, druids can learn to transform into beasts and shape nature itself.

DOMAINS

Sage and Arcana

STARTING EVASION

10

STARTING HIT POINTS

6

CLASS ITEMS

A small bag of rocks and bones or a strange pendant found in the dirt

DRUID'S HOPE FEATURE

Evolution: **Spend 3 Hope** to transform into a Beastform without marking a Stress. When you do, choose one trait to raise by +1 until you drop out of that Beastform.

CLASS FEATURES

Beastform

Mark a Stress to magically transform into a creature of your tier or lower from the Beastform list. You can drop out of this form at any time. While transformed, you can't use weapons or cast spells from domain cards, but you can still use other features or abilities you have access to. Spells you cast before you transform stay active and last for their normal duration, and you can talk and communicate as normal. Additionally, you gain the Beastform's features, add their Evasion bonus to your Evasion, and use the trait specified in their statistics for your attack. While you're in a Beastform, your armor becomes part of your body and you mark Armor Slots as usual; when you drop out of a Beastform, those marked Armor Slots remain marked. If you mark your last Hit Point, you automatically drop out of this form.

Wildtouch

You can perform harmless, subtle effects that involve nature—such as causing a flower to rapidly grow, summoning a slight gust of wind, or starting a campfire—at will.

DRUID SUBCLASSES

Choose either the Warden of the Elements or Warden of Renewal subclass.

WARDEN OF THE ELEMENTS

Play the Warden of the Elements if you want to embody the natural elements of the wild.

◾ SPELLCAST TRAIT

Instinct

◾ FOUNDATION FEATURE

Elemental Incarnation: Mark a Stress to *Channel* one of the following elements until you take Severe damage or until your next rest:

- **Fire:** When an adversary within Melee range deals damage to you, they take **1d10** magic damage.
- **Earth:** Gain a bonus to your damage thresholds equal to your Proficiency.
- **Water:** When you deal damage to an adversary within Melee range, all other adversaries within Very Close range must mark a Stress.
- **Air:** You can hover, gaining advantage on Agility Rolls.

◾ SPECIALIZATION FEATURE

Elemental Aura: Once per rest while *Channeling*, you can assume an aura matching your element. The aura affects targets within Close range until your *Channeling* ends.

- **Fire:** When an adversary marks 1 or more Hit Points, they must also mark a Stress.
- **Earth:** Your allies gain a +1 bonus to Strength.
- **Water:** When an adversary deals damage to you, you can **mark a Stress** to move them anywhere within Very Close range of where they are.
- **Air:** When you or an ally takes damage from an attack beyond Melee range, reduce the damage by **1d8**.

◾ MASTERY FEATURE

Elemental Dominion: You further embody your element. While *Channeling*, you gain the following benefit:

- **Fire:** You gain a +1 bonus to your Proficiency for attacks and spells that deal damage.
- **Earth:** When you would mark Hit Points, roll a **d6** per Hit Point marked. For each result of 6, reduce the number of Hit Points you mark by 1.
- **Water:** When an attack against you succeeds, you can **mark a Stress** to make the attacker temporarily *Vulnerable*.
- **Air:** You gain a +1 bonus to your Evasion and can fly.

WARDEN OF RENEWAL

Play the Warden of Renewal if you want to use powerful magic to heal your party.

■ SPELLCAST TRAIT

Instinct

■ FOUNDATION FEATURES

Clarity of Nature: Once per long rest, you can create a space of natural serenity within Close range. When you spend a few minutes resting within the space, clear Stress equal to your Instinct, distributed as you choose between you and your allies.

Regeneration: Touch a creature and **spend 3 Hope**. That creature clears **1d4** Hit Points.

■ SPECIALIZATION FEATURES

Regenerative Reach: You can target creatures within Very Close range with your "Regeneration" feature.

Warden's Protection: Once per long rest, **spend 2 Hope** to clear 2 Hit Points on **1d4** allies within Close range.

■ MASTERY FEATURE

Defender: Your animal transformation embodies a healing guardian spirit. When you're in Beastform and an ally within Close range marks 2 or more Hit Points, you can **mark a Stress** to reduce the number of Hit Points they mark by 1.

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

- Why was the community you grew up in so reliant on nature and its creatures?
- Who was the first wild animal you bonded with? Why did your bond end?
- Who has been trying to hunt you down? What do they want from you?

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

- What did you confide in me that makes me leap into danger for you every time?
- What animal do I say you remind me of?
- What affectionate nickname have you given me?

BEASTFORM OPTIONS

When you use your "Beastform" feature, choose a creature category of your tier or lower. At the GM's discretion, you can describe yourself transforming into any animal that reasonably fits into that category.

Beastform categories are divided by tier. Each entry includes the following details:

- **Creature Category:** Each category's name describes the common role or behavior of creatures in that category (such as Agile Scout). This name is followed by a few examples of animals that fit in that category (in this example, fox, mouse, and weasel).
- **Character Trait:** While transformed, you gain a bonus to the listed trait. For example, while transformed into an Agile Scout, you gain a +1 bonus to your Agility. When this form drops, you lose this bonus.
- **Attack Rolls:** When you make an attack while transformed, you use the creature's listed range, trait, and damage dice, but you use your Proficiency. For example, as an Agile Scout, you can attack a target within Melee range using your Agility. On a success, you deal d4 physical damage using your Proficiency.

- **Evasion:** While transformed, you add the creature's Evasion bonus to your normal Evasion. For example, if your Evasion is usually 8 and your Beastform says "Evasion +2," your Evasion becomes 10 while you're in that form.
- **Advantages:** Your form makes you especially suited to certain actions. When you make an action or reaction roll related to one of the verbs listed for that creature category, you gain advantage on that roll. For example, an Agile Scout gains advantage on rolls made to sneak around, search for objects or creatures, and related activities.
- **Features:** Each form includes unique features. For example, an Agile Scout excels at silent, dextrous movement—but they're also fragile, making you more likely to drop out of Beastform.

TIER 1

◼ AGILE SCOUT

(Fox, Mouse, Weasel, etc.)

Agility +1 | Evasion +2
Melee Agility d4 phy

Gain advantage on: deceive, locate, sneak

Agile: Your movement is silent, and you can **spend a Hope** to move up to Far range without rolling.

Fragile: When you take Major or greater damage, you drop out of Beastform.

◼ HOUSEHOLD FRIEND

(Cat, Dog, Rabbit, etc.)

Instinct +1 | Evasion +2
Melee Instinct d6 phy

Gain advantage on: climb, locate, protect

Companion: When you Help an Ally, you can roll a **d8** as your advantage die.

Fragile: When you take Major or greater damage, you drop out of Beastform.

◼ NIMBLE GRAZER

(Deer, Gazelle, Goat, etc.)

Agility +1 | Evasion +3
Melee Agility d6 phy

Gain advantage on: leap, sneak, sprint

Elusive Prey: When an attack roll against you would succeed, you can **mark a Stress** and roll a **d4**. Add the result to your Evasion against this attack.

Fragile: When you take Major or greater damage, you drop out of Beastform.

◼ PACK PREDATOR

(Coyote, Hyena, Wolf, etc.)

Strength +2 | Evasion +1
Melee Strength d8+2 phy

Gain advantage on: attack, sprint, track

Hobbling Strike: When you succeed on an attack against a target within Melee range, you can **mark a Stress** to make the target temporarily *Vulnerable*.

Pack Hunting: When you succeed on an attack against the same target as an ally who acts immediately before you, add a **d8** to your damage roll.

◼ AQUATIC SCOUT

(Eel, Fish, Octopus, etc.)

Agility +1 | Evasion +2
Melee Agility d4 phy

Gain advantage on: navigate, sneak, swim

Aquatic: You can breathe and move naturally underwater.

Fragile: When you take Major or greater damage, you drop out of Beastform.

◼ STALKING ARACHNID

(Tarantula, Wolf Spider, etc.)

Finesse +1 | Evasion +2
Melee Finesse d6+1 phy

Gain advantage on: attack, climb, sneak

Venomous Bite: When you succeed on an attack against a target within Melee range, the target becomes temporarily *Poisoned*. A *Poisoned* creature takes **1d10** direct physical damage each time they act.

Webslinger: You can create a strong web material useful for both adventuring and battle. The web is resilient enough to support one creature. You can temporarily *Restrain* a target within Close range by succeeding on a Finesse Roll against them.

ARMORED SENTRY

(Armadillo, Pangolin, Turtle, etc.)

Strength +1 | Evasion +1
Melee Strength d8+2 phy

Gain advantage on: dig, locate, protect

Armored Shell: Your hardened exterior gives you resistance to physical damage. Additionally, **mark an Armor Slot** to retract into your shell. While in your shell, physical damage is reduced by a number equal to your Armor Score (after applying resistance), but you can't perform other actions without leaving this form.

Cannonball: **Mark a Stress** to allow an ally to throw or launch you at an adversary. To do so, the ally makes an attack roll using Agility or Strength (their choice) against a target within Close range. On a success, the adversary takes **d12+2** physical damage using the thrower's Proficiency. You can **spend a Hope** to target an additional adversary within Very Close range of the first. The second target takes half the damage dealt to the first target.

POWERFUL BEAST

(Bear, Bull, Moose, etc.)

Strength +1 | Evasion +3
Melee Strength d10+4 phy

Gain advantage on: navigate, protect, scare

Rampage: When you roll a 1 on a damage die, you can roll a **d10** and add the result to the damage roll. Additionally, before you make an attack roll, you can **mark a Stress** to gain a +1 bonus to your Proficiency for that attack.

Thick Hide: You gain a +2 bonus to your damage thresholds.

MIGHTY STRIDER

(Camel, Horse, Zebra, etc.)

Agility +1 | Evasion +2
Melee Agility d8+1 phy

Gain advantage on: leap, navigate, sprint

Carrier: You can carry up to two willing allies with you when you move.

Trample: **Mark a Stress** to move up to Close range in a straight line and make an attack against all targets within Melee range of the line. Targets you succeed against take **d8+1** physical damage using your Proficiency and are temporarily *Vulnerable*.

STRIKING SERPENT

(Cobra, Rattlesnake, Viper, etc.)

Finesse +1 | Evasion +2
Very Close Finesse d8+4 phy

Gain advantage on: climb, deceive, sprint

Venomous Strike: Make an attack against any number of targets within Very Close range. On a success, a target is temporarily *Poisoned*. A *Poisoned* creature takes **1d10** physical direct damage each time they act.

Warning Hiss: **Mark a Stress** to force any number of targets within Melee range to move back to Very Close range.

POUNCING PREDATOR

(Cheetah, Lion, Panther, etc.)

Instinct +1 | Evasion +3
Melee Instinct d8+6 phy

Gain advantage on: attack, climb, sneak

Fleet: **Spend a Hope** to move up to Far range without rolling.

Takedown: **Mark a Stress** to move into Melee range of a target and make an attack roll against them. On a success, you gain a +2 bonus to your Proficiency for this attack and the target must mark a Stress.

WINGED BEAST

(Hawk, Owl, Raven, etc.)

Finesse +1 | Evasion +3
Melee Finesse d4+2 phy

Gain advantage on: deceive, locate, scare

Bird's-Eye View: You can fly at will. Once per rest while you are airborne, you can ask the GM a question about the scene below you without needing to roll. The first time a character makes a roll to act on this information, they gain advantage on the roll.

Hollow Bones: You gain a –2 penalty to your damage thresholds.

TIER 3

■ GREAT PREDATOR

(Dire Wolf, Velociraptor, Sabertooth Tiger, etc.)

Strength +2 | Evasion +2
Melee Strength d12+8 phy

Gain advantage on: attack, sneak, sprint

Carrier: You can carry up to two willing allies with you when you move.

Vicious Maul: When you succeed on an attack against a target, you can **spend a Hope** to make them temporarily *Vulnerable* and gain a +1 bonus to your Proficiency for this attack.

■ MIGHTY LIZARD

(Alligator, Crocodile, Gila Monster, etc.)

Instinct +2 | Evasion +1
Melee Instinct d10+7 phy

Gain advantage on: attack, sneak, track

Physical Defense: You gain a +3 bonus to your damage thresholds.

Snapping Strike: When you succeed on an attack against a target within Melee range, you can **spend a Hope** to clamp that opponent in your jaws, making them temporarily *Restrained* and *Vulnerable*.

■ GREAT WINGED BEAST

(Giant Eagle, Falcon, etc.)

Finesse +2 | Evasion +3
Melee Finesse d8+6 phy

Gain advantage on: deceive, distract, locate

Bird's-Eye View: You can fly at will. Once per rest while you are airborne, you can ask the GM a question about the scene below you without needing to roll. The first time a character makes a roll to act on this information, they gain advantage on the roll.

Carrier: You can carry up to two willing allies with you when you move.

■ AQUATIC PREDATOR

(Dolphin, Orca, Shark, etc.)

Agility +2 | Evasion +4
Melee Agility d10+6 phy

Gain advantage on: attack, swim, track

Aquatic: You can breathe and move naturally underwater.

Vicious Maul: When you succeed on an attack against a target, you can **spend a Hope** to make them *Vulnerable* and gain a +1 bonus to your Proficiency for this attack.

■ LEGENDARY BEAST

(Upgraded Tier 1 Options)

Evolved: Pick a Tier 1 Beastform option and become a larger, more powerful version of that creature. While you're in this form, you retain all traits and features from the original form and gain the following bonuses:

- A +6 bonus to damage rolls
- A +1 bonus to the trait used by this form
- A +2 bonus to Evasion

■ LEGENDARY HYBRID

(Griffon, Sphinx, etc.)

Strength +2 | Evasion +3
Melee Strength d10+8

Hybrid Features: To transform into this creature, **mark an additional Stress**. Choose any two Beastform options from Tiers 1–2. Choose a total of four advantages and two features from those options.

■ MASSIVE BEHEMOTH

(Elephant, Mammoth, Rhinoceros, etc.)

Strength +3 | Evasion +1
Melee Strength d12+12 phy

Gain advantage on: locate, protect, scare, sprint

Carrier: You can carry up to four willing allies with you when you move.

Demolish: **Spend a Hope** to move up to Far range in a straight line and make an attack against all targets within Melee range of the line. Targets you succeed against take **d8+10** physical damage using your Proficiency and are temporarily *Vulnerable*.

Undaunted: You gain a +2 bonus to all your damage thresholds.

■ TERRIBLE LIZARD

(Brachiosaurus, Tyrannosaurus, etc.)

Strength +3 | Evasion +2
Melee Strength d12+10 phy

Gain advantage on: attack, deceive, scare, track

Devastating Strikes: When you deal Severe damage to a target within Melee range, you can **mark a Stress** to force them to mark an additional Hit Point.

Massive Stride: You can move up to Far range without rolling. You ignore rough terrain (at the GM's discretion) due to your size.

■ MYTHIC AERIAL HUNTER

(Dragon, Pterodactyl, Roc, Wyvern, etc.)

Finesse +3 | Evasion +4
Melee Finesse d10+11 phy

Gain advantage on: attack, deceive, locate, navigate

Carrier: You can carry up to three willing allies with you when you move.

Deadly Raptor: You can fly at will and move up to Far range as part of your action. When you move in a straight line into Melee range of a target from at least Close range and make an attack against that target in the same action, you can reroll all damage dice that rolled a result lower than your Proficiency.

■ EPIC AQUATIC BEAST

(Giant Squid, Whale, etc.)

Agility +3 | Evasion +3
Melee Agility d10+10 phy

Gain advantage on: locate, protect, scare, track

Ocean Master: You can breathe and move naturally underwater. When you succeed on an attack against a target within Melee range, you can temporarily *Restrain* them.

Unyielding: When you would mark an Armor Slot, roll a **d6**. On a result of 5 or higher, reduce the severity by one threshold without marking an Armor Slot.

■ MYTHIC BEAST

(Upgraded Tier 1 or Tier 2 Options)

Evolved: Pick a Tier 1 or Tier 2 Beastform option and become a larger, more powerful version of that creature. While you're in this form, you retain all traits and features from the original form and gain the the following bonuses:

- A +9 bonus to damage rolls
- A +2 bonus to the trait used by this form
- A +3 bonus to Evasion
- Your damage die increases by one size (d6 becomes d8, d8 becomes d10, etc.)

■ MYTHIC HYBRID

(Chimera, Cockatrice, Manticore, etc.)

Strength +3 | Evasion +2
Strength Melee d12+10 phy

Hybrid Features: To transform into this creature, **mark 2 additional Stress**. Choose any three Beastform options from Tiers 1–3. Choose a total of five advantages and three features from those options.

GUARDIAN

The title of guardian represents an array of martial professions, speaking more to their moral compass and unshakeable fortitude than the means by which they fight. While many guardians join groups of militants for either a country or cause, they're more likely to follow those few they truly care for, majority be damned. Guardians are known for fighting with remarkable ferocity even against overwhelming odds, defending their cohort above all else. Woe betide those who harm the ally of a guardian, as the guardian will answer this injury in kind.

DOMAINS
Valor and Blade

STARTING EVASION
9

STARTING HIT POINTS
7

CLASS ITEMS
A totem from your mentor or a secret key

GUARDIAN'S HOPE FEATURE
Frontline Tank: Spend 3 Hope to clear 2 Armor Slots.

CLASS FEATURE
Unstoppable

Once per long rest, you can become *Unstoppable*. You gain an Unstoppable Die. At level 1, your Unstoppable Die is a **d4**. Place it on your character sheet in the space provided, starting with the 1 value facing up. After you make a damage roll that deals 1 or more Hit Points to a target, increase the Unstoppable Die value by one. When the die's value would exceed its maximum value or when the scene ends, remove the die and drop out of *Unstoppable*. At level 5, your Unstoppable Die increases to a **d6**.

While *Unstoppable*, you gain the following benefits:

- You reduce the severity of physical damage by one threshold (Severe to Major, Major to Minor, Minor to None).
- You add the current value of the Unstoppable Die to your damage roll.
- You can't be *Restrained* or *Vulnerable*.

Tip: If your Unstoppable Die is a d4 and the 4 is currently facing up, you remove the die the next time you would increase it. However, if your Unstoppable Die has increased to a d6 and the 4 is currently facing up, you'll turn it to 5 the next time you would increase it. In this case, you'll remove the die after you would need to increase it higher than 6.

GUARDIAN SUBCLASSES

Choose either the Stalwart or Vengeance subclass.

STALWART

Play the Stalwart if you want to take heavy blows and keep fighting.

■ FOUNDATION FEATURES
Unwavering: Gain a permanent +1 bonus to your damage thresholds.

Iron Will: When you take physical damage, you can **mark an additional Armor Slot** to reduce the severity.

■ SPECIALIZATION FEATURES
Unrelenting: Gain a permanent +2 bonus to your damage thresholds.

Partners-in-Arms: When an ally within Very Close range takes damage, you can **mark an Armor Slot** to reduce the severity by one threshold.

■ MASTERY FEATURES
Undaunted: Gain a permanent +3 bonus to your damage thresholds.

Loyal Protector: When an ally within Close range has 2 or fewer Hit Points and would take damage, you can **mark a Stress** to sprint to their side and take the damage instead.

VENGEANCE

Play the Vengeance if you want to strike down enemies who harm you or your allies.

■ FOUNDATION FEATURES
At Ease: Gain an additional Stress slot.

Revenge: When an adversary within Melee range succeeds on an attack against you, you can **mark 2 Stress** to force the attacker to mark a Hit Point.

■ SPECIALIZATION FEATURE
Act of Reprisal: When an adversary damages an ally within Melee range, you gain a +1 bonus to your Proficiency for the next successful attack you make against that adversary.

■ MASTERY FEATURE
Nemesis: Spend 2 Hope to *Prioritize* an adversary until your next rest. When you make an attack against your *Prioritized* adversary, you can swap the results of your Hope and Fear Dice. You can only *Prioritize* one adversary at a time.

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

- Who from your community did you fail to protect, and why do you still think of them?
- You've been tasked with protecting something important and delivering it somewhere dangerous. What is it, and where does it need to go?
- You consider an aspect of yourself to be a weakness. What is it, and how has it affected you?

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

- How did I save your life the first time we met?
- What small gift did you give me that you notice I always carry with me?
- What lie have you told me about yourself that I absolutely believe?

RANGER

Rangers are highly skilled hunters who, despite their martial abilities, rarely lend their skills to an army. Through mastery of the body and a deep understanding of the wilderness, rangers become sly tacticians, pursuing their quarry with cunning and patience. Many rangers track and fight alongside an animal companion with whom they've forged a powerful spiritual bond. By honing their skills in the wild, rangers become expert trackers, as likely to ensnare their foes in a trap as they are to assail them head-on.

DOMAINS

Bone and Sage

STARTING EVASION

12

STARTING HIT POINTS

6

CLASS ITEMS

A trophy from your first kill or a seemingly broken compass

RANGER'S HOPE FEATURE

Hold Them Off: Spend 3 Hope when you succeed on an attack with a weapon to use that same roll against two additional adversaries within range of the attack.

CLASS FEATURE

Ranger's Focus

Spend a Hope and make an attack against a target. On a success, deal your attack's normal damage and temporarily make the attack's target your *Focus*. Until this feature ends or you make a different creature your *Focus*, you gain the following benefits against your *Focus*:

- You know precisely what direction they are in.
- When you deal damage to them, they must mark a Stress.
- When you fail an attack against them, you can end your Ranger's Focus feature to reroll your Duality Dice.

RANGER SUBCLASSES

Choose either the Beastbound or Wayfinder subclass.

BEASTBOUND

Play the Beastbound if you want to form a deep bond with an animal ally.

■ SPELLCAST TRAIT

Agility

■ FOUNDATION FEATURE

Companion: You have an animal companion of your choice (at the GM's discretion). They stay by your side unless you tell them otherwise.

Take the Ranger Companion sheet. When you level up your character, choose a level-up option for your companion from this sheet as well.

■ SPECIALIZATION FEATURES

Expert Training: Choose an additional level-up option for your companion.

Battle-Bonded: When an adversary attacks you while they're within your companion's Melee range, you gain a +2 bonus to your Evasion against the attack.

■ MASTERY FEATURES

Advanced Training: Choose two additional level-up options for your companion.

Loyal Friend: Once per long rest, when the damage from an attack would mark your companion's last Stress or your last Hit Point and you're within Close range of each other, you or your companion can rush to the other's side and take that damage instead.

WAYFINDER

Play the Wayfinder if you want to hunt your prey and strike with deadly force.

■ SPELLCAST TRAIT

Agility

■ FOUNDATION FEATURES

Ruthless Predator: When you make a damage roll, you can **mark a Stress** to gain a +1 bonus to your Proficiency. Additionally, when you deal Severe damage to an adversary, they must mark a Stress.

Path Forward: When you're traveling to a place you've previously visited or you carry an object that has been at the location before, you can identify the shortest, most direct path to your destination.

■ SPECIALIZATION FEATURE

Elusive Predator: When your *Focus* makes an attack against you, you gain a +2 bonus to your Evasion against the attack.

■ MASTERY FEATURE

Apex Predator: Before you make an attack roll against your *Focus*, you can **spend a Hope**. On a successful attack, you remove a Fear from the GM's Fear pool.

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

- A terrible creature hurt your community, and you've vowed to hunt them down. What are they, and what unique trail or sign do they leave behind?
- Your first kill almost killed you, too. What was it, and what part of you was never the same after that event?
- You've traveled many dangerous lands, but what is the one place you refuse to go?

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

- What friendly competition do we have?
- Why do you act differently when we're alone than when others are around?
- What threat have you asked me to watch for, and why are you worried about it?

RANGER COMPANION

When you choose the Beastbound Ranger subclass, take a companion sheet. This sheet is for tracking important information about your character's companion and can be tucked beneath the right side of your character sheet for ease of viewing.

■ STEP 1: NAME YOUR COMPANION

Work with the GM to decide what kind of animal you have as your companion. Give them a name and add a picture of them to the companion sheet.

■ STEP 2: WRITE THEIR EVASION

Fill in their Evasion, which starts at 10.

■ STEP 3: CHOOSE THEIR COMPANION EXPERIENCE

Create two Experiences for your companion based on their training and the history you have together.

Start with +2 in both Experiences. Whenever you gain a new Experience, your companion also gains one. All new Experiences start at +2.

> **Example Companion Experiences**
>
> Bold Distraction, Expert Climber, Fetch, Friendly, Guardian of the Forest, Horrifying, Intimidating, Loyal Until the End, Navigation, Nimble, Nobody Left Behind, On High Alert, Protective, Royal Companion, Scout, Service Animal, Trusted Mount, Vigilant, We Always Find Them, You Can't Hit What You Can't Find

■ STEP 4: CHOOSE THEIR ATTACK AND RECORD DAMAGE DIE

Finally, describe your companion's method of dealing damage (their standard attack) and record it in the "Attack & Damage" section. At level 1, your companion's damage die is a d6 and their range is Melee.

WORKING WITH YOUR COMPANION

The following sections will run you through the basics of working with your companion.

■ USING SPELLCAST ROLLS, HOPE, AND EXPERIENCES

Make a Spellcast Roll to connect with your companion and command them to take action. Spend a Hope to add an applicable Companion Experience to the roll. On a success with Hope, if your next action builds on their success, you gain advantage on the roll.

■ ATTACKING WITH YOUR COMPANION

When you command your companion to attack, they gain any benefits that would normally only apply to you (such as the effects of "Ranger's Focus"). On a success, their damage roll uses your Proficiency and their damage die.

■ TAKING DAMAGE AS STRESS

When your companion would take any amount of damage, they mark a Stress. When they mark their last Stress, they drop out of the scene (by hiding, fleeing, or a similar action). They remain unavailable until the start of your next long rest, where they return with 1 Stress cleared.

When you choose a downtime move that clears Stress on yourself, your companion clears an equal number of Stress.

■ LEVELING UP YOUR COMPANION

When your character levels up, choose one available option for your companion from the following list and mark it on your sheet.

Intelligent: Your companion gains a permanent +1 bonus to a Companion Experience of your choice.

Light in the Dark: Use this as an additional Hope slot your character can mark.

Creature Comfort: Once per rest, when you take time during a quiet moment to give your companion love and attention, you can gain a Hope or you can both clear a Stress.

Armored: When your companion takes damage, you can **mark one of your Armor Slots** instead of marking one of their Stress.

Vicious: Increase your companion's damage dice or range by one step (d6 to d8, Close to Far, etc.).

Resilient: Your companion gains an additional Stress slot.

Bonded: When you mark your last Hit Point, your companion rushes to your side to comfort you. Roll a number of **d6s** equal to the unmarked Stress slots they have and mark them. If any roll a 6, your companion helps you up. Clear your last Hit Point and return to the scene.

Aware: Your companion gains a permanent +2 bonus to their Evasion.

RANGER
COMPANION

COMPANION NAME

Work with the GM to decide what kind of animal you have as your companion. Give them a name and draw or attach a picture of them in the space above. Then create two Experiences for your companion based on their training and the history you have together. Finally, describe their method of dealing damage (their standard attack) and record it in the "Attack & Damage" section. Their damage starts at d6 and their range starts at Melee.

COMPANION EXPERIENCE

Start with +2 in two Experiences. Whenever you gain a new Experience, your companion also gains one. All new Experiences start at +2.

Example Companion Experiences

Bold Distraction, Expert Climber, Fetch, Friendly, Guardian of the Forest, Horrifying, Intimidating, Loyal Until the End, Navigation, Nimble, Nobody Left Behind, On High Alert, Protective, Royal Companion, Scout, Service Animal, Trusted Mount, Vigilant, We Always Find Them, You Can't Hit What You Can't Find

Make a **Spellcast Roll** to connect with your companion and command them to take action. **Spend a Hope** to add an applicable Companion Experience to the roll. On a success with Hope, if your next action builds on their success, you gain advantage on the roll.

ATTACK & DAMAGE

Standard Attack		Range	
○ **d6**	○ **d8**	○ **d10**	○ **d12**

When you command your companion to attack, they gain any benefits that would normally only apply to you (such as the effects of "Ranger's Focus"). On a success, their damage roll uses your Proficiency and their damage die.

STRESS

STRESS: ☐☐☐☐ ☐☐

When your companion would take any amount of damage, they mark a Stress. When they mark their last Stress, they drop out of the scene (by hiding, fleeing, or a similar action). They remain unavailable until the start of your next long rest, where they return with 1 Stress cleared.

When you choose a downtime move that clears Stress on yourself, your companion clears an equal number of Stress.

TRAINING

When your character levels up, choose one available option for your companion from the following list and mark it here.

☐☐☐ ***Intelligent:*** Your companion gains a permanent +1 bonus to a Companion Experience of your choice.

☐ ***Light in the Dark:*** ◇ Use this as an additional Hope slot your character can mark.

☐ ***Creature Comfort:*** Once per rest, when you take time during a quiet moment to give your companion love and attention, you can gain a Hope or you can both clear a Stress.

☐ ***Armored:*** When your companion takes damage, you can **mark one of your Armor Slots** instead of marking one of their Stress.

☐☐☐ ***Vicious:*** Increase your companion's damage dice or range by one step (d6 to d8, Close to Far, etc.).

☐☐☐ ***Resilient:*** Your companion gains an additional Stress slot.

☐ ***Bonded:*** When you mark your last Hit Point, your companion rushes to your side to comfort you. Roll a number of **d6s** equal to the unmarked Stress slots they have and mark them. If any roll a 6, your companion helps you up. Clear your last Hit Point and return to the scene.

☐☐☐ ***Aware:*** Your companion gains a permanent +2 bonus to their Evasion.

ROGUE

Rogues are scoundrels, often in both attitude and practice. Broadly known as liars and thieves, the best among this class move through the world anonymously. Utilizing their sharp wits and blades, rogues trick their foes through social manipulation as easily as breaking locks, climbing through windows, or dealing underhanded blows. These masters of magical craft manipulate shadow and movement, adding an array of useful and deadly tools to their repertoire. Rogues frequently establish guilds to meet future accomplices, hire out jobs, and hone secret skills, proving that there's honor among thieves for those who know where to look.

DOMAINS

Midnight and Grace

STARTING EVASION

12

STARTING HIT POINTS

6

CLASS ITEMS

A set of forgery tools or a grappling hook

ROGUE'S HOPE FEATURE

Rogue's Dodge: **Spend 3 Hope** to gain a +2 bonus to your Evasion until the next time an attack succeeds against you. Otherwise, this bonus lasts until your next rest.

CLASS FEATURES

Cloaked

Any time you would be *Hidden*, you are instead *Cloaked*. In addition to the benefits of the *Hidden* condition, while *Cloaked* you remain unseen if you are stationary when an adversary moves to where they would normally see you. After you make an attack or end a move within line of sight of an adversary, you are no longer *Cloaked*.

Sneak Attack

When you succeed on an attack while *Cloaked* or while an ally is within Melee range of your target, add a number of **d6s** equal to your tier to your damage roll.

Level 1 → Tier 1

Levels 2–4 → Tier 2

Levels 5–7 → Tier 3

Levels 8–10 → Tier 4

ROGUE SUBCLASSES

Choose either the Nightwalker or Syndicate subclass.

NIGHTWALKER

Play the Nightwalker if you want to manipulate shadows to maneuver through the environment.

■ SPELLCAST TRAIT

Finesse

■ FOUNDATION FEATURE

Shadow Stepper: You can move from shadow to shadow. When you move into an area of darkness or a shadow cast by another creature or object, you can **mark a Stress** to disappear from where you are and reappear inside another shadow within Far range. When you reappear, you are *Cloaked*.

■ SPECIALIZATION FEATURES

Dark Cloud: Make a **Spellcast Roll (15)**. On a success, create a temporary dark cloud that covers any area within Close range. Anyone in this cloud can't see outside of it, and anyone outside of it can't see in. You're considered *Cloaked* from any adversary for whom the cloud blocks line of sight.

Adrenaline: While you're *Vulnerable*, add your level to your damage rolls.

■ MASTERY FEATURES

Fleeting Shadow: Gain a permanent +1 bonus to your Evasion. You can use your "Shadow Stepper" feature to move within Very Far range.

Vanishing Act: **Mark a Stress** to become *Cloaked* at any time. When *Cloaked* from this feature, you automatically clear the *Restrained* condition if you have it. You remain *Cloaked* in this way until you roll with Fear or until your next rest.
SYNDICATE

Play the Syndicate if you want to have a web of contacts everywhere you go.

SPELLCAST TRAIT

Finesse

FOUNDATION FEATURE

Well-Connected: When you arrive in a prominent town or environment, you know somebody who calls this place home. Give them a name, note how you think they could be useful, and choose one fact from the following list:

- They owe me a favor, but they'll be hard to find.
- They're going to ask for something in exchange.
- They're always in a great deal of trouble.
- We used to be together. It's a long story.
- We didn't part on great terms.

SPECIALIZATION FEATURE

Contacts Everywhere: Once per session, you can briefly call on a shady contact. Choose one of the following benefits and describe what brought them here to help you in this moment:

- They provide 1 handful of gold, a unique tool, or a mundane object that the situation requires.
- On your next action roll, their help provides a +3 bonus to the result of your Hope or Fear Die.
- The next time you deal damage, they snipe from the shadows, adding **2d8** to your damage roll.

MASTERY FEATURE

Reliable Backup: You can use your "Contacts Everywhere" feature three times per session. The following options are added to the list of benefits you can choose from when you use that feature:

- When you mark 1 or more Hit Points, they can rush out to shield you, reducing the Hit Points marked by 1.
- When you make a Presence Roll in conversation, they back you up. You can roll a **d20** as your Hope Die.

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

- What did you get caught doing that got you exiled from your home community?
- You used to have a different life, but you've tried to leave it behind. Who from your past is still chasing you?
- Who from your past were you most sad to say goodbye to?

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

- What did I recently convince you to do that got us both in trouble?
- What have I discovered about your past that I hold secret from the others?
- Who do you know from my past, and how have they influenced your feelings about me?

SERAPH

Seraphs are divine fighters and healers imbued with sacred purpose. A wide array of deities exist within the realms, and thus numerous kinds of seraphs are appointed by these gods. Their ethos traditionally aligns with the domain or goals of their god, such as defending the weak, exacting vengeance, protecting a land or artifact, or upholding a particular faith. Some seraphs ally themselves with an army or locale, much to the satisfaction of their rulers, but other crusaders fight in opposition to the follies of the Mortal Realm. It is better to be a seraph's ally than their enemy, as they are terrifying foes to those who defy their purpose.

DOMAINS

Splendor and Valor

STARTING EVASION

9

STARTING HIT POINTS

7

CLASS ITEMS

A bundle of offerings or a sigil of your god

SERAPH'S HOPE FEATURE

Life Support: Spend 3 Hope to clear a Hit Point on an ally within Close range.

CLASS FEATURE

Prayer Dice

At the beginning of each session, roll a number of **d4s** equal to your subclass's Spellcast trait and place them on your character sheet in the space provided. These are your Prayer Dice. You can spend any number of Prayer Dice to aid yourself or an ally within Far range. You can use a spent die's value to reduce incoming damage, add to a roll's result after the roll is made, or gain Hope equal to the result. At the end of each session, clear all unspent Prayer Dice.

SERAPH SUBCLASSES

Choose either the Divine Wielder or Winged Sentinel subclass.

DIVINE WIELDER

Play the Divine Wielder if you want to dominate the battlefield with a legendary weapon.

■ SPELLCAST TRAIT

Strength

■ FOUNDATION FEATURES

Spirit Weapon: When you have an equipped weapon with a range of Melee or Very Close, it can fly from your hand to attack an adversary within Close range and then return to you. You can **mark a Stress** to target an additional adversary within range with the same attack roll.

Sparing Touch: Once per long rest, touch a creature and clear 2 Hit Points or 2 Stress from them.

■ SPECIALIZATION FEATURE

Devout: When you roll your Prayer Dice, you can roll an additional die and discard the lowest result. Additionally, you can use your "Sparing Touch" feature twice instead of once per long rest.

■ MASTERY FEATURE

Sacred Resonance: When you roll damage for your "Spirit Weapon" feature, if any of the die results match, double the value of each matching die. For example, if you roll two 5s, they count as two 10s.

WINGED SENTINEL

Play the Winged Sentinel if you want to take flight and strike crushing blows from the sky.

■ SPELLCAST TRAIT

Strength

■ FOUNDATION FEATURE

Wings of Light: You can fly. While flying, you can do the following:

- **Mark a Stress** to pick up and carry another willing creature approximately your size or smaller.
- **Spend a Hope** to deal an extra **1d8** damage on a successful attack.

■ SPECIALIZATION FEATURE

Ethereal Visage: Your supernatural visage strikes awe and fear. While flying, you have advantage on Presence Rolls. When you succeed with Hope on a Presence Roll, you can remove a Fear from the GM's Fear pool instead of gaining Hope.

■ MASTERY FEATURES

Ascendant: Gain a permanent +4 bonus to your Severe damage threshold.

Power of the Gods: While flying, you deal an extra **1d12** damage instead of 1d8 from your "Wings of Light" feature.

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

- Which god did you devote yourself to? What incredible feat did they perform for you in a moment of desperation?
- How did your appearance change after taking your oath?
- In what strange or unique way do you communicate with your god?

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

- What promise did you make me agree to, should you die on the battlefield?
- Why do you ask me so many questions about my god?
- You've told me to protect one member of our party above all others, even yourself. Who are they and why?
SORCERER

Not all innate magic users choose to hone their craft, but those who do can become powerful sorcerers. The gifts of these wielders are passed down through families, even if the family is unaware of or reluctant to practice them. A sorcerer's abilities can range from the elemental to the illusionary and beyond, and many practitioners band together into collectives based on their talents. The act of becoming a formidable sorcerer is not the practice of acquiring power, but learning to cultivate and control the power one already possesses. The magic of a misguided or undisciplined sorcerer is a dangerous force indeed.

DOMAINS
Arcana and Midnight

STARTING EVASION
10

STARTING HIT POINTS
6

CLASS ITEMS
A whispering orb or a family heirloom

SORCERER'S HOPE FEATURE
Volatile Magic: **Spend 3 Hope** to reroll any number of your damage dice on an attack that deals magic damage.

CLASS FEATURES

Arcane Sense
You can sense the presence of magical people and objects within Close range.

Minor Illusion
Make a **Spellcast Roll (10)**. On a success, you create a minor visual illusion no larger than yourself within Close range. This illusion is convincing to anyone at Close range or farther.

Channel Raw Power
Once per long rest, you can place a domain card from your loadout into your vault and choose to either:

- Gain Hope equal to the level of the card.
- Enhance a spell that deals damage, gaining a bonus to your damage roll equal to twice the level of the card.

SORCERER SUBCLASSES

Choose either the Elemental Origin or Primal Origin subclass.

ELEMENTAL ORIGIN

Play the Elemental Origin if you want to channel raw magic to take the shape of a particular element.

◼ SPELLCAST TRAIT
Instinct

◼ FOUNDATION FEATURE
Elementalist: Choose one of the following elements at character creation: air, earth, fire, lightning, water.

You can shape this element into harmless effects. Additionally, **spend a Hope** and describe how your control over this element helps an action roll you're about to make, then either gain a +2 bonus to the roll or a +3 bonus to the roll's damage.

◼ SPECIALIZATION FEATURE
Natural Evasion: You can call forth your element to protect you from harm. When an attack roll against you succeeds, you can **mark a Stress** and describe how you use your element to defend you. When you do, roll a **d6** and add its result to your Evasion against the attack.

◼ MASTERY FEATURE
Transcendence: Once per long rest, you can transform into a physical manifestation of your element. When you do, describe your transformation and choose two of the following benefits to gain until your next rest:

- +4 bonus to your Severe threshold
- +1 bonus to a character trait of your choice
- +1 bonus to your Proficiency
- +2 bonus to your Evasion

PRIMAL ORIGIN

Play the Primal Origin if you want to extend the versatility of your spells in powerful ways.

■ SPELLCAST TRAIT

Instinct

■ FOUNDATION FEATURE

Manipulate Magic: Your primal origin allows you to modify the essence of magic itself. After you cast a spell or make an attack using a weapon that deals magic damage, you can **mark a Stress** to do one of the following:

- Extend the spell or attack's reach by one range
- Gain a +2 bonus to the action roll's result
- Double a damage die of your choice
- Hit an additional target within range

■ SPECIALIZATION FEATURE

Enchanted Aid: You can enhance the magic of others with your essence. When you Help an Ally with a Spellcast Roll, you can roll a **d8** as your advantage die. Once per long rest, after an ally has made a Spellcast Roll with your help, you can swap the results of their Duality Dice.

■ MASTERY FEATURE

Arcane Charge: You can gather magical energy to enhance your capabilities. When you take magic damage, you become *Charged*. Alternatively, you can **spend 2 Hope** to become *Charged*. When you successfully make an attack that deals magic damage while *Charged*, you can clear your *Charge* to either gain a +10 bonus to the damage roll or gain a +3 bonus to the Difficulty of a reaction roll the spell causes the target to make. You stop being *Charged* at your next long rest.

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

- What did you do that made the people in your community wary of you?
- What mentor taught you to control your untamed magic, and why are they no longer able to guide you?
- You have a deep fear you hide from everyone. What is it, and why does it scare you?

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

- Why do you trust me so deeply?
- What did I do that makes you cautious around me?
- Why do we keep our shared past a secret?
WARRIOR

Becoming a warrior requires years, often a lifetime, of training and dedication to the mastery of weapons and violence. While many who seek to fight hone only their strength, warriors understand the importance of an agile body and mind, making them some of the most sought-after fighters across the realms. Frequently, warriors find employment within an army, a band of mercenaries, or even a royal guard, but their potential is wasted in any position where they cannot continue to improve and expand their skills. Warriors are known to have a favored weapon; to come between them and their blade would be a grievous mistake.

DOMAINS
Blade and Bone

STARTING EVASION
11

STARTING HIT POINTS
6

CLASS ITEMS
The drawing of a lover or a sharpening stone

WARRIOR'S HOPE FEATURE
No Mercy: Spend 3 Hope to gain a +1 bonus to your attack rolls until your next rest.

CLASS FEATURES

Attack of Opportunity
If an adversary within Melee range attempts to leave that range, make a reaction roll using a trait of your choice against their Difficulty. Choose one effect on a success, or two if you critically succeed:

- They can't move from where they are.
- You deal damage to them equal to your primary weapon's damage.
- You move with them.

Combat Training
You ignore burden when equipping weapons. When you deal physical damage, you gain a bonus to your damage roll equal to your level.

WARRIOR SUBCLASSES

Choose either the Call of the Brave or Call of the Slayer subclass.

CALL OF THE BRAVE

Play the Call of the Brave if you want to use the might of your enemies to fuel your own power.

■ FOUNDATION FEATURES

Courage: When you fail a roll with Fear, you gain a Hope.

Battle Ritual: Once per long rest, before you attempt something incredibly dangerous or face off against a foe who clearly outmatches you, describe what ritual you perform or preparations you make. When you do, clear 2 Stress and gain 2 Hope.

■ SPECIALIZATION FEATURE

Rise to the Challenge: You are vigilant in the face of mounting danger. While you have 2 or fewer Hit Points unmarked, you can roll a **d20** as your Hope Die.

■ MASTERY FEATURE

Camaraderie: Your unwavering bravery is a rallying point for your allies. You can initiate a Tag Team Roll one additional time per session. Additionally, when an ally initiates a Tag Team Roll with you, they only need to spend 2 Hope to do so.

CALL OF THE SLAYER

Play the Call of the Slayer if you want to strike down adversaries with immense force.

■ FOUNDATION FEATURE

Slayer: You gain a pool of dice called Slayer Dice. On a roll with Hope, you can place a **d6** on this card instead of gaining a Hope, adding the die to the pool. You can store a number of Slayer Dice equal to your Proficiency. When you make an attack roll or damage roll, you can spend any number of these Slayer Dice, rolling them and adding their result to the roll. At the end of each session, clear any unspent Slayer Dice on this card and gain a Hope per die cleared.

■ SPECIALIZATION FEATURE

Weapon Specialist: You can wield multiple weapons with dangerous ease. When you succeed on an attack, you can **spend a Hope** to add one of the damage dice from your secondary weapon to the damage roll. Additionally, once per long rest when you roll your Slayer Dice, reroll any 1s.

■ MASTERY FEATURE

Martial Preparation: You're an inspirational warrior to all who travel with you. Your party gains access to the Martial Preparation downtime move. To use this move during a rest, describe how you instruct and train with your party. You and each ally who chooses this downtime move gain a **d6** Slayer Die. A PC with a Slayer Die can spend it to roll the die and add the result to an attack or damage roll of their choice.

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

- Who taught you to fight, and why did they stay behind when you left home?
- Somebody defeated you in battle years ago and left you to die. Who was it, and how did they betray you?
- What legendary place have you always wanted to visit, and why is it so special?

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

- We knew each other long before this party came together. How?
- What mundane task do you usually help me with off the battlefield?
- What fear am I helping you overcome?

WIZARD

Whether through an institution or individual study, those known as wizards acquire and hone immense magical power over years of learning using a variety of tools, including books, stones, potions, and herbs. Some wizards dedicate their lives to mastering a particular school of magic, while others learn from a wide variety of disciplines. Many wizards become wise and powerful figures in their communities, advising rulers, providing medicines and healing, and even leading war councils. While these mages all work toward the common goal of collecting magical knowledge, wizards often have the most conflict within their own ranks, as the acquisition, keeping, and sharing of powerful secrets is a topic of intense debate that has resulted in innumerable deaths.

DOMAINS

5

CLASS ITEMS
A book you're trying to translate or a tiny, harmless elemental pet

WIZARD'S HOPE FEATURE
Not This Time: **Spend 3 Hope** to force an adversary within Far range to reroll an attack or damage roll.

CLASS FEATURES

Prestidigitation
You can perform harmless, subtle magical effects at will. For example, you can change an object's color, create a smell, light a candle, cause a tiny object to float, illuminate a room, or repair a small object.

Strange Patterns
Choose a number between 1 and 12. When you roll that number on a Duality Die, gain a Hope or clear a Stress. You can change this number when you take a long rest.

WIZARD SUBCLASSES

Choose either the School of Knowledge or School of War subclass.

SCHOOL OF KNOWLEDGE

Play the School of Knowledge if you want a keen understanding of the world around you.

■ SPELLCAST TRAIT
Knowledge

■ FOUNDATION FEATURES
Prepared: Take an additional domain card of your level or lower from a domain you have access to.

Adept: When you Utilize an Experience, you can **mark a Stress** instead of spending a Hope. If you do, double your Experience modifier for that roll.

■ SPECIALIZATION FEATURES
Accomplished: Take an additional domain card of your level or lower from a domain you have access to.

Perfect Recall: Once per rest, when you recall a domain card in your vault, you can reduce its Recall Cost by 1.

■ MASTERY FEATURES
Brilliant: Take an additional domain card of your level or lower from a domain you have access to.

Honed Expertise: When you use an Experience, roll a **d6**. On a result of 5 or higher, you can use it without spending Hope.

SCHOOL OF WAR

Play the School of War if you want to utilize trained magic for violence.

◼ SPELLCAST TRAIT

Knowledge

◼ FOUNDATION FEATURES

Battlemage: You've focused your studies on becoming an unconquerable force on the battlefield. Gain an additional Hit Point slot.

Face Your Fear: When you succeed with Fear on an attack roll, you deal an extra **1d10** magic damage.

◼ SPECIALIZATION FEATURES

Conjure Shield: You can maintain a protective barrier of magic. While you have at least 2 Hope, you add your Proficiency to your Evasion.

Fueled by Fear: The extra magic damage from your "Face Your Fear" feature increases to **2d10**.

◼ MASTERY FEATURES

Thrive in Chaos: When you succeed on an attack, you can **mark a Stress** after rolling damage to force the target to mark an additional Hit Point.

Have No Fear: The extra magic damage from your "Face Your Fear" feature increases to **3d10**.

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

- What responsibilities did your community once count on you for? How did you let them down?
- You've spent your life searching for a book or object of great significance. What is it, and why is it so important to you?
- You have a powerful rival. Who are they, and why are you so determined to defeat them?

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

- What favor have I asked of you that you're not sure you can fulfill?
- What weird hobby or strange fascination do we both share?
- What secret about yourself have you entrusted only to me?

ANCESTRY

Ancestries represent your character's lineage, which affects their physical appearance. The following section describes each ancestry in Daggerheart and the physical characteristics shared by members of that ancestry. That said, you can decide that your character possesses characteristics that aren't "standard" or "average" for that ancestry. We encourage you to look to the art for inspiration and explore the diversity within individual ancestries as you craft your character's appearance.

We hope this section provides a window into the various physicalities of the creatures that populate Daggerheart. As you play and meet members of each ancestry, you'll have the opportunity to learn about the nuances and unique qualities among them. You'll also notice that within the world of Daggerheart, the term "people" is used to refer to all ancestries, as individuals from all lineages possess unique characteristics and cultures, as well as personhood.

Some ancestries are described using the term "humanoid." This does not refer to that specific ancestry having any relation to "humans," the distinct ancestry within Daggerheart. Specifically, it refers to the set of physical characteristics readers will recognize from their own anatomy, such as bipedal movement, upright posture,

facial layout, and more. These traits vary by ancestry and individual, though "humanoid" should still provide a useful frame of reference.

Each ancestry has two **ancestry features**. While some features (such as the ability to fly) are directly tied to an ancestry's anatomy, you ultimately get to determine your character's physical form. If you decide that your faerie character never had wings or lost theirs, you can work with the GM to replace the "Wings" feature that grants faeries flight. It's likewise up to you to decide how important your character's appearance is to their story.

If you'd like to make a character who combines more than one ancestry, see the "Mixed Ancestry" section on page 71.

CLANK

Clanks are sentient mechanical beings built from a variety of materials, including metal, wood, and stone. They can resemble humanoids, animals, or even inanimate objects. Like organic beings, their bodies come in a wide array of sizes. Because of their bespoke construction, many clanks have highly specialized physical configurations. Examples include clawed hands for grasping, wheels for movement, or built-in weaponry.

Many clanks embrace body modifications for style as well as function, and members of other ancestries often turn to clank artisans to construct customized mobility aids and physical adornments. Other ancestries can create clanks, even using their own physical characteristics as inspiration, but it's also common for clanks to build one another. A clank's lifespan extends as long as they're able to acquire or craft new parts, making their physical form effectively immortal. That said, their minds are subject to the effects of time, and deteriorate as the magic that powers them loses potency.

■ ANCESTRY FEATURES

Purposeful Design: Decide who made you and for what purpose. At character creation, choose one of your Experiences that best aligns with this purpose and gain a permanent +1 bonus to it.

***Efficient:*** When you take a short rest, you can choose a long rest move instead of a short rest move.

CLANKS CAN HAVE THE APPEARANCE OF ANY ANCESTRY AND BE MADE FROM A VARIETY OF MATERIALS INCLUDING METAL, WOOD, CLAY, PORCELAIN, STONE, ETC.

ALL CLANKS HAVE SOME POWER SOURCE. THESE CAN TAKE DIFFERENT SHAPES AND FORMS FOR THE INTENDED USE AND PARTICULAR CONSTRUCTION.

POWER SOURCES CAN BE STORED ANYWHERE WITHIN THE BODY, BUT COMMON LOCATIONS ARE IN THE HEAD OR CHEST.
A VARIETY OF ATTACHMENTS ARE AVAILABLE, RANGING FROM TOOLS AND APPENDAGES FOR UTILITY, TO WEAPONS AND PROTECTIVE GEAR FOR COMBAT AND ADVENTURES.

APPENDAGES OR ATTACHMENTS THAT HAVE BEEN LOST OR COMPLETELY BROKEN CANNOT BE REPAIRED OR REMADE THROUGH A CLANK'S SELF-REPAIR.

ELDER CLANK

ADULT CLANK

ADDITIONAL POWER SOURCE VARIANTS.

DRAKONA

Drakona resemble wingless dragons in humanoid form and possess a powerful elemental breath. All drakona have thick scales that provide excellent natural armor against both attacks and the forces of nature. They are large in size, ranging from 5 feet to 7 feet on average, with long sharp teeth. New teeth grow throughout a Drakona's approximately 350-year lifespan, so they are never in danger of permanently losing an incisor. Unlike their dragon ancestors, drakona don't have wings and can't fly without magical aid. Members of this ancestry pass down the element of their breath through generations, though in rare cases, a drakona's elemental power will differ from the rest of their family's.

■ ANCESTRY FEATURES

Scales: Your scales act as natural protection. When you would take Severe damage, you can **mark a Stress** to mark 1 fewer Hit Points.

Elemental Breath: Choose an element for your breath (such as electricity, fire, or ice). You can use this breath against a target or group of targets within Very Close range, treating it as an Instinct weapon that deals **d8** magic damage using your Proficiency.

ADULT DRAKONA

TAILS CAN BE LONG, SHORT, OR NON-EXISTENT. THEY CAN BE THICK OR THIN AND SCALED, SMOOTH, SPIKED, OR ACCENTED WITH HAIR.

MUCH LIKE EVERY FINGERPRINT IS DIFFERENT, EVERY DRAKONA HORN IS UNIQUE TO THAT INDIVIDUAL.

BROKEN HORNS MAY GROW BACK, BUT THE SPEED OF REGROWTH SLOWS WITH AGE.

ELDER DRAKONA

YOUNG DRAKONA

ADULT DRAKONA

MORE HUMANOID DRAKONA STILL HAVE HORNS AND SHARP TEETH—USUALLY ACCOMPANIED BY OTHER SHARP FEATURES.

DWARF

Dwarves are most easily recognized as short humanoids with square frames, dense musculature, and thick hair. Their average height ranges from 4 to 5 ½ feet, and they are often broad in proportion to their stature. Their skin and nails contain a high amount of keratin, making them naturally resilient. This allows dwarves to embed gemstones into their bodies and decorate themselves with tattoos or piercings. Their hair grows thickly—usually on their heads, but some dwarves have thick hair across their bodies as well. Dwarves of all genders can grow facial hair, which they often style in elaborate arrangements. Typically, dwarves live up to 250 years of age, maintaining their muscle mass well into later life.

ANCESTRY FEATURES

Thick Skin: When you take Minor damage, you can **mark 2 Stress** instead of marking a Hit Point.

Increased Fortitude: **Spend 3 Hope** to halve incoming physical damage.

DWARVES HAVE NATURALLY THICK AND TOUGH SKIN, HAIR, AND NAILS.

THEIR THICK SKIN OFFERS EXTRA PROTECTION FROM MINOR HAZARDS. THIS ALLOWS DWARVES TO DECORATE THEIR BODIES IN A VARIETY OF WAYS, FROM TATTOOS TO PIERCINGS, AND EVEN EMBEDDING GEMSTONES INTO THEIR SKIN.

THEIR HAIR TENDS TO BE THICK AND GROW QUICKLY. DWARVES OF ALL GENDERS OFTEN GROW OUT THEIR FACIAL HAIR FOR STYLING.

DUE TO THE THICKNESS OF THEIR NAILS, THEY CAN BE GROUND DOWN AND SHAPED. BECAUSE OF THIS, THEY OFTEN LOOK FACETED.

ADULT DWARF

ADULT DWARF

ELDER DWARF

MOST ELVES' APPEARANCES DON'T DRASTICALLY CHANGE UNTIL THEY REACH THE LATER YEARS OF THEIR LIFE.

AS AN ELF AGES, THEIR EARS CHANGE. A YOUNG ELF'S EARS POINT UPWARDS AND ARE STIFF, WHILE AN ELDER ELF'S EARS TEND TO DROOP DOWNWARDS.

MYSTIC FORM ELVES CAN BE SHAPED BY A VARIETY OF ASPECTS FROM NATURE OR MAGICAL PRACTICE, SO INFLUENCES FROM THE ELEMENTS ARE COMMON. SOME OTHERS MAY BE ALTERED BY STARS OR CELESTIAL BODIES.

ELF

Elves are typically tall humanoids with pointed ears and acutely attuned senses. Their ears vary in size and pointed shape, and as they age, the tips begin to droop. While elves come in a wide range of body types, they are all fairly tall, with heights ranging from about 6 to 6 ½ feet. All elves have the ability to drop into a celestial trance, rather than sleep. This allows them to rest effectively in a short amount of time.

Some elves possess what is known as a "mystic form," which occurs when an elf has dedicated themselves to the study or protection of the natural world so deeply that their physical form changes. These characteristics can include celestial freckles, the presence of leaves, vines, or flowers in their hair, eyes that flicker like fire, and more. Sometimes these traits are inherited from parents, but if an elf changes their environment or magical focus, their appearance changes over time. Because elves live for about 350 years, these traits can shift more than once throughout their lifespan.

■ ANCESTRY FEATURES

Quick Reactions: **Mark a Stress** to gain advantage on a reaction roll.

Celestial Trance: During a rest, you can drop into a trance to choose an additional downtime move.

ELVEN EARS CAN BE LONG OR SHORT, THIN OR WIDE, BUT THEY ALWAYS COME TO A POINT.

YOUNG ELF

ADULT ELF

FAERIE

Faeries are winged humanoid creatures with insectile features. These characteristics cover a broad spectrum from humanoid to insectoid—some possess additional arms, compound eyes, lantern organs, chitinous exoskeletons, or stingers. Because of their close ties to the natural world, they also frequently possess attributes that allow them to blend in with various plants. The average height of a faerie ranges from about 2 feet to 5 feet, but some faeries grow up to 7 feet tall. All faeries possess membranous wings and they each go through a process of metamorphosis. The process and changes differ from faerie to faerie, but during this transformation each individual manifests the unique appearance they will carry throughout the rest of their approximately 50-year lifespan.

ANCESTRY FEATURE

Luckbender: Once per session, after you or a willing ally within Close range makes an action roll, you can **spend 3 Hope** to reroll the Duality Dice.

Wings: You can fly. While flying, you can **mark a Stress** after an adversary makes an attack against you to gain a +2 bonus to your Evasion against that attack.

FAERIE APPEARANCES RANGE FROM INSECT-LIKE TO HUMANOID, WITH A WIDE VARIETY IN BETWEEN DIFFERENT FAMILIES. NO MATTER THEIR FORM, ALL FAERIES HAVE WINGS.

MONO-WING

DUAL-WING

TRI-WING

ONE, TWO, AND THREE SETS OF WINGS ARE MOST COMMON AMONG FAERIES. THEIR PATTERNS ARE INHERITED FROM THEIR PARENTS.

FAERIES CAN HAVE A VARIETY OF ANTENNAE, OFTEN MATCHING THE INSECT THEY MOST RESEMBLE.

THEIR HORNS, EARS,
AND HAIR IN A
VARIETY OF WAYS.

ALL FAUNS HAVE
SQUARE PUPILS,
EVEN IF THEIR
FACES ARE MORE
HUMANOID THAN
CAPRINE.

FAUN

Fauns resemble humanoid goats with curving horns, square pupils, and cloven hooves. Though their appearances may vary, most fauns have a humanoid torso and a goatlike lower body covered in dense fur. Faun faces can be more caprine or more humanlike, and they have a wide variety of ear and horn shapes. Faun horns range from short with minimal curvature to much larger with a distinct curl. The average faun ranges from 4 feet to 6 ½ feet tall, but their height can change dramatically from one moment to the next based on their stance. The majority of fauns have proportionately long limbs, no matter their size or shape, and are known for their ability to deliver powerful blows with their split hooves. Fauns live for roughly 225 years, and as they age, their appearance can become increasingly goatlike.

■ ANCESTRY FEATURES

Caprine Leap: You can leap anywhere within Close range as though you were using normal movement, allowing you to vault obstacles, jump across gaps, or scale barriers with ease.

Kick: When you succeed on an attack against a target within Melee range, you can **mark a Stress** to kick yourself off them, dealing an extra **2d6** damage and knocking back either yourself or the target to Very Close range.

FIRBOLG

Firbolgs are bovine humanoids typically recognized by their broad noses and long, drooping ears. Some have faces that are a blend of humanoid and bison, ox, cow, or other bovine creatures. Others, often referred to as minotaurs, have heads that entirely resemble cattle. They are tall and muscular creatures, with heights ranging from around 5 feet to 7 feet, and possess remarkable strength no matter their age. Some firbolgs are known to use this strength to charge their adversaries, an action that is particuarly effective for those who have one of the many varieties of horn styles commonly found in this ancestry. Though their unique characteristics can vary, all firbolgs are covered in fur, which can be muted and earth-toned in color, or come in a variety of pastels, such as soft pinks and blues. On average, firbolgs live for about 150 years.

■ ANCESTRY FEATURES

Charge: When you succeed on an Agility Roll to move from Far or Very Far range into Melee range with one or more targets, you can **mark a Stress** to deal **1d12** physical damage to all targets within Melee range.

Unshakable: When you would mark a Stress, roll a **d6**. On a result of 6, don't mark it.

SOME FIRBOLG HAVE HUMANOID FACES, WHILE OTHERS HAVE THE HEADS OF COWS, OXEN, OR OTHER BOVINE CREATURES. THESE ARE CALLED MINOTAURS.

YOUNG FIRBOLG

YOUNG FIRBOLGS TEND TO HAVE ROUND, SOFT FEATURES.

ADULT FIRBOLG

AS THEY ENTER ADULTHOOD, SOME TAKE ON MORE SQUARE FEATURES.

FIRBOLG BODIES ARE COVERED IN SHORT FUR. THEIR FUR COMES IN A VARIETY OF COLORS SUCH AS: BROWN, BLACK, GREY AND VARIOUS PASTELS.

ELDER FIRBOLG WITH A PASTEL FUR COLORING.

FIRBOLGS HAVE HUMANOID PROPORTIONS EXCEPT IN THEIR FACIAL FEATURES, WHICH APPEAR BOVINE-LIKE.

ELDER FIRBOLG

YOUNG FIRBOLG

FUNGRIL

Fungril resemble humanoid mushrooms. They can be either more humanoid or more fungal in appearance, and they come in an assortment of colors, from earth tones to bright reds, yellows, purples, and blues. Fungril display an incredible variety of bodies, faces, and limbs, as there's no single common shape among them. Even their heights range from a tiny 2 feet tall to a staggering 7 feet tall. While the common lifespan of a fungril is about 300 years, some have been reported to live much longer. They can communicate nonverbally, and many members of this ancestry use a mycelial array to chemically exchange information with other fungril across long distances.

■ ANCESTRY FEATURES

Fungril Network: Make an **Instinct Roll (12)** to use your mycelial array to speak with others of your ancestry. On a success, you can communicate across any distance.

Death Connection: While touching a corpse that died recently, you can **mark a Stress** to extract one memory from the corpse related to a specific emotion or sensation of your choice.

FUNGRIL CAPS GROW CONTINUOUSLY THROUGHOUT THEIR LIFE, SO THEY OFTEN TRIM OR SHAPE THEM FOR COMFORT. AS THEY AGE, THEIR CAPS LOSE STIFFNESS AND MAY BEGIN TO SAG.

MUSHROOM CAPS
MOST FUNGRIL GROW FUNGUS OR MUSHROOM CAPS ON THEIR HEAD AND BODY. THESE CAPS CAN GROW IN A VARIETY OF STYLES—SOME FUNGRIL HAVE ONE CAP WHILE OTHERS HAVE MANY. CAPS MAY ALSO BE MODIFIED OR CULTIVATED TO GROW INTO PARTICULAR SHAPES.

DAMAGED CAPS
DAMAGED CAPS WILL NATURALLY REGROW BACK TO THEIR NORMAL SHAPE WITH ENOUGH TIME AND CARE.

DECORATED CAPS
FUNGRIL OFTEN DECORATE THEIR CAPS WITH A VARIETY OF ACCESSORIES.

ADULT FUNGRIL

YOUNG FUNGRIL

ELDER FUNGRIL

GALAPA

Galapa resemble anthropomorphic turtles with large, domed shells into which they can retract. On average, they range from 4 feet to 6 feet in height, and their head and body shapes can resemble any type of turtle. Galapa come in a variety of earth tones—most often shades of green and brown— and possess unique patterns on their shells. Members of this ancestry can draw their head, arms, and legs into their shell for protection to use it as a natural shield when defensive measures are needed. Some supplement their shell's strength or appearance by attaching armor or carving unique designs, but the process is exceedingly painful. Most galapa move slowly no matter their age, and they can live approximately 150 years.

◼ ANCESTRY FEATURES

Shell: Gain a bonus to your damage thresholds equal to your Proficiency.

Retract: **Mark a Stress** to retract into your shell. While in your shell, you have resistance to physical damage, you have disadvantage on action rolls, and you can't move.

GALAPAS SOMETIMES CARVE DESIGNS INTO THEIR SHELLS, THOUGH THE PROCESS IS PAINFUL.

ALL GALAPA HAVE STRONG NAILS, AND MANY HAVE WEBBING BETWEEN THEIR DIGITS.

SHELLS CAN ALSO BE REINFORCED COMPLETELY OR PARTIALLY WITH ARMOR OR OTHER MATERIALS.

SHELLS THAT ARE DAMAGED CAN BE TEMPORARILY MENDED OR SUPPORTED LIKE ANY BROKEN BONE; OTHERWISE IT TAKES UP TO 2 YEARS FOR A DAMAGED SHELL TO FULLY RECOVER.

YOUNG GALAPA

ELDER GALAPA
GIANT

Giants are towering humanoids with broad shoulders, long arms, and one to three eyes. Adult giants range from 6 ½ to 8 ½ feet tall and are naturally muscular, regardless of body type. They are easily recognized by their wide frames and elongated arms and necks. Though they can have up to three eyes, all giants are born with none and remain sightless for their first year of life. Until a giant reaches the age of 10 and their features fully develop, the formation of their eyes may fluctuate. Those with a single eye are commonly known as cyclops. The average giant lifespan is about 75 years.

■ ANCESTRY FEATURES

Endurance: Gain an additional Hit Point slot at character creation.

Reach: Treat any weapon, ability, spell, or other feature that has a Melee range as though it has a Very Close range instead.

ADULT GIANTS — ADULT HUMAN

OCULAR VARIANTS

GIANTS MAY HAVE ANYWHERE FROM ONE TO THREE EYES. THIS NUMBER FLUCTUATES WHEN CHILDREN ARE YOUNG.

CYCLOPTIC GIANT

BICLOPTIC GIANT

TRICLOPTIC GIANT

YOUNG GIANT

LONG NECK

ADULT GIANT

ADULT GIANT

EXTENDED REACH

GIANTS TEND TO HAVE LONG ARMS, WIDE CHESTS, AND LONG NECKS.

GOBLIN

Goblins are small humanoids easily recognizable by their large eyes and massive membranous ears. With keen hearing and sharp eyesight, they perceive details both at great distances and in darkness, allowing them to move through less-optimal environments with ease. Their skin and eye colors are incredibly varied, with no one hue, either vibrant or subdued, more dominant than another. A typical goblin stands between 3 feet and 4 feet tall, and each of their ears is about the size of their head. Goblins are known to use ear positions to very specific effect when communicating nonverbally. A goblin's lifespan is roughly 100 years, and many maintain their keen hearing and sight well into advanced age.

■ ANCESTRY FEATURES

Surefooted: You ignore disadvantage on Agility Rolls.

Danger Sense: Once per rest, **mark a Stress** to force an adversary to reroll an attack against you or an ally within Very Close range.

IT'S COMMON FOR GOBLINS TO ADORN THEIR EARS WITH ACCESSORIES, PIERCINGS, AND MODIFICATIONS.

LARGE EARS

LARGE EYES

SHORT NOSE

MANY GOBLINS ESTABLISH ENTIRE LANGUAGES BASED ON THE MOVEMENTS AND POSITION OF THEIR EARS.

ELDER GOBLIN

GOBLINS CAN HAVE A VARIETY OF SKIN TONES.

GOBLIN EYES ARE QUITE LARGE. MANY GOBLINS DON'T HAVE VISIBLE SCLERA.

ADULT GOBLIN

YOUNG GOBLIN
HALFLING

Halflings are small humanoids with large hairy feet and prominent rounded ears. On average, halflings are 3 to 4 feet in height, and their ears, nose, and feet are larger in proportion to the rest of their body. Members of this ancestry live for around 150 years, and a halfling's appearance is likely to remain youthful even as they progress from adulthood into old age. Halflings are naturally attuned to the magnetic fields of the Mortal Realm, granting them a strong internal compass. They also possess acute senses of hearing and smell, and can often detect those who are familiar to them by the sound of their movements.

■ ANCESTRY FEATURES

Luckbringer: At the start of each session, everyone in your party gains a Hope.

Internal Compass: When you roll a 1 on your Hope Die, you can reroll it.

HUMAN

THE AVERAGE HALFLING IS ROUGHLY HALF THE HEIGHT OF THE AVERAGE HUMAN.

HALFLING

SOME HALFLING EARS MAY REACH UPWARD MORE PROMINENTLY.

HALFLING EARS TEND TO HAVE A ROUNDED SHAPE.

HALFLINGS ARE OFTEN PERCEIVED TO BE YOUTHFUL IN APPEARANCE, EVEN AFTER REACHING ADULTHOOD. ONLY WHEN A HALFLING REACHES THE LAST DECADE OF THEIR LIFE DO THEY SHOW THE OBVIOUS SIGNS OF AGING.

ADULT HALFLING

ELDER HALFLING

ELDER HALFLING

ADULT HALFLING

YOUNG HALFLING

HUMAN

Humans are most easily recognized by their dexterous hands, rounded ears, and bodies built for endurance. Their average height ranges from just under 5 feet to about 6 ½ feet. They have a wide variety of builds, with some being quite broad, others lithe, and many inhabiting the spectrum in between. Humans are physically adaptable and adjust to harsh climates with relative ease. In general, humans live to an age of about 100, with their bodies changing dramatically between their youngest and oldest years.

◼ ANCESTRY FEATURES

High Stamina: Gain an additional Stress slot at character creation.

Adaptability: When you fail a roll that utilized one of your Experiences, you can **mark a Stress** to reroll.

ADULT HUMAN

YOUNG HUMAN

IT'S COMMONPLACE FOR HUMANS TO INCORPORATE BOTH MAGICAL AND MECHANICAL TOOLS, ACCESSORIES, AND ITEMS THAT ASSIST THEIR DAILY LIFE AND TASKS.

ADULT HUMAN

ELDER HUMAN

YOUNG HUMAN

HUMANS OFTEN DRESS TO CLEARLY DISPLAY SOCIAL STATUS, WEALTH, PERSONAL FAITH, OR AESTHETICS.

ADULT HUMAN

INFERNIS

Infernis are humanoids who possess sharp canine teeth, pointed ears, and horns. They are the descendants of demons from the Circles Below. On average, infernis range in height from 5 feet to 7 feet and are known to have long fingers and pointed nails. Some have long, thin, and smooth tails that end in points, forks, or arrowheads. It's common for infernis to have two or four horns—though some have crowns of many horns, or only one. These horns can also grow asymmetrically, forming unique, often curving, shapes that infernis enhance with carving and ornamentation. Their skin, hair, and horns come in an assortment of colors that can include soft pastels, stark tones, or vibrant hues, such as rosy scarlet, deep purple, and pitch black.

Infernis possess a "dread visage" that manifests both involuntarily, such as when they experience fear or other strong emotions, or purposefully, such as when they wish to intimidate an adversary. This visage can briefly modify their appearance in a variety of ways, including lengthening their teeth and nails, changing the colors of their eyes, twisting their horns, or enhancing their height. On average, infernis live up to 350 years, with some attributing this lifespan to their demonic lineage.

■ ANCESTRY FEATURES

Fearless: When you roll with Fear, you can **mark 2 Stress** to change it into a roll with Hope instead.

Dread Visage: You have advantage on rolls to intimidate hostile creatures.

HORNS

INFERNIS CAN HAVE ANY NUMBER OF HORNS. THEIR HORNS ARE NOT DETERMINED BY THEIR PARENTAGE, BUT RATHER, ARE UNIQUE TO EACH INDIVIDUAL

INFERNIS HORNS CAN BE OF ANY SHAPE AND SIZE.

DECORATION

INFERNIS OFTEN DECORATE OR MODIFY THEIR HORNS.

TAILS

SOME INFERNIS HAVE TAILS THAT ARE LONG, THIN, AND SMOOTH.

ELDER INFERNIS

ADULT INFERNIS

FORKED TAIL

ARROW-SHAPED TAIL
KATARI

Katari are feline humanoids with retractable claws, vertically slit pupils, and high, triangular ears. They can also have small, pointed canine teeth, soft fur, and long whiskers that assist their perception and navigation. Their ears can swivel nearly 180 degrees to detect sound, adding to their heightened senses. Katari may look more or less feline or humanoid, with catlike attributes in the form of hair, whiskers, and a muzzle. About half of the katari population have tails. Their skin and fur come in a wide range of hues and patterns, including solid colors, calico tones, tabby stripes, and an array of spots, patches, marbling, or bands. Their height ranges from about 3 feet to 6 ½ feet, and they live to around 150 years.

■ ANCESTRY FEATURES

Feline Instincts: When you make an Agility Roll, you can **spend 2 Hope** to reroll your Hope Die.

Retracting Claws: Make an **Agility Roll** to scratch a target within Melee range. On a success, they become temporarily *Vulnerable*.

FELINE FEATURES

KATARI APPEARANCES CAN RANGE FROM MORE FELINE TO MORE HUMANOID WITH SUBTLER FELINE FEATURES.

SOME KATARI ARE DIGITIGRADES, NATURALLY STANDING ON THEIR TOES...
...WHILE OTHERS ARE PLANTIGRADES, NATURALLY STANDING FLAT-FOOTED ON THEIR HEELS.

KATARI ALWAYS HAVE FELINE EARS, EVEN WHEN THEY ARE VERY HUMANOID IN APPEARANCE

ADULT KATARI

ALL KATARI HAVE VERTICAL SLIT PUPILS.

KATARI HAVE SHARP, RETRACTABLE CLAWS.

ORC

Orcs are humanoids most easily recognized by their square features and boar-like tusks that protrude from their lower jaw. Tusks come in various sizes, and though they extend from the mouth, they aren't used for consuming food. Instead, many orcs choose to decorate their tusks with significant ornamentation. Orcs typically live for 125 years, and unless altered, their tusks continue to grow throughout the course of their lives. Their ears are pointed, and their hair and skin typically have green, blue, pink, or gray tones. Orcs tend toward a muscular build, and their average height ranges from 5 feet to 6 ½ feet.

■ ANCESTRY FEATURES

Sturdy: When you have 1 Hit Point remaining, attacks against you have disadvantage.

Tusks: When you succeed on an attack against a target within Melee range, you can **spend a Hope** to gore the target with your tusks, dealing an extra **1d6** damage.

ORCS CAN HAVE A WIDE RANGE OF NATURAL HAIR GROWTH, FROM NO HAIR TO THICK HAIR COVERING MOST OF THEIR BODY.

SKIN TONES

ORC SKIN TONES CAN RANGE FROM COOLER SHADES OF GREENS AND BLUES TO WARMER SHADES OF PINKS AND GRAYS.

TUSKS AND SIGNIFICANCE

AN ORCS' TUSKS TEND TO BE FAIRLY PROMINENT AND CAN GROW IN A VARIETY OF WAYS DEPENDING ON THE INDIVIDUAL AND PARENTAGE. THEY CAN BE CARVED OR ORNAMENTED.

ADULT ORC

RIBBET

Ribbets resemble anthropomorphic frogs with protruding eyes and webbed hands and feet. They have smooth (though sometimes warty) moist skin and eyes positioned on either side of their head. Some ribbets have hind legs more than twice the length of their torso, while others have short limbs. No matter their size (which ranges from about 3 feet to 4 ½ feet), ribbets primarily move by hopping. All ribbets have webbed appendages, allowing them to swim with ease. Some ribbets possess a natural green-and-brown camouflage, while others are vibrantly colored with bold patterns. No matter their appearance, all ribbets are born from eggs laid in the water, hatch into tadpoles, and after about 6 to 7 years, grow into amphibians that can move around on land. Ribbets live for approximately 100 years.

ANCESTRY FEATURES

Amphibious: You can breathe and move naturally underwater.

Long Tongue: You can use your long tongue to grab onto things within Close range. **Mark a Stress** to use your tongue as a Finesse Close weapon that deals **d12** physical damage using your Proficiency.

A RIBBET'S SKIN CAN VARY WIDELY—RANGING FROM NEUTRAL TONES, SUCH AS BROWNS, GRAYS, OR GREENS, TO VIVID HUES LIKE YELLOW, RED, AND BLUE.

THEIR SKIN MIGHT BE BUMPY AND DRY OR SMOOTH AND SHINY, AND SOMETIMES APPEARS DECORATED WITH STRIPES, SPOTS, OR GRADIENTS.

EACH RIBBET HAS A UNIQUE COLORATION AND PATTERN COMBINATION, WITH SOME RESEMBLANCE TO THEIR PARENTS.

ADULT

ADULT

CHILD

CHILD
YOUNG RIBBETS HAVE SHORT TAILS THAT SHRINK AS THEY MATURE, AS WELL AS PROPORTIONATELY LARGE EYES, HANDS, AND FEET.

SOME RIBBETS HAVE WEBBED DIGITS AND STICKY PADS ON THEIR FINGERS AND TOES.

RIBBETS OFTEN MOVE AROUND BY HOPPING INSTEAD OF WALKING.

YOUNG RIBBET

ADULT RIBBET

ELDER RIBBET

YOUNG SIMIAH

THEY ARE WELL KNOWN FOR THEIR CLIMBING ABILITY AND DEXTEROUS MOVEMENT.

ELDER SIMIAH

ADULT SIMIAH

SIMIAH

Simiah resemble anthropomorphic monkeys and apes with long limbs and prehensile feet. While their appearance reflects all simian creatures, from the largest gorilla to the smallest marmoset, their size does not align with their animal counterparts, and they can be anywhere from 2 to 6 feet tall. All simiah can use their dexterous feet for nonverbal communication, work, and combat. Additionally, some also have prehensile tails that can grasp objects or help with balance during difficult maneuvers. These traits grant members of this ancestry unique agility that aids them in a variety of physical tasks. In particular, simiah are skilled climbers and can easily transition from bipedal movement to knuckle-walking and climbing, and back again. On average, simiah live for about 100 years.

◼ ANCESTRY FEATURES

Natural Climber: You have advantage on Agility Rolls that involve balancing and climbing.

Nimble: Gain a permanent +1 bonus to your Evasion at character creation.

ADULT SIMIAH

SOME SIMIAH HAVE TAILS THAT CAN HELP THEM HOLD ONTO THINGS. THEY OFTEN MAKE USE OF THEIR FEET FOR VARIOUS TASKS, AS THEIR TOES ARE JUST AS STRONG AND DEXTEROUS AS THEIR FINGERS.

ADULT SIMIAH

ELDER SIMIAH

MIXED ANCESTRY

Families within the world of Daggerheart are as unique as the peoples and cultures that inhabit it. Anyone's appearance and skill set can be shaped by blood, magic, proximity, or a variety of other factors.

If you decide that your character is a descendant of multiple ancestries and you want to mechanically represent that in the game, use the steps below:

■ STEP 1: DETERMINE ANCESTRY COMBINATION

When you choose an ancestry at character creation, write down how your character identifies themself in the Heritage section of your character sheet. For example, your ancestry could be "goblin-orc," or just "goblin" (with orc in their lineage), or a name you choose, like "toothling."

■ STEP 2: CHOOSE ANCESTRY FEATURES

Work with your GM to choose two features from the ancestries in your character's lineage.

You must choose the first feature from one ancestry and the second from another. Write both down on a notecard you can keep with your other cards or next to your character sheet. For example, if you are making a goblin-orc, you might take the "Surefooted" and "Tusks" features or the "Sturdy" and "Danger Sense" features. You can't take both the "Surefooted" and "Sturdy" features.

If your character's heritage includes more than two ancestries, you only choose features from two. You can represent additional ancestries through their appearance or backstory.

INFERNIS-RIBBET
"HORNED TOAD"

FUNGRIL-GALAPA
"SHROOMSHELL"

FAERIE-SIMIAH
"FLITTERIN"

COMMUNITY

Communities represent the culture or environment your character grew up in. Though a character might have been a member of numerous communities during their upbringing, this choice represents the one they feel had the most influence over their personality and current skill set.

As with ancestries, describing the characteristics of a collective is nuanced, as people always view others through the lens of their own experience. For example, while a seaborne sailor might feel their own community is particularly strict, a character from an orderborne metropolis might find that group very changeable. An individual's relationship with their community also creates a wide variety of experiences. If your character has fallen out with the people that defined their upbringing, they might continue to carry that influence but also strive to live differently than they were taught.

As you explore the communities in this section, imagine the variety of ways they might manifest in your game. Some community cards reference locations, others an ethos, and others a common goal, but no two places that fall under the same category are identical. If one wanderborne caravan travels the world willingly and another was expelled from their home by force, each community's material trappings and their people's feelings about their lifestyle would be very different.

When you build your character, you can draw inspiration from communities other than the one you've chosen. As always, this aspect of the game is meant to be utilized in the way that best serves your group.

Each community has a **community feature** granted to your character by their community that can be utilized in play.

Tip: Each community entry suggests six adjectives that you can use as inspiration when crafting a character. If you'd like, choose one or more of these words (or roll a d6) to help develop your character's personality, their relationship with their upbringing or peers, or even the demeanor with which they interact with the rest of their party.
HIGHBORNE

Being part of a highborne community means you're accustomed to a life of elegance, opulence, and prestige within the upper echelons of society. Traditionally, members of a highborne community possess incredible material wealth. While this can take a variety of forms depending on the community—including gold and other minerals, land, or controlling the means of production—this status always comes with power and influence. Highborne place great value on titles and possessions, and there is little social mobility within their ranks. Members of a highborne community often control the political and economic status of the areas in which they live due to their ability to influence people and the economy with their substantial wealth. The health and safety of the less affluent people who live in these locations often hinges on the ability of this highborne ruling class to prioritize the well-being of their subjects over profit.

Highborne are often amiable, candid, conniving, enterprising, ostentatious, and unflappable.

◼ COMMUNITY FEATURE

Privilege: You have advantage on rolls to consort with nobles, negotiate prices, or leverage your reputation to get what you want.

A HIGHBORNE ISLAND COMMUNITY CITY BUILT AROUND A POWERFUL MAGE'S TOWER. THOSE WITH GREATER WEALTH LIVE IN HIGHER TIERS OF THE CITY.

HIGHBORNE FROM THIS CITY ARE ALL WEALTHY AND INFLUENTIAL MAGICAL PRACTITIONERS WITH GOLD AND TITLES GRANTED BY THE GRAND MAGE.

HIGHBORNE NOBLEMAN

HIGHBORNE NOBLEWOMAN

ROYAL BALLS AND EXTRAVAGENT PARTIES ARE A REGULAR FIXTURE IN HIGHBORNE COMMUNITIES. THEY OFFER AN EXCELLENT AVENUE TO RUB ELBOWS WITH OTHER MEMBERS OF HIGH SOCIETY.

SOME LOREBORNE COMMUNITIES ARE SMALL ENCLAVES OF SCHOLARS THAT SHARE A FIELD OF STUDY.

ALCHEMICAL GUILDS CAN EARN GOLD BY SELLING POTIONS TO NEIGHBORS AND PASSERSBY.

LOREBORNE

Being part of a loreborne community means you're from a society that favors strong academic or political prowess. Loreborne communities highly value knowledge, frequently in the form of historical preservation, political advancement, scientific study, skill development, or lore and mythology compilation. Most members of these communities research in institutions built in bastions of civilization, while some eclectic few thrive in gathering information from the natural world. Some may be isolationists, operating in smaller enclaves, schools, or guilds and following their own unique ethos. Others still wield their knowledge on a larger scale, making deft political maneuvers across governmental landscapes.

Loreborne are often direct, eloquent, inquisitive, patient, rhapsodic, and witty.

◼ COMMUNITY FEATURE

Well-Read: You have advantage on rolls that involve the history, culture, or politics of a prominent person or place.

AN ORRERY THAT TRACKS THE MOVEMENT OF THE STARS.

FIELDS OF STUDY

THOSE WHO BELONG TO A LOREBORNE COMMUNITY OFTEN HAVE A DEDICATED FIELD OF STUDY. THEY CULTIVATE SPACES THAT ALLOW THEM TO ACQUIRE NEW INFORMATION AND PRESERVE IT OVER THE CENTURIES.

LIBRARIES PLAY AN IMPORTANT PART IN MANY LOREBORNE COMMUNITIES, SERVING BOTH AS VALUABLE SOURCES OF ANCIENT INFORMATION AS WELL AS REPOSITORIES FOR RECENT DISCOVERIES.

ORDERBORNE

Being part of an orderborne community means you're from a collective that focuses on discipline or faith, and you uphold a set of principles that reflect your experience there. Orderborne are frequently some of the most powerful among the surrounding communities. By aligning the members of their society around a common value or goal, such as a god, doctrine, ethos, or even a shared business or trade, the ruling bodies of these enclaves are able to mobilize larger populations with less effort. While orderborne communities take a variety of forms—some even profoundly pacifistic—perhaps the most feared are those that structure themselves around military prowess. In such a case, it's not uncommon for orderborne to provide soldiers for hire to other cities or countries.

Orderborne are often ambitious, benevolent, pensive, prudent, sardonic, and stoic.

■ COMMUNITY FEATURE

Dedicated: Record three sayings or values your upbringing instilled in you. Once per rest, when you describe how you're embodying one of these principles through your current action, you can roll a **d20** as your Hope Die.

ISOLATIONIST
SOME DEVOUT ORDERBORNE COMMUNITIES ARE BUILT ISOLATED HIGH IN THE MOUNTAINS.

A HUGE GATED CITY PROTECTS FERTILE FARMLAND FROM INVADING ARMIES. ALL CITIZENS THAT LIVE WITHIN THE WALLS ARE CONSCRIPTED INTO SERVICE FROM THE MOMENT THEY'RE BORN AND GIVEN TASKS THEY MUST PREFORM AS SOON AS THEY'RE STRONG ENOUGH TO CARRY A BUCKET OF WATER.

ORDERBORNE COMMUNITIES WITH STRONG MILITARIES OFTEN MAKE AND UTILIZE SPECIALIZED WEAPONS AND ARMOR.
RIDGEBORNE

Being part of a ridgeborne community means you've called the rocky peaks and sharp cliffs of the mountainside home. Those who've lived in the mountains often consider themselves hardier than most because they've thrived among the most dangerous terrain many continents have to offer. These groups are adept at adaptation, developing unique technologies and equipment to move both people and products across difficult terrain. As such, ridgeborne grow up scrambling and climbing, making them sturdy and strong-willed. Ridgeborne localities appear in a variety of forms—some cities carve out entire cliff faces, others construct castles of stone, and still more live in small homes on windblown peaks. Outside forces often struggle to attack ridgeborne groups, as the small militias and large military forces of the mountains are adept at utilizing their high-ground advantage.

Ridgeborne are often bold, hardy, indomitable, loyal, reserved, and stubborn.

◾ COMMUNITY FEATURE

Steady: You have advantage on rolls to traverse dangerous cliffs and ledges, navigate harsh environments, and use your survival knowledge.

THIS RIDGEBORNE COMMUNITY HAS A MYTH ABOUT A FORGOTTEN GOD ROLLING THEIR STONE HOME ACROSS THE ENTIRE MORTAL REALM BEFORE IT WAS FINALLY PLACED AT THE TOP OF A MOUNTAIN.

PLATEAU SETTLEMENT
A VILLAGE BUILT ON THE MANY LEVELS OF A HIGH PLATEAU. EACH LEVEL HOLDS UNIQUE ARCHITECTURE BASED ON THE STRUCTURE OF THE STONE.

HIGHER ELEVATION ALLOWS THEM TO USE WIND FOR POWER.

A RIDGEBORNE COMMUNITY CARVED SWITCHBACKS INTO THE MOUNTAIN TO BUILD THEIR HOMES. THEIR FORTIFICATIONS ARE HIGHLY DEFENSIBLE IF THEIR ENEMIES ATTACK FROM BELOW.

A MASSIVE FOSSIL EXPOSED BOTH BY EROSION AND BY THE WORK OF A RIDGEBORNE COMMUNITY CARVING HOMES INTO THE CANYON WALLS.

THE BONES OF AN ANCIENT DRAGON, SACRED TO THE INHABITANTS OF THE CITY.

LIFE ON DECK

SOME SEABORNE COMMUNITIES ARE BUILT ON MASSIVE SHIPS. THIS VESSEL TRAVELS THE SAME ROUTE EVERY YEAR. TRAVELERS CAN JOIN THE COMMUNITY FOR MONTHS AT A TIME, DISEMBARKING AND REJOINING WHEN THE SHIP COMES BACK THE FOLLOWING YEAR.

MEMBERS OF SEABORNE COMMUNITIES MIGHT ADORN THEIR HAIR WITH CORAL OR SHELLS THAT WASH UP ON THE BEACH.

SOME SEABORNE COMMUNITIES ARE MERCANTILE, KNOWN TO TRADE GOODS FROM ACROSS THE MORTAL REALM WHEREVER THEY SAIL.

SEABORNE ISLANDS

SEABORNE COMMUNITIES ARE PROMINENT ON SMALL ISLANDS WHERE CITIZEN'S DAILY LIFE IS INFLUENCED BY THE OCEAN THEY'RE SURROUNDED BY.

SEABORNE

Being part of a seaborne community means you lived on or near a large body of water. Seaborne communities are built, both physically and culturally, around the specific waters they call home. Some of these groups live along the shore, constructing ports for locals and travelers alike. These harbors function as centers of commerce, tourist attractions, or even just a safe place to lay down one's head after weeks of travel. Other seaborne live on the water in small boats or large ships, with the idea of "home" comprising a ship and its crew, rather than any one landmass. No matter their exact location, seaborne communities are closely tied to the ocean tides and the creatures who inhabit them. Seaborne learn to fish at a young age, and train from birth to hold their breath and swim in even the most tumultuous waters. Individuals from these groups are highly sought after for their sailing skills, and many become captains of vessels, whether within their own community, working for another, or even at the helm of a powerful naval operation.

Seaborne are often candid, cooperative, exuberant, fierce, resolute, and weathered.

■ COMMUNITY FEATURE

Know the Tide: You can sense the ebb and flow of life. When you roll with Fear, place a token on your community card. You can hold a number of tokens equal to your level. Before you make an action roll, you can spend any number of these tokens to gain a +1 bonus to the roll for each token spent. At the end of each session, clear all unspent tokens.

SLYBORNE

Being part of a slyborne community means you come from a group that operates outside the law, including all manner of criminals, grifters, and con artists. Members of slyborne communities are brought together by their disreputable goals and their clever means of achieving them. Many people in these communities have an array of unscrupulous skills: forging, thievery, smuggling, and violence. People of any social class can be slyborne, from those who have garnered vast wealth and influence to those without a coin to their name. To the outside eye, slyborne might appear to be ruffians with no loyalty, but these communities possess some of the strictest codes of honor which, when broken, can result in a terrifying end for the transgressor.

Slyborne are often calculating, clever, formidable, perceptive, shrewd, and tenacious.

◼ COMMUNITY FEATURE

Scoundrel: You have advantage on rolls to negotiate with criminals, detect lies, or find a safe place to hide.

PIRATE TOWER

A LARGE TOWER SITTING IN THE MIDDLE OF THE SEA WHERE PIRATES GATHER TO SELL STOLEN LOOT, ASSEMBLE CREWS, AND TRADE INFORMATION ABOUT FUTURE TARGETS.

QUICK GETAWAY

COMPLEX COUNTER-BALANCED PULLEY SYSTEMS ALLOW INHABITANTS TO MAKE A HASTY RETREAT WHEN THE SITUATION REQUIRES IT.

GAMBLING IS A COMMON PASTIME IN MANY SLYBORNE COMMUNITIES. GAMES MAY HAVE MORE THAN MONEY ON THE LINE: MAGICAL ITEMS, INFORMATION, AND EVEN AN INDIVIDUAL'S MEMORIES CAN BE GAMBLED AWAY.

SLY FIVE

A CARD GAME THAT REQUIRES DECEPTION AND SKILL. CHEATING ISN'T AGAINST THE RULES, BUT THOSE WHO ARE CAUGHT WILL HAVE A FINGER REMOVED—THE DEALER CHOSES WHICH ONE.

SLYBOURNE MARKETS ALLOW CRIMINALS TO FENCE STOLEN ITEMS, BUY AND SELL CONTRABAND, AND GATHER ILLICIT INFORMATION.

UNDERBORNE

Being part of an underborne community means you're from a subterranean society. Many underborne live right beneath the cities and villages of other collectives, while some live much deeper. These communities range from small family groups in burrows to massive metropolises in caverns of stone. In many locales, underborne are recognized for their incredible boldness and skill that enable great feats of architecture and engineering. Underborne are regularly hired for their bravery, as even the least daring among them has likely encountered formidable belowground beasts, and learning to dispatch such creatures is common practice amongst these societies. Because of the dangers of their environment, many underborne communities develop unique nonverbal languages that prove equally useful on the surface.

Underborne are often composed, elusive, indomitable, innovative, resourceful, and unpretentious.

■ COMMUNITY FEATURE

Low-Light Living: When you're in an area with low light or heavy shadow, you have advantage on rolls to hide, investigate, or perceive details within that area.

CAVE SPIDER SILK CAN BE USED INSTEAD OF ROPE TO SUSPEND THESE UNDERBORNE HOMES, AS IT'S PARTICULARLY STRONG AND LIGHTWEIGHT.

SUSPENDED CITIES

AN UNDERBORNE COMMUNITY SUSPENDED FROM THE ROOF OF A CAVE TO PROTECT CITIZENS FROM SUBTERRANEAN THREATS.

CHISELED FROM A MASSIVE CRYSTAL, THIS HOLLOWED-OUT HOME IS STRUCTURED LIKE ANY TOWER FOUND ABOVEGROUND.
GREAT ARCHITECTURAL SKILL IS REQUIRED TO BATTLE THE CRUSHING FORCES OF THE SURFACE ABOVE AND TO MAINTAIN THE INTEGRITY OF STALAGMITES AND STALACTITES.

UNDERGROUND PREDATORS CAN ATTACK FROM THE CAVE CEILINGS AS WELL AS THE FLOOR, SO UNDERBORNE COMMUNITIES MUST INVEST IN UNIQUE PROTECTIVE MEASURES.

JUST BENEATH

SOME UNDERBORNE COMMUNITIES LIVE JUST BENEATH THE SURFACE, ALLOWING THEM TO MOVE BENEATH THE UPPER WORLD UNDETECTED.

ABOVEGROUND ENTRANCE
MEMBERS OF THIS WANDERBORNE
COMMUNITY LIVE IN TENTS THAT
CAN FLOAT IN THE AIR WITH THE
HELP OF LARGE BALLOONS MADE
OF SPECIALLY TREATED,
WEATHER-RESISTANT HIDES.

THESE WANDERBORNE CARRY FEW
BELONGINGS WITH THEM BUT CAN
QUICKLY TRAVEL A DISTANCE
THAT WOULD NORMALLY TAKE A
DAY OR MORE BY FOOT.

WHEN THEY LAND, THE HOT AIR
BALLOON CAN BE USED TO
PROTECT THEIR TENTS FROM
HARSH WEATHER. IF THEY NEED
TO, THIS COMMUNITY CAN MAKE
A QUICK GETAWAY FROM
DANGEROUS SITUATIONS.

WANDERBORNE

Being part of a wanderborne community means you've lived as a nomad, forgoing a permanent home and experiencing a wide variety of cultures. Unlike many communities that are defined by their locale, wanderborne are defined by their traveling lifestyle. Because of their frequent migration, wanderborne put less value on the accumulation of material possessions in favor of acquiring information, skills, and connections. While some wanderborne are allied by a common ethos, such as a religion or a set of political or economic values, others come together after shared tragedy, such as the loss of their home or land. No matter the reason, the dangers posed by life on the road and the choice to continue down that road together mean that wanderborne are known for their unwavering loyalty.

Wanderborne are often inscrutable, magnanimous, mirthful, reliable, savvy, and unorthodox.

■ COMMUNITY FEATURE

Nomadic Pack: Add a Nomadic Pack to your inventory. Once per session, you can **spend a Hope** to reach into this pack and pull out a mundane item that's useful to your situation. Work with the GM to figure out what item you take out.

MULTI-FAMILY
KITE SKIMMER

SINGLE-FAMILY

PULLED BY HORSES.
KITE SKIMMERS ARE SPECIALIZED MOBILE
HOMES FOR WANDERBORNE GROUPS WHO
LIVE IN THE DESERT, WHERE THE GROUND
CAN BE TOO LOOSE TO WALK ON FOR LONG
DISTANCES.

THE KITES AND SAILS CAN BE LOWERED
WHEN THE COMMUNITY ISN'T TRAVELING.
THEY ARE USED AS SHADE STRUCTURES
DURING THE HEAT OF THE DAY.

WILDBORNE

Being part of a wildborne community means you lived deep within the forest. Wildborne communities are defined by their dedication to the conservation of their homelands, and many have strong religious or cultural ties to the fauna they live among. This results in unique architectural and technological advancements that favor sustainability over short-term, high-yield results. It is a hallmark of wildborne societies to integrate their villages and cities with the natural environment and avoid disturbing the lives of the plants and animals. While some construct their lodgings high in the branches of trees, others establish their homes on the ground beneath the forest canopy. It's not uncommon for wildborne to remain reclusive and hidden within their woodland homes.

Wildborne are often hardy, loyal, nurturing, reclusive, sagacious, and vibrant.

■ COMMUNITY FEATURE

Lightfoot: Your movement is naturally silent. You have advantage on rolls to move without being heard.

MUSHROOM VILLAGE

A FOREST OF GIANT MUSHROOMS MAKES A PERFECT HOME FOR A WILDBORNE COMMUNITY.

IN THE EVENING, THE MUSHROOMS GLOW WITH A RAINBOW OF BIOLUMINESCENCE.

SYMBIOTIC RELATIONSHIP

MANY WILDBORNE COMMUNITIES PAY PARTICULAR ATTENTION TO THE HEALTH OF THE TREES THEY LIVE IN AND AROUND. IN ADDITION TO USING THESE TREES FOR FOOD AND SHELTER, THE COMMUNITY ALSO CARES FOR THEM THROUGH MAGICAL AND NONMAGICAL MEANS.

ADDITIONAL PLAYER GUIDANCE

This section provides guidance for playing disabled characters in Daggerheart.

ADJUSTING ABILITIES AND SPELLS

Some abilities and spells in Daggerheart designate the use of particular assets and senses, including sight, sound, touch, and movement. Like players, characters can be blind, deaf, or mute, have disabilities or limb differences, or possess any number of unique qualities that occur among individuals.

Just as there is no set style for weapons combat, there is no set style of spellcasting within Daggerheart. No spell requires specific language or motions. For example, sign language is equally viable for a Wordsmith bard as anything spoken aloud.

If instructions in the game aren't a good fit for your character's abilities (such as a blind PC's spell affecting "a target you can see"), work with your GM to adjust the requirements of that effect. For example, you might choose to make one of the following adjustments to the rules or campaign:

- Utilize another sense ("a target you can hear")
- Specify the mechanical range ("within Close range")
- Add narrative character details (the PC uses an aid or magical means to perceive the target)
- Address it through worldbuilding (the Mortal Realm is accessible for disabled characters)

Supporting the enjoyment of everyone at the table means modifying the spells, abilities, and other aspects of Daggerheart as you see fit. We invite you to adjust the flavor of cards based on the lines and veils established by the group (see the "Session Zero and Safety Tools" section on page 169). For example, a player might want their druid to use the Conjure Swarm spell, but either they or another player feel uncomfortable with bugs. In that case, they could conjure other objects such as flower petals, small birds, or even a specific bug (such as a butterfly) that everyone is comfortable with. All players, including the GM, should abide by the customizations made to accommodate one another.

PLAYING DISABILITY WITH PURPOSE AND RESPECT

By Rue Dickey

Portraying lived experiences—such as disability—other than your own is a powerful way to broaden your perspective when done with respect. Equality, disability, accessibility, and accommodations are a meaningful part of fantasy worldbuilding. For players interested in exploring these elements at the table, it's important to take care to avoid stereotypes and learn from disabled people themselves.

DISABLED IDENTITY

Like other marginalizations—such as race, gender, and sexuality— disability is just as much an identity as a state of being. When playing a disabled character, it's important to remember that disabilities are a part of people, not a mask they can take off. Different individuals have different experiences with their disability, such as how long they've been disabled, how society has treated them because of it, and how accommodations for their disability are handled. All of these elements are important to consider when building a disabled character, NPC, or fantasy world with accommodations.

Disability is a broad category, and some are more visible—both literally and metaphorically—than others. Some disabilities commonly touched on and explored at the table include limb difference, low mobility and mobility aids, low vision, hearing loss, neurodivergence, and mental illness. Mobility aids and prosthetics are most commonly included in disabled representation, but it is also important to remember that there are countless "invisible" disabilities, such as chronic illnesses, chronic pain, genetic disorders, and autoimmune conditions. Neurodivergence—a blanket term that covers autism, ADHD, learning or cognitive disabilities, PTSD, and more—and mental illness can also sometimes be considered invisible disabilities. When building an inclusive world, it is important to consider disabled people from all walks of life, not just those who are most visible.

MOBILITY AIDS, PROSTHETICS, AND ACCESSIBILITY TOOLS IN FANTASY

A key aspect of playing and including disabled characters in your narratives is ensuring that accessibility tools are a part of the setting. "Accessibility tools" is a broad category for anything that makes the world more navigable for a disabled person, from glasses and hearing aids to prosthetics, wheelchairs, canes, and more.

These mobility aids and accessibility tools can take inspiration from real life, using modern technology or historical reference. People have invented new ways to help disabled people access the world for thousands of years. But you should also feel empowered to get fun and fantastical with it—maybe a prosthetic grown from plants and vines, or a wheelchair that floats using magic better align with your PC or the campaign. If you'd like to implement a mobility aid mechanically, see the "Combat Wheelchair" section on page 122.

TELLING DISABLED STORIES

When playing a disabled character, or when including disabled characters as central elements in the plot, it's important to know what sort of story you're telling. Is the adventurer's disability a central element of their character? Is it part of their backstory or something they gained as part of their adventures? How do they engage with that part of their identity—are they proud of their disability, coming to terms with it, or looking for new coping strategies? All of these stories are valid explorations and will have different implications and directions for your character's journey throughout the narrative. Some players will want mechanical involvement for their disabilities, while others will want more narrative flavor without the mechanical aspects.

Above all, make sure to collaborate on the worlds you build, the characters you create, and the stories you tell. Be open to adjustment and change, and take care of yourself and your fellow players. The game will be safer, richer, and more fun if everyone has a seat at the table.

STURDY METAL LEG

DECORATIVE WOODEN LEG

BECAUSE RIBBETS HOP, THEIR LEG PROSTHETICS ARE MADE TO BE SPRINGY AND COMFORTABLE FOR JUMPING IN DAILY LIFE.

PROSTHETICS CAN BE CREATED TO SUIT AN INDIVIDUAL'S ANATOMY AND NEEDS. BECAUSE DRAKONA HAVE CLAWS, THEIR PROSTHETICS MAY BE HOOKED OR "CLAWED."

- THIS PROSTHETIC CAN HANDLE MORE STRENUOUS USE.
- IT IS MADE FROM STRONG BUT PLIABLE METAL.
- IT CAN BE MADE HEAVIER OR LIGHTER DEPENDING ON THE USER'S NEEDS.

- THIS PROSTHETIC IS NOT FOR STRENUOUS PHYSICAL ACTIVITY.
- IT IS MADE FROM BENT WOOD THAT PROVIDES SPRING FOR MOVEMENT.
- IT CAN BE MADE TO ACCOMPANY SPECIFIC DRESS ATTIRE.

PLAYING A BLIND OR VISUALLY IMPAIRED CHARACTER

By Deven Rue

For ease of information, this section uses the term blind to refer to individuals who lack all sight, and visually impaired (VI) to refer to individuals with low vision, who have visual impairments, or who are legally blind by definition.

Though every individual in the blind/VI community has their own experiences and preferences, here are a few tips on how to play a blind/VI character respectfully. First, consider the following when developing their backstory:

- If your character was born blind/VI, remember that from very young ages, blind/VI children develop their own methods to interact with the world.

- If your character wasn't born blind/VI, what caused, or is causing them, to lose their vision? A sudden loss of sight can be traumatic, creating a sense of helplessness until they learn ways to adapt.

- If your character is visually impaired, what level of sight do they have? Do they see only shadows and light? Or are things blurry blobs at a distance?

- Does your character want to gain or regain their sight? Not all blind/VI individuals care about "curing" their sight, especially if they're born that way. It's hard to miss something they have never had, and some treasure their unique interpretation of the world. On the other hand, those who've lost their vision might wish to regain it.

- Will your character use a cane? Blind/VI people don't use canes to "see"; rather, they use them to gather information about the surface they're walking on (by sound or how far their cane sinks into the ground), inclines or descents, and the edges of objects around them.

- Does your character have a service animal or familiar? Blind/VI people develop close bonds with their service animals, and these companions alert them of potential danger or obstacles, guide them, and bring them items they need. While characters who weren't born blind/VI could potentially see through the eyes of a familiar, a character who was born blind might not understand the images a familiar projects into their mind, as they haven't experienced sight and don't have the necessary context.

Strive to give blind/VI PCs and NPCs the same level of independence and function as other characters in your game, and make them common enough to let others know they not only exist in your world, they thrive.

When roleplaying, you're encouraged to include descriptions that go beyond appearance. Blind/VI people do not inherently have heightened smell or hearing, but these senses can inform them about their environment. Think about an area's scent, temperature, wind flow, and more. Describe obstacles, people, and enemies in relation to their current position, such as stating that someone is "several paces in front" of a character or referencing a clock face or compass (where the character is always standing in the middle).

Above all, don't be afraid to play a blind/VI character and open yourself up to these roleplaying opportunities, experiences, and perspectives.

PLAYING A DEAF CHARACTER

By Rogan Shannon

Deaf people exist on a wide spectrum ranging from mild to profound deafness. Some are deaf in one ear, but otherwise hear and speak, while others are entirely deaf and living in a fully visual world—or one of the many possible combinations in between. When you play a Deaf character, consider the many factors that influence how they move through their life. The following questions are a good place to start:

- Have they been deaf since birth, or did they become deaf later in life from illness or injury?

- How do they choose to communicate with their friends, loved ones, and the world at large?

- Growing up, did they learn how to speak, use sign language, or a combination of the two?

- If they don't speak the predominant language, how do they communicate? Do they use paper and pen? Or do they have accommodations, magical or otherwise?

- Is this person a loner, keeping to themself and interacting with people only when they have to, or are they part of a community of other Deaf people?

As an accommodation for a Deaf character, the GM and players can flavor scenes using other senses. For example, the character might feel the rumbling of a dragon's deep roar or the intense heat from a fire spell, rather than hearing the bellow or an explosion of flame. They may have a metallic taste in their mouth and hair standing up on their arms as the air crackles with electricity. Rather than hearing the groan of the undead, their nose might be assaulted with the pungent scent of rot.

When roleplaying, be mindful of how you portray the character's chosen communication mode. Either speak as you normally would or be intentional about how you do it.

Above all, Deaf people are people. Play them as you would any other character while considering the added layer of how they move through the world differently due to communication needs. If you're able, don't hesitate to ask someone Deaf for ideas and feedback.

MAGICAL FLOWERS CAN BE WORN IN THE EARS AND FUNCTION LIKE A HEARING AID OR COCHLEAR IMPLANT.

ENCHANTED OBJECTS CAN BE USED TO GIVE USERS INFORMATION ABOUT THEIR SURROUNDINGS.

ATTIRE (SUCH AS A MASQUERADE MASK) CAN BE MAGICALLY ENHANCED TO FUNCTION LIKE GLASSES.

THOSE WHO WEREN'T BORN BLIND OR VISUALLY IMPAIRED MIGHT USE A SERVICE ANIMAL TO SHARE THEIR VISION.

ALLIES CAN GIVE BLIND AND VISUALLY IMPAIRED COMPANIONS INFORMATION BY DESCRIBING DETAILS IN RELATION TO A CLOCK OR COMPASS.

CANES ALLOW BLIND AND VISUALLY IMPAIRED INDIVIDUALS TO GAIN INFORMATION ABOUT THE TERRAIN AND CAN BE USED ALONGSIDE VARIOUS WEAPONS.

DIFFERENT SERVICE ANIMALS HAVE UNIQUE SKILLS. THEY DEVELOP A CLOSE BOND WITH THE INDIVIDUAL THEY WORK WITH.
CHAPTER TWO:
PLAYING AN ADVENTURE

In this chapter, we'll cover what you need to know as a player to start your adventure, including the core mechanics, combat, leveling up, equipment, and a few optional rules you can add to your game.

FLOW OF THE GAME

In a session of Daggerheart, you and the other players go around the table describing what your characters do in the fictional circumstances that the GM sets up, building on each other's ideas and working together to tell an exciting story. The mechanics of the game help facilitate this conversation, providing structure to the discussion and a way to resolve moments when there are several exciting possibilities for what happens next.

Everyone at the table should ask questions and integrate the answers into the game. As a player, you'll often ask clarifying questions about the scene: "Are there any guards outside the door?" or "What kind of weapon are they holding?" or "Can I jump across the gap safely?" The GM might answer questions directly: "There are four guards outside the door," or "They're weilding longswords." They might also ask you to roll to determine the answer: "It's raining and dark, so let's see how well you jump the gap. Give me an Agility Roll, Difficulty 11."

In turn, the GM asks you questions and builds on those answers to create the fiction: *"How are you able to sneak around this building so carefully?"* or *"What does the camp you've set up look like?"* or *"You've found a way to safely scramble up the wall—what made your climb easier than you anticipated?"* This back and forth creates a collaborative conversation where everyone can meaningfully contribute to the fiction.

For those familiar with roleplaying games, the flow of the game might come naturally, but if you're new to this experience, it might not. The following steps outline an example of the gameplay loop that drives every session. This gameplay loop will be described in more detail in the upcoming sections.

STEP 1:
THE GM NARRATES DETAILS

STEP 2:
THE PLAYERS AND GM ASK QUESTIONS

STEP 3:
THE PLAYERS AND GM ANSWER QUESTIONS

STEP 4:
CHOOSE AND RESOLVE ACTIONS

STEP 5:
REPEAT THE CYCLE

STEP 1:
THE GM NARRATES DETAILS

The GM lays out a scene, describing the surroundings, dangers, NPCs, and any important elements the characters would notice immediately.

STEP 2:
THE PLAYERS AND GM ASK QUESTIONS

The players ask questions to explore the scene in more depth, gathering information to help them decide their characters' actions. When appropriate, the GM can ask the players to describe elements of a scene, leaving their own influence on the world.

STEP 3:
THE PLAYERS AND GM ANSWER QUESTIONS

The GM responds to these questions by giving the players information their characters can easily obtain. The players also respond to any questions the GM poses to them. If they want more insight than what is readily available, the GM informs players what dice roll or action they must make to obtain more information.

STEP 4:
CHOOSE AND RESOLVE ACTIONS

As the GM describes the scene and provides information, they lead the players to opportunities to take action—problems to solve, obstacles to overcome, mysteries to investigate, and so on. As the players pursue these opportunities, the GM helps facilitate their characters' actions, and everyone works together to move the fiction forward based on the outcome. If the players aren't compelled into action right away, the GM continues to provide more details, conflict, or consequences until they are.

STEP 5:
REPEAT THE CYCLE

Because the scene has changed in some way, this process repeats from the beginning.

EXAMPLE INTERACTION

A noble just caught Nolan's character, Lavelle, trying to steal an important letter from their bag in a busy market square at the center of town.

"How many guards did you say this noble had?" Nolan asks Stella, the GM.

"Two right there with him, and you suspect that there's another two out-of-uniform and back in the crowd."

"Great. I'm by an alley, right? I want to back off and find a place to climb up to the rooftop before anyone can catch me."

"Sure thing," Stella says. Based on the situation, she decides that Nolan doesn't need to roll for Lavelle to accomplish what they want to do. "You're fast, and thankfully the noble is the one who spotted you, not the guards—so you can scramble up without a roll. The guards will be following you, though, and once you're on the roof, they're going to draw their crossbows and start shooting."

Nolan asks, "How close are the buildings? Could I leap onto the next building's roof?"

"They're not that far apart," Stella says. "Certainly not any wider than what you're used to from growing up in Downside. That'd be an Agility Roll to escape across the rooftops. But heads up—if you don't succeed here, you'll probably take some serious damage from the fall. It's a long way down." Lavelle has a +2 Agility, and Nolan spends a Hope to use Lavelle's Scoundrel Experience, adding a +2 bonus to the roll to make the leap.

"I know it's dangerous, but I've done this kind of jump before." Nolan gathers 4 character tokens to represent his Agility and Scoundrel bonuses, then rolls his Duality Dice. The Hope Die lands on a 9 and the Fear Die lands on 4. He combines those values together—adding up to 13—then adds his 4 character tokens for a total of 17. Because his Hope Die rolled higher than his Fear Die, Nolan tells the GM: "I rolled a 17 with Hope!"

Stella nods. Nolan's total of 17 is higher than the Difficulty of 15 she had in mind, and a success with Hope means there are no negative consequences for the action. "That's more than enough to escape these guards. They're armored and trying to take shots, but none of them get close to you—and they're not good enough at jumping to risk a fall. By the time you're two blocks away, you've completely lost them. Make sure to gain a Hope for that roll. But now you're farther away from the noble and the letter you were trying to steal from him. What do you do?"

CORE MECHANICS

This section explains the core mechanics of Daggerheart and how to use them.

THE SPOTLIGHT

Any time a character becomes the focus of a scene, they're in the **spotlight.** Even if many characters are involved in a dramatic moment, there is often one character leading the action. This might be the PC pulling their ally to safety, the NPC haggling over the price of rare goods, or the adversary attacking with their foul weapon. The spotlight organically moves around the table as scenes unfold, but the mechanics of the game might also determine where the spotlight goes next. For example, if a player rolls with Fear on their Duality Dice during combat, the mechanics allow the GM to then spotlight an adversary to act against the heroes.

ON YOUR TURN

Daggerheart's turns don't follow a traditional, rigid format; you don't have a set number of actions you can take or things you can do before play passes to someone else. Players should follow the natural flow of the fiction to figure out what happens next, bouncing the spotlight around the table to whoever it makes sense to focus on in that moment. However, all players should keep in mind who has recently had the spotlight and try to find opportunities to give every character a chance to act.

OPTIONAL TOOL: SPOTLIGHT TRACKER

If your group prefers tactical play or structured player turns, you can limit the number of actions each PC has available to them at a time. We recommend that you start with three, but you can increase or decrease the number as your table prefers.

If you use this system, when a battle begins, every player places action tokens on their character sheets to represent how many actions they can take. Players then act as usual, and each time they make an action roll or perform a significant action while in the spotlight, they remove 1 token from their sheet. Collaborate with other players to pass play around the table, making moves and telling the story together. Even if you have multiple action tokens, see if any other players want a chance to act before you spend more than one in a row.

Once every player has used all their available tokens, players refill their character sheet with the same number of tokens as before, then continue playing.

MAKING MOVES

When you decide to do something in the story and the spotlight shifts to you, your PC makes a **move**, which you describe to the group. A move is an action a character takes to advance the story, such as talking to another character, interacting with the environment, using a class feature or spell, or anything else a character can do within the scene.

Some low-stakes moves automatically succeed—it's easy to open an unlocked door. But while heroic, high-stakes moves often require a roll to determine the outcome—it's hard to break down a barricaded door. When you make a move and the result of that action is in question, the fiction pauses while you make an action roll to see how things play out.

MOVES IN COMBAT

Since Daggerheart is a collaborative and conversational storytelling experience between the GM and players, combat has no initiative order, no rounds, and no distinct number of actions you can take while in the spotlight. Instead, fights play out narratively from moment to moment, just like noncombat scenes. This freeform combat gives players the freedom and opportunity to team up, respond on the fly to narrative changes in the scene, and follow the fiction. If they aren't mechanically locked into combat, players might find it easier to choose a solution other than violence, such as having their characters flee from their opponents or come to a temporary truce with their enemies.

GM MOVES AND ADVERSARY ACTIONS

PCs aren't the only ones who make moves—the GM can make a **GM move** (see the "Making Moves" section on page 149). GM moves can happen at nearly any time, but they most commonly occur when a PC rolls with Fear or fails an action roll. Typically, GM moves escalate the scene in an exciting and dangerous way. A new threat might emerge from the woods, the PCs could be separated by a sudden cave-in, or another similar action may significantly change the scene. When the GM is finished with their turn, play returns to the PCs. This creates a back-and-forth conversation as the story evolves organically between the GM and players.

Many GM moves don't require spending any resources, but the GM can spend Fear to make additional or more powerful moves, such as using an adversary or environment's Fear move (see the "Fear" section on page 154).

Tip: When the GM has the spotlight, PCs can't use features that require spending resources or making rolls unless those actions specifically allow for it, such as reaction rolls or features that interrupt attack or damage rolls.

DUALITY DICE

The core dice in Daggerheart are a pair of d12s called Duality Dice. Choose two d12s of different colors (or if you prefer, different sizes or patterns)—one to represent Hope and the other to represent Fear. Your Duality Dice should be easily recognizable from each other at a glance. You'll use these dice any time you make an action roll.

> *Example: Quinn looks at their dice and decides on a blue d12 to represent Hope and a red d12 to represent Fear.*
>
> *Aliyah looks at her dice and chooses a yellow d12 to represent Hope and a purple d12 to represent Fear.*
>
> *Nolan thinks about using a black d12 with red inking as the Fear Die and a black d12 with white inking as his Hope Die, but decides to go with an orange d12 as his Hope Die instead so that it's easier to identify.*

The Duality Dice represent the way the world pushes the character back or guides them forward throughout the story. Regardless of whether you succeed or fail on an action roll, the Duality of Hope and Fear influences how the scene evolves.

ROLLING WITH HOPE AND FEAR

One of your Duality Dice is your **Hope Die**, and the other is your **Fear Die**.

Hope: When you roll your Duality Dice and the Hope Die rolls higher than the Fear Die, you **roll with Hope**. When this happens on an action roll, even if you fail, mark one of the Hope slots on your character sheet. You might also gain Hope from spells, abilities, or other events that happen during the game.

Fear: When you roll your Duality Dice and the Fear Die rolls higher than the Hope Die, you **roll with Fear**. When this happens on an action roll, even if you succeed, the GM gains a Fear and there are consequences or complications that come from the action you were attempting.

Critical Successes

When you roll the Duality Dice and both dice roll the same number, that is a **critical success**. A critical success counts as a roll with Hope, even if you would've otherwise failed because the total is lower than the roll's Difficulty.

When you critically succeed on a roll, along with gaining a Hope, you also clear a Stress from your character sheet.

Additionally, when you critically succeed on an attack roll, you deal extra damage as described in the "Damage Rolls" section on page 98.

■ USING HOPE

When you've gained Hope and recorded it on your character sheet, you can spend it to power special abilities, clearing it from your character sheet when you do. Your Hope carries over between sessions, but you can only hold a maximum of 6 Hope at a time, so we recommend you look for opportunities to spend it. Hope can be used in several ways: to **Help an Ally**, to **Utilize an Experience**, to **Initiate a Tag Team Roll**, or to **Activate a Hope Feature**.

Help an Ally

You can spend a Hope to Help an Ally who is making an action roll you could feasibly support. When you do this, describe how you're helping and roll a d6 advantage die (see the "Advantage and Disadvantage" section on page 100). Any number of PCs can Help an Ally as long as they spend a Hope to do so. The ally being helped might also gain advantage on the roll from another source; in this case, they'd roll their own d6 advantage die. If the ally has gained advantage on a roll from multiple sources, they take the highest of all the advantage dice rolled and add the result to their action roll.

Utilize an Experience

You can spend a Hope to use one of your relevant Experiences on an action or reaction roll, adding its modifier to the result. If more than one Experience applies to the situation, you can spend an additional Hope for each Experience you want to use.

Initiate a Tag Team Roll

You can spend three Hope to initiate a Tag Team Roll between you and another PC in order to combine your efforts together in an exciting and scene-defining moment (see the "Tag Team Rolls" section on page 97).

Activate a Hope Feature

A **Hope Feature** is any effect that allows (or requires) you to spend Hope to activate its effects. If the text instructs you to "spend Hope," you must spend the specified number of Hope, or you can't trigger the Hope Feature.

When using a Hope Feature, if you rolled with Hope for that action, the Hope you gain from that roll can be spent on that feature (or toward it, if it requires spending multiple Hope). If you didn't roll with Hope, you'll need to spend Hope you gained from previous rolls to activate the effect.

> *Tip: Some effects only trigger on a success with Hope. This doesn't mean you can spend Hope on a successful roll with Fear to get the effect; it means the effect only occurs when you roll with Hope and succeed on your action roll. You don't need to spend Hope to activate these effects—they happen as long as the conditions of the roll are met.*

Each class has a unique Hope Feature, such as the guardian's "Frontline Tank" or the wizard's "Not This Time," that underscores their class archetype and showcases their power. You can spend 3 Hope to activate these powerful abilities. If you find yourself maxing out on Hope, using your Hope Feature could give you the upper hand—but remember to look for opportunities to use Hope to help your allies and utilize your Experiences. You will be gaining Hope regularly, and it's meant to be used often.

USING FEAR

As a player, rolling with Fear doesn't mean your action roll fails. Instead, you face a complication or consequence. For example, your character learns only some of the information they need, suffers a counterattack from the adversary they just struck, or encounters an unexpected danger or hazard. If you fail the action roll where you rolled with Fear, those consequences or complications are worse.

When you roll with Fear, you don't record it on your character sheet. Instead, the GM gains a Fear and makes a move to reflect the complications of your Fear roll. The GM can spend the Fear they gain on effects such as spotlighting an adversary or making Fear moves (see the "Spending Fear" section on page 154).

EVASION

Your **Evasion** represents your character's ability to avoid attacks and other unwanted effects from adversaries. This value sets the Difficulty for any roll a creature makes against you. Your base Evasion is determined by your class, but it can be modified by domain cards, equipment, conditions, and more.

You get to describe what your character's Evasion represents, flavoring it the same way you describe their actions. Take this opportunity to be creative, lean into the descriptions, and deepen your character. When an adversary misses them with an attack or other effect, they might deftly avoid it with acrobatic dodging or precise footwork or disrupt the attack with well-timed parries. They might even have a magical shield or enchanted object that wards off blows.

Although these descriptions add to your character and the story your group is telling together, they don't change the normal Evasion rules or give you special bonuses. For example, you might describe how your character uses a powerful burst of magic to redirect an arrow headed their way, but this doesn't mean you can redirect the arrow back at the attacker and deal the damage to them instead.

HIT POINTS AND DAMAGE THRESHOLDS

Hit Points (HP) represent the physical injuries and discomforts your character experiences during their adventures. Your available Hit Points are determined by your class. When you take damage—usually when an adversary succeeds on an attack roll against your Evasion —you mark between 1 and 3 HP, representing the harm your character suffers.

The number of HP you mark is determined by your **damage thresholds**. The threshold bar in the "Damage & Health" section of your character sheet (and at the top right of this page) show the three thresholds of damage you can take: Minor, Major, and Severe.

A character's level is added to their armor's damage thresholds to determine their final damage thresholds. For example, a level 1 guardian wearing chainmail armor (with thresholds of 7/15) would start with the following thresholds. (See the "Using Armor" section on page 114 for more details.)
MARKING HIT POINTS

When the GM tells you to take damage, compare the damage total to your thresholds and mark a number of Hit Points determined by the threshold:

- **Severe damage** is equal to or above your Severe threshold; you mark 3 HP.
- **Major damage** is equal to or above your Major threshold but below Severe; you mark 2 HP.
- **Minor damage** is anything below your Major threshold; you mark 1 HP.

If you ever reduce incoming damage to 0 or less (typically by using a subclass or domain card), you don't mark any HP. When you mark your last Hit Point, you must make a death move (see the "Death" section on page 106).

> **Example:** *Using the example above, if a guardian's incoming damage is 16 or higher, the damage is Severe and they mark 3 Hit Points. If the damage is 8 or higher (but below 16), the damage is Major and they mark 2 Hit Points. If the damage is below their Major threshold of 8, the damage is Minor and they mark 1 Hit Point.*

CLEARING HIT POINTS

Any time you make a downtime move (see the "Downtime" section on page 105), you have the opportunity to clear some of your marked Hit Points.

Additionally, as your character levels up, you can choose to permanently increase their number of Hit Points, making them more resilient against incoming attacks.

> **OPTIONAL RULE: MASSIVE DAMAGE**
>
> To make the game more dangerous, your table can implement a Massive threshold. If you ever take damage equal to double your Severe threshold, you mark 4 Hit Points.
>
> **Example:** *Using the example above, if the guardian takes 32 damage or more, they take Massive damage and mark 4 Hit Points.*

STRESS

Stress represents the mental and physical strain your character suffers during their adventures. Some features, such as your spells or abilities, might require you to mark a Stress to use them. Additionally, the GM might offer you the chance to mark a Stress in exchange for succeeding at the action you're taking. When you mark this Stress, consider the burden your character knowingly accepts. Does their anxiety increase as they use a new tactic in a high-stakes negotiation? Do they willingly dive back into danger and witness unimaginable horrors, knowing the toll it takes on them, to save an innocent life? Are they willing to take minor abrasions to fatally wound their foe?

■ MARKING STRESS

When an effect requires you to mark a Stress, do so on the slots on your character sheet. When you mark your last Stress, you become *Vulnerable* (see the "Conditions" section on page 102) until you clear at least 1 Stress.

If you're ever forced to mark 1 or more Stress but your slots are already full, you must instead mark 1 Hit Point. For example, if an adversary forces you to mark 3 Stress but your Stress is already filled, you instead mark 1 Hit Point. If you would take 2 Stress from an enemy and you have 1 Stress left, you would mark 1 Stress and 1 Hit Point.

As with Hit Points, when you make downtime moves (see the "Downtime" section on page 105), you have the opportunity to clear some of your marked Stress. Additionally, as your character levels up, you can choose to permanently increase the amount of Stress they can withstand.

Stress from Adversaries

Some adversary actions require you to mark Stress. These actions represent the adversary's ability to demoralize your character, exhaust them, or similarly push their physical and mental limits.

Stress from Complications

Your GM can tell you to mark Stress to represent a complication or consequence of an action, especially when a roll doesn't go as well as it could have. For example, you might mark Stress while having a difficult conversation, clashing swords with a worthy foe, or committing an act of incredible bravery. The GM might also allow you to mark Stress to avoid a different complication.

Stress from Moves

Certain moves require you to mark Stress. Unless an effect states otherwise, you can't mark Stress multiple times on the same feature to increase or repeat its effects (see the "Spending Resources" section on page 107).

You can't use a move that requires you to mark Stress if you don't have slots to mark.

ACTION ROLLS

In each scene, the GM and players go back and forth describing what happens. If you make a move where the outcome is in question, and the success or failure of that move is interesting to the story, your move is an action and the GM calls for an action roll to determine the outcome. However, if an action is either easy to pull off without complication or impossible to perform, there's no need to roll—you already know the result!

When the GM (or your spell, attack, or ability) asks you to make an action roll, you'll do so by rolling your Duality Dice. Each action roll follows four basic steps, which are summarized here and detailed in the sections that follow:

STEP 1:
PICK A CHARACTER TRAIT.

The GM tells you which character trait best applies to the roll and sets a Difficulty for the roll (either openly or privately, at their discretion) based on the details of the scene.

STEP 2:
ADD EXTRA DICE AND MODIFIERS.

You decide if any Experiences or other modifiers also apply, and grab character tokens, advantage or disadvantage dice, and other dice as needed.

STEP 3:
ROLL THE DICE.

You roll your Duality Dice and any additional dice, then add up the result of the dice and the tokens. Tell the GM the total and which Duality Die rolled higher (*"I got a 15 with Fear!"*).

STEP 4:
RESOLVE THE SITUATION.

You and the GM work together to resolve the outcome of your action.

STEP 1:
PICK A CHARACTER TRAIT

Some actions require a certain character trait. In more flexible situations, depending on the scenario and how you've described what you're trying to do, the GM might tell you which trait to use. Other times, the GM might ask you for more information to help decide: *"You want to convince this guard to let you through. How are you speaking to them? Are you intimidating them? Tricking them?"*

Sometimes, more than one trait makes sense. In this case, the GM might ask you which trait best fits your intent, offer you a choice between two, or make a judgment call based on the situation at hand. *"As you inform him about the important message you have for the king, I need you to make a roll to determine if he believes your lie. I'd say Presence is probably what best applies. Does that sound right to you?"*

Unless your action requires a certain trait, feel free to suggest one and describe why it's a good match for what you're doing. However, the GM always has final say over which trait applies.

Roll Difficulty

When you make an action roll, the roll will have a **Difficulty**—the number you need to reach or exceed when you roll. Often, the GM sets the roll's Difficulty based on the situation and how effective your approach might be. Some features provide this Difficulty in parentheses after the listed roll, such as an Agility Roll (13) or a Spellcast Roll (10). If you're making an action roll against an adversary, the Difficulty is found in their stat block.

The GM can choose whether to share the Difficulty of an action or not. Even if they don't tell you the Difficulty, they should make any potential consequences of your actions clear (unless the consequences aren't something your character would reasonably know). For example, *"You're putting yourself in melee with this guard, so you might take a hit in return,"* or *"If you fail this jump, you might not make it to the other side."*

STEP 2:
ADD EXTRA DICE AND MODIFIERS

Once you know which character trait to use, it's time to figure out if any other dice or modifiers apply to the roll, such as the following:

Duality Dice: You roll your Hope Die and Fear Die for every action roll.

Advantage or Disadvantage: If you have advantage or disadvantage on the roll (see the *"Advantage and Disadvantage"* section on page 100), set aside that d6. If you're rolling with disadvantage, make sure your disadvantage die is a distinct color, so you can remember which die to subtract from the result.

Features: Some features allow you to add additional dice to your roll (or allow another character to give you a die). For example, a bard can give you a Rally Die, which you can add to an action, reaction, or damage roll of your choice. Set these dice aside for your roll.

Other Dice: Occasionally, other effects (like a PC helping you with the action) might give you additional dice.

Then count the **modifiers** that apply to your action roll, setting aside that many character tokens to help you keep track. Modifiers can include the following:

Chosen Trait: Add or subtract the value of the trait you and your GM chose for this roll as the modifier.

Experience: If you have an Experience (or several) that you think applies to the situation, describe how your Experience helps your chance of success, then spend a Hope per Experience to add its modifier to your roll. The GM might ask you for more information to justify that Experience, but you have final say (within reason) over whether your Experience applies.

Class Features, Subclass Cards, and Domain Cards: Sometimes class features, subclass cards, and domain cards add a modifier to your roll, so keep an eye on your character sheet and cards.

Other Bonuses or Penalties: Add or subtract bonuses or penalties from your equipment, items, or other sources.

Tip: If you consistently use the same Experience on every roll, the GM will likely ask you to narrow the scope of that Experience or change it altogether. Experiences are meant to reflect the way your character has specialized in something important, not give you a bonus to all your actions.

Counting Character Tokens

Once you declare what modifiers you're applying to your action roll, grab that many character tokens.

Tokens aren't dice; they're counters you add to your hand to help total your results. Before you roll, total the sum of all your modifiers and grab that many tokens. For example, if you have a −1 to Agility and a +2 modifier from an Experience you're utilizing, you have a +1 total modifier to the roll, so set aside 1 token to represent that.

Tip: Occasionally, your total modifier on a roll can be negative. In this case, you can still use tokens, but they'll signify the number you need to subtract from the result, rather than add. If you'd like, you can use a token of a different color to indicate when your other tokens represent a negative modifier.

STEP 3:
ROLL THE DICE

Once you've gathered your dice and tokens from step 2, roll the dice at the same time. Add the results together (and subtract your disadvantage die, if necessary). Then, counting each token as 1, add or subtract your tokens to get the final result.

Tell the GM the total number you rolled and which Duality Die rolled higher *("I rolled a 12 with Hope!")*.

■ ADDING BONUSES TO ROLLS

Some features give you (or another player) a bonus to your action rolls, damage rolls, or reaction rolls. Unless otherwise specified, all bonuses must be added before you make the roll. For example, if a bard gives you a Rally Die, you must choose to use it before you roll, rather than after you see the results.

STEP 4:
RESOLVE THE SITUATION

If your total meets or exceeds the Difficulty, the action **succeeds**—you get what you want. If the total is below the Difficulty, the action **fails**—you don't get what you want—but with one exception! As described in the earlier "Duality Dice" section, if your Duality Dice both roll the same number, you critically succeed, even if your total wasn't enough to meet the Difficulty.

Based on the result of your roll, the GM uses the following guidelines to decide how the narrative moves forward:

■ ON A CRITICAL SUCCESS...

You get what you want and a little extra. You gain a Hope and clear a Stress. If you made an attack roll, you also deal extra damage (see the "Calculating Damage" section on page 98).

■ ON A SUCCESS WITH HOPE...

You pull it off well and get what you want. You gain a Hope.

■ ON A SUCCESS WITH FEAR...

You get what you want, but it comes with a cost or consequence. The GM gains a Fear.

■ ON A FAILURE WITH HOPE...

Things don't go to plan. You probably don't get what you want and there are consequences, but you gain a Hope.

■ ON A FAILURE WITH FEAR...

Things go very badly. You probably don't get what you want, and a major consequence or complication occurs because of it. The GM gains a Fear.

After you announce the result of your roll, the GM describes what happens next. The "Making Moves" section on page 149 provides GM guidance for resolving action rolls and making moves.

EXAMPLE ACTION ROLL

Aliyah's warrior Tabby is trying to run across a narrow parapet to stop a mage who is raining spellfire down on her party. The GM, Stella, tells Aliyah to make an Agility Roll with a Difficulty of 15. Tabby has a +2 Agility, so Aliyah rolls the Duality Dice, adds them together, then adds 2 tokens (representing her +2 modifier from Agility) to get her total.

Here are examples of the five possible results of her roll:

■ FAILURE WITH FEAR

Aliyah rolls 3 on the Hope Die and 6 on the Fear Die, then adds 2 from her Agility for a result of 11 with Fear. 11 is below the roll's Difficulty. Stella gains Fear and, because play passes back to her on a failure, describes the mage making an attack roll in response to Tabby's maneuver. The attack is successful, so the mage knocks her off the parapet with a blast of magical fire and deals damage. Tabby crashes down to the ground below and must find a way back up if she plans to face the mage head-on again.

■ FAILURE WITH HOPE

Aliyah rolls 6 on the Hope Die and 3 on the Fear Die, then adds 2 from her Agility. That's an 11 with Hope. A total of 11 isn't enough to make it across safely, so on a failure, Stella makes a move, narrating that the mage sees Tabby coming and makes an attack, which succeeds. The mage's blast knocks Tabby off-balance, leaving her dangling from the parapet, her progress stalled and position precarious. Tabby gains a Hope, but her friends are still in the line of fire and might need to help her reach safety.

■ SUCCESS WITH FEAR

Aliyah rolls 5 on the Hope Die and a 9 on the Fear Die, then adds 2 from her Agility. That's a 16 with Fear, so it's a success. Stella gains Fear, then asks Aliyah to describe how she races across the parapet, dodging the mage's blasts. After her description, Stella takes over, saying that once Tabby has crossed, she faces her foe head-on, blocking them from attacking the rest of the party. But as the consequence for a result with Fear—the mage reaches out with magic and crumbles the parapet behind Tabby, leaving her trapped and unable to move back to safety. At least the mage isn't attacking her friends, right?

■ SUCCESS WITH HOPE

Aliyah rolls 10 on the Hope Die and 6 on the Fear Die, then adds 2 from her Agility. That's an 18 with Hope, so it's a success. She immediately gains a Hope, then Stella asks her to describe what it looks like as Tabby races across the parapet and interrupts the mage's assault on the party. Since Aliyah rolled a success with Hope, Stella asks what the players want to do next.

■ CRITICAL SUCCESS

Aliyah rolls 8 on the Hope Die and 8 on the Fear Die. That's a critical success! Tabby immediately gains a Hope and clears a Stress. Stella offers Aliyah a choice of two extra benefits—she can deal damage to the mage or gain advantage on the next roll against the mage. Aliyah describes how Tabby races across the parapet and lands a solid blow on the mage, not just stopping their attacks on the party, but dealing weapon damage as well. Since a critical success counts as a roll with Hope, Stella asks the players what they want to do next.

STORY IS CONSEQUENCE

In Daggerheart, every time you roll the dice, the scene changes in some way. There is no such thing as a roll where nothing happens, because the fiction constantly evolves based on the successes and failures of the characters. A failure doesn't mean you simply don't get what you want, especially if that would result in a moment of inaction. The game is more interesting when every action the players take yields an active outcome—something that develops the situation they're in.

For example, if you fail a roll to pick a lock, it's not just that the door doesn't open. On a failure with Hope, it might mean you can hear the rumble of footsteps coming down the hall behind you—the adversaries you previously escaped are getting close, and you have to hide, or find another way through. On a failure with Fear, the door might've been magically warded to keep thieves away, and its arcane alarm triggers. Meanwhile, on a success with Fear, you might succeed in unlocking the door, but you're spotted by the adversaries within. These consequences are what make the game interesting and drive forward your shared adventure.

Every GM and player has a different level of interest and comfort in this roll-by-roll improvisation. Some groups might prefer a largely predetermined world—for example, the GM could have previously decided there are two guards on patrol, and you roll simply to learn whether you unwittingly run into both of them, whether one rounds the corner but you catch them unawares, or whether you escape both guards without notice. In other groups, the GM might not have decided if there are guards at all—but after you roll a failure with Fear, the they quickly weave two guards into the story. Either approach is okay, and you'll likely use a mix of both in each session!

SPECIAL ACTION ROLLS

Many action rolls use the rules in the previous section. However, some situations require special types of action rolls, which are detailed in the following sections.

◼ TRAIT ROLLS

A **trait roll** is an action roll that calls for a specific character trait to be used. These rolls often appear on domain cards and say something like "Presence Roll" or "Agility Roll (12)." If there is a number in parentheses after the trait, that is the Difficulty you must meet to succeed on the roll. If there is no number, the Difficulty is set by the GM based on the circumstances. You can add your Experiences and other bonuses to a trait roll.

If a feature affects a roll that uses a certain trait (such as an Agility Roll), it affects any roll that uses that trait (such as a Spellcast Roll or attack roll that uses Agility). For example, the katari's ancestry feature "Feline Instincts," which allows the katari to reroll an Agility Roll, can be used both on an Agility Roll to traverse dangerous terrain and on an attack roll made with a weapon that uses Agility.

◼ ATTACK ROLLS

When you make an action roll with the intent to harm an adversary, you're making an attack roll. Reference the weapon or spell you're using for the attack to determine what trait it uses. We'll talk more about Spellcast Rolls in the next section, but for a standard physical or magic weapon attack, use the character trait the weapon requires (see the "Equipment" section on page 112), as well as any applicable Experiences or other modifiers, and resolve it as you would a normal action roll.

If you succeed, make a damage roll to determine how much damage the target takes.

By default, each attack roll can only target one adversary. If a spell or ability allows you to target multiple adversaries, roll once and apply that result to all of the adversaries the attack can hit, unless otherwise specified. The attack is successful against all targets for which the attack roll result meets or exceeds their Difficulty.

◼ UNARMED ATTACK ROLLS

When your character makes an attack without a weapon—for example, a punch or a kick—you make an attack roll using Strength or Finesse (though the GM might allow you to use another trait depending on how you describe the attack). On a success, you deal d4 physical damage using your Proficiency.

◼ SPELLCAST ROLLS

Spellcast Rolls are a type of action roll used when you're creating significant magical effects (typically with a domain card). To make a Spellcast Roll, your character must have a subclass that gives you a Spellcast trait (which you can find on the subclass foundation card). You use that trait when you make a Spellcast Roll. Like other trait rolls, Spellcast Rolls can have a set Difficulty, such as "Spellcast Roll (14)."

If a Spellcast Roll can damage a target, it's also considered an attack roll.

You can't make a Spellcast Roll unless you use a spell that calls for one, and the action you're trying to perform must be within the scope of the spell. You can't just make up magic effects that aren't on your character sheet or cards. However, at the GM's discretion, they might allow you to creatively apply an existing spell in an unusual way. Remember that you can always flavor your magic to match the character you're playing, but that flavor won't give you access to new effects.

> **Example 1:** A sorcerer is trying to reach a cliff high above him and doesn't have a spell or ability that lets him get there. He can't make a generic Spellcast Roll to have magic lift him up into the air and fly him to the cliff; he needs a specific spell or ability to accomplish this task.
>
> **Example 2:** To explain why their "Rune Circle" spell gives them protection from adversaries, a wizard wants to flavor that spell as an eruption of sparks from their wand that forms a galloping stallion circling around them. That's awesome and should be highly encouraged, but if dealing extra damage to an adversary because of this narration falls outside the scope of the spell.

When you cast a spell, the text tells you when the effect expires. It might be temporary (in which case the GM can spend Fear to end the spell), it might end at the next rest, or it might have another duration. If the spell doesn't note an expiration, you choose when to end it, or it ends when the story changes in a way that would naturally stop the effect. If you ever want to end a spell earlier than its normal expiration, you can always choose to do so. Unless the spell says otherwise, you can cast and maintain the effects of more than one spell at the same time.
■ GROUP ACTION ROLLS

When multiple characters take action together—such as sneaking through an adversary's camp as a group—the party nominates one character to lead the action (typically the character with the highest bonus to the most applicable skill). Each player then describes how their character collaborates on the task. The action's leader makes an action roll as usual, while the other players make a reaction roll using whichever traits they and the GM decide fit best (see the upcoming "Reaction Rolls" section). They can use different traits for their reaction rolls if they wish.

The leader's action roll gains a +1 bonus for each reaction roll that succeeds and a −1 penalty for each reaction roll that fails.

> **Tip:** If you want to assist an individual ally with an action, you can use Help an Ally instead (see page 90).

> **Example:** The party has just retrieved a stolen amulet from an ancient stronghold, and they are rushing out as the structure collapses around them.
>
> The GM calls for a group action roll as they try to escape. The group elects Tabby the warrior to be the leader, since that character would best remember the path to the exit. The other characters each explain how they work with the party to escape:
>
> Shepherd the druid says they are running alongside Tabby to act as a second set of eyes in case there's a faster route. The GM calls for an Instinct Reaction Roll. It's a 19, a success, so they give Tabby an additional +1 bonus. The GM asks Shepherd to describe the shortcut they notice that allows for a quicker escape.
>
> Rune the wizard says that he wants to understand what kind of magic caused the collapse and potentially reverse it. The GM calls for a Knowledge Reaction Roll. It's a 12, which isn't quite enough, giving Tabby a −1 penalty. The GM asks Rune what causes him to fall behind for a moment.
>
> Lavelle the rogue says he notices that Rune looks like he's not going to make it, so he turns back to reach out a hand in a moment of desperation, yelling, "I've got you! We're not leaving you behind!" The GM calls for a Presence Reaction Roll. It's a 16—a success—giving Tabby a +1 bonus. The GM asks Lavelle and Rune to describe how this rescue happens successfully.
>
> Now that everyone else has acted, Tabby takes the total of the modifiers, in this case +1, and makes an Agility Roll, hoping to lead the party to safety while dodging debris and pointing out hazards. She rolls a 16 with Fear. The GM gains a Fear and says that each character must mark a Stress—but they also emerge from the stronghold just in the nick of time, the ancient stones collapsing behind them.

■ TAG TEAM ROLLS

Once per session, each player can choose to spend 3 Hope and initiate a **Tag Team Roll** between their character and another PC. When you do, work with the other character's player to describe how you combine your actions in a unique and exciting way. You both make separate action rolls, but before resolving the roll's outcome, choose one of the rolls to apply for both of your results. On a roll with Hope, all PCs involved gain a Hope. On a roll with Fear, the GM gains a Fear for each PC involved.

Tag Team Rolls are especially powerful on attack rolls. When you and a partner succeed on a Tag Team Roll attack, you both roll damage and add the totals together to determine the damage dealt. If the attacks deal different types of damage (physical or magic), you choose which type to deal.

A Tag Team Roll counts as a single action roll for the purposes of any countdowns or features that track action rolls.

> **Tip:** Though you can only initiate one Tag Team Roll per session, you can be involved in multiple Tag Team Rolls. For example, you might spend 3 Hope to initiate a Tag Team Roll with a partner, and the same partner can later spend 3 Hope to initiate one with you.

DAMAGE ROLLS

When you succeed on an attack roll against an adversary, you then make a damage roll to determine how much damage your attack deals, and thus how many Hit Points your target must mark. A damage roll is composed of two parts: your Proficiency and damage dice.

PROFICIENCY

Your Proficiency reflects how skilled you are at wielding weapons. You start at 1 Proficiency and can increase this value to a maximum of 6 over the course of a campaign. Your Proficiency determines how many damage dice you roll on a successful attack with a weapon, though other abilities or spells use Proficiency as well. This value is not weapon-specific, and does not change or reset when you equip a new weapon.

> **Tip:** The effects of a spell or an ability might allow you to increase your Proficiency beyond the maximum of 6.

DAMAGE DICE

The **damage dice** used to make a damage roll are determined by the weapon, spell, or ability you're using to make the attack. If the attack uses a weapon, you roll a number of your weapon's damage dice equal to your Proficiency. You can find your weapon's damage dice in the "Active Weapons" section of your character sheet. If the attack is coming from a spell on a domain card or class feature, the text tells you which damage dice you should roll.

Any time a move tells you to deal damage using your Proficiency, you roll a number of dice equal to your Proficiency. Any time it tells you to deal damage using your Spellcast trait, you roll a number of dice equal to your Spellcast trait.

> **Example:** Aliyah's character Tabby has an ability that deals d8 damage using her Proficiency, which is 2. She rolls 2d8 when dealing damage. Miles's character Rune has a spell that deals d6 damage using his Spellcast trait, which is 3. He rolls 3d6 when dealing damage.

As with action rolls, if you want to add a bonus to your damage roll, you must decide to do so before you roll.

CALCULATING DAMAGE

After rolling your damage dice, add their values together, then add any modifiers to determine the result. The GM marks Hit Points based on that damage.

> **Tip:** In Daggerheart, there's a difference between damage and Hit Points. Damage is the result of your damage roll, including your damage dice and modifiers. Hit Points reflect how hard that damage affects the creature who's taking it. The number of Hit Points a creature marks depends on factors such as their damage thresholds, armor, resistances, and immunities.

■ DAMAGE WITHOUT MODIFIERS

Some damage rolls tell you to roll a certain number and type of die without any modifiers. For example, "1d8 physical damage." In this case, you simply roll as indicated and the result of that roll is the amount of damage you deal.

> **Example:** Aliyah makes an attack roll with her warrior's broadsword and gets a 15, which is a success. Her Damage Proficiency is 2 and her broadsword's damage dice are d8s, so she rolls 2d8 and gets a 3 and a 7, for 10 total damage.

■ DAMAGE WITH MODIFIERS

Some damage rolls come with modifiers, such as "2d6+2" or "3d8+5." In these cases, you roll the dice, add their values together, then add the modifier to that total. This modifier is not affected by your Proficiency.

> **Example:** Nolan makes a successful attack with his improved shortbow, which deals d6+6 damage. He has a Proficiency of 3, so he rolls 3d6. The results are 3, 5, and 6, totaling 14. He then adds the modifier of +6, for a total of 20 physical damage to the target.

■ CRITICAL SUCCESSES AND DAMAGE

If your attack roll critically succeeds, your attack deals extra damage! Start with the highest possible value the damage dice can roll, and then make a damage roll as usual, adding it to that value.

> **Example:** Miles's character Rune makes an attack against a target with his wand and rolls two 7s on the Duality Dice—a critical success. Rune has a Proficiency of 2, and the wand deals d6+1 magic damage, so Miles starts with the maximum possible roll of 2d6, for a total of 12 damage. Then, he rolls the 2d6 and they land on a 4 and 5, totaling 9. Finally, he adds the +1 modifier for a total of 22 magic damage.

■ MULTIPLE SOURCES OF DAMAGE

Whenever damage would be applied more than once to a creature during a PC's move, the damage is always totaled before it's applied to the adversary's damage thresholds. For example, if a PC with orc ancestry makes a successful attack against a target in Melee range and decides to spend a Hope to use their "Tusks" feature (which gives them an extra 1d6 damage on a damage roll), they would roll their normal weapon damage and add a d6 to the result, then deal that total damage to the adversary.

If this orc then decided—with the table's consent—to keep the spotlight and make another attack, this is considered a separate move. When this attack resolves, its total damage is counted separately from the damage of the orc's first move.

DAMAGE TYPES AND RESISTANCE

Sometimes other circumstances affect how much damage a creature takes. Use the following rules to determine whether special circumstances affect a damage roll.

■ DAMAGE TYPES

Weapons, spells, and abilities deal one of two damage types: physical damage (phy) or magic damage (mag). Some mechanics interact with damage types to affect how damage is dealt or received—for example, a spell might double magic damage, a condition might make a character resistant to physical damage, or an adversary might be immune to a damage type altogether.

- **Physical damage** is dealt through mundane physical blows, usually without the aid of magic. Most standard blades and bows deal physical damage.
- **Magic damage** is dealt through magical means. Most harmful spells deal magic damage.

■ DIRECT DAMAGE

Direct damage is physical or magic damage that Armor Slots can't be used to reduce. For example, if a character is *Poisoned* by a creature's attack, they might take 1d10 direct physical damage each time they act, which their Armor Slots can't be used to reduce.

■ RESISTANCE AND IMMUNITY

Some abilities, spells, items, and other effects grant resistance that reduces damage, or immunity that prevents it. If the text doesn't specify whether resistance or immunity applies to physical or magic damage, the effect applies to both.

When a creature has **resistance** to a damage type, they halve damage of that type before comparing it to their damage thresholds. For example, when your character deals 26 physical damage to a creature with physical resistance, the creature only takes 13 physical damage.

If multiple features grant the same kind of resistance, they only count as one source of resistance. For example, if two different spells both provide a character resistance to physical damage, incoming damage is still only halved.

When a creature has **immunity** to a damage type, they do not take any damage from an attack that deals damage of that type.

If your character has resistance or immunity plus another way to reduce damage (such as marking an Armor Slot), apply the resistance or immunity first. You can then use other methods to reduce the damage further. If an attack deals both physical and magic damage, you can only benefit from resistance or immunity if you are resistant or immune to both damage types.

REACTION ROLLS

Some moves prompt a reaction roll. This is a roll in response to an attack or a hazard, representing your effort to avoid or withstand the effect.

Reaction rolls work similarly to action rolls, except they don't generate Hope, Fear, or additional GM moves. Additionally, other characters can't help you on a reaction roll—every second counts, so you'll have to handle this alone!

When you make a reaction roll, the GM tells you what trait to use, then you make a roll with the Duality Dice as if it were an action roll. As with action rolls, if you want to add a bonus to your reaction roll, you must decide to do so before you roll. An effect requiring a reaction roll often says something like: "The target must succeed on an Agility Reaction Roll (14) or take 3d12 physical damage." In this case, if the target fails to meet or exceed the Difficulty of 14, they take the damage from the effect.

> **Example:** *The GM describes a mage's explosive spell hurtling toward Nolan's rogue Lavelle, then asks Nolan to make a reaction roll using Agility. Nolan rolls his Duality Dice, adds his Agility, and gets a 19, beating the assigned Difficulty of 16. It's a success! The GM asks Nolan to describe how Lavelle avoids the attack.*

If you critically succeed on a reaction roll, you don't clear a Stress or gain a Hope, but you do ignore any effects that would still impact you on a success (such as taking damage or marking Stress).

Adversaries also make reaction rolls, though they follow slightly different rules (see the "Adversary Reaction Rolls" section on page 161).

ADVANTAGE AND DISADVANTAGE

Some features let you roll with advantage or disadvantage on an action or reaction roll.

Advantage represents an opportunity that you seize to increase your chances of success. When you roll with advantage, you add a d6 advantage die to your total.

Disadvantage represents an additional difficulty, hardship, or challenge you face when attempting an action. When you roll with disadvantage, you subtract a d6 disadvantage die from your total.

Some of your abilities might automatically grant you advantage or impose disadvantage on adversaries, but the GM can also choose to give you advantage or disadvantage on any roll when it fits the story. Unique rules for advantage come into play when an ally is helping you with a roll, so see the earlier "Help an Ally" section on page 90 for more information.

Advantage and disadvantage always cancel each other out when applied to the same roll, so you'll never roll both at the same time. For example, if the GM gives you disadvantage on a roll but you gain advantage from a domain ability, the two cancel each other out and the roll is made without a d6 advantage or disadvantage die. In this way, if you have two sources of advantage and one of disadvantage, one of the advantage dice and the disadvantage die cancel each other out, so you would have advantage on the roll.

NPCs can also roll with advantage (or disadvantage), but when they do, the GM rolls an additional d20 and picks the highest (or lowest) result (see the "Giving Advantage and Disadvantage" section on page 160).

Tip: Some moves or effects require you to add or subtract a d6 for reasons other than advantage or disadvantage. If you find yourself both adding and subtracting a d6 for any reason, roll neither, since they cancel each other out.

BATTLING ADVERSARIES

The flow of combat in Daggerheart is malleable and driven by the dice. The player characters pass the spotlight between themselves, making moves until someone fails a roll or rolls with Fear, or until the GM spends a Fear to interrupt the players' turns. When play passes to the GM, the GM can make a move to spotlight an adversary—and, if they wish, can spend any number of Fear to spotlight that many additional adversaries.

A spotlighted adversary can take any action the fiction demands of them, but most of the time, they'll do one of the following:

- Move within Close range and make a standard attack.
- Move within Close range and use an adversary action.
- Clear a condition.
- Sprint within Far or Very Far range on the battlefield.

Conditions and ranges are described in the upcoming "Conditions" and "Maps, Range, and Movement" sections, but the following example provides a brief overview of what it looks like when the GM takes their turn. Once the GM has finished, play passes back to the PCs.

Example: After Quinn makes an attack roll with Fear for their druid Shepherd, play moves to the GM. The GM spotlights a nearby adversary who is temporarily Vulnerable*, and describes them breaking free from the vines that are binding them to remove the* Vulnerable *condition. The GM has 6 Fear available, so they spend 1 to spotlight the adversary Shepherd just hit with their shortstaff. The GM describes the adversary pulling their warhammer out of the mud and swinging at Shepherd's ribs. The adversary succeeds on the attack, then rolls for damage and totals it for 9 physical damage. This damage falls above Shepherd's Major threshold, but Quinn marks an Armor Slot and reduces the damage by one tier to Minor instead, marking 1 Hit Point.*

Spending another Fear to shift the spotlight again, the GM describes an additional adversary sprinting all the way across the battlefield to get to the massive bell that would signal reinforcements. As the adversary prepares to ring it, the GM returns play to the players, asking, "What do you want to do?"

DOMAIN CARDS

As introduced in the "Domains" section of chapter 1, your active domain cards grant you special abilities or spells. Unless a domain card states otherwise, you can use it as many times as you wish, for as long as it remains in your loadout.

LOADOUT AND VAULT

You can have a maximum of five active domain cards in your **loadout** at any one time. Your subclass, ancestry, and community cards don't count toward that limit and are always active. At lower levels, you won't have enough cards that you need to make selections, but once you have six or more domain cards, you need to choose which to keep in your loadout and which to store in your vault.

Cards in your loadout can be held in your hand, placed on the table next to your character sheet, or made accessible through other means. Do whatever makes it easiest to use them. Any cards in your loadout are considered active, and you're free to use them during play.

Your **vault** holds any domain cards that are inactive and not currently in your loadout. Vault cards should be kept somewhere out of the way, but close enough that they're available if they need to be accessed during a session if you want to swap them into your loadout. A few features require you to permanently place a card in your vault. When this happens, that card is removed from play. You can't move such a card back into your loadout by any means, nor can you choose it again when you gain a level.

SWAPPING CARDS

When you start a rest, you can swap cards between your loadout and your vault. You must do so before you use any downtime moves. If you have fewer than five cards in your loadout, you can add cards from your vault to your loadout until you have five active cards.

When you're not resting, you can still swap cards into your loadout, but it's stressful to do so! To immediately switch a card from your vault to your loadout, mark a number of Stress equal to the vaulted card's Recall Cost (located in the top right of the card next to the lightning bolt symbol). When you do, switch it for another domain card in your loadout and place that card into your vault. If you currently have fewer than five domain cards in your loadout, you can pay the Recall Cost and place a card from your vault into your loadout without trading out a card for it.

Swapping When You Level Up

If your loadout is full when you level up and gain a new card, you can immediately move one of your active cards into your vault and add the new card to your loadout at no cost.

USAGE LIMITS

Some domain cards have an exhaustion limit that restricts how often you can use that card (for example, once per long rest). If you use that card, you'll need a way to remember that it's temporarily unavailable. You might choose to take that card out of your hand and place it face down on the table, turn it on its side or upside down, or any other method to remind yourself that you've already used it. If a card allows for a certain number of uses, you could add a token to it each time you activate it to keep track of how many times you've used it.

ADDING TOKENS TO CARDS

A feature might ask you to add a number of tokens to a domain card. When you do, put the card on the table, grab the appropriate number of character tokens, and place them on the card. These tokens are used to track certain effects, but they don't affect your ability to add tokens to your roll to represent your modifiers, or anything else you might need to use them for. If you still have tokens on your card at the end of a session and aren't told to clear them, ensure you track the number you have left to place back on that card at the beginning of the next session.

Tip: Some spells or abilities remain in effect once you activate them. Unless stated otherwise, this does not prevent you from activating another spell or ability—you can use two (or more) at the same time.

Level

Domain

Recall Cost

6

2

SPELL

RESTORATION

After a long rest, place a number of tokens equal to your Spellcast trait on this card. Touch a creature and spend any number of tokens to clear 2 Hit Points or 2 Stress for each token spent.

You can also spend a token when touching a creature to end the *Vulnerable* condition or heal physical or magical ailment (the GM might require additional tokens depending on the severity of the ailment).

When you take a long rest, clear all spent tokens.

Mat Wilma   DH Core 240/270 | Daggerheart © Darrington Press 2025

CONDITIONS

Some features impose a condition on your character (or an adversary). These are effects that grant specific benefits or drawbacks to the target they are applied to. Daggerheart has three primary conditions—*Hidden*, *Restrained*, and *Vulnerable*—which are explained in the following sections. Some features apply other unique conditions whose effects are detailed within the text of the feature. Unless otherwise noted, the same condition can't be stacked—applied more than once—on one target.

◼ HIDDEN

While you're out of sight from all foes and they don't know where you are, you gain the **Hidden** condition. While *Hidden*, any rolls against you have disadvantage. After an adversary moves to where they would see you, you move into their line of sight, or you make an attack, you are no longer *Hidden*.

Example: While scouting a temple to the Fallen Gods and investigating some large statues depicting ancient battles, Rune hears footsteps coming. He declares that he's going to duck behind the statues and wait for whoever's approaching to pass. The GM decides that the statues provide ample cover and doesn't call for a roll. Rune is now considered Hidden. *The GM describes snippets of dialogue as two cultists walk right by Rune as he sticks to the shadows, then asks Rune what he wants to do next. If Rune had attacked the cultists as they passed, he'd have lost the* Hidden *condition after doing so.*

◼ RESTRAINED

When you gain the **Restrained** condition, you can't move until this condition is cleared, but you can still take actions from your current position.

◼ VULNERABLE

When you gain the **Vulnerable** condition, you're in a difficult position within the fiction. This might mean you're knocked over, scrambling to keep your balance, caught off guard, magically enfeebled, or anything else that makes sense in the scene. When a creature becomes *Vulnerable*, the players and GM should work together to describe narratively how that happened. While you are *Vulnerable*, all rolls targeting you have advantage.

CLEARING CONDITIONS

When an effect imposes a condition, it might say it is "temporary," or only applies "temporarily," the condition is a **temporary condition**. You can make an action roll, with a Difficulty determined by the GM, to try clearing a temporary condition, though the GM might have you clear it in another way. As always, this action roll should be described and negotiated narratively. For example, if your character is Vulnerable, you might describe how you leap through the fire that's trapped you, free your legs from the vines entangling them, or use a canteen to wash noxious venom off your body.

If an adversary is affected by a temporary condition, the GM can use their move to spotlight the adversary and show how they clear the condition. This doesn't require a roll but does use that adversary's spotlight. When it fits the story, the GM might clear the condition in other ways instead.

Special conditions are cleared only when specific requirements are met, such as completing a certain action or using an item. The requirements for clearing these conditions are stated in the text when the condition is applied. The GM can offer alternative ways to clear these conditions at their discretion.

◼ ENDING OTHER TEMPORARY EFFECTS

Some effects aren't a condition, but state that they are **temporary**. They can be ended in the same way as temporary conditions. If you initiate the effect (for example, by using the "Ranger's Focus" class feature), the GM can end it by spotlighting the adversary and describing how they get rid of it. Conversely, if the GM initiates the effect (such as an adversary creating a temporary cloud of poisonous gas), you can try to end it by making an appropriate action roll.

COUNTDOWNS

Sometimes the GM, or a specific mechanic, utilizes a **countdown**. Countdowns are a way for the table to keep track of a coming event, which you do by setting a die to a certain value, then ticking that number down until it reaches 0. A countdown might tick down every time an action roll is made, every time a PC rolls with Fear, during each downtime, or any other parameter (either set by the specific mechanics or by the GM to reflect the fiction). To learn more about countdowns, see the "Countdowns" section on page 162.

MAPS, RANGE, AND MOVEMENT

You can play Daggerheart using theater of the mind or maps and miniatures. The following section assumes you are using a map for combat.

MAPS

Your group might want to use maps to clarify positioning, showcase an environment, or simply because you enjoy maps and miniatures. Maps can be as elaborate or as simple as you like. When it's time to use an area map, everyone places their miniatures on it. Use the range measurements discussed below as general reference when building out a map.

RANGE

Daggerheart measures most distance by **range**. Each range includes an example of how you might quickly estimate distance on a physical map on which 1 inch represents roughly 5 feet. However, these ranges aren't intended to be precisely measured during play. The suggested estimates are a quick guide for the GM to determine ranges during a scene, and they might adjust the map as needed. The map should always adjust to capture the fiction, rather than the fiction changing to match the map.

If the table decides not to implement a map, you still use range, but in a more abstract way. Distances are simply a part of the theater of the mind, and it's up to the GM to decide roughly how far away everything is.

Melee: Your character is within touching distance of the target. A PC can touch targets up to a few feet away from them. Keep in mind that Melee range might be greater for especially large NPCs.

Very Close: Your character is very close to a target, able to see their fine details, and can reach them within moments. This is about 5–10 feet away. While in danger, a character can move into Melee range with anything that's within Very Close range of them as part of their action. *Anything on a battle map that is within the shortest length of a game card (2–3 inches) can usually be considered within Very Close range.*

Close: Your character is close enough to a target to see their prominent details, such as across a room or in a neighboring market stall. This is about 10–30 feet away. While in danger, a character can move into Melee range with anything that's within Close range of them as part of their action. *Anything on a battle map that is within the length of a standard pen or pencil (5–6 inches) can usually be considered within Close range.*

Far: Your character is far enough away that they can see the appearance of a target, but not in detail, such as across a small battlefield or down a large corridor. This is about 30–100 feet away. While a character is in danger, the GM might call for them to make an Agility Roll to safely move into Melee range with something that's within Far range of them. *Anything on a battle map that is within the length of the long edge of a standard piece of paper (11–12 inches) can usually be considered within Far range.*

Very Far: Your character is very far away, such as across a large battlefield or down a long street, and while they might be able to see the shape of a person or object, they likely can't make out any details. This is about 100–300 feet away. While a character is in danger, the GM might call for them to make an Agility Roll to safely move into Melee range with something that's within Very Far range of them. *Anything on a battle map that is beyond Far range, but still within the bounds of the conflict or scene, can usually be considered within Very Far range.*

Out of Range: Anything beyond a character's Very Far range is Out of Range and usually can't be targeted.

Tip: When specific distances are referenced in the game (such as a wall that is 30 feet high or a rope that is 50 feet long) it is to give a sense of scale in the fiction. In this same way, you shouldn't feel restricted to using ranges when describing the world—just when the characters interact with it mechanically.

◼ USING RANGE

When a weapon, spell, ability, item, or other effect states a range, this refers to its maximum range. Unless otherwise noted, an effect can also be used at closer ranges. For example, the shortstaff weapon has a Close range, so it can be used against a target within Close, Very Close, or Melee range.

Range is always measured from the source of the effect (often the attacker or caster), unless the feature says otherwise. This means targets in any direction of your character within the specified range can be hit. Some effects specify a certain area within their range, such as an effect that targets "all adversaries in front of you." In that example, you choose which direction your character is facing, then target each adversary in a 180-degree field in front of them. If an effect targets creatures in a line, then you target each adversary in a straight line within the specified range. As with other rules in this game, use common sense when interpreting these effects—they're there to support the story, not limit it.

Other effects can move your character or a target from one range to another, such as an effect that lets you "knock back a target to Close range." These effects typically clarify which range band a target is moved to (you can always move them closer by choice). But if the fiction doesn't support it—for example, if an adversary hits a wall and can't be moved any farther—then follow the fiction rather than the exact range.

A map is just an approximation of the scene playing out in everyone's head, so scale, distance, and details don't need to be perfectly accurate. The map and the miniatures on it should never limit the table's imagination, only provide spatial context so everyone is on the same page.

OPTIONAL RULE: DEFINED RANGES

If your table would rather operate with more precise range rules, you can use a 1-inch grid battle map during combat. If you do, use the following guidelines for play:

- **Melee:** 1 square
- **Very Close:** 3 squares
- **Close:** 6 squares
- **Far:** 12 squares
- **Very Far:** 13+ squares
- **Out of Range:** Off the battlemap

MOVEMENT

When you're not in a dangerous, difficult, or time-sensitive situation, you don't need to worry about how fast you move. However, when you're under pressure or in danger, the following rules apply.

■ MOVING CLOSE DURING ACTIONS

When you make an action roll, you can also move to a location within Close range as part of that action. This location must be somewhere your character could plausibly and easily reach within the narrative. If you want to move somewhere beyond your Close range but within Far or Very Far range, or if you want to reach an area that's not easily accessible (such as one that requires climbing, swimming, or jumping), use the following rules.

■ MOVING FAR OR MOVING AS YOUR PRIMARY ACTION

If you're not already making an action roll, or if you want to move farther than your Close range, you'll need to succeed on an Agility Roll to safely reposition yourself. The GM sets this Difficulty depending on the situation. On a failure, you might only be able to move some of that distance, the adversaries might act before you can make it, or a hazard might prevent you from moving at all.

■ ADVERSARY MOVEMENT

When an adversary is in the spotlight and makes a move such as attacking a target or picking a lock, the GM can move them within their Close range as part of their action. For example, the adversary can pick a lock to open a door and then move within their Close range toward a PC inside the room beyond. If the GM wants to move the adversary somewhere beyond their Close range but within their Far or Very Far range, this uses their entire action, but the adversary doesn't have to succeed on an Agility Roll like a PC would.

TARGETS AND GROUPS

An effect often asks you to choose a target within range. This means you choose a single creature to affect. When it makes sense in the story, you can ask the GM if you can target a single object in range, rather than an adversary, adjusting the effects as needed. If an effect allows for multiple targets, you can choose any that fall within the parameters of the effect.

To affect a **group** of targets, those targets must be clumped together in an area within Very Close range of a point you choose. You can always ask the GM if adversaries would be considered a group before you make a move. Regardless of the number of targets, you only make one attack roll and compare its result to the Difficulty of each eligible target to determine which creatures you succeed against. When your attack deals damage to more than one target, roll damage once and apply the total to each target the attack succeeded against.

COVER, LINE OF SIGHT, AND DARKNESS

Sometimes during a fight, you might seek **cover**, such as by diving behind a small barricade or ducking behind a tree. When you take cover behind something that makes attacking you more difficult (but not impossible), attack rolls against you are made with disadvantage.

You usually can't be targeted if you're entirely behind a substantial structure like a wall, even if you're technically in range of the attack. However, you might still be affected by nearby explosions or similar effects that target an area.

Some effects require the target to be within your **line of sight**. You have line of sight if you can see the target (though in some situations, the GM might decide the effect can't go through a glass window or similarly transparent object). For alternatives to this rule for blind characters, see the "Adjusting Abilities and Spells" section on page 82.

Darkness can also make certain actions more challenging. The GM should reflect this by raising the Difficulty of action rolls or imposing disadvantage on rolls made by the PCs.

GOLD

Gold tracks how much wealth you have collected on your journey. You can spend it on things such as items, consumables, and equipment. Some campaigns are more or less focused on gold as a reward, so check with your GM about how much your game will prioritize gold. There are no set prices in this book for weapons, armor, and loot, so you aren't locked out of adding exciting equipment if you're not playing a gold-focused campaign. The GM determines equipment prices based on the amount of gold given out during your sessions.

Gold is measured in **handfuls**, **bags**, and **chests**, with 10 handfuls to 1 bag, and 10 bags to 1 chest. When you have marked all of the slots in a category and you gain another gold reward in that category, you mark a slot in the following category and clear all the slots in the current one. For example, if you have 9 handfuls and gain another, you instead mark 1 bag and erase all handfuls. If you have 9 bags and gain another, you mark 1 chest and erase all bags. If you ever have more than 1 chest, you'll need to store some of your gold before you can take more.

The value of gold is abstracted so you don't need to track it precisely. If you want to tip a coin to a waiter or flip a coin into a well, you don't need to worry about it.

> **OPTIONAL RULE: GOLD COINS**
>
> If your group wants to track gold more granularly, you can add **coins** as your lowest denomination. Following the established pattern, 10 coins equal 1 handful.

DOWNTIME

A party can choose to rest before they continue forward on their journey, and when they do, each PC has the chance to make two **downtime moves**. Though downtime is their chance to recover from the dangers they've faced, it's also an opportunity for characters to have important, emotional scenes with each other—to learn more about one another in their quiet moments together and have character-centric conversations they might not have had time for during big battles or high-intensity exploits.

When the characters decide they want to have downtime, they choose between a short rest and a long rest. A party can take up to three short rests before their next rest must be a long rest. If a short rest is interrupted (such as by an adversary's attack), characters don't gain its benefits. If a long rest is interrupted, the characters instead gain the benefits of a short rest (even if they've already had three short rests).

■ SHORT REST

A **short rest** is when the characters stop to catch their breath, taking a break for about an hour. Each player can swap any domain cards in their loadout for cards in their vault, then choose two of the following moves (or choose the same move twice). Some short rest downtime moves require you to use your tier as a value. This is covered in the upcoming "Tiers of Play" section.

Tend to Wounds: Describe how you hastily patch yourself up, then clear a number of Hit Points equal to 1d4 + your tier. You can do this to an ally instead.

Clear Stress: Describe how you blow off steam or pull yourself together, then clear a number of Stress equal to 1d4 + your tier.

Repair Armor: Describe how you quickly repair your armor, then clear a number of Armor Slots equal to 1d4 + your tier. You can do this to an ally's armor instead.

Prepare: Describe how you prepare yourself for the path ahead, then gain a Hope. If you choose to Prepare with one or more members of your party, you each gain 2 Hope.

■ LONG REST

A **long rest** is when the characters make camp, relax for a few hours, and get some rest. Each player can swap any domain cards in their loadout for cards in their vault, then can choose two of the following moves (or choose the same move twice).

Tend to All Wounds: Describe how you patch yourself up, then clear all Hit Points. You can do this to an ally instead.

Clear All Stress: Describe how you blow off steam or pull yourself together, then clear all Stress.

Repair All Armor: Describe how you spend time repairing your armor, then clear all Armor Slots. You can do this to an ally's armor instead.

Prepare: Describe how you prepare for the next day's adventure, then gain a Hope. If you choose to Prepare with one or more members of your party, you each gain 2 Hope.

Work on a Project: Establish or continue work on a project (see the following "Working on a Project in Downtime" section).

■ WORKING ON A PROJECT IN DOWNTIME

If a PC wants to pursue a project that would take them a substantial amount of time but that they can work on during a long rest, they should first discuss it with the GM. This could involve deciphering an ancient text, crafting a new weapon, or something similar. Projects usually involve a Progress Countdown (see the "Countdowns" section on page 162). Each time a PC takes the Work on a Project downtime move during a long rest, they either automatically tick down their countdown, or the GM might ask them to make an action roll to gauge their progress.

For more information on projects, see the "Using Downtime" section on page 181.

■ DOWNTIME CONSEQUENCES

Downtime allows for quiet scenes between characters, encouraging personal moments in the story—but the world doesn't stop when you rest! The GM also takes actions during downtime. On a short rest, they gain 1d4 Fear. On a long rest, they gain an amount of Fear equal to 1d4 + the number of PCs, and they can advance a long-term countdown.

■ REFRESHING FEATURES DURING DOWNTIME

Resting can refresh the availability of your features and end some temporary effects.

- Any effects that last until your next rest end when your character finishes either a long or a short rest. Likewise, any features that can be used a number of times per rest refresh when your character finishes either a long or a short rest.

- Any effects that last until your next long rest end when your character finishes a long rest. Likewise, any features that can be used a number of times per long rest only refresh when your character finishes a long rest.

■ ONCE PER SESSION FEATURES

Some features say you can use them "once per session." These features don't refresh during rests, but instead are available again at the start of your next Daggerheart session. If your table decides to play a long session, the GM might decide that all "once per session" abilities are refreshed during a break in play instead.

DEATH

Facing death is an important part of being an adventurer and having a character die can be an exciting end to a story, as well as an opportunity for the player to transition into something new. In Daggerheart, when you mark your last Hit Point, you must make a **death move**.

■ DEATH MOVE

Choose one of the following options:

Blaze of Glory: Your character embraces death and goes out in a blaze of glory. Take one action (at the GM's discretion), which critically succeeds, then cross through the veil of death.

Avoid Death: Your character avoids death and faces the consequences. They temporarily drop unconscious, and then you work with the GM to describe how the situation worsens. Your character can't move or act while unconscious, they can't be targeted by an attack, and they return to consciousness when an ally clears 1 or more of their marked Hit Points or when the party finishes a long rest. After your character falls unconscious, roll your Hope Die. If its value is equal to or under your character's level, they gain a scar (see the following "Scars" section).

Risk It All: Roll your Duality Dice. If the Hope Die is higher, your character stays on their feet and clears an amount of Hit Points or Stress equal to the value of the Hope Die (divide the Hope Die value between Hit Points and Stress however you'd prefer). If the Fear Die is higher, your character crosses through the veil of death. If you critically succeed, your character stays up and clears all Hit Points and Stress.

If a player makes a death move that results in their character dying, they should work with the GM before the next session to build a new character at the current level of the rest of the party.

■ SCARS

If you choose to avoid death, you might take a **scar**. If you do, cross out one of your Hope slots. You can't use this slot anymore. The narrative impact of this scar is up to you. For example, you might now bear a physical scar, a painful memory, or a deep fear. Scars are permanent, but can be healed at the GM's discretion as a downtime project, a reward for a quest focused on healing that scar, or something with similar narrative weight.

If you ever cross out your last Hope slot, it's time to end your character's journey. Work with the GM to find a fitting way for the party to say goodbye to them at the end of the session, then prepare a new character at the current level of the rest of the party for the next time you play.

■ RESURRECTION

It is possible to resurrect a dead character, though it's often a long, difficult, and costly process. If a party decides to take this path upon a character's death, the GM details the steps the party must take to complete the resurrection.

There is also the "Resurrection" spell available from the Splendor domain at level 10.
ADDITIONAL RULES

The following rules apply to many aspects of the game.

ROUNDING UP

This game doesn't use fractions; if you need to round to a whole number, round up unless otherwise specified.

REROLLING DICE

When a feature allows you to reroll a die, you always take the new result. You do not choose between the first result and the new one, unless the feature specifically says that you can.

INCOMING DAMAGE

When a feature refers to incoming damage, it's describing the damage amount a target is currently receiving. For example, the dwarves' "Increased Fortitude" feature allows a PC to spend 3 Hope to halve incoming physical damage. This means that the GM tells the player how much damage their PC is taking from an attack. The player can then decide to spend 3 Hope to take half as much damage instead. If the player wanted to do this again on an additional attack, they'd need to spend another 3 Hope.

SIMULTANEOUS AND STACKING EFFECTS

If two or more effects can apply to a situation, and the rules don't tell you which order to apply them in, the player controlling the effects (including the GM) can apply the effects in any order. For example, if one ability lets you spend a Hope to retaliate after an attack, and another ability lets you gain a Hope when you mark a Hit Point, you can decide to gain the Hope first, then spend it to make the attack. Similarly, if you have multiple moves that can trigger in a situation (such as two moves that occur "after a successful attack"), you can use them together and choose in which order to activate them.

If you want to apply two or more effects, they must both be able to successfully resolve to be used together. Otherwise, you must choose which one applies. For example, if you can clear a Stress every time you roll with Fear, and you have an ability that lets you make a roll with Fear into a roll with Hope, you can't clear a Stress and then change the roll to be with Hope instead of Fear. As always, if there's any uncertainty, the GM arbitrates how effects apply.

At the GM's discretion, most effects can stack. For example, if two bards give you a Rally Die, you can spend both of them on the same roll. However, you can't stack conditions, advantage or disadvantage, or other effects that say you can't.

ONGOING SPELL EFFECTS

Once a spell's effect is in play, as long as it doesn't mention an expiration, it continues until a PC or the GM ends it, or until the fiction changes in a way that would naturally stop it. This means that if you cast a spell and then switch out that domain card for another in your vault, the spell's effect can remain active, even though that card is no longer in your loadout.

SPENDING RESOURCES

If a rule tells you to spend a resource, you lose that resource once you spend it. For example, when you spend a Hope on an ability, you clear a Hope that you've marked on your character sheet. Similarly, if a bard gives you a Rally Die, when you choose to spend it and add its result to your roll, you lose that die and return it to the other player.

Unless an effect states otherwise, you can't spend Hope or mark Stress multiple times on the same feature to increase or repeat its effects on the same roll. For example, if a feature says you can "spend a Hope to add 1d6 to the damage roll," you can't spend 2 Hope and add 2d6 instead. If a feature says "mark a Stress to gain a +3 bonus to your Spellcast Roll," you can't mark 2 Stress and gain a +6 bonus.

However, on an effect like the Guardian's Hope Feature, which says "Spend 3 Hope to clear 2 Armor Slots," you can spend 6 Hope to clear 4 Armor Slots, because this effect isn't applying its bonus to a specific roll—you're just activating the feature more than once.

USING FEATURES AFTER A ROLL

Some features let you affect a roll after the result has been totaled—such as the seraph's "Prayer Dice," the faerie's "Wings," or the Grace domain's "Endless Charisma." In this case, you use it after the GM declares if the roll succeeds or fails, but before the narrative consequences unfold (such as damage being rolled) or another dice roll is made.

END OF THE SCENE

Sometimes certain effects, bonuses, or conditions state that they last until the end of the scene. At the GM's discretion, a scene continues until the current narrative situation has played out. A chase scene might end when the PCs have caught their quarry or when they've escaped pursuit. A battle scene usually ends when one side has fled, surrendered, or been entirely defeated. If there's uncertainty about when a scene is considered to be over, throw it to the table and see what the players think makes sense. You don't have to linger in a scene after the most engaging actions and interactions have occurred. If you want to play out their implications or process the emotions but the heat of the moment has passed, that aftermath can take place in its own scene.

PLAYER BEST PRACTICES

This section provides guidance for player best practices and how to get the most out of Daggerheart. When considering these best practices, remember the "Player Principles" section in this book's introduction.

→ Embrace danger.
→ Use your resources.
→ Tell the story.
→ Discover your character.

■ EMBRACE DANGER

The life of an adventurer is a dangerous one, often filled with treacherous paths, monstrous threats, and powerful foes. Along the way, you'll face difficult choices and life-threatening peril. It's important as adventurers to embrace this danger as part of the game. Playing it safe, not taking risks, and overthinking a plan can often slow the game to a halt.

Don't be afraid to leap in headfirst and think like a storyteller, asking what the hero of a novel or a TV show would do here? Think about not only what choice might be obvious, but what story could be most interesting, or how your character might approach the situation differently because of their background. Remember that you are not your character and that it's okay to put them into harm's way, push them to their limits, and take big risks if it's right for the story. Their trials and their failures are not yours. We might always want to win, but players win by collaborating on a compelling narrative, not by having successful dice rolls every time.

■ USE YOUR RESOURCES

Player characters in Daggerheart have access to many resources that help them in their heroic journey. Chief among them is Hope, a resource that frequently comes and goes over the course of a session. You'll gain a Hope roughly every other time you make an action roll, so you're encouraged to spend it on Hope Features, to Help an Ally, to Utilize an Experience, to initiate a Tag Team Roll, and to use other features and abilities that cost Hope.

Stress, Hit Points, and Armor are your most essential other resources. They interact in varying ways that you can manipulate and optimize with domain abilities, ancestry features, class features, and more. For players excited about the crunch of interacting mechanics, look to those resources and think about how to manage them to get the most out of your character.

■ TELL THE STORY

You are an equal partner in telling the story alongside everyone else at the table. The GM presents opportunities and challenges for the party along the way, but they are not the sole author of the fiction you're exploring together. Daggerheart is a collaborative game where everyone is responsible for bringing the tone, feel, and themes they're interested in to the group. If you have an idea for a description or a detail to add, feel free to offer it to the table. If you want a specific emotional arc to be a part of your story, talk to your GM about finding opportunities to include it, and seize those opportunities when they show up. When you reach these moments in the story, take the time to showcase the emotions driving your character forward and the desires spurring their actions.

Your role as a player in Daggerheart is to guide your character along the best story arc you can, not necessarily to always make the most tactical or strategic moves. Think about what you're interested in saying thematically with the narrative, and let that be expressed through your character.

■ DISCOVER YOUR CHARACTER

It's okay not to know everything about your character when you sit down to play for the first time, the tenth time, or even the hundredth time. When the game begins, you only have a few pieces of information to go on—such as what your character might be good at, some backstory, their relationships with a few other characters, and what kind of weapon they carry. That's perfectly fine—because you'll build on your character throughout the game. Think of character creation as an ongoing process. The GM might turn to you to ask something about your past that you haven't worked out or thought of yet. You could take this opportunity to invent something on the spot, or ask them to talk through some ideas with you before you settle on one. Try to use the game's fiction to discover the different aspects of your character, and let those discoveries flow into the decisions they make.

LEVELING UP

When your party reaches a milestone in a campaign, the GM will tell you that it's time to level up. How often this happens is up to your GM and your group's narrative preferences, but most groups play at least three sessions between levels.

OVERVIEW

All party members level up at the same time. When you level up your character, you can upgrade their character traits and features. The following sections provide step-by-step instructions for leveling up a character.

Generally, characters begin their journey at level 1 and end their journey at level 10, but if a party loses a character in the middle of a campaign, the GM should have the character's player make a new character at the appropriate level of the party.

TIERS OF PLAY

Levels in Daggerheart are divided into tiers.

> → **Tier 1** encompasses level 1 only.
> → **Tier 2** encompasses levels 2–4.
> → **Tier 3** encompasses levels 5–7.
> → **Tier 4** encompasses levels 8–10.

Your tier affects your damage thresholds, level achievements, and more.

LEVEL ACHIEVEMENTS

When your character levels up, first take any **level achievements** they have earned. These achievements are given in at the top of the tier block, found on the lower half of your class guide.

- **At level 2**, you gain an additional Experience and add it to your character sheet with a modifier of +2. You also gain a permanent +1 bonus to your Proficiency.
- **At level 5**, you gain an additional Experience and add it to your character sheet with a modifier of +2. You also gain a permanent +1 bonus to your Proficiency. You clear any marks on each character trait you've previously increased and marked, allowing you to increase those traits again later.
- **At level 8**, you gain an additional Experience and add it to your character sheet with a modifier of +2. You also gain a permanent +1 bonus to your Proficiency. You clear any marks on each character trait you've previously increased and marked.

Tip: For help with Experiences, see the "Step 7: Create Your Experiences" section on page 20.
CHOOSING ADVANCEMENTS

Next, you have a set list of options for upgrading your character. You can choose any two options with unmarked slots. Some options have multiple slots, meaning they can be chosen more than once. When you choose your advancement, mark the appropriate slot. Once all of an option's slots have been marked, you can't take that option again.

TIER 2: LEVELS 2–4

At level 2, gain an additional Experience at +2 and gain a +1 bonus to your Proficiency.

Choose two options from the list below and mark them.

- Gain a +1 bonus to two unmarked character traits and mark them.
- Permanently gain one Hit Point slot.
- Permanently gain one Stress slot.
- Permanently gain a +1 bonus to two Experiences.
- Choose an additional domain card of your level or lower from a domain you have access to (up to level 4).
- Permanently gain a +1 bonus to your Evasion.

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

TIER 3: LEVELS 5–7

At level 5, gain an additional Experience at +2 and clear all marks on character traits. Then gain a +1 bonus to your Proficiency.

Choose two options from the list below or any from the previous tier and mark them.

- Gain a +1 bonus to two unmarked character traits and mark them.
- Permanently gain one Hit Point slot.
- Permanently gain one Stress slot.
- Permanently gain a +1 bonus to two Experiences.
- Choose an additional domain card of your level or lower from a domain you have access to.
- Permanently gain a +1 bonus to your Evasion.
- Take an upgraded subclass card. Then cross out the multiclass option for this tier.
- Increase your Proficiency by +1.
- Multiclass: Choose an additional class for your character, then cross out an unused "Take an upgraded subclass card" and the other multiclass option on this sheet.

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

TIER 4: LEVELS 8–10

At level 8, gain an additional Experience at +2 and clear all marks on character traits. Then gain a +1 bonus to your Proficiency.

Choose two options from the list below or any from the previous tier and mark them.

- Gain a +1 bonus to two unmarked character traits and mark them.
- Permanently gain one Hit Point slot.
- Permanently gain one Stress slot.
- Permanently gain a +1 bonus to two Experiences.
- Choose an additional domain card of your level or lower from a domain you have access to.
- Permanently gain a +1 bonus to your Evasion.
- Take an upgraded subclass card. Then cross out the multiclass option for this tier.
- Increase your Proficiency by +1.
- Multiclass: Choose an additional class for your character, then cross out an unused "Take an upgraded subclass card" and the other multiclass option on this sheet.

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

- *When you choose to increase two unmarked character traits and mark them:* Choose two unmarked character traits and gain a permanent +1 bonus to them. You can't increase these stats again until the next tier (when your level achievement allows you to clear those marks).
- *When you choose to permanently add 1 or more Hit Point slots:* Darken the outline of the next rectangle in the Hit Point section of your character sheet in pen or permanent marker.

- *When you choose to permanently add 1 or more Stress slots:* Darken the outline of the next rectangle in the Stress section of your character sheet in pen or permanent marker.

- *When you choose to increase an Experience:* Choose an Experience on your character sheet and gain a permanent +1 bonus to it.

- *Take an additional domain card of your level or lower from a domain you have access to:* You can choose an additional domain card from your class's domains at your level or lower. If you have multiclassed, select a card from your chosen domain at no higher than half your level.

- *When you choose to increase your Evasion:* Gain a permanent +1 bonus to your Evasion.

- *When you choose to take an upgraded subclass card:* Take the next card for your subclass. If you have only the foundation card, take a specialization. If you have a specialization already, take a mastery. You'll also cross out the option to multiclass when you subsequently level up in that tier.

- *When you choose to increase your Proficiency:* Fill in one of the open circles in the "Proficiency" section of your character sheet, then increase your weapon's number of damage dice by 1 (for example, from 2d6 to 3d6). You'll see a black box around the level-up slots. That is because increasing your Proficiency requires you to mark both level-up slots in order to take it as an option.

- *When you choose to multiclass:* You can take certain features and domain cards from another class. You'll see a black box around the level-up slots. That is because multiclassing requires you to mark both level-up slots in order to take it as an option. See the upcoming "Multiclassing" section for details.

RAISING DAMAGE THRESHOLDS

After choosing advancements, raise your character's damage thresholds by +1 (since you always add their current level to their damage thresholds).

TAKING DOMAIN CARDS

Finally, take a new domain deck card at your level or lower, increasing the special abilities your character can use. You can choose one card from any domain deck available to your class. If you share a domain deck with another player, make sure you take each other's preferences into consideration when choosing a card, or that you have multiple copies of a card available.

Additionally, you can also choose to trade out one domain card you already have for a different domain card of an equal level or lower.

Since you can't have more than five domain cards active at a time, once you have six or more domain cards, you need to choose which to keep in your loadout and which to store in your vault.

MULTICLASSING

Starting at level 5, you can choose multiclassing as an option when leveling up. When you multiclass, you get to choose an additional class, select one domain from that class, and gain access to their class feature. Take the appropriate multiclass module and add it to the right side of your character sheet, then choose a foundation card from a subclass of your choice. If that foundation card has a Spellcast trait on it, you can choose to use that trait when making a Spellcast Roll or use the Spellcast trait from your original subclass. If you did not previously have a Spellcast trait and now require one for your multiclass, you must use the Spellcast trait noted on your new subclass.

> **Tip:** *When you multiclass, you must cross out one available "take an upgraded subclass card" option on this tier of your level up sheet, meaning you can't gain the mastery card for any subclass. You also cross out any other multiclass options, as characters can only multiclass once.*

Choose a domain from your new class that you don't already have access to. Moving forward, whenever you get to choose domain cards, you can choose from cards that match your additional domain at half your current level (rounded up). This means a level 5 wizard who decides to multiclass into druid and chooses the Sage domain could choose any Sage domain cards of level 3 or lower.

Any attacks, spells, or other moves you use while multiclassing are always performed at your current level. For example, a level 7 wizard who multiclasses into a druid can use the tier 3 "Beastform" options. If any move you get by multiclassing asks you to use a number of dice equal to your level, use the level on your character sheet. The half-level restriction only applies to selecting domain cards, not the mechanics written on them.

EXAMPLE OF LEVELING UP A CHARACTER

Aliyah's party has just advanced to level 2 and the group is leveling up together. Aliyah finds the warrior class guide to bring Tabby up to level 2.

- First, Aliyah updates Tabby's level to "2" at the top of her character sheet.

- Aliyah then takes her level achievements. She adds a new Experience for Tabby. Because Tabby has been doing a lot of acrobatics and daring jumps, she decides to give her the Always Land on My Feet Experience. This is a new Experience, so it starts with a +2 modifier. Afterward, she increases Tabby's Proficiency to 2 (because she gets a permanent +1 bonus at level 2) and fills in one of the circles in the Proficiency section of her character sheet to reflect the change.

- Next, she looks at the advancement options for levels 2 to 4. She knows she wants to increase Tabby's Agility, since that's her primary trait for combat. She marks "Gain a +1 bonus to two unmarked character traits and mark them." Aliyah chooses Agility and Instinct, raising each by 1 (Tabby now has an Agility of +3 and an Instinct of +2), then marks the circle attached to each trait as a reminder that they can't be raised again until Tabby hits level 5 and clears marks on all traits.

- Following that, Aliyah marks "Permanently gain one Stress slot." She looks at the Stress section of Tabby's character sheet and fills in the outline of one of the dotted squares to represent Tabby's new permanent Stress slot. That means she'll be able to withstand more strain during play.

- She then goes to Tabby's damage thresholds and gains a permanent +1 bonus to both from her level up, increasing her Major threshold from 7 to 8 and her Severe threshold from 14 to 15. Additionally, she updates the damage bonus from her "Combat Training" class feature to +2, as the bonus is equal to her level.

- Lastly, Aliyah asks for the domain decks for Blade and Bone to pick a new domain card at level 2 or lower. At level 2, her options in the Blade deck are "Reckless" and "A Soldier's Bond." Her choices from the Bone are "Strategic Approach" and "Ferocity." Aliyah considers the option to gain and give Hope with "A Soldier's Bond." Since Tabby's Knowledge trait is only 0, she doesn't think "Strategic Approach" is a good choice. In the end, she settles on "Reckless" to give Tabby a better chance of hitting her opponents.

Now Tabby is ready to continue her journey as a level 2 warrior!

EQUIPMENT

This section details the rules for equipping and using weapons and armor, then lists the weapons and armor used in this game.

EQUIPPING, STORING, AND SWITCHING EQUIPMENT

You **equip** weapons and armor to your character by recording them on your character sheet in the "Active Weapons" and "Active Armor" sections. Your character can only attack with weapons, benefit from armor, and gain features from items they have equipped.

■ INVENTORY WEAPONS

As your character acquires new equipment throughout their journey, they can carry two additional weapons (primary, secondary, or any combination of the two) in the "Inventory Weapon" areas of the character sheet, but there's only so much room in your character's pack. The inventory section holds gear your character doesn't have equipped, therefore your character isn't wielding these items and will not gain their benefits.

■ SWITCHING WEAPONS

When your character is in a dangerous situation, you can mark a Stress to equip an Inventory Weapon, moving their previous Active Weapon into the Inventory Weapon section. If your character is in a calm situation or preparing during a rest, they can swap weapons with no Stress cost.

■ SWITCHING ARMOR

Your character can't equip armor while in danger or under pressure. Otherwise, they can equip armor freely, replacing their previous active armor with armor they've purchased or otherwise acquired. Each armor has its own Armor Slots, as recorded in the boxes in that section; if your character switches armor, be sure to keep track of how many Armor Slots you've marked on the old armor, especially if you are giving it to a party member. You can't carry additional armor in your inventory.

When your character switches armor, be sure to add their current level to its base damage thresholds and incorporate any bonuses they might have from other features.

USING WEAPONS

The following sections detail the types of weapons found in Daggerheart, then break down their statistics. When you're ready to review the weapon options, see the "Primary Weapon Tables" and "Secondary Weapon Tables" sections, which list available weapons by tier.

■ PRIMARY AND SECONDARY WEAPONS

Weapons fall into two main categories: primary and secondary.

Primary weapons are the main weapons your character will likely be fighting with during an encounter. A character can only hold one primary weapon at a time, which goes into the "Primary Weapon" area of their character sheet. If you take a two-handed weapon, this is typically the only weapon your character can have active. The list of starting primary weapons, called Tier 1 primary weapons, can be found in the upcoming "Primary Weapon Tables" section on page 115.

Secondary weapons are typically ancillary pieces of equipment that augment your character's fighting, such as shields, daggers, or small swords. If a character's primary weapon is one-handed, we recommend you also take a secondary weapon (but you can't hold your secondary weapon if you switch to a primary weapon that requires two hands). Your character can only hold one secondary weapon at a time, which goes in the "Secondary Weapon" area on their character sheet. The list of starting secondary weapons, called Tier 1 secondary weapons, can be found in the upcoming "Secondary Weapon Tables" section on page 124.

You can make an attack roll with either a primary or secondary weapon your character has equipped, allowing for flexibility in the types of attacks you can make. Many secondary weapons have features that augment another aspect of your character's fighting style—for example, a dagger might grant them extra damage to targets they attack with their primary weapon within Melee range, or a shield might add to your character's Armor Score. Most adventurers choose to at least carry a primary weapon, but for guidance on fighting without a weapon, see the "Unarmed Attack Rolls" section on page 96.

■ THROWING A WEAPON

When you're using a weapon that you could theoretically throw (such as a dagger or an axe), you can throw it at a target within Very Close range, making an attack roll using Finesse. On a success, deal damage as usual for that weapon. Once thrown, you lose that weapon. Unless you retrieve it, you can't attack with it or benefit from its features.
WEAPON STATISTICS

Each weapon in this book includes its name, trait, range, damage die, damage type, and burden. Some weapons also have a feature. For example, the broadsword starting weapon has the following statistics:

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Broadsword	Agility	Melee	d8 phy	One-handed	*Reliable:* +1 to attack rolls

■ NAME

In your character's early adventures, most weapon **names** are the same as their type. For starting weapons, this is often something straightforward, such as a battleaxe or hand runes. As characters level up and collect better equipment, this name could become more specific—something like a flaming dragonscale blade, a valiant bow, or even a named weapon like the Wand of Essek.

■ TRAIT

This tells you what **trait** is used when making an attack with this weapon. For example, a Strength weapon uses your character's Strength trait whenever they use it to attack a target.

■ RANGE

Range signifies the maximum distance from which a weapon or effect can hit a target. You can hit something in Melee, Very Close, Close, Far, or Very Far range with an effect or weapon.

■ DAMAGE

The **damage** represents how deadly your weapon is against the adversaries you face. When a weapon's damage lists a type of die—such as "d8"—you roll that die to determine the damage you deal.

As your character levels up, they'll increase their Proficiency, which starts at 1. Unless otherwise specified, you roll a number of damage dice equal to your character's Proficiency. For example, if your character's Proficiency is 2 and their damage die is a d8, you roll 2d8 and add their values together. If you roll a 4 and an 8 on these dice, you deal a total of 12 damage.

■ DAMAGE TYPE

A weapon's **damage type** specifies what kind of damage it does to a target: physical (phy) or magic (mag). Physical damage comes from any wielded weapon that cuts, stabs, or bludgeons (such as swords, longbows, and warhammers). Magic damage is caused or enhanced by magic (such as the "Conjure Swarm," "Midnight Spirit," and "Smite" spells).

Damage types are important because some creatures might have resistance or immunity to one of the two types. For example, ghosts may not be as affected by physical damage as they are by magic damage.

You typically can't wield weapons that deal magic damage unless you have a Spellcast trait.

■ BURDEN

A weapon's **burden** notes how many hands it takes to wield it. Weapons are either one-handed or two-handed. When you take a weapon, you'll also fill up a number of hands equal to its burden on your character sheet. If your character can't bear the burden of a weapon because their hands are already full, you can't equip it.

You're welcome to create a character with any number of hands or have your character wield a weapon using something other than their hands. However, when tracking burden, each character mechanically has two appendages capable of wielding weapons.

■ FEATURE

A weapon **feature** describes any special rules that apply only to that particular weapon. For example, some features reduce or increase your character's statistics, while others give them special ways to deal damage. A weapon's features only apply to that weapon; you can't apply its features to a different weapon. Your character can only benefit from a weapon's features while the weapon is equipped. If you put a weapon into your inventory, lose it, or get rid of it, your character no longer gains the benefits of that feature.

Arrows & Ammunition

We assume that if your character has a bow, they're well supplied with standard arrows. If you have a gun, they're well supplied with standard bullets of the applicable type. But if they've picked up specialized ammunition at some point, be prepared to keep track of this limited arsenal.

> **Tip:** *Your party might want to play a campaign that feels grounded or gritty. If so, you can monitor and limit the acquisition of supplies such as food, ammunition, and other sundries. Have a discussion with your GM and table about the cost of goods and the availability of materials in your world.*

USING ARMOR

Each armor in this book includes its name, base damage thresholds, and base Armor Score. Some armor also has a feature. For example, the chainmail starting armor has the following statistics:

NAME	BASE THRESHOLDS	BASE SCORE	FEATURE
Chainmail Armor	7 / 15	4	*Heavy:* −1 to Evasion

■ NAME

In your character's early adventures, most early armor **names** are the same as their type, such as chainmail armor. As your character levels up, they might acquire special armor, such as veritas opal armor.

■ BASE SCORE

An armor's **base score** represents the short-term protection it provides and how many Armor Slots you can mark (before any bonuses from other features). For example, if an armor's base score is 4, you have 4 available Armor Slots you can mark. Your character's Armor Score, with all bonuses included, can never exceed 12. Once you add all other bonuses to an armor's base score, the final total is referred to as your character's Armor Score.

■ BASE THRESHOLDS

An armor's **base damage thresholds** represent the long-term protection your armor provides, and determine your damage thresholds (before any bonuses from other features). When recording your character's damage thresholds in the "Damage & Health" section of your character sheet, you always add your character's level to those values. For example, if your level 1 character has base thresholds of 7/15 with no other bonuses, they would have a Major damage threshold of 8 and a Severe damage threshold of 16.

■ FEATURE

Armor **features** describe any special rules that apply only to that particular armor. For example, some reduce or increase your character's statistics, and others give you special ways to use your character's Armor Slots. A set of armor's features apply only to that specific armor; you can't apply its features to different armor. Your character can benefit from a set of armor's features only while armor is equipped.

■ REDUCING DAMAGE

When your character takes damage, you can negate some (or all) of it by marking an available **Armor Slot** next to the large Armor shield on your character sheet, then reducing the severity of the damage by one threshold (Severe to Major, Major to Minor, Minor to Nothing). Each time your character takes damage, you can only mark 1 Armor Slot (as long as you have one available). Once all available Armor Slots are marked, your character's armor can't be used again in this way until they repair it, usually as a move during downtime.

Example: Rune has an Armor Score of 3 and Miles, his player, has marked 1 Armor Slot already. If an adversary hits Rune for Major damage, Miles can mark an Armor Slot to reduce that to Minor instead. That puts him at 2 marked Armor Slots, so he can only mark 1 more Armor Slot before needing to repair his armor during downtime.

If your character has an Armor Score of 0, you can't mark Armor Slots. If an effect gives your character a temporary Armor Score (such as the "Tava's Armor" spell), you can mark that many additional Armor Slots while the temporary armor is active. When the temporary armor ends, clear a number of Armor Slots equal to the temporary Armor Score.

Example: Miles's wizard Rune gains a +2 bonus to his Armor Score until his next rest. Miles changes Rune's Armor Score to 5. At the start of his next short rest, he changes Rune's Armor Score back to 3 and clears 2 Armor Slots.

■ UNARMORED

Going unarmored does not give your character any bonuses or penalties, but while unarmored, they have an Armor Score of 0, their Major threshold is equal to their level, and their Severe threshold is equal to twice their level.

■ REFLAVORING ARMOR

As with weapons, class abilities, and domains, you can reflavor your character's armor to suit them. A wizard using full plate armor might describe their protection as coming from heavily enchanted robes and protective rings, while their penalty to Evasion and Agility is due to the intense focus required to maintain such powerful protective magic.

Armor Score of 3 with 2 Armor Slots marked.

PRIMARY WEAPON TABLES

Players can choose one Tier 1 primary weapon during character creation.
The GM can make other weapons available throughout the campaign as the PCs level up.

BLOODSTAFF
COMBAT WHEELCHAIR

By Mark Thompson

The combat wheelchair is a ruleset designed to help you play a wheelchair user in Daggerheart. This section provides mechanics and narrative guidance for you to work from, but feel free to adapt the flavor text to best suit your character. Have fun with your character's wheelchair design, and make it as unique or tailored to them as you please.

■ ACTION AND MOVEMENT

When describing how your character moves, you can use descriptions such as the following:

- *"I roll over to the door to see if it's open."*
- *"I wheel myself over to the group to ask what's going on."*
- *"I pull my brakes and skid to a halt, turning in my seat to level my bow at the intruder."*

■ CONSEQUENCES

Here are some ways you might describe complications you encounter when your character uses their wheelchair:

- *"I pull my brakes, but I don't think to account for the loose gravel on the ground."*
- *"I hit a patch of ice awkwardly and am sent skidding out past my target."*
- *"I go to push off in pursuit, but one of my front caster wheels snags on a crack in the pavement, stalling me for a moment."*

GMs should avoid breaking a character's wheelchair or otherwise removing it from play as a consequence, unless everyone at the table, especially the wheelchair user's player, gives their approval.

■ EVASION

Your character is assumed to be skilled in moving their wheelchair and navigating numerous situations in it. As a result, the only wheelchair that gives a penalty to a PC's Evasion is the Heavy Frame model.

■ BURDEN

All wheelchairs can be maneuvered using one or two hands outside of combat. However, when being used as a weapon, the chair is restricted to requiring one or two hands to perform attacks, depending on the model you've chosen.

If you're playing a character who has limited to no mobility in their arms, their wheelchair can be attuned to them by magical means. For example, your character might use a psychic link to guide the chair around like a pseudo-electric wheelchair. All the rules presented here can be tailored and adapted to any character's needs.

■ CHOOSING YOUR MODEL

All combat wheelchairs are equipped as Primary Weapons. There are three models of wheelchair available: **light**, **heavy**, and **arcane**. You're encouraged to consider the type of character you're playing and the class they belong to, then choose the model that best matches that character concept.

Light Frame Models

Though tough, these wheelchairs have light frames that allow the chair to move with your character in more acrobatic ways. These models are best suited to adventurers who rely on speed and flexibility.

NAME	TIER	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Light-Frame Wheelchair	1	Agility	Melee	d8 phy	One-Handed	*Quick:* When you make an attack, you can mark a Stress to target another creature within range.
Improved Light-Frame Wheelchair	2	Agility	Melee	d8+3 phy	One-Handed	*Quick:* When you make an attack, you can mark a Stress to target another creature within range.
Advanced Light-Frame Wheelchair	3	Agility	Melee	d8+6 phy	One-Handed	*Quick:* When you make an attack, you can mark a Stress to target another creature within range.
Legendary Light-Frame Wheelchair	4	Agility	Melee	d8+9 phy	One-Handed	*Quick:* When you make an attack, you can mark a Stress to target another creature within range.

Heavy Frame Models

These wheelchairs have bulky and heavier frames, allowing the chair to lend its weight to your character's attacks. It also makes them a bigger target.

NAME	TIER	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Heavy-Frame Wheelchair	1	Strength	Melee	d12+3 phy	Two-Handed	*Heavy:* −1 to Evasion
Improved Heavy-Frame Wheelchair	2	Strength	Melee	d12+6 phy	Two-Handed	*Heavy:* −1 to Evasion
Advanced Heavy-Frame Wheelchair	3	Strength	Melee	d12+9 phy	Two-Handed	*Heavy:* −1 to Evasion
Legendary Heavy-Frame Wheelchair	4	Strength	Melee	d12+12 phy	Two-Handed	*Heavy:* −1 to Evasion

Arcane Frame Models

These wheelchairs have frames that are attuned to your character and their magic, allowing them to channel their spells through the chair. Unlike other primary magic weapons, the arcane-frame model doesn't specify a trait to use when making an attack with it. Instead, you use the Spellcast trait indicated by your subclass.

NAME	TIER	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Arcane-Frame Wheelchair	1	Spellcast	Far	d6 mag	One-Handed	*Reliable:* +1 to attack rolls
Improved Arcane-Frame Wheelchair	2	Spellcast	Far	d6+3 mag	One-Handed	*Reliable:* +1 to attack rolls
Advanced Arcane-Frame Wheelchair	3	Spellcast	Far	d6+6 mag	One-Handed	*Reliable:* +1 to attack rolls
Legendary Arcane-Frame Wheelchair	4	Spellcast	Far	d6+9 mag	One-Handed	*Reliable:* +1 to attack rolls

HEAVY-FRAME WHEELCHAIR

ARCANE-FRAME WHEELCHAIR

SECONDARY WEAPON TABLES

Players can choose one Tier 1 secondary weapon during character creation.
The GM can make other weapons available throughout the campaign as the PCs level up.

TIER 1 (LEVEL 1)

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Shortsword	Agility	Melee	d8 phy	One-Handed	*Paired:* +2 to primary weapon damage to targets within Melee range
Round Shield	Strength	Melee	d4 phy	One-Handed	*Protective:* +1 to Armor Score
Tower Shield	Strength	Melee	d6 phy	One-Handed	*Barrier:* +2 to Armor Score; −1 to Evasion
Small Dagger	Finesse	Melee	d8 phy	One-Handed	*Paired:* +2 to primary weapon damage to targets within Melee range
Whip	Presence	Very Close	d6 phy	One-Handed	*Startling:* Mark a Stress to crack the whip and force all adversaries within Melee range back to Close range.
Grappler	Finesse	Close	d6 phy	One-Handed	*Hooked:* On a successful attack, you can pull the target into Melee range.
Hand Crossbow	Finesse	Far	d6+1 phy	One-Handed	—

TIER 2 (LEVELS 2–4)

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Improved Shortsword	Agility	Melee	d8+2 phy	One-Handed	*Paired:* +3 to primary weapon damage to targets within Melee range
Improved Round Shield	Strength	Melee	d4+2 phy	One-Handed	*Protective:* +2 to Armor Score
Improved Tower Shield	Strength	Melee	d6+2 phy	One-Handed	*Barrier:* +3 to Armor Score; −1 to Evasion
Improved Small Dagger	Finesse	Melee	d8+2 phy	One-Handed	*Paired:* +3 to primary weapon damage to targets within Melee range
Improved Whip	Presence	Very Close	d6+2 phy	One-Handed	*Startling:* Mark a Stress to crack the whip and force all adversaries within Melee range back to Close range.
Improved Grappler	Finesse	Close	d6+2 phy	One-Handed	*Hooked:* On a successful attack, you can pull the target into Melee range.
Improved Hand Crossbow	Finesse	Far	d6+3 phy	One-Handed	—
Spiked Shield	Strength	Melee	d6+2 phy	One-Handed	*Double Duty:* +1 to Armor Score; +1 to primary weapon damage within Melee range
Parrying Dagger	Finesse	Melee	d6+2 phy	One-Handed	*Parry:* When you are attacked, roll this weapon's damage dice. If any of the attacker's damage dice rolled the same value as your dice, the matching results are discarded from the attacker's damage dice before the damage you take is totaled.
Returning Axe	Agility	Close	d6+4 phy	One-Handed	*Returning:* When this weapon is thrown within its range, it appears in your hand immediately after the attack.

SHORTSWORD PARRYING DAGGER WHIP GRAPPLER ROUND SHIELD TOWER SHIELD SMALL DAGGER
TIER 3 (LEVELS 5–7)

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Advanced Shortsword	Agility	Melee	d8+4 phy	One-Handed	*Paired:* +4 to primary weapon damage to targets within Melee range
Advanced Round Shield	Strength	Melee	d4+4 phy	One-Handed	*Protective:* +3 to Armor Score
Advanced Tower Shield	Strength	Melee	d6+4 phy	One-Handed	*Barrier:* +4 to Armor Score; −1 to Evasion
Advanced Small Dagger	Finesse	Melee	d8+4 phy	One-Handed	*Paired:* +4 to primary weapon damage to targets within Melee range
Advanced Whip	Presence	Very Close	d6+4 phy	One-Handed	*Startling:* Mark a Stress to crack the whip and force all adversaries within Melee range back to Close range.
Advanced Grappler	Finesse	Close	d6+4 phy	One-Handed	*Hooked:* On a successful attack, you can pull the target into Melee range.
Advanced Hand Crossbow	Finesse	Far	d6+5 phy	One-Handed	—
Buckler	Agility	Melee	d4+4 phy	One-Handed	*Deflecting:* When you are attacked, you can mark an Armor Slot to gain a bonus to your Evasion equal to your Armor Score against the attack.
Powered Gauntlet	Knowledge	Close	d6+4 phy	One-Handed	*Charged:* Mark a Stress to gain a +1 bonus to your Proficiency on a primary weapon attack.
Hand Sling	Finesse	Very Far	d6+4 phy	One-Handed	*Versatile:* This weapon can also be used with these statistics—Finesse, Close, d8+4.

TIER 4 (LEVELS 8–10)

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Legendary Shortsword	Agility	Melee	d8+6 phy	One-Handed	*Paired:* +5 to primary weapon damage to targets within Melee range
Legendary Round Shield	Strength	Melee	d4+6 phy	One-Handed	*Protective:* +4 to Armor Score
Legendary Tower Shield	Strength	Melee	d6+6 phy	One-Handed	*Barrier:* +5 to Armor Score; −1 to Evasion.
Legendary Small Dagger	Finesse	Melee	d8+6 phy	One-Handed	*Paired:* +5 to primary weapon damage to targets within Melee range
Legendary Whip	Presence	Very Close	d6+6 phy	One-Handed	*Startling:* Mark a Stress to crack the whip and force all adversaries within Melee range back to Close range.
Legendary Grappler	Finesse	Close	d6+6 phy	One-Handed	*Hooked:* On a successful attack, you can pull the target into Melee range.
Legendary Hand Crossbow	Finesse	Far	d6+7 phy	One-Handed	—
Braveshield	Agility	Melee	d4+6 phy	One-Handed	*Sheltering:* When you mark an Armor Slot, it reduces damage for you and all allies within Melee range of you who took the same damage.
Knuckle Claws	Strength	Melee	d6+8 phy	One-Handed	*Doubled Up:* When you make an attack with your primary weapon, you can deal damage to another target within Melee range.
Primer Shard	Instinct	Very Close	d4 phy	One-Handed	*Locked On:* On a successful attack, your next attack against the same target with your primary weapon automatically succeeds.

ARMOR TABLES

Players can choose one Tier 1 piece of armor during character creation. The GM can make other armor available throughout the campaign as the PCs level up.

TIER 1 (LEVEL 1)

NAME	BASE THRESHOLDS	BASE SCORE	FEATURE
Gambeson Armor	5 / 11	3	*Flexible:* +1 to Evasion
Leather Armor	6 / 13	3	—
Chainmail Armor	7 / 15	4	*Heavy:* −1 to Evasion
Full Plate Armor	8 / 17	4	*Very Heavy:* −2 to Evasion; −1 to Agility

TIER 2 (LEVELS 2–4)

NAME	BASE THRESHOLDS	BASE SCORE	FEATURE
Improved Gambeson Armor	7 / 16	4	*Flexible:* +1 to Evasion
Improved Leather Armor	9 / 20	4	—
Improved Chainmail Armor	11 / 24	5	*Heavy:* −1 to Evasion
Improved Full Plate Armor	13 / 28	5	*Very Heavy:* −2 to Evasion; −1 to Agility
Elundrian Chain Armor	9 / 21	4	*Warded:* You reduce incoming magic damage by your Armor Score before applying it to your damage thresholds.
Harrowbone Armor	9 / 21	4	*Resilient:* Before you mark your last Armor Slot, roll a d6. On a result of 6, reduce the severity by one threshold without marking an Armor Slot.
Irontree Breastplate Armor	9 / 20	4	*Reinforced:* When you mark your last Armor Slot, increase your damage thresholds by +2 until you clear at least 1 Armor Slot.
Runetan Floating Armor	9 / 20	4	*Shifting:* When you are targeted for an attack, you can mark an Armor Slot to give the attack roll against you disadvantage.
Tyris Soft Armor	8 / 18	5	*Quiet:* You gain a +2 bonus to rolls you make to move silently.
Rosewild Armor	11 / 23	5	*Hopeful:* When you would spend a Hope, you can mark an Armor Slot instead.

BELLAMOI FINE ARMOR

MONETT'S CLOAK

LOOT

The items and consumables you find along your journey are known as loot. The GM can pull loot from the following tables, or use the tables as inspiration to create their own unique loot.

ITEMS

Items are loot that can be kept and used repeatedly until you choose to get rid of them, or until something in the narrative causes you to lose them.

Use the rolling guide on the right to generate items ahead of a game or during a session. Determine the desired rarity of your items, roll the associated number of d12s, add their values together (if needed), and take the item that matches that value. The rolling guide to the right also describes where each rarity of item is commonly found.

- **Common (1d12 or 2d12):** Common items might be found at an abandoned camp or readily available at a local shop.
- **Uncommon (2d12 or 3d12):** Uncommon items might be found in limited supply in a shop, kept in a protected place in a camp, or offered as part of a reward for a job.
- **Rare (3d12 or 4d12):** Rare items might be kept under lock and key in a shop, offered as the sole reward for a job, or discovered among a powerful NPC's possessions.
- **Legendary (4d12 or 5d12):** Legendary items might be the only item of their kind, a reward for an incredibly difficult or dangerous job, or a powerful adversary's most precious and guarded treasure.

ROLL	LOOT	DESCRIPTION
01	**Premium Bedroll**	During downtime, you automatically clear a Stress.
02	**Piper Whistle**	This handcrafted whistle has a distinctive sound. When you blow this whistle, its piercing tone can be heard within a 1-mile radius.
03	**Charging Quiver**	When you succeed on an attack with an arrow stored in this quiver, gain a bonus to the damage roll equal to your current tier.
04	**Alistair's Torch**	You can light this magic torch at will. The flame's light fills a much larger space than it should, enough to illuminate a cave bright as day.
05	**Speaking Orbs**	This pair of orbs allows any creatures holding them to communicate with each other across any distance.
06	**Manacles**	This pair of locking cuffs comes with a key.
07	**Arcane Cloak**	A creature with a Spellcast trait wearing this cloak can adjust its color, texture, and size at will.
08	**Woven Net**	You can make a Finesse Roll using this net to trap a small creature. A trapped target can break free with a successful Attack Roll (16).
09	**Fire Jar**	You can pour out the strange liquid contents of this jar to instantly produce fire. The contents regenerate when you take a long rest.
10	**Suspended Rod**	This flat rod is inscribed with runes. When you activate the rod, it is immediately suspended in place. Until the rod is deactivated, it can't move, doesn't abide by the rules of gravity, and remains in place.
11	**Glamour Stone**	Activate this pebble-sized stone to memorize the appearance of someone you can see. Spend a Hope to magically recreate this guise on yourself as an illusion.
12	**Empty Chest**	This magical chest appears empty. When you speak a specific trigger word or action and open the chest, you can see the items stored within it.
13	**Companion Case**	This case can fit a small animal companion. While the companion is inside, the animal and case are immune to all damage and harmful effects.
14	**Piercing Arrows**	Three times per rest when you succeed on an attack with one of these arrows, you can add your Proficiency to the damage roll.
15	**Valorstone**	You can attach this stone to armor that doesn't already have a feature. The armor gains the following feature. **Resilient:** Before you mark your last Armor Slot, roll a d6. On a result of 6, reduce the severity by one threshold without marking an Armor Slot.
16	**Skeleton Key**	When you use this key to open a locked door, you gain advantage on the Finesse Roll.
17	**Arcane Prism**	Position this prism in a location of your choosing and activate it. All allies within Close range of it gain a +1 bonus to their Spellcast Rolls. While activated, the prism can't be moved. Once the prism is deactivated, it can't be activated again until your next long rest.
18	**Minor Stamina Potion Recipe**	As a downtime move, you can use the bone of a creature to craft a Minor Stamina Potion.
19	**Minor Health Potion Recipe**	As a downtime move, you can use a vial of blood to craft a Minor Health Potion.

ROLL	LOOT	DESCRIPTION
20	Homing Compasses	These two compasses point toward each other no matter how far apart they are.
21	Corrector Sprite	This tiny sprite sits in the curve of your ear canal and whispers helpful advice during combat. Once per short rest, you can gain advantage on an attack roll.
22	Gecko Gloves	You can climb up vertical surfaces and across ceilings.
23	Lorekeeper	You can store the name and details of up to three hostile creatures inside this book. You gain a +1 bonus to action rolls against those creatures.
24	Vial of Darksmoke Recipe	As a downtime move, you can mark a Stress to craft a Vial of Darksmoke.
25	Bloodstone	You can attach this stone to a weapon that doesn't already have a feature. The weapon gains the following feature. **Brutal:** When you roll the maximum value on a damage die, roll an additional damage die.
26	Greatstone	You can attach this stone to a weapon that doesn't already have a feature. The weapon gains the following feature. **Powerful:** On a successful attack, roll an additional damage die and discard the lowest result.
27	Glider	While falling, you can mark a Stress to deploy this small parachute and glide safely to the ground.
28	Ring of Silence	Spend a Hope to activate this ring. Your footsteps are silent until your next rest.
29	Calming Pendant	When you would mark your last Stress, roll a d6. On a result of 5 or higher, don't mark it.
30	Dual Flask	This flask can hold two different liquids. You can swap between them by flipping a small switch on the flask's side.
31	Bag of Ficklesand	You can convince this small bag of sand to be much heavier or lighter with a successful Presence Roll (10). Additionally, on a successful Finesse Roll (10), you can blow a bit of sand into a target's face to make them temporarily *Vulnerable*.
32	Ring of Resistance	Once per long rest, you can activate this ring after a successful attack against you to halve the damage.
33	Phoenix Feather	If you have at least one Phoenix Feather on you when you fall unconscious, you gain a +1 bonus to the roll you make to determine whether you gain a scar.
34	Box of Many Goods	Once per long rest, you can open this small box and roll a d12. On a result of 1–6, it's empty. On a result of 7–10, it contains one random common consumable. On a result of 11–12, it contains two random common consumables.
35	Airblade Charm	You can attach this charm to a weapon with a Melee range. Three times per rest, you can activate the charm and attack a target within Close range.
36	Portal Seed	You can plant this seed in the ground to grow a portal in that spot. The portal is ready to use in 24 hours. You can use this portal to travel to any other location where you planted a portal seed. A portal can be destroyed by dealing any amount of magic damage to it.
37	Paragon's Chain	As a downtime move, you can meditate on an ideal or principle you hold dear and focus your will into this chain. Once per long rest, you can spend a Hope to roll a d20 as your Hope Die for rolls that directly align with that principle.
38	Elusive Amulet	Once per long rest, you can activate this amulet to become *Hidden* until you move. While *Hidden* in this way, you remain unseen even if an adversary moves to where they would normally see you.
39	Hopekeeper Locket	During a long rest, if you have 6 Hope, you can spend a Hope to imbue this locket with your bountiful resolve. When you have 0 Hope, you can use the locket to immediately gain a Hope. The locket must be re-imbued before it can be used this way again.
40	Infinite Bag	When you store items in this bag, they are kept in a pocket dimension that never runs out of space. You can retrieve an item at any time.
41	Stride Relic	You gain a +1 bonus to your Agility. You can only carry one relic.
42	Bolster Relic	You gain a +1 bonus to your Strength. You can only carry one relic.
43	Control Relic	You gain a +1 bonus to your Finesse. You can only carry one relic.
44	Attune Relic	You gain a +1 bonus to your Instinct. You can only carry one relic.
45	Charm Relic	You gain a +1 bonus to your Presence. You can only carry one relic.
46	Enlighten Relic	You gain a +1 bonus to your Knowledge. You can only carry one relic.
47	Honing Relic	You gain a +1 bonus to an Experience of your choice. You can only carry one relic.
48	Flickerfly Pendant	While you carry this pendant, your weapons with a Melee range that deal physical damage have a gossamer sheen and can attack targets within Very Close range.
49	Lakestrider Boots	You can walk on the surface of water as if it were soft ground.

SPEAKING ORBS

GEM OF SAGACITY

GEM OF AUDACITY

PHOENIX FEATHER
COMPANION CASE

ROLL	LOOT	DESCRIPTION
50	**Clay Companion**	When you sculpt this ball of clay into a clay animal companion, it behaves as that animal. For example, a clay spider can spin clay webs, while a clay bird can fly. The clay companion retains memory and identity across different shapes, but they can adopt new mannerisms with each form.
51	**Mythic Dust Recipe**	As a downtime move, you can use a handful of fine gold dust to craft Mythic Dust.
52	**Shard of Memory**	Once per long rest, you can spend 2 Hope to recall a domain card from your vault instead of paying its Recall Cost.
53	**Gem of Alacrity**	You can attach this gem to a weapon, allowing you to use your Agility when making an attack with that weapon.
54	**Gem of Might**	You can attach this gem to a weapon, allowing you to use your Strength when making an attack with that weapon.
55	**Gem of Precision**	You can attach this gem to a weapon, allowing you to use your Finesse when making an attack with that weapon.
56	**Gem of Insight**	You can attach this gem to a weapon, allowing you to use your Instinct when making an attack with that weapon.
57	**Gem of Audacity**	You can attach this gem to a weapon, allowing you to use your Presence when making an attack with that weapon.
58	**Gem of Sagacity**	You can attach this gem to a weapon, allowing you to use your Knowledge when making an attack with that weapon.
59	**Ring of Unbreakable Resolve**	Once per session, when the GM spends a Fear, you can spend 4 Hope to cancel the effects of that spent Fear.
60	**Belt of Unity**	Once per session, you can spend 5 Hope to lead a Tag Team Roll with three PCs instead of two.

CONSUMABLES

Consumables are loot that can only be used once. You can hold up to five of each consumable at a time.

Use the following rolling guide to generate consumables ahead of a game or during a session. Determine the desired rarity of your consumable, roll the associated number of d12s, add their values together (if needed), and take the consumable that matches that value. The rolling guide below also describes where each rarity of consumable is commonly found.

- **Common (1d12 or 2d12).** Common consumables might be found at an abandoned camp or readily available at a local store.
- **Uncommon (2d12 or 3d12).** Uncommon consumables might be found in limited supply in a shop, kept in a protected place in a camp, or offered as part of a reward for a job.
- **Rare (3d12 or 4d12).** Rare consumables might be kept under lock and key in a shop, offered as the sole reward for a job, or discovered in a powerful NPC's possessions.
- **Legendary (4d12 or 5d12).** Legendary consumables might be the only item of their kind, a reward for an incredibly difficult or dangerous job, or a powerful adversary's most precious and guarded treasure.

ROLL	LOOT	DESCRIPTION
01	Stride Potion	You gain a +1 bonus to your next Agility Roll.
02	Bolster Potion	You gain a +1 bonus to your next Strength Roll.
03	Control Potion	You gain a +1 bonus to your next Finesse Roll.
04	Attune Potion	You gain a +1 bonus to your next Instinct Roll.
05	Charm Potion	You gain a +1 bonus to your next Presence Roll.
06	Enlighten Potion	You gain a +1 bonus to your next Knowledge Roll.
07	Minor Health Potion	Clear 1d4 HP.
08	Minor Stamina Potion	Clear 1d4 Stress.
09	Grindletooth Venom	You can apply this venom to a weapon that deals physical damage to add a d6 to your next damage roll with that weapon.
10	Varik Leaves	You can eat these paired leaves to immediately gain 2 Hope.
11	Vial of Moondrip	When you drink the contents of this vial, you can see in total darkness until your next rest.
12	Unstable Arcane Shard	You can make a Finesse Roll to throw this shard at a group of adversaries within Far range. Targets you succeed against take 1d20 magic damage.
13	Potion of Stability	You can drink this potion to choose one additional downtime move.

ROLL	LOOT	DESCRIPTION
14	Improved Grindletooth Venom	You can apply this venom to a weapon that deals physical damage to add a d8 to your next damage roll with that weapon.
15	Morphing Clay	You can spend a Hope to use this clay, altering your face enough to make you unrecognizable until your next rest.
16	Vial of Darksmoke	When an adversary attacks you, use this vial and roll a number of d6s equal to your Agility. Add the highest result to your Evasion against the attack.
17	Jumping Root	Eat this root to leap up to Far range once without needing to roll.
18	Snap Powder	Mark a Stress and clear a HP.
19	Health Potion	Clear 1d4+1 HP.
20	Stamina Potion	Clear 1d4+1 Stress.
21	Armor Stitcher	You can use this stitcher to spend any number of Hope and clear that many Armor Slots.
22	Gill Salve	You can apply this salve to your neck to breathe underwater for a number of minutes equal to your level.
23	Replication Parchment	By touching this piece of parchment to another, you can perfectly copy the second parchment's contents. Once used, this parchment becomes mundane paper.
24	Improved Arcane Shard	You can make a Finesse Roll to throw this shard at a group of adversaries within Far range. Targets you succeed against take 2d20 magic damage.
25	Major Stride Potion	You gain a +1 bonus to your Agility until your next rest.
26	Major Bolster Potion	You gain a +1 bonus to your Strength until your next rest.
27	Major Control Potion	You gain a +1 bonus to your Finesse until your next rest.
28	Major Attune Potion	You gain a +1 bonus to your Instinct until your next rest.
29	Major Charm Potion	You gain a +1 bonus to your Presence until your next rest.
30	Major Enlighten Potion	You gain a +1 bonus to your Knowledge until your next rest.
31	Blood of the Yorgi	You can drink this blood to disappear from where you are and immediately reappear at a point you can see within Very Far range.
32	Homet's Secret Potion	After drinking this potion, the next successful attack you make critically succeeds.
33	Redthorn Saliva	You can apply this saliva to a weapon that deals physical damage to add a d12 to your next damage roll with that weapon.
34	Channelstone	You can use this stone to take a spell or grimoire from your vault, use it once, and return it to your vault.

ROLL	LOOT	DESCRIPTION
35	Mythic Dust	You can apply this dust to a weapon that deals magic damage to add a d12 to your next damage roll with that weapon.
36	Acidpaste	This paste eats away walls and other surfaces in bright flashes.
37	Hopehold Flare	When you use this flare, allies within Close range roll a d6 when they spend a Hope. On a result of 6, they gain the effect of that Hope without spending it. The flare lasts until the end of the scene.
38	Major Arcane Shard	You can make a Finesse Roll to throw this shard at a group of adversaries within Far range. Targets you succeed against take 4d20 magic damage.
39	Featherbone	You can use this bone to control your falling speed for a number of minutes equal to your level.
40	Circle of the Void	Mark a Stress to create a void that extends up to Far range. No magic can be cast inside the void, and creatures within the void are immune to magic damage.
41	Sun Tree Sap	Consume this sap to roll a d6. On a result of 5–6, clear 2 HP. On a result of 2–4, clear 3 Stress. On a result of 1, see through the veil of death and return changed, gaining one scar.
42	Dripfang Poison	A creature who consumes this poison takes 8d10 direct magic damage.
43	Major Health Potion	Clear 1d4+2 HP.
44	Major Stamina Potion	Clear 1d4+2 Stress.
45	Ogre Musk	You can use this musk to prevent anyone from tracking you by mundane or magical means until your next rest.
46	Wingsprout	You gain magic wings that allow you to fly for a number of minutes equal to your level.
47	Jar of Lost Voices	You can open this jar to release a deafening echo of voices for a number of minutes equal to your Instinct. Creatures within Far range unprepared for the sound take 6d8 magic damage.
48	Dragonbloom Tea	You can drink this tea to unleash a fiery breath attack. Make an Instinct Roll against all adversaries in front of you within Close range. Targets you succeed against take d20 physical damage using your Proficiency.
49	Bridge Seed	Thick vines grow from your location to a point of your choice within Far range, allowing you to climb up or across them. The vines dissipate on your next short rest.
50	Sleeping Sap	You can drink this potion to fall asleep for a full night's rest. You clear all Stress upon waking.
51	Feast of Xuria	You can eat this meal to clear all HP and Stress and gain 1d4 Hope.

ROLL	LOOT	DESCRIPTION
52	Bonding Honey	This honey can be used to glue two objects together permanently.
53	Shrinking Potion	You can drink this potion to halve your size until you choose to drop this form or your next rest. While in this form, you have a +2 bonus to Agility and a −1 penalty to your Proficiency.
54	Growing Potion	You can drink this potion to double your size until you choose to drop this form or your next rest. While in this form, you have a +2 bonus to Strength and a +1 bonus to your Proficiency.
55	Knowledge Stone	If you die while holding this stone, an ally can take a card from your loadout to place in their loadout or vault. After they take this knowledge, the stone crumbles.
56	Sweet Moss	You can consume this moss during a rest to clear 1d4 HP or 1d4 Stress.
57	Blinding Orb	You can activate this orb to create a flash of bright light. All targets within Close range become *Vulnerable* until they mark HP.
58	Death Tea	After you drink this tea, you instantly kill your target when you critically succeed on an attack. If you don't critically succeed on an attack before your next long rest, you die.
59	Mirror of Marigold	When you take damage, you can spend a Hope to negate that damage, after which the mirror shatters.
60	Stardrop	You can use this stardrop to summon a hailstorm of comets that deals 8d20 physical damage to all targets within Very Far range.

MINOR STAMINA POTION
STARDROP
FEATHERBONE
MINOR HEALTH POTION
VARIK LEAVES

USING CONSUMABLES

Using a consumable typically doesn't require a roll unless stated. Under certain circumstances, the GM might have you make an action roll to use a consumable, even if an action roll isn't noted in its description. For example, if you're on the battlefield preparing to run at an adversary and attack them, you have a moment to drink a Stamina Potion before you sprint toward them. But if you're pinned in the jaws of a massive Flickerfly and want to consume a Health Potion, the GM might rule that you need to make an action roll to drink it.

FULL EXAMPLE OF PLAY

In this full example of play, we join a party as they embark on a journey to Whitecrest Tower, rumored to be the home of a powerful artifact from an ancient battle.

THE PARTY:

- **Quinn (they/them),** playing Shepherd (they/them), Wildborne Infernis Warden of Renewal Druid
- **Miles (he/him),** playing Rune (he/him), Ridgeborne Drakona School of War Wizard
- **Aliyah (she/her),** playing Tabby (she/her), Underborne Katari Call of the Brave Warrior
- **Nolan (he/him),** playing Lavelle (he/him), Slyborne Human Nightwalker Rogue

THEIR GM:

- **Stella (she/her),** who starts the scene with five Fear.

STELLA: *"Whitecrest Tower is built into the side of a mountain, forcing attackers approaching from the valley below to make a dangerous climb. So my first question is—how do you want to get up to the tower?"*

QUINN: *"I want to use 'Nature's Tongue' and find a goat or ram or some other creature that lives on the mountains and ask them about the easiest way up to the tower."*

STELLA: *"Absolutely. It's not hard to find some goats tromping around in seeming defiance of gravity. Give me that Instinct Roll, Difficulty 12."*

> Quinn rolls the Duality Dice and adds 2 tokens to represent their Instinct of +2. They roll a 7 on the Hope Die and a 4 on the Fear Die.
>
> With their 2 tokens, the final result is a 13 with Hope. Quinn adds a Hope to their sheet.

"On a success with Hope, the goat is friendly enough and gives you clear information. She remembers the pathway that the last group of two-legs took and leads you to it. Don't forget to gain a Hope."

QUINN: *"I respond, 'Thank you, goat friend.' Then I fish out some food from my pack and give it to her as she leads us up."*

STELLA: *"The food disappears in an instant. Then the goat starts scaling the mountain, leading you to the path. We're going to do the ascent as a progress countdown, but since you're getting help, I'm going to set it at 3 instead of 5. What's the next move you make to scale the mountain?"*

ALIYAH: *"Tabby is going to take the lead and set pitons for the others to help make the ascent easier for everyone."*

STELLA: *"That sounds like an Agility Roll."*

> Aliyah rolls a 2 on the Hope Die, but a 7 on the Fear Die. With Tabby's Agility of +3, that's a total of 12 with Fear.

ALIYAH: *"I'm going to use my 'Feline Instincts' as a katari to spend 2 Hope and reroll my Hope Die."*

> She spends the Hope and rolls the Hope Die again, getting an 8.

"Nice! That's an 18 with Hope."

STELLA: *"On a success with Hope, you tick down the countdown by 2."* *"It's down to 1, so at this point, even a success with Fear will get you to the tower. Gain a Hope. Tabby scales the mountain, neck and neck with the goat, setting pitons and throwing rope down behind to help the others. You're making quick work, but there's still another hundred feet between you and the top of the tower. What do you do?"*

MILES: *"Oh, I want to try out my new grimoire. Rune takes some rope and pitons, and then he's going to cast 'Arcane Door' to teleport up to the front gate so he can throw down the rope."*

STELLA: *"Nice. That's a Spellcast Roll with Difficulty 13, and you spend a Hope to cast it."*

> Miles spends a Hope and rolls the Duality Dice, adding 3 modifier tokens for his character's Spellcast trait (Knowledge). He gets a 5 on the Hope Die and a 6 on the Fear Die.

MILES (slightly nervous): *"That's a 14, so a success...with Fear."*

> Stella gains a Fear, adding it to her pool.

STELLA: *"You all see Rune disappear and then reappear halfway up the remaining distance, then he blinks out again and appears by the front gate. With a rope leading all the way up, it's relatively simple for the rest of you to make the climb unscathed."*

QUINN: *"I give the helpful goat another nibble of food before I send her off to her own business."*

STELLA (nods): *"Shepherd says farewell to the goat. But Rune, behind you something shifts, like the wooden floors of an old house. But this doesn't feel like settling. It feels like something waking from slumber."*

NOLAN (with an expression that suggests the opposite): *"I'm sure that's fine."*

STELLA: *"Once you've all made it up the rope, you stand at the shattered front gate of Whitecrest Tower, the mountainside wall collapsed and long since worn down by snow, rain, or avalanche. The only sounds you hear are the whistling of wind through the ruins as you pass the outer wall of Whitecrest Tower."*

STELLA (CONT'D): *Lavelle, your contact said that the surviving treasure hunter she met last month made it as far as the basement of the castle before the rest of her party was killed by a Skeleton Knight.*

NOLAN: *"So we know to go down once we get inside. Let's sneak in as far as we can before we catch the attention of whatever's already here."*

STELLA: *"Okay, that'll be a group Finesse Roll."*

QUINN: *"Lavelle, you lead?"*

> *Nolan agrees, so Quinn, Miles, and Aliyah make Finesse Reaction Rolls for their characters. Miles and Quinn succeed, and Aliyah fails.*

STELLA: *"Miles and Quinn, you each add a +1 to the group roll, and Aliyah adds a −1 for that failure, which means you're at a +1, Nolan. Let's see how you do in leading the group."*

NOLAN: *"I'm going to spend a Hope to Utilize an Experience, this is definitely the kind of intrusion Lavelle has done as a 'Treasure Hunter.'"*

> *Nolan rolls a 2 on the Hope Die and a 4 on the Fear Die— that's 6. He adds +3 for his Finesse, +2 for the "Treasure Hunter" Experience, and +1 from the party's contribution (6+3+2+1=12).*

"That's a total of 12, with Fear."

> *Stella grimaces as she takes a Fear token.*

STELLA: *"A 12 is not going to do it. You make your way through the outer courtyard of the fortress passing rusted swords, decayed wooden emplacements, and rubble from the collapsing stone structure. You take a turn into the inner courtyard, with the keep just ahead of you, when you hear rattling and the sounds of steel on stone. All around you, skeletons lying in the snow begin assembling, stacking themselves up into moving figures wielding rusted swords and bows that shouldn't work, but do. Since you rolled a failure with Fear, this opening move is going to be a big one."*

> *Stella spends a Fear to make a group attack using the Skeleton Dredges.*

"All four of the smaller skeletons surround Lavelle, hacking and stabbing with their rusted blades."

> *Stella makes one attack for the group of skeletons according to the text of the group attack action. She rolls a d20, adding 1 token for the Skeleton Dredges' attack modifier of −1. The die comes up a 15, −1 for 14.*

"Lavelle, what is your Evasion?"

NOLAN: *"It's 13."*

STELLA: *"Then that's a hit. You take 4 physical damage."*

NOLAN: *"That would be Minor damage, so I'm marking an Armor Slot to bring it down to nothing."*

> *Nolan has an Armor Score of 3 from his gambeson armor, so he has 2 more uses of armor available.*

STELLA: *"Now for the archers."*

> *Stella spends another two Fear to spotlight two additional adversaries.*

"They're going to attack Shepherd and Rune."

> *The archers are not using a group attack, so Stella rolls 1d20+2 twice (once for each Skeleton Archer). She rolls a 3 and an 8, for a total of 5 against Rune and 10 against Shepherd. The attack against Rune misses (5 is lower than his Evasion of 12), but the attack against Shepherd hits (they have an Evasion of 10, and if an attack total is equal to the target's Evasion, the attack hits).*
>
> *Stella rolls 1d8+1 for the archer's damage. It's a total of 6—but that gets doubled thanks to the Skeleton Archers' "Opportunist" feature, which says, "When two or more adversaries are within Very Close range of a target, all damage the archer deals to that target is doubled." Since the Skeleton Dredges mobbed the group, the archers are able to fire in moments when the heroes are more open.*

"That's 12 physical damage for Shepherd."

> *Stella turns to Quinn to see what they want to do about the damage taken by Shepherd.*

QUINN: *"12 is Major damage, so I'll mark armor and only take Minor damage."*

> *Quinn marks an Armor Slot on their sheet. But since a character can only mark armor once per attack, they can't completely negate the attack, and must mark a Hit Point for Minor damage. Shepherd's Armor Score is 4, so they have three more uses of armor before it needs repairs.*
>
> *Stella spends another Fear to spotlight the Skeleton Knight.*

STELLA: *"Once the other skeletons have engaged and the archers have loosed their arrows, the Skeleton Knight stomps forward and takes a big swing at Tabby."*

> *The Skeleton Knight has a +2 modifier, so Stella adds 2 tokens to the d20. She rolls a 14 and adds +2 for a total of 16.*

"I'm pretty sure a 16 hits Tabby?"

ALIYAH: *"It does, alas."*

> *Stella rolls 1d10+2 for damage, getting a total of 10.*

STELLA: *"That's 10 physical damage against Tabby as the knight comes in with an overhead blow. Their 'Terrifying' feature causes Tabby and everyone within Close range of her to lose a Hope, plus I will take a Fear."*

ALIYAH: *"That's all of us."*

All four characters lose a Hope and Stella takes a Fear. The total of 10 would be Major damage, so Aliyah marks an Armor Slot to reduce it to Minor, then marks a Hit Point.

Every adversary has activated during this turn, and Stella wants to hold on to some Fear for later, so she returns the spotlight to the PCs.

STELLA: *"The skeletons rushed you all at once like it was a practiced maneuver. I wonder how many other groups they've ambushed like this. What do you want to do?"*

MILES: *"This is going to be their last ambush. Magical flame ignites in my hands, and I hurl it at the skeletons I'm in melee with. I'm going to use 'Wild Flame,' targeting two of the little ones and the big one with the sword."*

STELLA: *"Cool, roll spellcast as your attack roll."*

MILES: *"This is exactly what my War College Prodigy Experience prepared me for."*

Miles spends a Hope to add 2 tokens from his Experience to his +3 bonus from his Knowledge. He rolls 9 on the Hope Die, 11 on the Fear Die, then adds +5 from his modifiers.

"That's a 25 with Fear."

Stella gains a Fear.

STELLA: *"So you'll get your bonus damage from School of War, and each of them has to mark a Stress because of Wild Flame. Let's see that damage roll!"*

Miles rolls 2d6 for the "Wild Flame" spell, plus an extra d10 for his foundation subclass feature. He gets a total of 17 magic damage, which is compared to each of the three targets' damage thresholds. Since the dredges have the "Minion (4)" feature, every 4 damage dealt to them kills an additional dredge in range. The 17 damage is enough to kill all four minions in one blow.

STELLA: *"Nice. With one graceful sweep of your hands, you hit the first two you were aiming for, who collapse as you continue to erupt fire. Since they were minions, 17 damage was enough to kill all four of them. You turn them to ash."*

Next, Stella looks at the knight's thresholds. A 17 is above the Severe threshold.

"You turn your fire on the Skeleton Knight. Their armor begins to melt and sag, melding to the bone. The knight's still coming, but you dealt them a Severe blow."

Stella marks 3 HP for the knight.

"Since you rolled with Fear, I'm going to spotlight the Skeleton Knight. As the minions collapse, the knight roars with an unearthly voice, eyes glowing yellow with malice. They raise the greatsword and hack into the group with huge sweeping blows. I'm marking a Stress to attack all enemies within Very Close range. So all four of you."

Stella rolls 1d20+2 for the attack, getting 6+2 for a total of 8. That total is compared to each character's Evasion. Luckily, every PC's evasion is above 8 and the attack misses entirely.

Stella spends a Fear to spotlight one of the archers, who attacks Shepherd. But this time Stella rolls a 4, for a total of 6, which is below Shepherd's Evasion.

After that attack, Stella decides to save her Fear, since this encounter is just a warmup.

STELLA: *"The knight is rampaging while the archers pelt you with arrows. What do you do?"*

ALIYAH: *"I'd love to take a swing at them."*

The others nod.

"I'm going to mark Stress to use 'Reckless' and get advantage on an attack against the big boy. And I'll spend a Hope to Utilize my Pit Fighter Experience for +2."

Aliyah rolls 5 on the Hope Die, 5 on the Fear Die, and 3 on the advantage die, +3 for Agility since Tabby's using a broadsword, +1 from the broadsword's "Reliable" feature, and +2 for her Experience.

"My total is 19, but since the dice matched, it's a critical success!"

STELLA: *"Amazing! Give me that critical damage roll!"*

ALIYAH: *"I just got my second point of Proficiency, and the broadsword has d8 damage dice. So that's 16 plus a normal roll of 2d8, and +2 for my level thanks to 'Combat Training.'"*

Aliyah rolls a 1 and a 4, but rerolls the 1 thanks to her Blade domain ability Not Good Enough, getting an 8. She adds 8+4+2 (because of her "Combat Training" feature) for a total of 14, and then she adds that to 16 because of the critical hit. An amazing 30 damage!

That's a Severe hit for the Skeleton Knight, who only had 2 HP left.

STELLA (looks up and asks): *"So Aliyah, how do you want to do this?"*

The table bursts into cheers.

ALIYAH: *"The knight has a greatsword, right? I get right up in their face so they can't bring the sword to bear. Then I hack them apart like I'm chopping wood. There goes the tibia; there goes the humerus. Then, I bring my sword around and do a backflip, chopping off the knight's head. I land with my shield bracing me as the knight topples into a shattering pile of bones."*

STELLA: *"Amazing. Make sure to clear a Stress and gain a Hope from your crit. And as the skeleton collapses, they have one final reaction that triggers when they're killed—they lash out with the last of their strength to try to bring you with them, clawing at you with a great skeletal hand."*

> Stella rolls 1d20+2 and gets a 16+2 for 18. She rolls 1d4+8 damage and gets a 4 for a total of 12. Because the knight's "Dig Two Graves" feature also forces the PC to lose 1d4 Hope, she rolls a d4, for a result of 2.
>
> Because Tabby critically succeeded, Stella chooses to omit the "Terrifying" feature from this attack.

"The Skeleton Knight deals 12 physical damage back, and steals 2 Hope from you as unlife fades from their bones."

ALIYAH: *"Oof. That's Major damage, but I still have armor to spend, so I'm going to mark that and just take Minor damage."*

> Aliyah marks an Armor Slot and marks a Hit Point for Minor damage. She also loses 2 Hope from the "Dig Two Graves" action.

STELLA: *"As you all look up from the destroyed knight, you see that the archers have collapsed back into piles of bones. Rune, you remember lore about groups of skeletons where the spell used to animate them is focused on one of the group, usually the strongest."*

MILES: *"So next time, we go straight for the big one."*

> With the combat complete, Stella takes a breath and resets the scene.

STELLA: *"You're alone in the inner courtyard, the destroyed remains of skeletons around you. What do you do?"*

QUINN: *"'I'm guessing that's not the last surprise we'll see today,' Shepherd says. 'In we go?'"*

NOLAN: *"Yes, but this time I want to be scanning for threats."*

> In some situations, Stella might rule that Lavelle could just hear adversaries coming, but she wants to emphasize the danger and uncertainty of this ruin.

STELLA: *"That's an Instinct Roll."*

MILES: *"Rune can help by listening for more of those strange building-waking-up sounds or anything else suspicious."*

> Miles spends a Hope, rolls a d6 advantage die, and gets a 3.
>
> Nolan makes an Instinct Roll for Lavelle. He gets a 1 on the Hope Die and a 5 on the Fear Die. Nolan adds his Duality Dice together for a value of 6, +1 for his Instinct, and +3 for Rune's help, for a total of 10 with Fear.
>
> Stella nods, thinking for a moment as she gains a Fear.

STELLA: *"You enter the keep with caution, looking for traps and listening for threats. The base of the tower is littered with the decayed remains of many different kinds of folk—galapa and katari, dwarves and infernis. But none of them stir. You go through a barracks and a kitchen, finding the stairwell that leads you down into the musty basement.*

"There's no light here, but you have torches. Here and there are some traps somehow still intact, or perhaps repaired. There are three somewhat-fresh corpses of adventurers that must have been the survivor's companions. At this altitude, they're pretty well preserved. Two are impaled on a wall of spikes that jutted out from one side. The third is wrapped in the embrace of another Skeleton Knight, but that one does not move.

"But what you don't see, dear adventurers, is the wraith emerging from the wall behind you, looming over Shepherd and Tabby as Lavelle and Rune take the lead. The wraith grows wide, its midnight eyes devouring the light behind you. The room grows cold as it reaches out toward you... and that's where we'll end for tonight."

> The table erupts into excited chatter as the players debrief from their session together.

QUESTIONS TO CONSIDER FOR GMS

- Aliyah's roll with Hope to finish off the Skeleton Knight meant that the PCs would have been able to act again before the archers. Those archers hadn't taken any damage, but Stella described them falling apart after the knight died. Do you feel like that was a satisfying end to the combat, or would you have had the archers keep fighting? The explanation Stella offered to Rune could be taken as precedent, so if Stella chooses to not end a fight early in the future when the party destroys the most powerful skeleton, she'll want to have an idea in mind why things are different the second time to maintain the integrity of the story.

- Stella allowed Rune to make two jumps using the "Arcane Door" spell rather than making him roll for each casting. When a character is using an ability like that, do you want to call for a roll for each use or let one roll represent chaining the ability a couple of times like Stella did?

- Would you have chosen to use "Terrifying" when the Skeleton Knight hit Tabby with "Dig Two Graves?" You don't always have to use every one of an adversary's features, and Stella skipped it to honor Tabby's critical success.

- In the fight with the skeletons, would you have had them attack the group in the order and fashion that Stella did? Choosing which adversaries to spotlight—and when—helps determine the shape of the fight and its rhythm, the ups and downs. How else could that fight have gone? Would you have waited to use the archers until after the Skeleton Knight?

- Rune destroyed all four skeleton minions in one good hit, which meant the attack on the other skeletons was wasted. Would you have allowed Rune to use that other "Wild Flame" attack to attack the Skeleton twice, or maybe to hit one of the archers even though they were out of range? Or does losing the extra attack seem like a fair price for the certainty of being able to remove the minions?

- What would you have done if Shepherd had rolled a success with Fear when using their "Nature's Tongue" spell to talk to the goat? What would have been an interesting consequence if Shepherd failed that roll entirely? Would the goat have run off, or would you have introduced another complication during their ascent? Is there some complication that Stella could have used to foreshadow the skeletons or the wraith? Or would it have been better to gain a Fear and let the players keep pressing forward without an immediate consequence?

As you consider your answers to these questions and make rulings during the game, you'll develop your own GM style. That's the key point to take away from this: there is no right answer. It all comes down to your group and what creates the best experience for your table. Your GM style might even change over time, and that's okay, too. Next up is chapter 3, which will give you the tools you need to run a great game for your players.

CHAPTER THREE
RUNNING AN ADVENTURE

This chapter is only required reading if you plan to be the game master for a session or campaign of Daggerheart. If you're reading the book to create and play a character, you've reached the end of what you need to know. If you're a game master, read on!

INTRODUCTION

As a game master, you are responsible for guiding the narrative and playing as the world that exists around your PCs. You are the massive sandstorm that hinders their journey, the innkeeper they befriend while seeking shelter, the mysterious stranger in the corner who asks them for help, or anything else that comes up during a session. Being a GM can be one of the most fun, exhilarating, and fulfilling experiences at the table—but it can also be intimidating, especially when you're learning a new system.

Parts of this chapter are much more conversational than the rest of the book. The previous chapters were primarily focused on delivering the mechanics of the game; while we're going to cover mechanics in this chapter as well, we're also going to talk about topics that lend themselves much better to a conversation than hard-and-fast rules: aspects of gameplay like story structure, improv, and world-building. Because, at the end of the day, the "big secret" about GMing is that you aren't bound by a rigid ruleset like the players—you get to make it all up. Whether you made it up the week before, the day before, or in the moment at the table, you're always crafting an experience for your players through the decisions you make.

This chapter is dedicated to giving you the tools you need to run a game of Daggerheart: understanding the core mechanics; creating memorable encounters; planning exciting sessions; knowing how to select, create, and use GM moves; crafting a full campaign; running dynamic NPCs; and more.

CORE GUIDANCE

In this section, you'll find some core guidance on how to run Daggerheart:

- GM Principles
- GM Best Practices
- Pitfalls To Avoid

These three sections provide a foundation to help you get the most out of this game. The "GM Principles" are your guiding star—when in doubt, return to these principles. The "GM Best Practices" provide examples for you to follow, while "Pitfalls to Avoid" shows you what to stay away from when GMing Daggerheart.

As you read, don't forget "The Golden Rule" on page 7.

Whether you are a first-time GM, a veteran behind the screen, or anything in between, we encourage you to embrace the parts of this chapter that resonate with you and modify portions that don't.
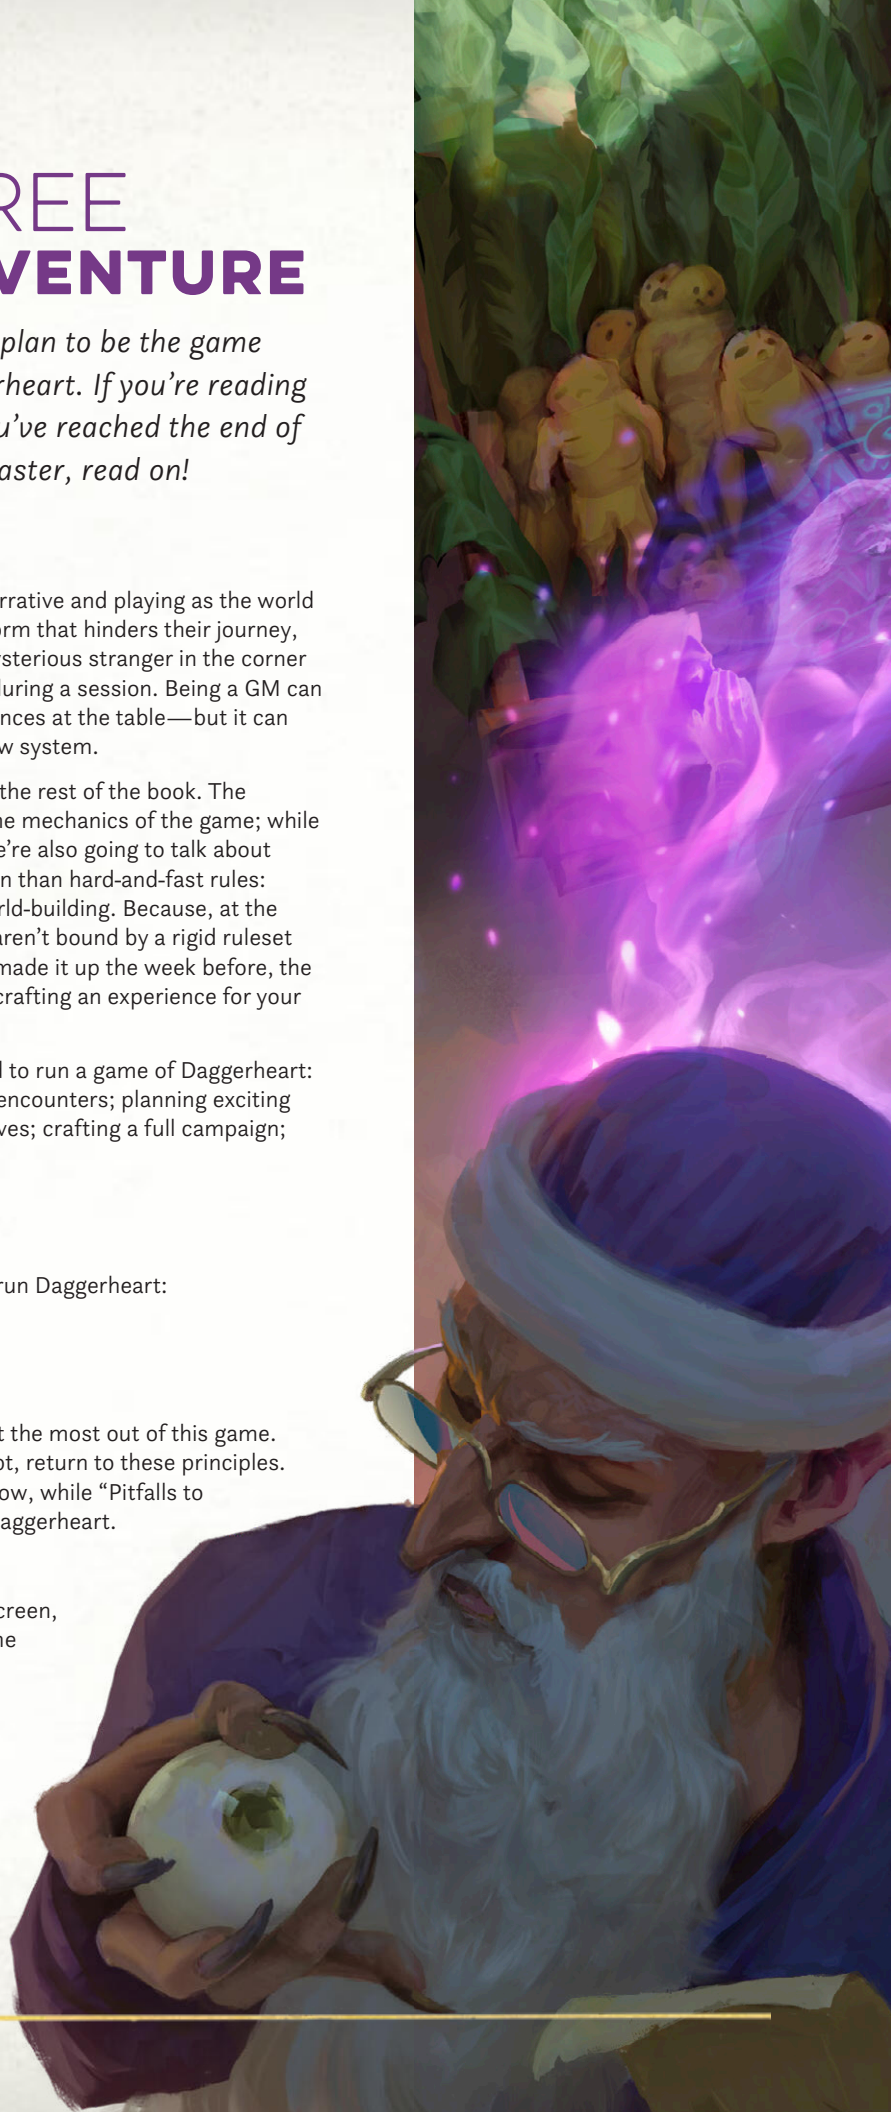

GM PRINCIPLES

Daggerheart stands on the shoulders of a decades-long tradition of fantasy adventure TTRPGs that traces back to the beginning of the form as we know it. This game shares many characteristics with its predecessors—an attention to dramatized combat, familiar fantasy ancestries and archetypes, common touchstones from popular culture and folklore, and more. In addition, as you can see in the "Touchstones" section in the Introduction, Daggerheart draws inspiration from a variety of TTRPGs and other media beyond the fantasy adventure genre.

Daggerheart prioritizes and provides the tools for telling a certain kind of heroic fantasy story. The system is focused on building collaborative, character-focused stories full of emotion, and it weaves the narrative through the entire experience, including its combat. Battle comes alive when the dramatic beats and rhythm highlight the conflicting motivations of combatants, when the characters' bonds impact their decisions in the fight, and when there is a goal beyond simply killing every combatant. Daggerheart truly shines when the battles against adversaries are a dramatic beat in a larger, emotionally grounded story about the wants and needs of the characters.

Following these GM principles will help the whole table have the best possible experience playing this game:

→ Begin and end with the fiction.
→ Collaborate at all times, especially during conflict.
→ Fill the world with life, wonder, and danger.
→ Ask questions and incorporate the answers.
→ Make every roll important.
→ Play to find out what happens.
→ Hold on gently.

◼ BEGIN AND END WITH THE FICTION

"The fiction" refers to the story being created as you play. Use the fiction to drive mechanics—for example, when to call for rolls, which GM moves to use, what Difficulty a roll should be, or whether it should have advantage or disadvantage. Daggerheart's rules exist to facilitate collaborative storytelling, so the flow of play should begin with narrative and lead to mechanics when needed. The GM then connects the results of the mechanics back to the fiction so play can continue smoothly.

COLLABORATE AT ALL TIMES, ESPECIALLY DURING CONFLICT

When you're the GM, the players are your collaborators and their characters are the protagonists of the campaign. You're all working together to tell an exciting, memorable story where heroes face incredible odds and often win in the end. Antagonism between player and GM should exist only in the fiction of the game, through the actions of NPCs and opposition within the narrative.

Neither the PCs nor the players are your "enemy." They're the opponents of the adversaries you play, but you and the players are on the same side: the side invested in telling an amazing story together. When representing antagonists and challenges, your main job is to balance presenting credible threats with maintaining the trust of the players so that the collaborative process can succeed.

Part of collaboration is being a fan of the players and a fan of their characters. Being a fan of the players means consciously including story elements and themes they've expressed interest in. It also means giving them the benefit of the doubt when they forget something small—especially something that their character wouldn't forget. Being a fan of the PCs means that while you'll make their life challenging, up to and potentially including death, you're never rooting for them to lose—you're working with the players to ensure that the characters' story is exciting and the environment around them is behaving with internal consistency.

FILL THE WORLD WITH LIFE, WONDER, AND DANGER

Daggerheart is a game of action, adventure, and high fantasy. One of your biggest jobs as the GM is to present a world worthy of heroic tales. When running a player-driven game, you can take the characters' details, backgrounds, connection questions, and worldbuilding notes your players provided both in and out of your session zero (see the upcoming "Session Zero and Safety Tools" section on page 169) and use those as a palette to paint an exciting world. Fill it with vibrant adventures that showcase rich cultures, take the PCs to wondrous places, and introduce them to dangerous creatures. Strive to ground all of this in a place that honors the motivations and personhood of everyone, from preeminent high nobility and demigods to humble farmers and artisans.

ASK QUESTIONS AND INCORPORATE THE ANSWERS

In Daggerheart, the GM doesn't have to do all the heavy lifting in terms of worldbuilding; we encourage you to share narrative authority with the players. Many players will be drawn more fully into the story when you empower them to add their own touches and details to your shared world.

When the party enters a character's hometown, you might invite that player to describe the local market. Rather than narrating a character's deadly blow on a critical success, you can ask the player to take the spotlight and detail their triumph. In dramatic or even commonplace moments, you might ask questions about a character's motivations, emotions, and history, then connect the answers to the current moment.

Some groups may want to go even further, closing the gap in narrative authority between players and GM by letting players take authorship over entire regions or nations. Your players' involvement shows their interest in the story—do your best to respect their investment and fold their contributions into the tale. As the GM, it's your job to maintain the integrity of the world and make adjustments when needed, but ensuring that the players' ideas are included results in a narrative that supports the whole group's creativity.

MAKE EVERY ROLL IMPORTANT

Action rolls in Daggerheart describe and resolve a moment within a story; these moments might be as short as a split-second dodge, as long as a full exchange of blows in combat, or an entire montage of chasing leads over the course of an evening.

Because the GM can choose to make a move in response to a player's failed roll or a result with Fear, and since every roll generates Hope or Fear, only ask the players to roll during meaningful moments to ensure that every roll contributes to the story. Daggerheart is designed for cinematic play—when you provide information freely and allow characters to succeed at tasks in line with their skills, the moments where characters do roll carry more risk and weight. Failures should create heartbreaking complications or unexpected challenges, while successes should feel like soaring triumphs!

PLAY TO FIND OUT WHAT HAPPENS

Daggerheart thrives when the focus is on the emotional journey of the PCs and the GM leaves room for their impact. You're not playing a pre-planned story—the overarching plot of your campaign will emerge when you collaborate with the players to weave together the characters' stories, the world, and major events.

Actively create room to be surprised by what the characters will do, the choices they'll make, and the people they'll become. Try to prepare situations without expectations about the solutions the players will find or create. While preparing adversaries and appropriate maps can help make for exciting scenes, always know you can adjust or completely throw out plans to follow inspiration when it strikes at the table.

HOLD ON GENTLY

Improvisational storytelling isn't always perfect, and that's okay. Hold on gently to the fiction, enough so that you don't lose the pieces that matter, but not so tightly that the narrative has no room to breathe. Let yourself make mistakes and make changes. Smooth the edges and shape them to fit the story. You'll be the final arbiter and editor, but don't worry if you need to go back and revisit or retroactively change something that came before.

GM BEST PRACTICES

The GM Principles give you guidance on what to do; meanwhile, the GM Best Practices in this section help you know how to do it. Think of the principles as the guiding stars for your game's ship, and the practices are the sails, ropes, and oars the ship uses to traverse that route.

→ Cultivate a curious table.
→ Gain your players' trust.
→ Keep the story moving forward.
→ Cut to the action.
→ Help the players use the game.
→ Create a meta conversation.
→ Tell them what they would know.
→ Ground the world in motive.
→ Bring the game's mechanics to life.
→ Reframe rather than reject.
→ Work in moments and montages.

CULTIVATE A CURIOUS TABLE

Tantalize players with a suspicious line muttered under an NPC's breath, illustrate the signs of a lingering magical threat shimmering among the trees, hint at future danger looming over the distant horizon. Throw out hooks and see what catches their interest. Foster an environment of creative inquiry at the table and allow that curiosity to lead you to incredible places.

GAIN YOUR PLAYERS' TRUST

Trust is essential for a successful game of Daggerheart. The GM trusts the players to represent their characters' actions thoughtfully while keeping the table's shared goals in mind. The players trust the GM is acting in good faith—that when you're introducing challenges and doling out consequences, you're doing so with their interests in mind.

Make promises and then follow through on them. Maybe an innkeeper tells you they heard strange sounds coming from the basement at night. When the PCs go to the basement that evening, give them something interesting to find. Let players' hunches come to fruition when you can—let them feel like their understanding of the world is correct even if it's incomplete. Perhaps the dangerous person they're tracking did come through the shop they just visited, or the ancient book they're seeking can be found in the library from a PC's backstory the party is now headed toward. When resolving an action, deliver on the expectations you set when you called for the roll. If you tell the PC that a successful Agility Roll will let them jump from their airship to another, when they succeed, let them do it.

This also means admitting when you misstep or misspeak, and checking in with your players when you're unsure what they intend. If you didn't realize a player was expecting to bypass the entire patrol of guards with a single roll, you might back the scene up and reestablish the stakes. Alternatively, you might just let them know you'll be more clear next time and allow them to sneak by the patrol this time.

KEEP THE STORY MOVING FORWARD

Every time a player makes an action roll, the story should move forward, success or failure. On a failure, the GM says how the world responds and keeps the story moving. This is often referred to as "failing forward." A character might not get what they want if the roll goes poorly, but the story advances through escalation, new information, or some other change in circumstances.

CUT TO THE ACTION

Heroic fantasy stories consist of dramatic scenes, travel montages, and downtempo moments around a campfire as the heroes decompress and prepare for what's ahead. If the travel between two places won't result in danger or interesting challenges and everyone is excited to press forward, you can cut ahead to the action by saying something like, "So you travel to Oldhome. Instead of playing this out and doing long rests, just clear all your marked Hit Points, Stress, and Armor Slots. We pick up on the edge of town after two long days on the road. It's only twilight, but you haven't seen anyone in any of the outlying farms. There's no sound coming from the tavern just ahead on your right. What do you do?"

When a scene feels like it's dragging or going in circles, you can cut to a new scene to keep the narrative moving, letting the players know they can flash back to the details of the plan or get their story straight later.

Note that action doesn't always mean combat. Action can be tense political drama as the party tries to maintain an alliance hanging by a thread. It can be navigating an archmage's warded and trapped hedge maze. It can be an emotional scene between a character and an NPC from their past. "Action" means any time there is tension and uncertainty—situations that challenge the characters.

If the PCs have an enemy on the ropes and the players' interest seems to be wavering, go ahead and have the foe run off or surrender. Alternatively, just ask the players how they finish out the fight. You should do your best to not let a scene become a slog where everyone feels obligated to see it through, even when no one is having fun. Part of being the GM is knowing which moments to focus on and which to push off-screen.

HELP THE PLAYERS USE THE GAME

If you're the GM, there's a good chance that you're the person who has spent the most time learning Daggerheart's rules. Thus, you are best equipped to help your table understand how to play. Help players reach the point where they see the rules as a toolkit used to tell the story together, not as an obstacle that stands between them and enjoying the experience of play.

The GM plays the opposition to the characters, but they're working with the players to tell the story. If the players are missing something obvious or seem to be forgetting an ability, don't be afraid to guide them to it. The better an understanding the players have of the rules and mechanics, the better they're equipped to face increasingly difficult situations and find clever ways to solve problems.

CREATE A META CONVERSATION

As the GM, you should ensure players always feel comfortable shifting out of character to discuss something. Whether as creative collaborators or friends enjoying a game together, players should feel empowered to utilize safety tools during the game or ask for clarifications concerning the story or rules.

TELL THEM WHAT THEY WOULD KNOW

While the characters live in the fictional world and can utilize all their senses to experience it, the players only know what is established by your descriptions. Help the players by sharing details about their environment, giving them critical information, and offering facts their characters would easily know or have already discovered. For example, three players will all imagine "a wizard's tower" differently, so include the specific details that will shape their understanding of this particular wizard's tower. In many cases, if you don't describe something, it doesn't exist in the minds of the other people at your table.

If there is information in a scene that characters would be able to perceive just by being in the space, don't gate those details behind a roll. For instance, if a PC asks about a desk or chest within the tower that the wizard might use to store important notes, you can explain that the desk is clean and has no drawers, but there is a large bookshelf filled with scrolls and stacks of paper. This is a detail the character could easily see without effort—you don't need to ask the player to roll.

GROUND THE WORLD IN MOTIVE

The characters in Daggerheart are driven by their motivations. An ambitious baroness wants to gain status and increase her sphere of influence, so she acts to extend her power. A large swamp serpent is motivated by hunger and safety, so they hunt outsiders, but they might not chase them beyond the muddy water if they're sated.

Each adversary stat block suggests a couple general motives, but when you're depicting important NPCs, consider both their short-term and long-term goals. A renowned thief might be most immediately driven by a desire to steal crown jewels from a caravan, but their ultimate goal is to avoid capture by the king's guard—when both of these motivations impact their decisions, this creates a multidimensional character.

The players might not always know a character's true motives, but if you keep motivation in mind, you can depict the world with depth and consistency. When you hint at or reveal an NPC's motives, the players can push and pull on the NPC's hopes and fears to create dynamic bonds.

Action without motivation can feel like choreography. When a supposed ally betrays the party, your story will hit harder if the players understand their motivations, truly making the betrayal both sudden and (in retrospect) inevitable.

BRING THE GAME'S MECHANICS TO LIFE

Set a good example of how fiction and mechanics work together to enhance the game experience. For example, when an incoming storm will bring disaster to the nearby port town, place a countdown (see the upcoming "Countdowns" section on page 162) on the table labeled "The storm ravages Port Emerald" to show that the threat is real.

Mechanics and storytelling accentuate each other in nearly every aspect of the game. When a PC rolls a failure with Fear, go hard with your description of the consequence to convey the gravity of the fallout, demonstrating the difference between a failure with Hope and one with Fear. Embody the enemy's fatigue and desperation as they mark their last Stress but continue to goad the party on. If the heroes are ambushed by a large band of raiders, lay out your battlemat and set down figures for all fourteen enemies to show how outnumbered the party is. Whenever possible, let the mechanics of the game drive the story you're telling and let the fiction you've created reinforce the mechanics you're using.

REFRAME RATHER THAN REJECT

If a player's suggestion or description is generally implausible or out of sync with what has been established in the game, try to find a way to reframe the situation and work with them rather than rejecting their idea outright. You might ask the table what it would take to accomplish a seemingly implausible task, or call out a more workable part of the suggestion and encourage the player to build on that aspect.

> **Example:** *"Well, you might not be able to fly up to the platform using the Telekinesis spell in your grimoire, but there are plenty of large rocks here you could move around if you wanted."*

WORK IN MOMENTS AND MONTAGES

When framing a scene or playing out a beat of the story, think about moments and montages. If the stakes are high and you want to zoom in on the flash of blades or the coded language of courtly flirtation, you're working in moments. Give those powerful, climactic moments their due, lingering on the emotion and giving players time to savor the scene. However, not every part of the story needs to be told in moment-by-moment description or full scenes. In those cases, consider using montage, a sequence of short descriptions or a summary that establishes what happens without lingering on the individual moments. Montage can be used for actions that take place over minutes, hours, or days.

> **Example:** *"You spend the evening working the crowds to find leads on the Scorpion Society, but I don't think we need to play it all out. Tell us a little about what that looks like and then make a Presence Roll."*

PITFALLS TO AVOID

Like any game that relies on collaboration, your Daggerheart campaign will be impacted by the tactics and behaviors of the people at the table. Here are a few areas where hang-ups are more likely to occur when running Daggerheart, and ways to help your games run more smoothly if you encounter them.

→ Undermining the heroes
→ Always telling the players what to roll
→ Letting scenes drag
→ Singular solutions
→ Overplanning
→ Hoarding Fear

■ UNDERMINING THE HEROES

Even at level 1, the heroes possess both talent and experience. This is a heroic fantasy game, and so the characters are assumed to be skilled in the basics of adventuring.

When a roll doesn't go well, things go badly and the character doesn't get what they want. Rather than describing the PCs being incompetent, it's often better to show how the failure was impacted by their target's prowess, environmental factors, or unexpected surprises. An easy way to make this work is to describe the cool or smart move the character was making, then say "But…" and narrate a surprise, complication, or escalation.

"Your blade slices through the air with grace, aimed perfectly at the guard's shoulder. But she reacts just fast enough to bring up the haft of her halberd to block your blow, then swings her weapon to try to pin you against the wall. She's way faster than a random guard at an outpost like this should be. What's a soldier with her skill doing stuck all the way out here?"

If the group has decided on a more comical tone, this guidance might not apply, but the default for Daggerheart is to assume the PCs are competent adventurers and make the story exciting by depicting capable heroes struggling with extraordinary challenges.

■ ALWAYS TELLING THE PLAYERS WHAT TO ROLL

Daggerheart's collaborative approach encourages players to express their character's personalities through creative problem-solving. In some situations, there might really only be one trait that's appropriate to roll; for example, traversing a slippery bridge is almost always going to be an Agility Roll. But in many situations, you can give the players the freedom to decide how they're going to handle a challenge and what trait they want to use to accomplish the roll.

Example: Stella, the GM, says "The spellrider on the giant bat just broke the enchantment keeping your airship aloft. You're all going to need to give me a roll to deal with the imminent fall. What do you do?"

Aliyah says, "I'm going to jump off the ship, grab a hold of the bat to climb up, and wrestle the spellrider out of the saddle. Can I do that with Agility?"

Nolan says, "I want to make a Finesse Roll using my Pirate Experience to cut one of the smaller sails free and use it like a parachute."

■ LETTING SCENES DRAG

Ideally, scenes should be focused, carrying the momentum of the story forward. Each roll should progress the narrative and build or resolve tension. At the natural conclusion of a scene, when the table energy is flagging, or when the players or characters are talking in circles, consider shaking up the scene or resolving it and cutting away to a new one to maintain that momentum. In social situations, prompt them to action by making a relevant GM move to introduce a ticking clock, provide new information, foreshadow future danger, or something similar. In a combat that's dragging, remember not all conflicts need to end with the enemy's death—change things up or create a dramatic resolution, such as an escape, a natural disaster, or an intervention by an authoritative power.

■ SINGULAR SOLUTIONS

If the GM has exactly one idea in mind for how the PCs can solve a given problem, it can become challenging if the players get excited about another answer. You might have good reason for why the solution you have in mind is the best option, but if the players have a clever idea, it's often smart to adjust in the moment and figure out how to make their approach work.

Puzzles are a great example of a situation where a singular solution can cause problems. Everyone's minds work in different ways, and a puzzle or riddle with only one "right" answer can shut down interesting alternatives. If the players get bogged down or frustrated with a puzzle or scene, consider finding a way to move things along or adjust the situation to let the character's actions advance the story. This might involve showing your hand to give the players more context or checking in to ask how they're feeling about a scene.

OVERPLANNING

Daggerheart is designed to be played with a great deal of improvisation to allow the players a large amount of creative agency—the group builds and discovers the world together. The game is also built to be player driven, where the PCs' backgrounds and connections serve as the primary fuel for the plot. For these reasons, we recommend leaving space for the story to breathe.

The game works better when more preparation time goes into situations for the characters to explore rather than scripting entire scenes and a set progression of story beats. Every GM's style is different, and you may find that you benefit with more time spent on forms of preparation that allow you to utilize player agency and creativity.

Your players will often surprise you with daring or risky actions you could never anticipate. When these great ideas come up, read the energy of the table and see if they're all excited about this new direction, and what opposition or narrative responses might feed their enthusiasm. It's okay to tell your players: "That took me by surprise. How about a quick ten minute break while I think about how this exciting change will play out?"

HOARDING FEAR

Because you gain Fear any time a PC rolls with Fear, as well as during downtime, you'll often have a stockpile of Fear to draw on when you need it. Do your best to spend that Fear when you have the opportunity. Spending more Fear at the start of a combat or during a big moment can generate a lot of tension and set the stakes. This helps give shape to the scene, where the PCs are on the ropes, being reactive more than proactive as they fight to get their footing. Then, as they get their equilibrium, they become proactive, directly pursuing their objectives. Once they've made some strides toward those objectives, they may roll with Fear. This creates an opening for you to make another Fear move to complicate the scene.

This back-and-forth creates a dynamic scene, keeping the PCs on their toes and ultimately making the result all the more satisfying whether it's a hard-earned victory or a heartbreaking defeat.

CORE GM MECHANICS

In this section, we'll cover the core mechanics you will use when GMing Daggerheart.

THE GM'S DIE

The players use two d12 Duality Dice as their primary dice for action resolution, but as the GM, you'll use one d20. This creates a less predictable outcome for your rolls, while the players will have more reliable results. You're just as likely to roll abysmally high or low as you are to roll a middling number, whereas rolling two d12s creates a more stable bell curve of results. When you succeed, it creates a new and exciting challenge, and when you fail, it is a relief and a boon for the players. The swingy nature of the d20's results helps facilitate a variety of outcomes during a session.

MAKING GM ROLLS

When an adversary attacks a PC, you roll to determine the outcome. This follows a similar process to PC action rolls, except you use a d20 instead of two d12s:

◾ STEP 1: CALCULATE THE ATTACK ROLL

Roll your d20 and add the adversary's attack bonus (along with any other dice, such as an additional d20 for advantage).

◾ STEP 2: DETERMINE IF THE ATTACK HITS

If the roll result meets or beats the target PC's Evasion, the attack succeeds and hits the target. Otherwise, the attack fails and doesn't hit.

◾ STEP 3: ON A HIT, ROLL FOR DAMAGE

On a success, roll the appropriate damage dice to determine how much damage the attack deals.

If you ever want to increase the chances an adversary will succeed or fail, you can increase or decrease their attack modifier.

> **GM Critical Successes**
>
> PCs aren't the only characters who can roll a critical success—their adversaries can too! Whenever you roll a 20 on the d20, your roll automatically succeeds.
>
> If you critically succeed on an attack roll, you also deal extra damage. Start with the highest possible value the damage dice can roll, and then make a damage roll as usual, adding it to that value. For example, if the damage dice are 2d8+2 and you critically succeed on the roll, you would automatically deal 16 damage. You then roll the dice and get a 5 and a 7. So you add 16+5+7 for 28, plus 2 for the modifier, for a total of 30 damage.
>
> A critical success on a reaction roll does not have any added benefit for an adversary.

CALLING FOR ACTION ROLLS

After a player describes a move they want to make during the game, you might decide an action roll is necessary to determine how the scene progresses. Use this guide to determine what to present the player, choosing whichever option best fits the situation:

- **Let the PC guarantee success in exchange for a consequence.** If there is an opportunity for an interesting consequence, offer the player that outcome in exchange for performing the move without a roll; should they agree, the PC succeeds and you narrate the repercussions. For example, rather than rolling to see if a PC can jump from one roof to another, you might allow them to automatically succeed in exchange for being noticed by bystanders on the street beneath them.

- **Establish the stakes.** If a move is particularly difficult or dangerous and offers interesting consequences for success or failure, establish the stakes for the roll so that the player knows what to expect. Once everyone is aligned, ask the player to roll and shape the fiction around the results. For example, you can inform a player whose wants their PC to leap across rooftops that they'll jump without alerting anyone on a success, but a failure will mean they crash into the streets below, suffering heavy injuries. This empowers the player to take informed risks and lean into the fiction.

- **Make clear any guaranteed consequences.** If a move is particularly difficult or dangerous, and if it will certainly have repercussions regardless of whether the PC succeeds or not, tell the player about those repercussions before the move occurs. If the player wishes to proceed with the move, ask them to roll and narrate the consequences without compromising on your repercussions. For example, you might tell a player who wants their PC to jump from the roof of a burning building to safety that the roof will collapse in the attempt. Even if the roll succeeds spectacularly, narrate the building groaning and collapsing in on itself, preventing anyone after from performing the same escape.

◾ EXPERIENCES IMPACT FICTION

When determining whether or not a roll is necessary, always consider a PC's Experiences and narrative history. For example, if a PC has the "Expert Climber" Experience and they're attempting to scale a wall with no danger around, you might decide they don't need to roll—they can just do it. If the climb would be tricky due to weather, but you don't want the story to focus on what happens if they fail, you might offer them the option of marking a Stress in exchange for climbing without a roll. A character's history should lessen their need to roll things they're experienced in—you should introduce rolls only when circumstances fall outside of their Experience, such as the PC trying to climb while archers rain arrows down from parapets above.

MAKING MOVES

Just like the players have moves they can make during the game, you also have **GM moves** that change the story in response to their actions. Unlike the PCs, you aren't bound by specific spells you can cast or certain effects you can do—when you make GM moves, you are acting to shape and facilitate the story, whatever that requires. When you begin a GM move, you are starting your **GM turn**. When you are done making your GM move (or moves) and play passes back to the PCs, your GM turn is over.

At its most simple, a GM move is anything you do that guides the story. These moves can heighten the danger, often by introducing conflict or increasing the Difficulty, or they can offer ease and support, often by revealing new information or relieving a burden. This ebb and flow of opposition and cooperation facilitates dynamic play and invites opportunities for both GMs and players to surprise one another with exciting choices.

If moves are your chance to make things happen in the scene, what should you do? The upcoming sections provide suggestions (and examples in the "Example GM Moves" section), but these decisions are hard to make in a vacuum. The best tool you have at your disposal is listening to your players as they add to the narrative, then weaving your moves into theirs.

◼ WHEN TO MAKE A MOVE

Knowing when to make moves (and what kind of moves to make) is a significant part of learning to GM Daggerheart. The frequency and severity of these moves depends on the type of story you're telling, the actions your players take, and the tone of the session you're running, but the general rule of thumb is this: you can make a GM move whenever you want. That's right! You're the GM—your job is not to crush the PCs or always act adversarially; it's to help tell a story. You should be making moves whenever you see an opportunity to do so.

Consider making a GM move when a player does one of the following things:

- Rolls with Fear on an action roll.
- Fails an action roll.
- Does something that would have consequences.
- Gives you a golden opportunity.
- Looks to you for what happens next.

Note that making a big move isn't always necessary! When you can't see an opening for a narratively impactful move, remember the other tools in your toolkit: make a PC mark a Stress, progress an event happening outside the current scene, or even defer the consequence for later. For example, perhaps nothing happens when you break the cursed object now, but its rightful owner might come to collect their due down the line.

They Roll with Fear on an Action Roll

If a PC rolls with Fear, play returns to you to make a GM move. Whether their roll failed or succeeded, your move should generally build on the action the player just attempted.

They Fail an Action Roll

If a PC fails an action roll, play returns to you to describe the failure and what comes next in the story because of it. If it's a failure with Fear, consider choosing a harsher consequence or complication than you would otherwise.

They Do Something That Would Have Consequences

Sometimes a PC makes a move that, regardless of whether they succeed or fail, has inevitable consequences. In these situations, you can make a move to reflect that outcome. For example, if a PC wants to save someone from a burning building, the player declares they want to run inside. You can explain to that player that no matter how high they roll, a consequence will occur: the character takes damage from the fire, the building collapses around them to prevent an easy escape, or something they're carrying is damaged in the flames.

They Give You a Golden Opportunity

Sometimes, a PC's decision gives you the perfect opportunity for a dramatic move—perhaps they move too close to a waiting predator or get distracted while watching for intruders. In these cases, a roll doesn't prompt your move, but you can still seize the opportunity for a powerful dramatic beat. For example, if the PCs are hiding from a group of thieves while discussing the bandit leader's plans, a PC might say with dramatic irony, "But surely they won't look in the eaves of every barn in the district!" In response, you might describe the barn door noisily swinging open as a bandit steps inside, a lit torch in one hand and a sword in the other as they peer into the rafters where the characters are hiding.

They Look to You for What Happens Next

Your job is to keep the story moving, so when the players aren't sure what to do, they'll likely look to you to find out. This is usually a sign that you should make a move. For example, if the PCs are conversing with each other during a dinner party then reach a lull in the conversation, the players might glance at you to see if it's time for an NPC to speak or take action.

Similarly, you should make a move when the players are stumped about what to do or when they seem frustrated about a lack of information. When you need to get the scene moving again, a softer move might do the trick (see the upcoming "Softer and Harder Moves" section), but sometimes a harder move is needed to provoke the PCs to action.

◼ HOW TO CHOOSE A MOVE

When a player makes an action roll, the result influences how the scene changes—but those changes depend on your chosen GM move. Consider the following examples of phrases you might say to the player after an action roll, and what moves you might make:

Critical Success

"That's a critical success! You get what you want and a little extra. Gain a Hope and clear a Stress. Tell me how this happens..."

Let the player describe their success, then give the party an additional opportunity or advantage in the scene because of it.

Success with Hope

"That's a success with Hope, so you get what you want. Gain a Hope. Tell me how this happens..."

Let the player describe their success, then show how the world reacts to it.

Success with Fear

"That's a success with Fear, so you get what you want, but it comes at a cost. I gain a Fear and here's what happens..."

Work together to describe the PC's success, then introduce a complication or cost as a GM move—but don't negate their success with this consequence. Maybe an adversary attacks them in response or they mark a Stress from the toll it took to succeed. Perhaps they realize their ally is in imminent danger or get new information that raises the stakes.

Failure with Hope

"That's a failure with Hope, so things don't go according to plan, but you gain a Hope. Here's what happens..."

Describe how the PC fails to get what they want, and how the situation goes wrong as a result, by introducing a minor complication or consequence as a GM move. Maybe they spot a new danger they must now contend with, face an attack or mark a Stress from an enemy they're engaged with, or face collateral damage that puts them in a more difficult position.

Failure with Fear

"That's a failure with Fear, so it doesn't go well! I gain a Fear and here's what happens..."

Describe how things go wrong by introducing a major complication or consequence as a GM move. Maybe they receive bad news and the information puts them in immediate danger, they become the focus of multiple adversaries, they are separated from their party, or an important opportunity is lost for good.

QUICK REFERENCE: RESOLVING ACTION ROLLS

If you're unsure how to resolve a roll, think about these quick phrases:

Success with Hope: Yes, and... (You get what you want and gain a Hope.)

Success with Fear: Yes, but... (You get what you want, but there's a consequence, and the GM gains a Fear.)

Failure with Hope: No, but... (Things don't go as planned, but you gain a Hope.)

Failure with Fear: No, and... (Things don't go as planned and it gets worse. The GM gains a Fear.)

Obvious Moves

Sometimes, you'll know without hesitation how to make a move in a scene. A PC just rolled a success with Fear on a melee attack against a powerful adversary? They get what they want, but it comes at a cost. In response, your move might have the adversary strike back or throw the PC across the battlefield. Maybe you've set up the scene so that they're fighting on a precarious ledge, and the attack from the PC was successful, but momentum carries them dangerously close to the cliff's edge and they must make an Agility Roll to see if they can keep from falling off.

Other times, the move might not be immediately obvious. In that case, you can draw inspiration from the upcoming "Example GM Moves" section. If all else fails, either have the PC mark a Stress, or tell them "everything is fine... for now" and think about how you can bring more danger their way in a later scenario.

Player-Driven Moves

If you're still not sure what to do, you might turn the decision over to the player, giving them an option of two different things or simply asking them what happens next. They sometimes put themselves in a more interesting or dangerous situation than you ever would've!

Social Moves

Keep in mind that GM moves are applicable in any situation. While combat mechanics naturally lend themselves to signaling when enemies attack, how much damage they deal, and so on, the concept of "making moves" applies across all scenarios within Daggerheart. A tense dinner between rivals, an important negotiation, an emotional confrontation—all of these scenes have a back-and-forth between the PCs and the GM. You can use moves to accomplish the single most important part of GMing: listening and responding to your players.

■ AVOID UNDERMINING SUCCESS

On a success with Fear, one pitfall GMs can run into is undermining their players' success when making a GM move as the consequence. For example, if a PC makes a Finesse roll in an attempt to move stealthily through a hallway, and they succeed but roll with Fear, don't use your move to sound an alarm bell or make someone bump into them, spoiling their cover. The PC succeeded on the roll, and that success should be honored, even if it comes with a consequence. Instead, consider options such as introducing a new obstacle at their target destination or adding a new enemy approaching from behind to complicate their situation.

Similarly, if a PC does something cool—such as cleverly casting a spell—let them enjoy it instead of immediately foiling their schemes and let the scene play out for a while, using moves to change and escalate the scenario rather than end the effect. For example, a PC might circumvent a trap you laid; rather than immediately use a GM move to spring the trap into working, let the PC feel smart as you instead use your next GM move to summon more foes or telegraph what other dangers might be on the path ahead. Use your GM moves to immediately shut down an effect when it involves a climactic moment or a powerful adversary—when you need to show that the situation is dire.

Keep this principle in mind as you make GM moves. The following sections provide advice on what kind of moves you can make and how to implement harder moves with care. After all, not every move will be enjoyed in every circumstance. If the PCs are delivering a powerful artifact to a wizard to be destroyed, having a minor adversary steal the artifact can spark an exciting story arc—or it can throw icy water on the party's excitement and make them feel all their work to retrieve it was pointless. As always, communication and collaboration are key, and hard actions shouldn't negate player agency or feel punishing.

■ SOFTER AND HARDER MOVES

When play turns to you, you have many options for how to respond. Some are **soft moves** that are generally easier on the players—they give the party new information about the scene and offer them an opportunity to react to it. Others are **hard moves** that are usually harsher, bigger, or more direct—this fiction happens without allowing PCs to intercede. Consider using softer moves on failures with Hope and harder moves on any roll with Fear. Additionally, you might start off a session using softer moves and progress into harder moves as the story comes to a climax. Remember that your moves set the tone for a challenge or threat.

> The next section contains example moves in approximate order of severity.
EXAMPLE GM MOVES

GM moves are your most important tool as a storyteller in Daggerheart.

The way you make moves truly defines your story and style. Everyone who plays this game will interact with GM moves differently, so you should never feel like you have to use them the same way anyone else does! As long as you and your table are having fun, you're staying true to the story, and you're acting as a fan of your players, that's what matters.

The following examples span the gradient from softer moves to harder moves. Look down the list until you find the move that seems appropriate. Don't describe your move in the terms used in this section. Instead of saying "I show the collateral damage," contextualize it for the players—describe how their missed arrow pierces the frayed rope holding a lantern aloft, and now the room in the bandits' hideaway has been set ablaze!

When you make a GM move, you might try one of these:

→ Show how the world reacts.
→ Ask a question and build on the answer.
→ Make an NPC act in accordance with their motive.
→ Lean on the character's goals to drive them to action.
→ Signal an imminent off-screen threat.
→ Reveal an unwelcome truth or unexpected danger.
→ Force the group to split up.
→ Make a PC mark Stress as a consequence for their actions.
→ Make a move the characters don't see.
→ Show the collateral damage.
→ Clear a temporary condition or effect.
→ Shift the environment.
→ Spotlight an adversary.
→ Capture someone or something important.
→ Use a PC's backstory against them.
→ Take away an opportunity permanently.

SHOW HOW THE WORLD REACTS

To show how the world reacts, simply think about the way the PC's move has affected the world and narrate that change in a way that creates new opportunities for the PCs to act. At its softest, you might describe them successfully breaking down a door, then give them a description of the next room and what danger they find there. You could also make the person they're negotiating with present an option for compromise, or have an enemy they just hit attempt to retreat. This is your opportunity to make the world around the PCs feel real and alive.

ASK A QUESTION AND BUILD ON THE ANSWER

This is perhaps the most collaborative move—presenting the player with a question, and using their answer as truth to build the scene. You might ask them something like, "What do you see in this city that reminds you of home?" or "What about this place tells you someone else was here before you?" Typically utilized when establishing information about a scene or when you're interested in a specific character or player's perspective on the current situation, this move can be a great way to get the whole table involved in worldbuilding during the game.

MAKE AN NPC ACT IN ACCORDANCE WITH THEIR MOTIVE

When a scene includes characters other than the PCs, you can spotlight what these NPCs are doing in response to the PCs' actions. You might show a friendly NPC helping the party in a fight, a group of townsfolk taking cover, or an enemy moving positions. Make sure their actions always flow from their motive.

LEAN ON THE CHARACTER'S GOALS TO DRIVE THEM TO ACTION

One of the most powerful ways to change a scene as a GM is to introduce something personal to the PCs. If the character is seeking out a specific object or creature, you might reveal where it is and why it's going to be so challenging to get there. Using a PC's desires to drive them forward is a great way to reinforce why this scene matters to them.

SIGNAL AN IMMINENT OFF-SCREEN THREAT

A rustle in the trees, an alarm bell being sounded, the clanging armor of reinforcements headed their way—this move creates a ticking clock for your PCs. They need to get moving now.

REVEAL AN UNWELCOME TRUTH OR UNEXPECTED DANGER

This versatile move is usually applicable in any scene—you're simply heightening the drama or tension. Maybe an unexpected person steps out of the shadows, or the characters receive bad news that makes them rethink their plans. A soft version of this move might manifest as moving a group of dangerous foes within striking range of the PCs or revealing a guard captain just when the PCs think they have the upper hand over the guards. A harder version of this move might be an enemy pinning a PC against the wall, making a PC *Restrained* until they make a roll to escape the adversary's grasp.

FORCE THE GROUP TO SPLIT UP

Usually the result of an environmental hazard or a trap, splitting up the party can force your players to think differently than they normally would about how to accomplish a task. This move can also make for some fun cutting back and forth between scenes as the two groups work independently before finding a way back to each other.

MAKE A PC MARK STRESS AS A CONSEQUENCE FOR THEIR ACTIONS

This move is perfect for a success with Fear when you're not sure what other consequences apply—the PC can get it done, but it's not going to be easy. For example, the PC can charge across the battlefield, but they'll mark a Stress to do it. As a softer move, you can also make this an offer instead—maybe you give them the choice to only make it halfway across and not mark a Stress.

When you have a player mark Stress, describe why the circumstance is stressful—or ask the player to do so. Is it physically taxing in some way? Does it bring up painful memories? Is the PC under significant pressure?

MAKE A MOVE THE CHARACTERS DON'T SEE

This move is most useful when you have something happening behind the scenes that you're waiting to reveal. You might start a new countdown or tick down a current one, add more damage dice to an enemy's upcoming damage roll, adjust a narrative situation the PCs have yet to encounter, or create another consequence the players can't foresee. When you do this, don't tell them the move, but do create fun tension at the table by letting them know your machinations have changed: "Everything is fine... *for now*."

Depending on your style of play, you might instead tick down a countdown timer the players can see but don't fully understand. You could also cut away to a scene that the players see but the characters don't.

SHOW THE COLLATERAL DAMAGE

This is a great move to use when the player tries to do something powerful and there's a consequence. That fireball that missed? Maybe it went wide, struck the side of the mountain, and now they hear rumbling from above. An avalanche is about to swallow them! Whenever a PC does something that significantly impacts the world around them, you can use this move to show them the natural ramifications of that event.

CLEAR A TEMPORARY CONDITION OR EFFECT

If there is a temporary condition or effect on an adversary or environment, you can choose to clear it. When you make this move, lead with the narrative, describing who or what causes the effect to end, then how it changes the PCs' situation. For example, if an adversary is *Vulnerable* because they're being held down by a tangle of vines, you might describe them using their blade to hack away at the vines to break free. Or if the effect is caused by a spell, you might describe the adversary unleashing a hail of arrows toward the caster, missing them but inhibiting their ability to focus on the spell any longer. If a PC just started an effect, think twice before ending it—it will be more satisfying if they see it impact the scene first. Clearing some conditions or effects might also require you to spend Fear.

SHIFT THE ENVIRONMENT

You can change the environment the PCs are navigating to raise the stakes. If you're using an environment stat block, you could choose to utilize one of its actions. Otherwise, affect the area surrounding the PCs in a fun and engaging way—maybe the rope bridge they're crossing suddenly snaps or a river sweeps them off their feet. Perhaps an angry crowd packs the marketplace, obscuring the person they're following, or a building falls toward the PCs after being struck with a spell that missed its target.

SPOTLIGHT AN ADVERSARY

Heroes are molded when pitted against adversaries of equal mettle—this move allows your adversaries to act meaningfully in a scene. When you make this move, an adversary can move anywhere within Close range and perform an action. In battle, this often manifests as an attack—they move into Melee range with a PC, make an attack roll, and showcase their power whether the attack succeeds or fails. But this move isn't limited to violence. When you spotlight an adversary, they can demonstrate their tactics, reveal their motives, use one of their actions, or change the scene in an interesting way. Whether an adversary bludgeons a PC with jagged maul, floods the room with choking gas, or reveals that a local leader is in their pocket, this move is your chance to prove their prowess.

Sometimes, you might want to spotlight more than one adversary during your GM turn. You can spend a Fear to make an additional GM move, shifting the spotlight to another adversary in the scene. You can spend any amount of Fear you currently have to move the spotlight around the battlefield, but you can't typically spotlight the same adversary more than once during your turn.

CAPTURE SOMEONE OR SOMETHING IMPORTANT

Taking away something the party desperately wants or needs can quickly ratchet up the tension in a scene. You might knock a weapon from a PC's hand, capture a fellow party member or an ally of the group, or steal a powerful object from right under their noses. This move is an exciting, fiction-forward way to advance the story.

USE A PC'S BACKSTORY AGAINST THEM

Integrating a player's backstory into your move can have a huge impact on the PC and make the story much more personal to them. Maybe someone from their past shows up, a mistake they made long ago catches up with them, or the scene parallels a past experience, giving them the chance to make a different choice. Grounding the move in a character's history ensures their next decisions matter all the more to them.

TAKE AWAY AN OPPORTUNITY PERMANENTLY

When things are dire, sometimes the PCs lose an opportunity they once had. A softer version of this move might be to collapse the party's straightforward pathway through a cave system, forcing them to find another, more treacherous way to escape. A harder version of this move would be to kill a valuable NPC or destroy a powerful object the party desperately needs. These moves can be used to great effect when you want to twist the trajectory of the story in a new direction.

FEAR

While PCs gain Hope as a metacurrency during the game, you gain Fear.

◼ GAINING FEAR

When you start a campaign, you begin with an amount of Fear equal to the number of PCs. Whenever a PC rolls with Fear, you gain a Fear. You can also gain Fear from the players taking downtime, certain PC abilities or spells, and specific adversary features.

You can hold up to a maximum of 12 Fear.

◼ TRACKING FEAR

You can track Fear with tokens, a die, or any other counting method, and you should keep this pool visible to players during the game. Fear carries over between sessions, so note how many Fear you have at the end of each session and begin the next time with that same pool.

◼ SPENDING FEAR

Whenever you spend Fear, describe how fate changes the world against the characters. What interrupts or counters the PCs? How does an adversary prepare for a powerful attack? What barrages the PCs' senses as the raging avalanche swallows them?

When you spend a Fear, you can:

> → Interrupt the players to make a move.
> → Make an additional GM move.
> → Use an adversary's Fear Feature.
> → Use an environment's Fear Feature.
> → Add an adversary's Experience to a roll.

Tip: As with any GM move, spending Fear shouldn't undermine the players' fun. Fear is a tool for you to enhance the scene, create dramatic tension, and raise the stakes, not to shut down a PC's heroic actions.

Interrupt the Players to Make a Move

You can spend a Fear to make a GM move as if the PCs had failed an action or rolled with Fear, allowing you to interrupt between the players' moves. This tactic is most useful when you want to make a move during a slew of successes—for example, if the PCs roll a success with Hope four times in a row during combat and you want to give your adversaries a chance to fight back, you can spend a Fear to interrupt the action and spotlight an adversary.

Make an Additional GM Move

After making a GM move, you can spend a Fear to make an additional move this GM turn. For example, when a player rolls a failure or rolls with Fear, you might spotlight an adversary to show them stealing the party's carriage and starting to ride away, then spend a Fear to have the archer in the tree shoot at the PCs as cover fire for the carriage heist.

Use an Adversary's Fear Feature

In addition to each adversary's standard features, some adversaries have powerful Fear Features. You can use an adversary's Fear Features by spending the indicated number of Fear.

You can always improvise a Fear Feature for an adversary, even if they already have predetermined Fear Features. Just spend a Fear and come up with a big adversary move that might otherwise feel overpowered or arbitrary (see the upcoming "Improvising Fear Moves" section).

If you've spent Fear to make an additional GM move to activate an adversary, you must additionally spend the required amount to activate a Fear Feature. For example, once the thief steals the party's carriage and you've spent a Fear to have the archer rain down a hail of arrows, you could spend an additional Fear to activate a third thief in the scene. If this thief has a Fear Feature you want to activate, you would spend a fourth Fear to utilize it.

Use an Environment's Fear Feature

Environments can have their own features that require spending Fear to activate. You can use an environment's Fear Feature by spending the indicated number of Fear.

Even if an environment has predetermined Fear Features, you can also spend Fear to improvise a big environment move that might otherwise feel overpowered or arbitrary.

Add an Adversary's Experience to a Roll

When making a roll for an adversary, if their Experience would apply to the situation at hand, you can spend a Fear and add the Experience's modifier to the roll. When you do, showcase how their Experience enhances the action to help ground this mechanic in the narrative.

HOW MUCH FEAR SHOULD I SPEND IN A SCENE?

Spending Fear is one of the GM's strongest tools for inflicting consequences and enhancing the stakes of a scene. Each scene plays a specific role in the story, and not all scenes need the same level of drama and danger. The more important a scene is to the story, the more likely a GM is to want to use Fear to complicate the PCs' lives and add to the danger of the fiction.

The GM adjusts the stakes by increasing or decreasing the amount of Fear they spend in a scene—more Fear to heighten the tension, fewer Fear to ease off. You might surprise the PCs by spending Fear to add twists to a scene to keep the players on their toes, turning what the PCs thought was an incidental or minor scene into one with major stakes. You might spend a few Fear at the beginning of a scene to establish the danger of a story beat and force the PCs to dig deep and overcome it, then either spend additional Fear as you gain it or store it for a future scene.

Here is a rough guide of how much Fear you might want to spend in a given scene depending on its role in the story:

SCENE TYPE	EXAMPLE SCENES	AMOUNT OF FEAR SPENT
Incidental	A catch-up between PCs after an emotionally charged scene; gathering information; resupplying at a local market; resting during downtime.	0–1 Fear
Minor	A travel sequence; a minor skirmish that introduces new foes or signals future trouble.	1–3 Fear
Standard	A substantial battle with a notable objective; perilous travel that tests might and wit; a tense social encounter seeking crucial information or aid.	2–4 Fear
Major	A large battle with a Solo or Leader adversary; a character-defining scene with a significant change to a character's personal story (such as revelation, growth, and betrayal).	4–8 Fear
Climactic	A major confrontation with the villain of a story arc; an epic set piece battle; a judicial duel to determine an important NPC's fate.	6–12 Fear

What Do I Do with All This Fear?

If you find yourself coming into a battle with a large amount of Fear (especially over 10), consider the following approaches:

Act First

Spend a Fear immediately to interrupt the PCs and spotlight an adversary to begin the fight.

Spend Consistently

Each time your turn comes around, make a GM move, then spend a Fear to make an additional move. If you gained Fear from a PC's roll, consider spending that one as well, either on an additional GM move or a Fear Feature. Your pool of Fear will slowly deplete, but this method will provide significant power every time play returns to you.

Come Out Strong

You might choose to spend enough Fear to spotlight a majority of the adversaries during your first GM turn. This is a big move that can put the PCs on the back foot at the beginning of the fight, giving them the opportunity to feel like they're turning the fight around.

Draw Blood

Every time an adversary misses an attack, you might spend a Fear to spotlight additional adversaries until one of them successfully strikes a PC. This can help make your GM turn feel dynamic even when your first attack misses.

Improvising Fear Moves

Whether you're improvising adversaries and environments or using existing ones, you might find a moment where you want to put your thumb on the scale to make something dramatic happen or to escalate the scene. You can always improvise a GM move, but there might be situations where you want to make an especially hard move. In those situations, you can make a Fear move. By spending Fear when you declare the move, you communicate and respect the scale of the action you're taking.

A Fear move should redefine a scene, change the terms, raise the stakes, modify or move the location, or accomplish another pivotal action.

Fear moves commonly include one or more of these elements:

- Introducing new adversaries to a scene when their appearance hasn't been foreshadowed or lacks context.
- An adversary activating a powerful spell or transformation to deal massive damage or boost their capabilities.
- An environment exerting a strong negative effect on the party.

For additional guidance on creating Fear moves, reference the existing Fear moves included in the "Adversary Features" and "Environment Features" sections and stat blocks of chapter 4.

Examples of Improvised Fear Moves

Example 1: *The party has confronted a corrupt noble who the GM, Stella, planned to use as a recurring villain, but most of the noble's HP are already marked and the party is close to dispatching them before their plans can be revealed. Deciding that they don't want to change plans and let the PCs claim this unexpected victory, Stella improvises a Fear move to allow the noble to escape using a method that makes sense for the adversary but hasn't been set up in the fiction yet. The noble, not previously shown to use magic, produces a token that allows them to teleport away. The GM has spent a Fear on an improvised "Take away an opportunity" move, and the villain survives to fight another day.*

Example 2: *In a battle with the party, a Solo adversary's damage output isn't proving as much of a threat as Stella would have liked. She might decide to spend Fear and improvise an adversary feature where the enemy flies into a rage, increasing their damage for the remainder of the scene. Stella leads with the fiction, describing the enemy's increasing desperation due to their significant wounds, then signals the mechanical escalation to the PCs—the enemy's damage output will be much higher from here on out.*

Example 3: *During a scene where Quinn's druid is tracking a kidnapper, Shepherd rolls a success with Fear. Stella invites Quinn to describe how their action allows the PCs to gain ground, then spends a Fear and describes a huge shadow passing over the group as they spot the kidnapper on the horizon—a Wyvern is on the hunt for flesh. Stella hadn't mentioned anything about Wyverns being active in this area, so she decides it's appropriate to spend a Fear rather than introduce the new threat with a normal GM move in response to the player's roll.*

Example 4: *The party is facing off with a group of bandits trying to steal a treasure chest the group is transporting. Tabby, the warrior, just succeeded on an attack roll with Fear against one of their adversaries. Because Tabby rolled with Fear, play passes to the GM after Tabby deals damage.*

Stella has 10 Fear in her pool and decides to spend three to start the battle off strong. On the battlefield, there are two ribbet Bandits and a group of five Bandit Minions.

Stella uses her move to spotlight the first Bandit, describing her leaping down from a tree to slide beneath the party's wagon and break some of the wooden floorboards to get to the treasure inside.

Stella then spends a Fear to spotlight the second Bandit, a large, bullfrog-like figure with heavy armor. They leap down to put themselves between a few members of the party and swing a massive hammer, using their "Better Surrounded" action to hit all targets in range of their weapon. Stella rolls against the PCs' Evasion and succeeds. They then roll the adversary's damage dice and deal 12 physical damage to each target.

Finally, Stella spends 2 Fear, the first to shift the spotlight to one of the Bandit Minions, and the second to use their "Group Attack" action (which costs a Fear to activate). This puts the spotlight on all five Minions, who move into Melee range of Tabby. Stella makes an attack, describing the scene and rolling against Tabby's Evasion. Stella succeeds, so the bandits deals 3 damage each for a total of 15 damage to Tabby. Tabby has no Armor Slots left, so she takes Major damage—marking 2 Hit Points.

Stella has 7 Fear left but no more adversaries to spotlight, so Stella returns play to the PCs.
SETTING ROLL DIFFICULTY

When a player makes an action roll, you'll often have to set the Difficulty of that challenge to know whether they've succeeded or failed. Setting a target number for Difficulty can feel like it relies on a lot of factors, but it's best not to overcomplicate the question: how hard is the task they're trying to accomplish in this scene? Use the following rubric as a general guideline when setting Difficulty.

5	10	15	20	25	30
VERY EASY	EASY	AVERAGE	HARD	VERY HARD	NEARLY IMPOSSIBLE

Difficulty doesn't need to be a multiple of 5, so feel free to choose numbers between two of the rubric options. Additionally, while most Difficulties fall between 5 and 30, you can select numbers outside that range to fit the story. You can choose to keep this Difficulty secret or tell the player what they're aiming for up front; both playstyles work well in Daggerheart.

■ DEGREES OF SUCCESS AND FAILURE

Often, instead of setting a single value for success, you might instead give a player different outcomes based on the relative success or failure of their roll This tactic is especially useful on rolls to inspect an area, recall something from the past, or persuade an NPC to surrender information. Simply pick a target number and scale the amount of information you give them up or down based on the player's relative roll result.

■ DIFFICULTY ROLLS

When a PC rolls against an adversary, the stat block provides a Difficulty for the roll. However, if an NPC doesn't have a stat block—or if you like the unpredictability of rolling—you can have that NPC make a roll to determine what the Difficulty would be. Though this can add to the time it takes to resolve the scene, it can also be a useful tool in situations where you're unsure what the Difficulty should be. To make a Difficulty Roll, roll a d20 and add any relevant Experience the NPC or adversary has to its total.

Tip: Attack rolls against adversaries use that stat block's assigned Difficulty. For other PC action rolls, it's often easiest to add the relevant Experience to the adversary's current Difficulty to determine the new Difficulty.

EXAMPLE DIFFICULTY

Included here are Difficulty examples for each trait. Don't feel the need to refer to these during play—just use them to get a sense for how Difficulty works so you can make judgment calls on the fly as your players take actions.

Example Difficulty Settings

AGILITY	ROLL	SPRINT	LEAP	MANEUVER
	5	Sprint within Close range across an open field with an enemy present.	Make a running jump of half your height (about 3 feet for a human).	Walk slowly across a narrow beam.
	10	Sprint within Far range across an open field with an enemy present.	Make a running jump of your height (about 6 feet for a human).	Walk quickly across a narrow beam.
	15	Sprint within Close range across rough terrain with an enemy present.	Make a running jump of double your height (about 12 feet for a human).	Run across a narrow beam.
	20	Sprint within Close range through an active battle of multiple enemies.	Make a running jump of three times your height (about 18 feet for a human).	Run across a narrow beam in heavy wind.
	25	Sprint within Far range through a pitched battle in rough terrain.	Make a running jump of five times your height (about 30 feet for a human).	Run across a very narrow beam in an active rainstorm.
	30	Sprint across the heads of your enemies in a pitched battle.	Make a running jump of ten times your height (about 60 feet for a human).	Run across an inch-wide, oil-slicked beam in an active rainstorm.

STRENGTH	ROLL	LIFT	SMASH	GRAPPLE
	5	Lift a chair.	Destroy a glass cup.	Subdue a child.
	10	Lift a table or small chest.	Destroy a small wooden table.	Subdue a weak adult.
	15	Lift a grown person or large chest.	Break through a wooden door.	Subdue an average adult.
	20	Lift the side of a laden cart or carry a large chest up stairs.	Break through a stone wall.	Subdue a skilled wrestler.
	25	Lift a horse, an ox, or a large monster.	Break through a dragon's teeth.	Subdue a large beast.
	30	Lift a falling portcullis gate.	Break a god's grip.	Subdue a legendary beast.

FINESSE	ROLL	CONTROL	HIDE	TINKER
	5	Ride a horse through easy terrain.	Evade notice under full cover on a moonless night.	Open a sticky lock with the appropriate key.
	10	Drive an ox-pulled cart.	Evade notice in limited cover on a moonless night.	Open a simple puzzle box.
	15	Ride a horse through rough terrain.	Evade notice in limited cover on an average night.	Disable a standard trap.
	20	Drive a cart through rough terrain.	Evade notice in the shadows on an average night.	Disable a complicated trap.
	25	Ride a wild horse through dangerous terrain.	Evade notice with minimal cover in ample light.	Open a door secured by a sequence of elaborate locks.
	30	Ride an enraged beast through dangerous terrain.	Evade notice with no cover in full daylight.	Disable an incredibly sensitive and deadly trap.

INSTINCT	ROLL	PERCEIVE	SENSE	NAVIGATE
	5	Hear a loud noise twenty paces away.	Detect an obvious ambush or notice an obvious deception.	Follow a well-trod path in good lighting and weather.
	10	Hear a speaking voice fifty paces away.	Detect a looming threat or notice an average person's lies.	Follow an average path in good lighting and weather.
	15	Hear someone walking in the woods fifty paces away.	Detect hostile intent from a foe or see through a merchant's lies.	Follow a subtle path through rough conditions.
	20	Hear someone sneaking through the woods fifty paces away.	Detect a politician's veiled hostility or detect a nearby assassin.	Follow a subtle path through harsh conditions.
	25	Hear a prowling animal fifty paces away.	Identify a spymaster's plot or read a politican's true intentions.	Find your way with no path through dangerous conditions.
	30	Hear a diving bird a hundred paces away.	Sense a shred of doubt within a god's pronouncement.	Find your way through a trickery god's maze.

PRESENCE	ROLL	CHARM	PERFORM	DECEIVE
	5	Win the trust of a friendly neighbor.	Earn a meal from a friendly crowd.	Trick a trusting acquaintance.
	10	Win the trust of a friendly stranger.	Earn room and board in a small town or impress a small crowd.	Trick an average stranger.
	15	Win the trust of a cautious stranger or talk your way into a noble's party.	Earn room and board in a low-end tavern or impress a large crowd.	Trick an average merchant.
	20	Win the trust of a sympathetic foe or talk your way into an enemy's party.	Earn lodging in a high-end tavern or impress a full theater.	Trick a trained courtier.
	25	Turn an enemy against their ruler or talk your way into a fae court.	Earn your keep in a royal court or impress a full colosseum.	Trick a spymaster.
	30	Talk a hostile god into granting you a boon.	Save yourself from execution after offending the queen.	Trick a god.

KNOWLEDGE	ROLL	RECALL	ANALYZE	COMPREHEND
	5	Recall uncommon facts about your community.	Unpack an obvious metaphor in a simple text.	Learn simple skills from an excellent teacher.
	10	Recall uncommon facts about a neighboring community.	Identify obvious subtext in a conversation.	Learn simple skills from an average teacher.
	15	Recall uncommon facts about a distant community.	Break an average cipher in a coded message.	Learn complicated skills from an excellent teacher.
	20	Recall specialized facts about a distant community.	Identify a weakness in a complicated battle plan.	Learn complicated skills under poor conditions.
	25	Recall specialized facts about a fallen kingdom.	Predict the downfall of a nation based on concealed misdeeds.	Learn complicated skills quickly under dangerous conditions.
	30	Recall secret information about an obscure historical group.	Identify the weakness in a divine champion's fighting form.	Learn complicated skills quickly from incomplete information.

GIVING ADVANTAGE AND DISADVANTAGE

Whenever it seems appropriate within the bounds of the narrative, you can give a PC advantage or disadvantage on a roll. This tool explicitly shows a player that the situation is helpful or harmful to the action they're attempting. For example, if a player is attempting to sprint through deep mud or knee-high water, you might impose disadvantage on their Agility Roll. If they say something clever to a guard or use knowledge they obtained from an NPC about their captor, you might grant advantage on their Presence Roll.

◼ NPC ADVANTAGE AND DISADVANTAGE

If an NPC has advantage, roll an extra d20 and take the highest result. Similarly, if an NPC has disadvantage, roll an extra d20 and use the lowest result. Some PC abilities can impose disadvantage on an NPC's roll, or you might choose to give an NPC advantage or disadvantage due to the circumstances of the narrative.

◼ ADVANTAGE VS. DIFFICULTY

Because you control both Difficulty and advantage or disadvantage, why not just raise or lower the Difficulty of a roll instead? You certainly can, but advantage and disadvantage allow the characters' actions and circumstances to modify how successful they are at interacting with the world in a tangible way. Players feel the advantage through rolling extra dice, while a disadvantage conveys a difficult situation on both a mechanical and narrative level.

> **Example:** *"For any standard adventurer, it would be a Difficulty of 15 to sneak by the Head Guard without being noticed. But, because you knocked out one of their lackeys and stole their attire, you gain advantage on a Presence Roll to sneak by them without catching their eye."*

ADVERSARY ROLLS

Adversaries aren't limited to just the attacks and unique actions in their stat blocks; those represent their special abilities, but they can do most anything a PC would do, such as picking a lock or climbing a cliff. However, other than the attack rolls described in the next section, adversaries don't typically make action rolls.

When you want an adversary's action to have a chance of failure, you can offer the PCs the opportunity to make a reaction roll or otherwise respond to the situation. This highlights the agency of the PCs and keeps the story focused on them. For example, when a Kraken attacks the party's boat to throw them into the sea, you might have the PCs all make a Strength or Agility Reaction Roll to see if they're able to keep themselves from falling overboard. For dramatic or difficult tasks that the PCs can't influence, you might want to roll to see if the adversary succeeds. To do so, spend a Fear to utilize any relevant Experience the adversary might have, then roll a d20. These rolls are more interesting if you tell the players the Difficulty and roll where they can see the result.

◼ ADVERSARY ATTACK ROLLS

When an adversary you're controlling attacks a PC, you'll make a simplified version of the attack roll made by players. Every adversary can make normal attacks using the weapon in their stat block, and some adversaries can also use special moves to attack.

Step 1: Choose Dice

You make your attack roll with a d20. If the adversary has advantage or disadvantage on the attack, add an extra d20 to that roll.

Step 2: Find the Attack Modifier

Unlike PCs, adversaries don't use traits on their attacks; instead, the stat block's Attack Modifier is the value added to or subtracted from the adversary's attack roll. You can also spend a Fear to add an adversary's Experience to the roll's result. Set aside a number of character tokens equal to the Attack Modifier and any applicable Experience you have spent Fear to add.

Step 3: Roll the Dice

Once you've gathered your dice and tokens for the Attack Modifier, roll them all at the same time. Counting each token as 1 (or –1 for a negative modifier), add the tokens and dice roll result together to determine the total. If you rolled with advantage (or disadvantage), don't count both d20s, only the highest (or lowest) one.

Step 4: Resolve the Situation

Share your roll total with the player who was attacked and compare it against their Evasion. If the attack meets or beats that value, it is successful and deals the damage indicated in the stat block for that attack. If it rolls below their Evasion, the attack misses and no damage is dealt; invite the player to describe how they avoided the blow.

Attacking Multiple Targets

By default, an adversary can only hit one target with their standard attack. When an adversary's action lets you make an attack against multiple targets, you make one attack roll and ask if it hits any of the targets. If you are making individual attacks with multiple adversaries during the same GM move, make an attack roll for each adversary.

Attack Rolls as Story

Every attack roll is an opportunity for you to show how that attack changes the scene. When your attack roll hits, you're taking away resources from the PCs (Hit Points, Stress, Armor Slots, etc.), so ensure you provide context for that depletion in the fiction. When your roll is a failure, it's an opportunity to celebrate the prowess of the PC and ask the player to describe how their character avoids the attack.

If a player isn't sure how to describe their Evasion, remind them it's not just about how quick a character is, it's about how skilled they are at not getting hit. This could manifest as the sorcerer reaching out and stopping an arrow mid-flight or the wizard throwing up a magical barrier. It could be the rogue transforming into a swirling mass of darkness and letting the axe pass through them, a ranger backflipping out of the way, or anything else that aligns with the character they built.

■ ADVERSARY REACTION ROLLS

Some PC moves can force an adversary or other NPC to make a reaction roll. When this occurs, roll a d20 to determine whether they succeed or fail. If you meet or exceed the roll's Difficulty, the NPC succeeds and avoids the consequences. If they roll below the target number, the NPC fails and suffers the consequences.

Because NPCs don't have character traits like PCs do, you can spend a Fear to add any of the adversary's relevant Experiences as a bonus to their reaction roll.

> **Example:** Rune is chasing a Masked Thief and unleashes the Fireball spell to slow them down. The Masked Thief has the very relevant Experience of Acrobatics +3, so the GM spends a Fear and adds +3 to the reaction roll.

On the other hand, if you feel like the adversary would be particularly weak against the PC's move, you can instead impose a penalty on the adversary's roll.

> **Example:** Rune the wizard casts Fireball on a Zombie Pack and their commander, a Skeleton Knight. The Difficulty on the reaction roll is 13. The GM rules that a Zombie Pack is particularly ill-prepared to avoid a fireball, as they're weak against fire and unlikely to dodge quickly, so the GM imposes a −3 penalty on the roll.
>
> The GM rolls a d20 for the Zombie Pack and gets a 13. With the −3 penalty, they fail and take full damage. The GM rolls again for the Skeleton Knight and gets an 18, which passes the reaction roll. The Skeleton Knight takes half damage per the mechanics of the Fireball spell.

CLASS HOPE FEATURES

Each class has a Hope Feature that requires 3 Hope to use; whenever a PC uses this unique and powerful feature, ensure that it impacts the scene. Draw attention to the ferocity and strength of the druid's empowered Beastform, encourage the guardian to describe their burning determination as they patch their armor and fight on—these are your heroes' powerful features, so yield the stage to the player to affect the fiction and describe how their PC's Hope changes fate.
COUNTDOWNS

You can use a **countdown** to track progress toward an event, consequence, or adversary move. Some stat blocks and adventures specifically call for a countdown, but feel free to use them in any scene you wish.

◼ COUNTDOWN DIE

When you want to represent the passage of time or events leading to a dramatic climax—such as an impending adversary move or a significant narrative event—you can use your d20 or another die as a **countdown die** to track that progression. Choose a die with your desired starting value on it and put it on the table with that number facing up. For example, if your starting value is 5, you can use a d6 set to 5 as your countdown die.

Each time the countdown ticks down, turn the die to reduce its value by one. When the countdown ticks down from 1 to 0 (which doesn't appear on the die), the countdown ends and triggers the event you were counting down to. If you ever need to continue a countdown across sessions, record the current countdown value so you can continue counting next session.

If you don't want to use dice to track your countdowns, you can alternatively draw a number of small boxes equal to the starting value and fill them in as the countdown progresses.

◼ USING A COUNTDOWN

When you introduce a countdown, you can either directly tell the players you've done so ("I'm starting a countdown to when the army attacks—what do you want to do before then?") or imply it through your narration ("The bridge is starting to crack, and it won't last long."). It's up to you whether you keep the countdown die visible to the players (increasing the tension each time it ticks down) or secretly use it to track an event they can't predict.

When you're designing a countdown (or using one from an adversary stat block), consider three elements:

- **Activation:** What moment in the fiction prompts you to activate the countdown? For example, a countdown might activate when the PCs stealthily enter an enemy camp.
- **Advancement:** When does the countdown advance, prompting you to tick down the die by 1? For example, a countdown might advance whenever a PC makes an action roll, or it might advance only on certain roll results.
- **Effect:** What happens when the countdown ends? For example, a countdown might trigger a powerful enemy attack or a wave of allies arriving to save the day.

◼ STANDARD COUNTDOWN

Many adversaries and events use a **standard countdown**, in which the die begins on a specific number (such as "Countdown 4") and ticks down every time a player makes an action roll, regardless of the result. When the countdown die reaches 0, the countdown's effect triggers immediately after the last action roll is resolved.

- Short countdowns (2–4) work well when you want a move or event to quickly trigger in an encounter regardless of how the players roll. If you want the countdown speed to vary with the players' rolls, see the following "Dynamic Countdowns" section.
- Longer countdowns (5 or higher) are best used for powerful moves or events that you want to build across the length of an entire scene.

While in combat, standard countdowns for adversary moves are usually reserved for the major antagonist. Running multiple countdowns at once can be complex, so most encounters include no more than one adversary with countdowns.

◼ DYNAMIC COUNTDOWN

When a situation is being actively influenced by the players, you may choose to use a **dynamic countdown** to track it. Unlike standard countdowns, this doesn't tick down every time a player rolls—instead, it's influenced by the outcome of their rolls or choices. Dynamic countdowns can be used to track larger-scale events or situations happening in the background of a complex scene. Typically, these countdowns have a starting value of 5–10.

For example, if the PCs are trying to destroy a wall or another object that doesn't have Hit Points, a dynamic countdown can track how close they are to destroying it. Similarly, if the party's skyship is under attack, you could use a dynamic countdown to track their escape. If the PCs are chasing or searching for an enemy, the countdown can track how close the PCs are to catching them.

Most dynamic countdowns can be categorized as either a **progress countdown** (if players are working toward a desired outcome) or a **consequence countdown** (if players are trying to avoid a dreaded outcome). The Dynamic Countdown Advancement table suggests how much to tick down the countdown die each time a PC makes an action roll.
Dynamic Countdown Advancement

ROLL RESULT	PROGRESS ADVANCEMENT	CONSEQUENCE ADVANCEMENT
Failure with Fear	No advancement	Tick down 3
Failure with Hope	No advancement	Tick down 2
Success with Fear	Tick down 1	Tick down 1
Success with Hope	Tick down 2	No advancement
Critical Success	Tick down 3	No advancement

■ ADVANCED COUNTDOWN FEATURES

You can use the following additional features to make countdowns more complex or unique.

Randomized Starting Value

Instead of assigning a starting value, a countdown might instead use a randomized value. For example, a "Countdown (1d6)" means that you roll 1d6 and use the result as the countdown's starting value. Randomized countdowns are most commonly used when you want the timing to be unpredictable—usually to keep the PCs on their toes.

Loop

Some countdowns **loop** after they trigger; this is common with adversaries who can recharge a feature over time. After this type of countdown triggers and you apply its effects, it resets to its starting value and begins counting down again. For example, "Countdown (Loop 5)" resets after 5 ticks.

Increasing or Decreasing

Some countdowns repeat like loops, but the starting value, and thus the timing between them, increases or decreases with each loop, reflecting a narrative event that changes frequency.

Each time an **increasing countdown** triggers and resets, its starting value increases by 1. For example, "Countdown (Increasing 8)" begins at 8, then after its effect triggers, the starting value resets to 9, then 10, and so on.

Similarly, each time a **decreasing countdown** triggers, its starting value decreases by 1. For example, "Countdown (Decreasing 8)" begins at 8, then resets to 7, then 6, and so on. Once a decreasing countdown reaches 0, a major event triggers—maybe a cave the PCs are struggling to escape from finally collapses, or a ship they're trying to keep afloat sinks beneath the waves.

■ CHASE COUNTDOWNS

You can use dynamic countdowns to track the progress of a **chase** scene, whether the PCs are pursuing an NPC or being pursued themselves. When the chase begins, set two countdowns: one for the pursuing party and one for the escaping party. First pick a die for the pursuers' countdown—the more time you want the chase to take, the higher the starting value should be—then set that die at its highest value. Next, select another die with the same starting value for the escapee's countdown, but set that die at a lower value to reflect how much of a lead they have (1 lower for a small lead, 3 lower for a decent lead, 5 lower for a substantial lead).

For example, a chase through a town market could use d6 dice and each tick of the countdown could represent one range band (Very Close to Close, Close to Far, Far to Very Far, etc.). For a chase playing out over a longer distance, such as the PCs pursuing bandits across the countryside, each tick on the countdown might represent several miles.

Regardless of whether the PCs are pursuing or escaping, their action rolls advance both countdowns, as shown on the earlier Dynamic Countdown Advancement table. When a PC succeeds on an action roll, it ticks down their countdown, which is a progress countdown. When they fail on an action roll—or roll a success with Fear—it ticks down the other party's countdown, which is a consequence countdown. When setting the Difficulty of these rolls, consider the adversary's Difficulty plus any other narrative considerations.

> **Example:** *A thief has stolen Rune's wizard spellbook and now the PCs are chasing them across a market square. The GM, Stella, decides on a d6 for the pursuing PCs' progress countdown, then sets up the thief's countdown—a consequence countdown—by taking another d6 and setting its starting value to 3, since the thief has a slight head start.*
>
> *The warrior, Tabby, asks to go first, clambering up onto the market stall tents to run over the top rather than pushing through the crowds. Stella calls for an Agility Roll against the thief's Difficulty of 15, and Aliyah uses Tabby's Second-Story Traveler Experience to get a bonus. Quinn spends a Hope to Help an Ally, describing how Shepherd channels their affinity with air to boost Tabby up. With the help of Shepherd's d6 advantage die, Tabby rolls a success with Hope, so Stella ticks the PC's progress countdown from 6 to 4; this represents Tabby gaining on the thief and helping the group catch up by calling out a quicker route through the crowd.*
>
> *Next, Rune wants to take things into his own hands. Using his Book of Sitil grimoire, he describes how he conjures an illusion of a runaway horse charging across the thief's path, forcing them to slow down rather than get trampled. Rune makes a Spellcast Roll against Difficulty 15, but rolls a failure with Fear. Stella describes the thief seeing through the illusion at the last moment and ducks through a busy crowd that blocks the party's path. Stella ticks the thief's consequence countdown down from 3 to 1 as the thief makes it to Far range away from the party. The thief is eluding their sight and in real danger of getting away—if the consequence countdown ticks down one more time, the thief will be gone.*

■ LONG-TERM COUNTDOWNS

Countdowns can also be used to track long-term events during a campaign; you could count down toward a nation being overthrown, the death of a powerful mage, or another momentous event that might take more than a few sessions to come to fruition.

While you can use a die for long-term countdowns, it's often easier to make a **countdown track** to record progress across multiple sessions. To do so, decide how far out the event should be (usually between 4 and 12 ticks) and, on a piece of paper, create small boxes for each tick. Starting from the first and working towards the last, write some events that may occur along the way that foreshadow the final event. These steps can alternate between softer and harder moves to give a sense of variety and growing tension. Adding unique events throughout the story ensures the countdown is always present during play, even if the final result is many sessions away.

Advancing a Long-Term Countdown

During a short rest, you should generally tick a relevant long-term countdown once. During a long rest, you should generally tick down a relevant long-term countdown twice.

When you tick the countdown, let the consequences ripple down to the PCs, building tension as events unfold. Often, you can reveal this progression through something the PCs witness, such as the banner of a rival leader recently hung on the castle or conversations in the marketplace about the strange lights NPCs saw in the sky last night. Other times, you might cinematically cut away to a scene the PCs are unaware of, narrating the events to the players. This is best done when the characters know about the events surrounding the countdown so players aren't asked to completely ignore out-of-character knowledge.

Example Long-Term Countdown

Early in the campaign, the party crossed paths with Marius, a galapa mercenary captain. The group suspected Marius would cause trouble, but pressing matters drew them elsewhere in the kingdom. Meanwhile, Marius makes a deal with an expansionist theocracy to the east—an action the party's seraph may well view with concern because of her past with the theocracy. In exchange for helping the theocrats invade, Marius will be appointed as governor of a prosperous county once the kingdom falls.

The GM wants this invasion to ramp up pretty quickly, so they set the countdown's starting value to 8, drawing eight checkboxes as a countdown tracker. Next to each checkbox, the GM plans out story beats that represent the countdown's advancement.

EXAMPLE: COUNTDOWN TRACKER

8 *The deal is struck and Marius's company mobilizes.*

7 *Marius's company raids a border town.*

6 *The theocracy's troops gather at the border.**

5 *Marius's company captures a different border town, having misdirected nearby militias.*

4 *The theocracy's army marches into the kingdom, establishing a beachhead in the captured town.*

3 *Refugees flee the region around the border town, bringing news of the invasion with them to larger settlements.**

2 *Marius harries the kingdom's army to give the theocracy time to establish supply lines.*

1 *The theocracy rededicates a temple in the captured town to their god, magnifying their priests' power in the kingdom.*

0 *The invasion becomes an all-out war, with Marius's and the theocracy's army executing coordinated strikes to divide the kingdom's defenders.*

The GM identifies steps 6 and 3, marked with *, as prime candidates for steps where news would reach the party. This gives the PCs at least two clear prompts to get involved before the invasion escalates to a full-blown war. Depending on the party's movements and location as the countdown progresses, the GM can bring the edges of the invasion to the party's horizon—or their doorstep.
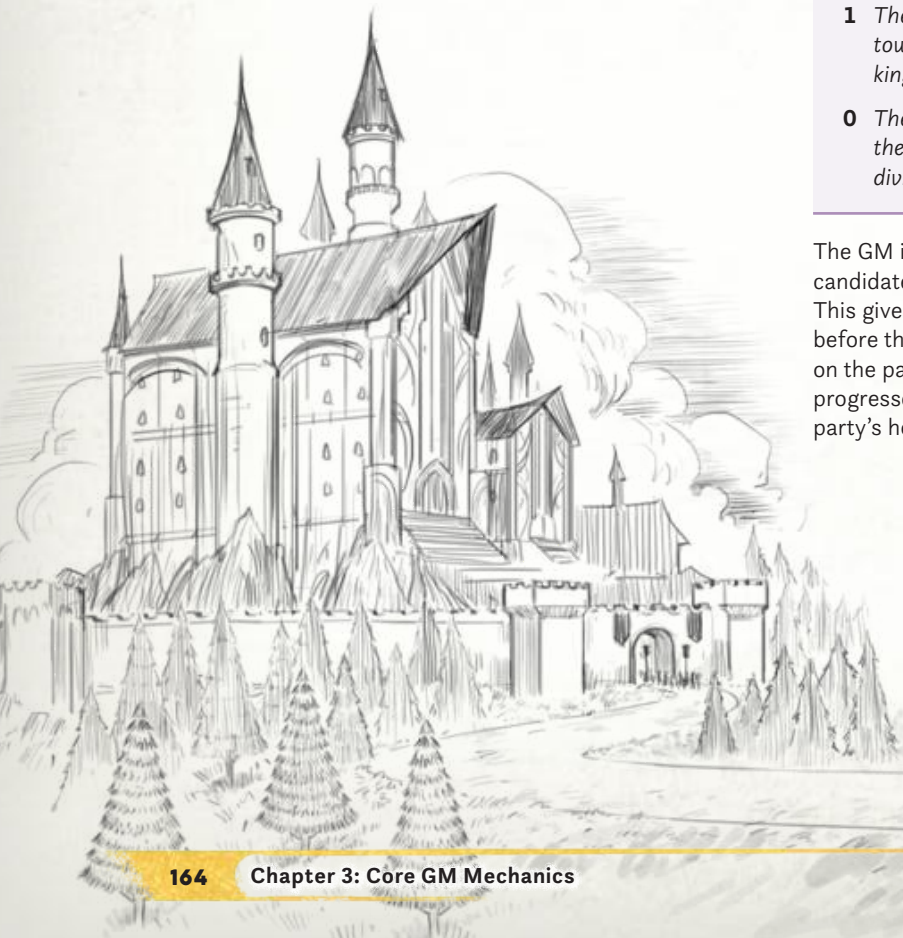

GOLD, EQUIPMENT, AND LOOT

It's up to you and your players how much importance you want to place on gold, equipment, and loot in your campaign.

Your players might operate as a band of thieves who rob their adversaries, a group of spiritual devotees who abstain from acquiring possessions, or a company of adventurers whose approach to wealth and possessions lands somewhere in the middle. You can also utilize wealth and equipment to adjust the dial between realism and fantasy. If your game has a more survivalist tone and players need gold to buy food, their interactions with opportunities to acquire wealth will be very different than if you handwave the cost of rations.

◼ DISTRIBUTING GOLD

Using gold as a quest reward can give your players a fun way to procure new equipment for future adventures. This book leaves the price of items up to you, allowing you to decide how much importance you want to place on gold in your campaign and how costly individual items are if and when they become available.

If you don't want to worry about gold in your campaign, you can let PCs shop by abstracting payment and letting each player choose one or two items. When you do this, rather than letting them choose from every item, you can encourage them to shop around by only offering a few items that make sense for that location, have bonuses and abilities you want to make available, or fit your party's tastes and goals.

If you'd rather gold play a larger role in your game, the following sections provide further guidance on pricing equipment.

◼ DISTRIBUTING EQUIPMENT

At character creation, players can choose from the starting weapons and armor. The remainder of the equipment is organized by rarity and should be made available to players as the party journeys through the campaign. For example, you can stock a few options in shops along the PCs' journey, provide equipment as part of an NPC's reward, or allow them to pull weapons and armor off of the adversaries they've defeated. The average costs of items and services can be found on the Average Costs table in the upcoming "Economy of Your World" section.

You can raise the price of weapons and armor with unique magical qualities or worldbuilding implications. For example, armor the PCs can use to disguise themselves or an enchanted sword that has been outlawed in a specific region will fetch a higher price.

Regardless of how you treat the overall economy in your campaign, keep in mind how common a weapon or armor is in a particular city or region—and how generous or stingy a particular shopkeeper might be.

◼ DISTRIBUTING LOOT

The tables of items and consumables in chapter 2 are organized to help you distribute loot based on its prevalence and impact. The lower the number of an item or consumable on a list, the less it tends to impact play and the more commonly it can be found in a typical fantasy economy.

Consumables are fun to use and less powerful than permanent items, so you can offer common consumables pretty regularly during a campaign. Outside of buying them from shops along the way, you might consider having an NPC offer a bundle of consumables as a gesture of good faith to get in the PCs' good graces, or scattering a few around an enemy camp for the PCs to pick up as they sneak through. When the campaign nears its climax or you want to highlight an important moment, you might find a narrative reason to give the PCs a few rare or legendary consumables and items.

You're highly encouraged to make your own items and consumables for your campaign to personalize it for your story. Like other equipment, loot has no set gold cost; instead, the cost should reflect how often you're giving gold as a reward, as well as how commonplace that loot might be locally.

◼ ECONOMY OF YOUR WORLD

The following table provides examples of the average cost of basic goods and services. However, your world's economy should reflect how important gold is to your campaign, so don't be afraid to adjust these prices accordingly.

Average Costs

PURCHASE	GOLD
Meals for a party of adventurers per night	1 Handful
Standard inn room per night	1 Handful
Luxury inn room per night	1 Bag
Carriage ride	2 Handfuls
Mount (horse, mule, etc.)	3 Bags
Specialized tools	3 Handfuls
Fine clothing	3 Handfuls
Luxury clothing	1 Bag
Tier 1 equipment (weapons, armor)	1–5 Handfuls
Tier 2 equipment (weapons, armor)	1–2 Bags
Tier 3 equipment (weapons, armor)	5–10 Bags
Tier 4 equipment (weapons, armor)	1–2 Chests

RUNNING GM NPCS

When you run NPCs as the GM, you should always strive to follow your GM principles and use them to bring the world to life. Differentiate each character by the unique ways they speak and act—you can use a new voice, posture, or set of mannerisms if you're comfortable—and lean into their individual motives to fill the world with dynamic, active NPCs.

■ CHOOSING NPC STATISTICS

Many NPCs don't need page-long backstories or their own stat block—if the PCs are simply interacting with a friendly bar patron to gather information, you probably just need a name, description, and motive. These three things give the NPC a moniker, a way to recognize them, and a purpose behind their actions. If they're someone the PCs might try to make a roll against, consider also giving them a **Difficulty**. You can use the examples in the earlier "Setting Roll Difficulty" section or base it on similar NPCs you've already introduced.

If you're improvising a creature who isn't interacting with the party socially, it's still important to think about motive, but you'll want to focus more on the information needed to play them in battle. You can grab an adversary stat block of a similar creature and make some changes—or if you prefer, improvise your own using the guidance in the "Improvising Adversaries" section of chapter 4, then decide their features when you have the chance to make a GM move. That allows you to choose something that will have the most interesting impact on the scene at that moment.

■ USING NPC ALLIES

NPCs can also become allies in a fight. If this happens, you don't need a stat block for them—instead, put the spotlight on them and what they do, showing how the fiction changes because they're involved. When they act to help the PCs, and if a PC capitalizes on that help during their next action, give the PC advantage on the roll.

Even if an NPC doesn't have Hit Points or Stress, they aren't immune to danger and tragedy—they can get seriously injured or even die as a result of the narrative. During your GM move, don't be afraid to capture and threaten the NPC to drive the PCs to action, trap the NPC and force the PCs to make a difficult choice, or push on the NPC's motive so hard that they do something that endangers everyone. When it's justified, hit the NPC hard. Allow them to be beaten and broken after a difficult fight, or have them die in the party's arms if the narrative says they should. You run both the adversaries and NPCs—you control their story and fate. Follow the fiction, embrace your GM principles, and make moves that drive interesting conflict for the party.

■ NPC FEATURES

If you want an important NPC to mechanically interact with the system, you can give them one or more features that reflect how they move through the world. At your discretion, you can share these NPC features openly with your table, allowing players to help keep track of them, or keep them private, so an NPC's actions feel more organic and narrative-focused.

An NPC feature works similarly to an adversary's reaction, but it is broken down into the trigger and the effect. The trigger is the event that makes the NPC behave in a certain way, and the effect is what mechanically occurs because of that trigger. For example:

Not On My Watch

Trigger: A PC within Very Close range marks at least 2 Hit Points.

Effect: Roll **1d8**. On a 4 or higher, this NPC moves into Melee range of the PC and marks one of the Hit Points instead. Reduce the die size by 1 (from 1d8 to 1d6, then 1d6 to 1d4). Once you must reduce the die below 1d4, this feature can't be used again until this NPC finishes a long rest.

In this example, any PCs within the NPC's Very Close range have a chance of taking less damage because of the ally, but if they do, the odds of that NPC being able to reduce damage again decrease. Once the NPC can no longer trigger the effect, they can't use that feature until they rest and recover.

These triggers and effects are designed so you can include other mechanics alongside them—such as countdowns, rolling dice, and dealing damage—to represent an NPC's complex and dynamic interactions with the world. On the flip side, you can also tailor these elements to be as narrative-forward as needed for your playstyle and table.

Optionally, an NPC might also have a choice. The choice represents a specific parameter by which the trigger and effect will operate. For example:

Arcane Hold

Choice: When the battle begins, choose a favored PC.

Trigger: The first time during a battle the favored PC is within Close range and hit with an attack.

Effect: Make an attack roll with a +6 modifier against the adversary. On a success, the target is temporarily *Restrained* by tendrils of powerful magic.

The following NPC feature examples showcase the different ways you can approach this mechanic. Use them as inspiration to build your own for NPCs in your campaign. If the effect ever calls for an attack roll or action roll, roll your d20 (just like with adversaries).

ADDITIONAL NPC FEATURE EXAMPLES

Volley of Arrows

Trigger: A battle begins and this NPC is involved.

Effect: Activate a countdown (Loop 3). It ticks down when a PC misses an attack. When it triggers, this NPC releases a volley of arrows at a target of the PCs' choice, dealing **2d8+3** physical damage.

Mentor

Choice: When the battle begins, choose a protégé PC.

Trigger: Your protégé is within Close range and fails an attack roll.

Effect: Move into Melee range with the PC and give them advice or guidance. The next attack roll they make has advantage.

Regroup

Choice: When a battle begins, choose a point within Far range.

Trigger: All PCs have marked all of their Armor Slots.

Effect: Teleport all PCs and this NPC to the chosen spot and clear an Armor Slot on each target.

Into the Night

Trigger: The PCs start a long rest with this NPC.

Effect: Roll **1d4**. On a 2 or less, this NPC steals 1 handful of gold from the party while they are sleeping, then disappears into the night.

It's good practice to limit the number of active NPCs with features, as they can quickly become overwhelming to track, especially in battle. We recommended using them only as needed, prioritizing very important or reoccuring NPCs.

OPTIONAL GM MECHANICS

The following sections describe optional GM mechanics you can choose to implement if you or your table would enjoy them.

■ FATE ROLLS

When narrating a moment outside the PCs' influence, the GM might wish to leave the outcome up to chance. In these situations, you can use a **fate roll**, asking a player to roll only their Hope or Fear Die to decide the result. Your choice of die doesn't affect the outcome, nor does the roll result grant Hope or Fear—the die type simply helps add flavor to the roll. You might roll the Hope Die in lucky circumstances or to see if fortune smiles upon the character, while the Fear Die can be used to decide whether a hazard comes into play or how dangerous a situation becomes.

When making a fate roll, you can declare what event occurs if the result falls within a certain number range or determine the outcome based on how high or low the result is.

> *"Roll your Fear Die. On a 4 or lower, the fire spreads beyond this house."*
>
> *"I think it's really up to chance whether reinforcements will make it to you in time. Go ahead and roll your Fear Die— that'll determine the starting size of the countdown. When that triggers, reinforcements will arrive in your Far range."*
>
> *"Go ahead and roll your Hope Die to see how big the crowd at the inn is tonight. The higher the roll, the bigger the crowd."*
>
> *"Make a roll using your Hope Die to determine the number of Stamina Potions the shop has in stock."*

■ FALLING AND COLLISION DAMAGE

If a character falls to the ground, you can use the following as a guide to determine the damage they take:

- A fall from Very Close range deals 1d10+3 physical damage.
- A fall from Close range deals 1d20+5 physical damage.
- A fall from Far or Very Far range deals 1d100+15 physical damage, or death at the GM's discretion.

If a character collides with an object or another character at a dangerous speed, they take 1d20+5 direct physical damage.

You can always increase or decrease the damage dice to fit the story.

■ MOVING AND FIGHTING UNDERWATER

Attack rolls underwater have disadvantage unless it makes sense for a character to easily fight underwater, like a Siren or Shark making an attack on a PC.

For any creatures that can't breathe underwater, you can use a countdown to create tension about how long they can hold their breath. Set the countdown die's starting value to 3 or higher and tick down as follows:

- Tick down once whenever any PC takes an action underwater.
- If an action roll is a failure or with Fear, you can use your move to tick it down an additional time. (If the roll is both a failure and with Fear, you can tick it twice instead.)

Once the countdown ends, a PC underwater must mark a Stress whenever they take an action.

■ CONFLICT BETWEEN PCS

Sometimes a player might want their character to act against another PC in the scene. Before jumping to rolling dice, discuss the situation with both players to decide how to resolve the conflict. A roll might not be necessary to reach an outcome—but if rolling will be fun for everyone involved, come to a consensus on the terms of the roll, then facilitate the scene according to the results.

On an attack roll against a PC, the attacker rolls against the defender's Evasion, just like an adversary. On any other kind of action roll, the instigator makes an action roll and the target makes a reaction roll. To succeed, the instigator must beat a Difficulty equal to the total value of the reaction roll.
SESSION ZERO AND SAFETY TOOLS

When preparing to embark on a long campaign that will span months or years, it's important to get everyone on the same page by setting expectations as early as possible.

LAYING THE GROUNDWORK

If you were creating an epic fantasy TV show, you'd prepare via the preproduction process: the creator and showrunner would build the writers' room, work with the producers and heads of departments to develop the look, feel, and vision for the series, and so on. If you were writing an epic fantasy book series, you might accomplish this by worldbuilding and developing characters, researching the genre, making a mood board, and outlining the book.

Many tabletop roleplaying games do this via a **session zero**. This term means different things to different people, but for Daggerheart, it's how you set up your group to tell a successful fantasy epic together. Before making characters or deciding on the setting, the group talks about what everyone wants from this experience.

The GM facilitates session zero, but all players should be active participants, advocating for what they do and don't want from the campaign.

There are many tools for structuring your session zero. If everyone in your group has played together before, you may already have a method for conducting this process. If you haven't done a session zero before or want to explore another process, the following sections offer suggestions.

An essential part of session zero is choosing your game's content and **safety tools**. These tools ensure players know they can avoid material that would be hurtful or upsetting—and beyond that, safety tools empower players to explore challenging subjects everyone has signed up to engage with (to be what we'd call "comfortably uncomfortable"). In addition, these tools help the GM and players communicate during play. In improvisation, there is always the chance that something unexpectedly troubling comes up, or the participants need help remembering what story elements the group is avoiding or keeping "off-screen." Safety tools give structure to pregame conversations and tools for working through mid-game hurdles.

We recommend the following tools:

CATS

One of many frameworks for discussing content and safety is the CATS Method. This framework presents four elements to discuss with your players to decide what the group wants from the game:

- → **C**oncept
- → **A**im
- → **T**one
- → **S**ubject

◼ CONCEPT

Discuss the concept for the campaign—what's the big-picture pitch? If this campaign was a book series, how would you hype it up to a friend you know would love it? Getting yourself and the group excited about a campaign's concept is a great way to set a guiding star for your creative discussions throughout session zero and beyond.

For example, you might pitch one of the following concepts:

- → Childhood friends reunite at the funeral of their village elder and uncover a secret that could destroy the world...or save it.
- → A science-fantasy romp across the realms with a party of misfits who try to find their origins but end up finding a family in one another.
- → In a world wracked by powerful disasters, a group of treasure hunters is hired to retrieve five lost elemental shards to restore the balance of nature.

You can also choose a campaign frame from chapter 5 or use those options as inspiration to create your own to share with the group. Alternatively, you can use the campaign frames as a guide to create a new frame together.

You might not know the campaign's concept at the beginning, and that's okay. Feel free to return to this conversation at the end of session zero or throughout the first couple sessions of play as necessary.

◼ AIM

Aim is what you want from and for your campaign—your creative and social goals. Do you have a specific creative agenda? Or do you mostly want to spend a few hours with friends every week making things up together and blowing off steam?

For example, an aim might center on one of the following:

- → We're going to play a weekly campaign from level 1 to 10 with strong individual and group character arcs.
- → Our aim is mostly to hang out and chat while killing monsters and getting new powers and cool items.
- → We want to tell a story that explores the relationship between grief and community through an action-fantasy game in a world recovering from a near-apocalypse.

Other ways to explore your game's aim might be to reference touchstones or character archetypes you want to play, drawing from books, films, comics, music, and other media. You might create a mood board to help define the aesthetic of your campaign or a soundtrack to form an aural soundscape for the vibe you want.

■ TONE

While playing Daggerheart, you and your group will build a world entirely your own. Even if you're using an established setting, your version of that setting will become distinct through your collective creativity. An important element of defining your world and campaign is agreeing on tone—the emotional landscape and tendency of the campaign. Establishing your game's tone helps align the players' expectations and ensures everyone has a good time.

A quick way to pick a tone is to list the following options on a piece of paper or note card, then circle a few everyone is excited to focus on and cross out tones the players want to avoid.

ADVENTUROUS, COZY, DRAMATIC, FUNNY, GOOFY, GRITTY, INTIMATE, LIGHTHEARTED, POLITICAL, ROMANTIC, SCARY, WHIMSICAL

Example: Emerson, Kate, Chen, and Asa are starting a new Daggerheart campaign. Chen nominates Dramatic to be highlighted and everyone agrees, so that option is circled to signal that it will be prominent in the campaign. Emerson says they're not interested in a Goofy tone, and nominates it to be crossed out. Kate is possibly interested in Goofy, but since Emerson's not, Kate is willing to cross it out—but in exchange, she asks that the group consider circling Romantic.

Chen isn't interested in Romantic being a central tone, but doesn't want to cross it out and completely remove it from play. Asa chimes in and nominates Adventurous for a major tone, and after discussion, it gets circled. The group agrees that they don't want a Gritty game, so it gets crossed out. They also cross out Whimsical.

This leaves the group with the following list:

ADVENTUROUS, COZY, DRAMATIC, FUNNY, ~~GOOFY~~, ~~GRITTY~~, INTIMATE, LIGHTHEARTED, POLITICAL, ROMANTIC, SCARY, ~~WHIMSICAL~~

In other words, they're interested in a game that will be especially Adventurous and Dramatic; sometimes Cozy, Funny, Intimate, Lighthearted, Political, Romantic, and Scary; but not Goofy, Gritty, or Whimsical.

■ SUBJECT

Discuss subjects you and the players actively want in the game and topics you want to avoid. Subjects to avoid can be broad themes, such as bigotry and torture, or specific elements, such as spiders or a particular name that carries emotional weight for a player.

When discussing challenging subjects, it's important to center the needs and desires of players from marginalized groups who are personally affected by the issues and subject matter that could come up in a given storyline. In heroic fantasy games, some players find it empowering to face oppressive forces as part of the evils of the world—allowing those evils to be directly fought and overcome—but that should be a choice actively made by the players who are impacted by that oppression outside the game. Many marginalized people play TTRPGs to escape the everyday frustrations and pains of bigotry they experience in their daily lives, and they shouldn't be forced to struggle with them in a game. These choices should be made prioritizing the needs of those most impacted by the subject matter. For instance, if your group includes LGBTQ players, prioritize their preferences on whether to include or exclude homophobia, transphobia, and other forms of oppression against queer people.

This is a good time to pick any specific safety tools you want to use during the campaign. We recommend the following to start:

LINES AND VEILS

"Lines and Veils" are a safety tool designed to be first employed in a session zero and revisited as needed throughout a campaign. When discussing the tones and goals for the game, the GM (or another player) should make a list of everyone's lines and veils. **Lines** are topics that players do not want in the game. They should not appear in any form. **Veils** are topics that players do not want to feature in the game, but can still exist in the world. Treat lines and veils like a living document—the list can be updated by anyone at any point.

X-CARD

The X-Card is a tool that allows any player (including the GM) to remove content from the game. This traditionally appears in the form of a physical card, marked with a large letter X, that is placed within reach of all players at the table. That said, a table can represent the X-Card through a different item, creating an X with their arms, or using another agreed-upon signal.

To utilize the X-Card, a player only needs to tap the card (or use the agreed-upon signal) and note the moment of play they wish to "rewind" to. It can help if the player notes the detail they're flagging for removal, but this is not a requirement for using the tool. The group will simply go back to the designated moment and play forward, making a new choice.

For more information about all of these tools, visit www.daggerheart.com/sessionzero.

ASKING QUESTIONS

During the session zero discussions, some GMs will find it useful to ask clarifying questions and dig deeper into suggestions and ideas. Regardless of whether you want to use an existing setting or build your own, one of the best ways to ensure that players are invested and excited to play is to encourage them to bring their ideas and interests to the planning stages in session zero.

For example, you might ask questions like the following during your session zero conversation:

- "Can you talk more about what you mean by wanting to make a post-fantasy world?"
- "When you said it'd be cool if elven clans worked like a beehive, did you mean physiology, or is this more about communication and hierarchy?"
- "What aspect of that fantasy series you mentioned are you most excited to bring into the game? The plot, the setting, the vibes, or something else?"

Fostering an atmosphere of curiosity is also useful for interrogating your own assumptions in worldbuilding. Rather than treating typical fantasy conventions as the default, you can make conscious decisions about your world to intentionally build a setting that best fits the fiction your table wants to create. For example, your group might consider questions like:

- "Should all the major countries in our region be monarchies, or do we want them to have different forms of government? If they're monarchies, are they feudal, bureaucratic, or a different structure entirely?"
- "How do people think about gender in this world? Do conceptions of gender vary by community, by region, or something else?"
- "What, if anything, do we want to change in the existing setting we're using to better fit the story we're telling?"

Every group is different and every GM's style is their own, so use the parts of collaborative worldbuilding that excite you, and feel free to leave behind the aspects that don't.

FINDING CAMPAIGN INSPIRATION

During session zero, look for hooks and nuggets of ideas to use as creative inspiration throughout the campaign. This can be things as small as a turn of phrase or the name of a creature or things as big as a player describing a climactic scene they want for their character at the end of the campaign.

You'll especially want to note what the players give as their answers for the background and connections prompts while creating their characters. Those answers will form the bulk of the initial material for you to use to tie the story of the campaign to the characters, especially if you want that story to emerge from those characters' worlds and lives.

You might also choose to frame your questions with additional narrative you think is interesting. If you do, leave space for that player to push back on your additions to their answers and discuss as needed:

- "Jasper, how did you get the Crystal of the Sunbearer? And what does it whisper to you at night before you drift off to sleep?"
- "The simiah mentioned that his sister settled in a small town. Sprout, what do you think about having that sister be from the town you accidentally destroyed?"

Keep your GM principles in mind throughout this process—these apply to all stages of the campaign, not just in-scene play.

EXAMPLE SESSION ZERO BREAKDOWN

Assuming a 4-hour time slot for session zero, here's an example of how you might structure it.

◼ BEFOREHAND

Ahead of the session, you'll want to prepare materials for the game. This process often differs if you're playing in person or over a virtual tabletop; for a physical table, you might want to print off documents, but the digital files used during an online game could also be utilized through laptops or tablets.

Gather—or have players open digital versions of—character sheets, reference sheets, play guides, maps, notetaking tools, physical dice or online dice rollers, and any other play aids you think you'll need. Before the players arrive, prepare the physical or VTT play space and make it as comfortable for yourself and the players as you can.

◼ PLAYER INTRODUCTIONS (5–10 MIN)

If you haven't all played together before, facilitate introductions as the players arrive and make sure everyone knows what pronouns to use for one another. If all the players already know one another, you can spend this time catching up and settling in.

◼ SESSION OVERVIEW (5–10 MIN)

Explain to the players what will be involved in this session zero. Point out the materials and explain when they'll want to use them. Many people find it helpful to browse through materials before using them, but encourage people not to get too far ahead of the discussion.

◼ CATS (40 MIN)

Discuss what the group wants from the game using CATS or another framework. This includes what the campaign should be about, what you want from the campaign socially and creatively, logistical details (like how often, when, and where you're going to play), the tone of the game, content to include and exclude, and anything else you need to cover before deciding the setting and making characters.

◼ BREAK (5–10 MIN)

It's good to take breaks to let everyone move around, refresh themselves, and get a little bit of time to decompress from creative discussions, which can demand a lot of attention and energy.

◼ WORLDBUILDING (50 MIN)

Whether you're using the guidance in the upcoming "Running a Campaign" section, a campaign frame from chapter 5, or your own worldbuilding tools, facilitate the process of creating or fleshing out the setting for your campaign. During the process, think about the elements (tropes, genres, influences) the players are especially interested in, then do what you can to build those elements into the setting. Worldbuilding can be engrossing, but you don't need to define or name every part of the map at this stage. Leave yourself blank spaces to fill in later as you continue to build the setting together through play.

Alternatively, you may instead want to introduce players to a setting you've created! Use this time to introduce your setting and answer any questions they may have.

◼ BREAK (5–10 MIN)

Since character creation is such an important part of preparing a campaign, it's good to go in fresh. Consider taking another short break between worldbuilding and the next step.

◼ CHARACTER CREATION (70 MIN)

Walk the group through character creation using the "Character Creation" section of chapter 1 and the "Character Creation" PDF guide, helping players with their questions and facilitating discussion and coordination between players. This step may also include explaining some of the game's rules so players understand the abilities from class, subclass, heritage, and domain cards.

Pay special attention to the group's discussion of each character's background and connections, as they will play a vital role in your preparations for the campaign. This is a great place to ask questions and encourage players to flesh out their answers. If time is limited or this process is taking longer than expected, try to at least complete the background questions and make one connection per player.

◼ BREAK (5 MIN)

If you've got time left in your session, you can take a short break before doing wrap-up and feedback, or a longer break if you've got the time for a bit more play before finishing for the day.

◼ INTRODUCTORY SCENE (OPTIONAL; 30 MIN)

If you have the time, you can throw the characters into an initial scene to help the players get a handle on the rules and their characters. This scene can be non-canon or serve as a jump start for the campaign. You can start with something calmer, such as a slice-of-life scene, or immediately throw the characters into a dramatic opening.

◼ WRAP-UP AND FEEDBACK (10 MIN)

Use the last few minutes of the session to check in with the players—gather their feedback about the session zero, see if they have any additional questions, and ask if they want to revisit any safety tools or content concerns.
RUNNING A SESSION

This section provides guidance for preparing and running a session of Daggerheart.

If you'd like to start with a single-session adventure, the upcoming "Running a One-Shot" section can provide inspiration for your adventure's setting and story.

When you're ready to dive into a longer campaign, see the "Running a Campaign" section on page 185.

THINKING IN BEATS

In storytelling, a beat is a moment that changes the trajectory of the narrative—a shift in the world, a significant action or reaction, an emotional revelation, or an important decision.

As the GM in a collaborative game, you're going to take turns with the players, narrating a beat and then letting them react and carry the scene forward with their own beats. It's like a dance, a conversation, or a game of tennis.

This focus on beats is very useful for preparation—rather than writing out every single detail of what's going to happen, you can think in beats, the moments that give shape to the scene or sequence.

The following is an example of thinking in beats to create a countdown. The GM is preparing a session where a mercenary company seizes control of a border town in a narrow mountain pass. The mercenaries are loyal to an invading army and this location will be an important step in their invasion.

> **EXAMPLE BEATS AS A COUNTDOWN TO INVASION**
>
> **8** *The mercenary company makes a partnership with the neighboring kingdom.*
>
> **7** *One of the mercenaries arrives in town and gets a job with the city guard.*
>
> **6** *The undercover mercenary is assigned to night duty, as expected for new hires in the guard.*
>
> **5** *The undercover mercenary ambushes the other night guards and unlocks the town gate.*
>
> **4** *The mercenaries rush through the open gate and attack the guard barracks and the mayor's house.*
>
> **3** *The mercenaries kill or subdue the city guard and capture the mayor.*
>
> **2** *Under threat of violence to the townspeople, the mayor pledges loyalty to the invading warlord.*
>
> **1** *The warlord's forces arrive to resupply as the mercenaries hold the town to protect the invaders' supply lines.*
>
> **0** *The invasion begins.*

If the PCs are in the town, they can interrupt this sequence of events at any point. They might see the disguised mercenary attacking his fellows, or they might be in the tavern when the mercenaries stream down the main road, headed for the barracks and mayor's house.

Knowing the major beats of the mercenaries' plan makes it easier to maintain the integrity of the fiction while the PCs are acting. The PCs might stop the attack on the barracks but not the seizure of the mayor. This could lead to the mercenaries fortifying the mayor's house with him as a hostage while the members of the town guard ask the PCs for assistance.

Thinking in beats is also useful for larger-scale planning and off-screen thinking. If the party is racing toward a city to prevent a coup, you can use a progress countdown to track their distance from the city and a standard countdown to represent the steps of that coup. Keep the pace of both countdowns in mind when setting the frequency of events. If the PCs need to travel five hundred miles (represented by the progress countdown), then the coup could take place over a week (represented by the standard countdown), with a countdown step occurring each day. As the PCs make action rolls to determine how far they can travel in a day, you can resolve the advancement of the Progress Countdown, then tick down the standard countdown by 1. Should the PCs need to travel a shorter distance, you can similarly shrink the time frame the coup takes place over, such as from a week to a few days, with each countdown step occurring every few hours. This format lets you know what's happening as the PCs burst onto the scene, rather than having to improvise in the moment.

> **EXAMPLE COUNTDOWN STEPS TO COUP**
>
> **6** *A band of assassins sneaks into the capital city.*
>
> **5** *The assassins infiltrate the homes of the prime minister and other leaders of the majority party.*
>
> **4** *The assassins kill the prime minister and other party leaders. Meanwhile, a fifth "assassin" stages a fake attempt on the minority party leader to throw off suspicion. The minority party leader is, in fact, the mastermind behind this whole plot.*
>
> **3** *The minority party leader parades the "assassin" through the streets and pledges justice for his fellow ministers.*
>
> **2** *With the majority party leaderless, the minority party takes power in the legislative council and the captured assassin is replaced by a nameless prisoner before being executed.*
>
> **1** *Under the guise of "security," the new prime minister pushes a slate of legislation to increase executive power and ensure he retains power.*
>
> **0** *The prime minister is now a de facto emperor.*

PREPARING COMBAT ENCOUNTERS

In Daggerheart, it's important to approach each encounter from the perspective of "What helps tell the story?" and build the hurdles the PCs face around that question. Through this lens, we can start to think about enemies and damage as more than collections of mechanics and stat blocks—they're tools in our GM toolbox for heightening tension and creating drama.

As you start GMing Daggerheart, balancing encounters and creating appropriate enemies for your players will often take guesswork during prep. However, the more sessions you run, the easier it will become. Adjust on the fly as necessary to find the right balance as you play, and you'll naturally figure out what works best for your table. The most important element is to ensure that combat is being used to give players more information about the unfolding story—it reveals more about the world, the plot, or the characters.

This section includes general advice for prepping encounters that will, hopefully, make your life easier. These tips are meant to help with creating narratively-grounded encounters and planning how to best challenge your party based on their current capabilities and circumstances. Where it comes to prepping encounters mechanically, chapter 4 has several sections to help, such as "Choosing Adversaries," "Improvising Adversaries," and "Using Environments." Use the following guidelines as a jumping-off place, finetune the details with chapter 4, then tweak combat as needed while you home in on what works best for your group, both narratively and mechanically.

◼ BATTLES AND NARRATIVE

Battles play an important part in high fantasy adventure stories. Many challenges can be answered through cunning and charm, but battle often serves as the primary vehicle through which obstacles are addressed. Dynamic battles create suspense—forcing players to choose between their various objectives, engaging their character's motivations and weaknesses, and creating the crucible that the players use to forge their characters into legendary heroes.

The following prompts guide you through building the story around the battles, ensuring each clash of swords feels poignant in the greater tale.

Narrative Function

The first thing to consider when building a battle in Daggerheart is the narrative function the battle is playing. Is this battle an obstacle along the way to a larger objective, designed to show the breadth of a villain's influence? Is an ambush the result of failed rolls to notice that the party is being tailed? Is this fight the culmination of an arc for a character as they confront a figure from their background? Whatever the answer, that narrative role should stay with you throughout the process of building and running a battle.

Adversary Motives

The next thing to think about is motive. What are the motives of the adversaries arrayed against the party? What would it take for the adversary to surrender? To flee? What objective does the adversary have beyond survival? If given the choice between capturing the artifact the PCs have with them and delivering the final blow to a character, which way would the adversary act? Keeping these questions in mind can help you make quick decisions about what actions an adversary will take in combat.

Dynamic Environment

Battles become more memorable when you include compelling adversaries and dynamic environments the players (and the PCs) can interact with in interesting ways. If the enemies are on their own territory, think about how they'd manipulate their environment to stack the deck in their favor. Have they built fortifications on the high ground? Have they blocked off alternate routes to force attackers into a frontal assault with exposed flanks? How can the battlefield and terrain reinforce the narrative goal of the battle and show the adversaries' motives? Chapter 4 presents environment stat blocks you can use to further bring your battleground to life.

◼ FLIGHT AND OTHER FEATURES

When building battles, consider the abilities and spells your PCs have. For example, if they can fly, consider adding enemies that can fly or attack distant targets, ensuring the combat remains dynamic and challenging for all PCs. Remember that your players probably chose their features because they want to use them! You have the chance to craft engaging opportunities for the players to show off those powers in exciting ways.

This example demonstrates how you might plan a battle that implements the previous narrative considerations.

Setup

Early in a campaign, the party is going to travel to a forest known to have especially strong nature spirits protecting it. The party includes Sprout Hilldweller, a Warden of the Elements druid who is being hunted by a corrupted Greater Earth Elemental. The party also has a ranger, Marigold Seok, who would be interested in any disruptions to the natural world and is eager to face the corrupted elemental.

The GM, Ben, decides to start the arc with a bang by having the party attacked by Dryads and other nature spirit adversaries as they enter the woods.

Narrative Function

The fight is meant to communicate to the party that the corrupted earth elemental's influence has already infected the nature spirits of these woods. It also introduces the enemy types that will play a major role in this arc, helping the characters and players learn their powers and weaknesses. Lastly, it provides an opportunity for the druid and ranger to showcase their Experiences, Sage domain cards, class features, and community features that will provide them with specialized knowledge and relevant abilities for the fight.

Adversary Motives

Ben decides that the corrupted Earth Elemental wants to sever all connections between mortals and nature so that nature can return to a primordial state of unchecked growth. The elemental corrupted the dryads and other forest spirits have been warped by capitalizing on their resentment of outsiders and stoking their fears about the forest being destroyed. Now the elemental can possess them at will without their knowledge or memory.

The fight will take place in a former druid grove using the Abandoned Grove environment, the site of a bloody confrontation where the possessed dryads and other nature spirits killed most of the druids and drove out the others. Complicating the situation is the fact that the dryads don't remember being possessed, only a violent conflict with the druids over a poorly remembered disagreement. Any substantial conversation with the dryads in the grove exposes that foggy memory and provides a thread to pull on. Ben plans to have the elemental assume direct control and attack the party after just a couple of beats of interaction, using a hidden countdown.

When the fight starts, Ben plans to hint at the manipulation by describing the dryads and treants moving as if they were being controlled, with the Dryads weeping as they pull down trees to attack the party. This complicates the apparent motives of the adversaries and should prime the PCs to look beyond first appearances to find out what's going on.

Dynamic Environment

Ben plans to let the PCs arrive alone in the Abandoned Grove so he can use the environment's "Overgrown Battlefield" feature to encourage them to investigate and begin piecing together clues. After that, the dryad and their forces can arrive to confront the PCs. The PCs will likely explain themselves, exposing the weirdness around the dryads' memories. Ben also makes a note to describe some oddities about the woods and dryads, signaling to the PCs that something is wrong.

Next, Ben draws inspiration from the Burning Heart of the Wood environment (see the "Environment Stat Blocks" section on page 242). He utilizes its "Grasping Vines" and "Chaos Magic Locus" features and adapts them to Tier 2. This can make the scene more perilous and memorable—the vines can *Restrain* the PCs to escalate the stakes in a social or combat scene, and the "Chaos Magic Locus" feature further signals to the PCs that something is magically wrong with these woods.

Alternatively, Ben could decide to skip the "Chaos Magic Locus" feature and develop another passive feature of his own. Maybe a certain species of animal is following the party and can be befriended for more information, or a pack of dangerous creatures will find them if they rest for too long before reaching the grove.
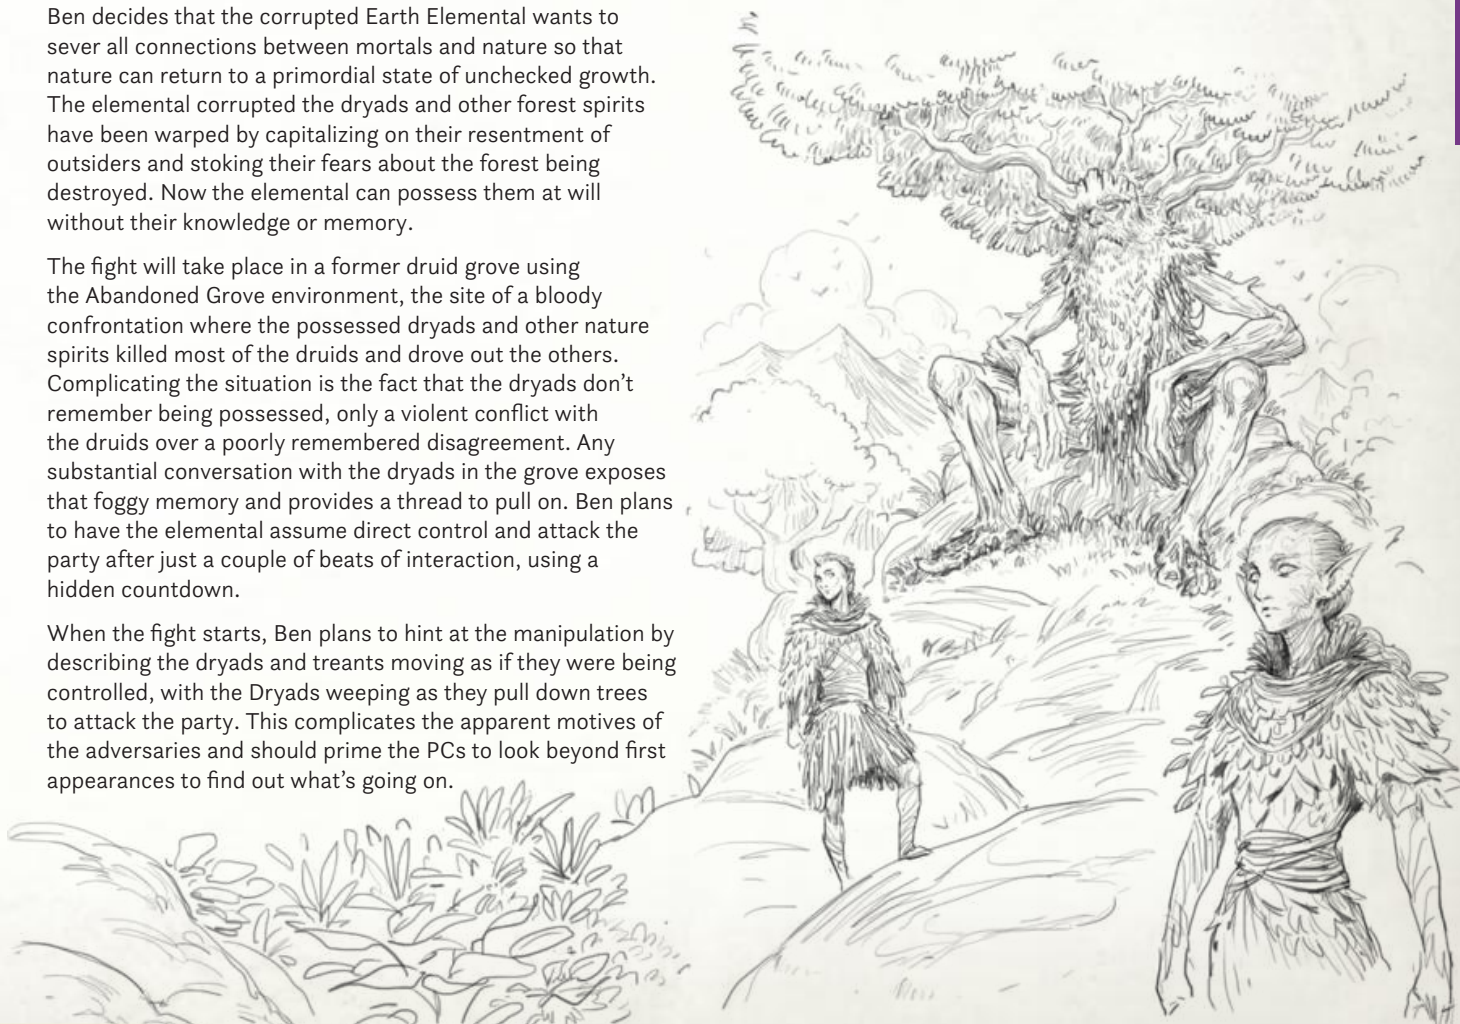

SESSION REWARDS

The most common reward given out to players and their characters during a session of Daggerheart is information. The location of a bandit's hideout, the magical ritual needed to break a curse, or the weakness of a powerful monster—this steady stream of information helps the players decide where to go and what to do. Information keeps the story moving by answering questions, introducing new questions, or complicating the party's understanding of something they thought they knew.

On a slightly longer time frame—every few sessions, at the end of an arc, or at special moments when it makes sense in the fiction—loot can be an exciting reward. For example, PCs might find gear in a mercenary company's supply wagon after a few sessions of searching for missing mercenaries.

Characters should get access to weapons and armor of their tier, usually within the first few levels of entering a new tier to keep pace with adversaries. Some players love getting new weapons and armor, while others may have established an emotional connection to an item (for example, a family heirloom sword or armor once worn by an old friend) and want to keep it. If PCs want to keep their current weapon or armor, consider other ways they could be enhanced. A clever witch could impart enchantments on a breastplate to make it more durable, a blacksmith could upgrade arrow tips to deal more damage, or a god could bless a sword with a deadly edge. You can employ a variety of narrative beats to improve or refurbish the PCs' equipment, upgrading it to the appropriate tier.

CRAFTING SCENES

One of your main responsibilities as a GM in Daggerheart is to set the scene for your players. Whenever you start a session, arrive at a new place, or change the situation, the players are going to look to you for what they need to know. When you do this, think with all of your senses—not just what this place looks like, but what does it smell, feel, taste, and sound like? What is something unique or unexpected about this place, and what does that say about it? Your players will use these details to interact with the world, so give them enough to not only picture the scene, but make choices about what they do and where they go.

Example: "You step into the mouth of the cave and for a long moment you're in pitch darkness. You can hear the soft tap, tap, tap of water in the distance suggesting there may be an underground river ahead. The stone is slick beneath your feet, as you gingerly step forward. At first, there's only the dank smell you expect from a cave: the earthy tang of lichen on mold. But then there's a gust of wind forced from deep within the cavern, and you're overcome by the sickly sweet smell of rotting meat. Something died here recently...

As you move deeper inside, you begin to make out sharp white stalactites bearing down on you.... No—these aren't formations of stone. They're teeth! You aren't standing on slick stone; you're balanced on the salivating tongue of a great beast. You feel that fetid wash of air come over you again—the creature is taking a deep breath and preparing to swallow. What do you want to do?"

SHARING THE SPOTLIGHT

It's rare that every PC will organically have the same amount of spotlight time during a given session. In any group, some players are more outgoing than others—and some PCs are instigators, while others are more cautious. As the GM, you can help ensure that the story's focus rotates between the PCs, so each player has ample time in the spotlight.

■ TIE TOGETHER STORY ELEMENTS

If you know that a specific PC is going to be in the spotlight for a session or an arc, you can try to involve the other PC by drawing on their ties to the spotlit PC and by including story elements that will excite them. For example, if the courtier bard is invited to a debutante ball that ties into his backstory, you might decide that the ball will also be hosting a fencing tournament (which you hope will excite the swashbuckler rogue) and social dancing (which should interest the noble-born sorcerer). You're confident that the warrior will be excited about the scene already, as he has sworn to protect the bard and is not-so-secretly in love with him.

■ ENGAGE QUIET PLAYERS

You can also engage a quieter player by directly inviting action from their character, rather than broadly asking the whole party what they're doing next. Alternatively, you could ask how their character feels about unfolding events.

■ USE VISUAL AIDS

Another approach to balancing play is to use visual aids. For example, you can draw out a space for each character on a sheet of paper to make an action tracker. When a player takes an action, they place one token on the tracker in their character's space. Throughout a session, a quick look at the tracker will show you which players are taking more actions and help you remember to engage the players that haven't acted as much. This visual reminder can also help the other players know who could use an invitation into the spotlight.

■ ENCOURAGE UNGUIDED PLAY

Sometimes you might realize your NPCs and the wider scene have received a lot of focus. As the GM, you too can share the spotlight by creating opportunities to let the players or their characters speak among themselves. The players can carry out a downtime scene or interpersonal moment without your input while you listen and observe—and take note of story threads to weave into later scenes.
USING CONFLICT

Daggerheart is a game of perilous adventure, where conflict plays a key role in creating drama and provoking strong character choices.

Conflict in Daggerheart results when the characters' hopes and actions are met by opposition and uncertainty. If the group's wizard seeks to become the world's greatest spellcaster, her quest likely won't be as satisfying if she's never challenged along the way.

Conflicts can be external (outside forces act against a character) or internal (a character struggles against themself emotionally or intellectually). Our wizard might face external conflict: tests of skill against other mages, magical puzzles that appraise her knowledge and cunning, and eventually trials against legendary beings who wield the most potent magic in the world. Meanwhile, her internal conflicts might include struggling with the ideologies taught to her in school, or even fearing the destructive power of her own magic.

The strongest character arcs in Daggerheart emerge from a combination of internal and external conflicts. External conflicts can bring up unresolved tensions from internal conflicts, while resolving internal conflicts can provide clarity for a character that allows them to overcome external conflict.

When designing conflicts for maximum emotional impact, challenge characters in a way that ties in their internal struggles. If a character struggles with self-confidence, challenge them to excel. If a character struggles with the ethics of using power, put them in situations where using their power has high stakes for other people, not just themselves. Conflicts like these push the characters to better themselves, forging them decision by decision until they emerge as unforgettable heroes.

◼ SOCIAL CONFLICT

Battles and armed conflict are common in games of Daggerheart, but your characters may also trade barbs with courtiers, talk their way past guards, seduce rivals, and plead their innocence to an uncaring monarch. Always keep motive in mind, considering how the characters' request or demand aligns or conflicts with the NPCs' aims.

When NPCs or creatures aren't hostile but aren't inclined to do as the party asks, it helps to think about the scene less as a conflict and more as a collaborative process where both parties are trying to get what they want while maintaining or improving their existing relationship.

Influencing NPCs

For everyday social obstacles, a single successful action may be sufficient to progress, such as haggling down a merchant or convincing a steward to let you into a noble's estate. On a success with Fear, you can introduce a minor setback—for example, an NPC might demand a bribe or set other special terms before they'll do what the character asks.

When dealing with more formidable NPCs, a single action might not be enough to change their mind. A hostile countess couldn't be convinced to send troops to help fight a necromancer with a single roll. Since an adversary or PC becomes *Vulnerable* while their Stress slots are full, you can use an adversary's Stress slots as the meter for tracking an extended or higher-stakes social conflict. By default, one successful social action against an adversary (intimidation, deceit, bribery, etc.) forces them to mark a Stress. Some abilities (such as class or domain abilities) also force adversaries to mark Stress—these are highly useful in social conflicts so long as they're narratively applicable. (Using an ability that forces an adversary to mark Stress upon a successful attack may be ill-advised in a noble's court).

> **Example:** A Petty Noble has a distaste for the party. The Petty Noble has 4 Stress, so if the PCs want to get back into the noble's good graces or force them to concede a point, the GM could tell the party that if they fill the noble's Stress track, they'll change the noble's mind.

Countdowns in Social Conflict

If a social situation has especially high stakes, you might set a consequence countdown or a time limit to represent the adversary's patience. The PCs take actions to mark the adversary's Stress, while trying to minimize consequences that tick down the countdown. If this high-stakes countdown triggers, the PCs lose the opportunity—or suffer a consequence, such as being kicked from a gala or having the guards called on them.

EXAMPLE SOCIAL CONFLICT

The party is making an appeal to a Petty Noble to send troops to deal with a growing undead threat in the woods. The noble is disinclined to help, even if they did believe that the undead threat was real. Ben tells the party that the noble has 5 Stress, and if they can force the noble to mark the whole track, they'll convince the noble to dispatch troops to investigate.

The party's wizard Barnabas goes first, producing the still-twitching tibia taken from a skeleton in the swamp. He describes the magical power needed to maintain a necromantic effect when a corpse is rendered into such small pieces. Ben calls that a Presence Roll, but Asa asks to roll for Barnabas with Knowledge, focusing on the arcane display and demonstration of intellect. Ben says that he would normally give disadvantage on a Knowledge Roll here, since Presence is usually better for persuasion, but that the evidence would give advantage on that roll.

With advantage and disadvantage canceling out, Barnabas rolls a success with Hope, and Ben marks a Stress on the noble. Since Barnabas rolled a success with Hope, Ben invites the players to continue.

Next, Jasper the bard takes the stage, recalling the story of when the party entered the swamp and first battled the undead raised by this necromantic force. Jasper uses their Enrapture spell and makes a Presence Roll, getting a success with Fear. Jasper's player, Emerson, chooses to mark Stress to force the noble to mark a Stress, bringing them down to 2 Stress remaining. Ben gains a Fear and makes a move, describing how they can hear a carriage arriving outside, and it won't be long until they aren't alone anymore.

Since Jasper has the Petty Noble Enraptured, *Ben asks Emerson whether they want to continue. Emerson says they'll weave the words of any party member that speaks into the spell if that's okay. Ben agrees, wanting to involve the whole party.*

Next, the group's ranger Marigold takes the economic angle, telling the noble that if they don't act, the noble's subjects will die and therefore be unable to work and pay taxes. Kate makes a Presence Roll for Marigold and critically succeeds! Since a normal social action would mark a Stress, Ben decides that he'll mark 2 Stress instead on a critical success, which includes the noble's last Stress.

With the Petty Noble's Stress exhausted, Ben describes how they finally agree to dispatch a patrol.

■ ARMED CONFLICT

Chapter 4 presents rules for using adversary and environment stat blocks in combat—but as you plan for combat, remember that the most resonant battle scenes aren't about violence, they're about people and motivation. Violence conveys underlying emotions, developing NPCs and the wider world they inhabit. When bandits raid a village, they're not just looking to hurt others—their motive might be greed or desperation, but either way, violence is their means to an end.

The following sections give guidance for creating emotionally resonant combat scenes.

Layering Goals into Combat

The drama of a battle should stem from narrative goals, rather than solely from the risk the PCs will die. Daggerheart isn't a particularly deadly game, and the players likely know that. The PCs typically fight for a reason, such as defending loved ones or subverting a villain's schemes—if their battle relates to multiple goals or narrative threads, this adds uncertainty to the outcomes and increases dramatic tension.

You can do this by ensuring that the adversary's motivation is front and center and introducing an objective that goes beyond "kill or knock out the opponents." If you establish a special objective for the adversaries (or PCs) before the conflict begins, the scene suddenly has more dimensions and characters have immediate options for actions to take beyond just trading attacks. Another way of thinking about action scenes is to consider the defining action verb. Is this scene just about fighting the enemy or is the party securing a position so that the wizard can conduct the ritual by the solstice? The follow example illustrates a combat with three objectives:

> **Example:** *After the blood mage Caressa kidnapped the governor's husband Osten, the PCs tracked her across the Shattered Mountains. When they confront her in the Ruins of Nix, she's conducting a ritual to seize Osten's latent magical power. The PCs want to stop the ritual, save Osten, and capture Caressa. But which of those goals is most important? If the PCs are winning the fight, what happens if you put Osten in danger and make the players choose between rescuing him and capturing Caressa?*

The outcome of the previous example is uncertain, entirely dependent on the PCs' choices and luck. They could achieve a partial victory by capturing Caressa after Osten dies or allowing Caressa to get away to save Osten. With cleverness and good rolls, they could stop Caressa, capture her, and save Osten, accomplishing all their goals. The uncertainty is what makes the combat dynamic and tense.

When in doubt, you can use the following table to randomly generate an objective to work into a combat or action scene. Roll 1d12 or pick an option to use as the goal of the adversaries (or the PCs).

Objective Generation Prompt

1D12	OBJECTIVE
1	Acquire (obtain or steal) an important item or items.
2	Capture one or more of the opponents.
3	Activate a magical device.
4	Frame a character or tarnish their reputation.
5	Drive the opponent into a corner or ambush point.
6	Stop a magical ritual, legal ceremony, or time-sensitive spell.
7	Hold the line—keep the enemy from reaching a specific area or group.
8	Plant evidence or a tracking device on a target.
9	Secure a specific location ahead of another group's arrival.
10	Harass the opponent to deplete their resources or keep them occupied.
11	Destroy a piece of architecture, a statue, a shrine, or a weapon.
12	Investigate a situation to confirm or deny existing information.

Using Fear for Drama

During battles, spend Fear to keep the characters on their toes. Duality Rolls cause momentum to dramatically ebb and flow as the PCs fail their rolls or succeed with Fear in the fight.

While a lucky streak of Hope Rolls means you don't automatically get a GM move, you can still interrupt the players' momentum by spending a Fear to make a GM move. Because of this, we recommend keeping a few Fear on reserve, especially during battles, so you have the ability to interrupt the scene and create more tension as needed.

When spending Fear, think about what move will most powerfully impact the scene. Change the energy or nature of the fight by activating a powerful foe's ability, bringing reinforcements into the battle, shifting the environment, or having the foes move boldly toward their objective.
Phased Battles

Battles become more memorable when the nature of the foes or the boundaries of the space shift mid-combat. These phases of battle create a sense of natural evolution and escalation, increasing the dramatic tension. Consider the following ways to introduce phases to a combat:

Change the Terms of Engagement

Turn a fight into a chase, reveal information that turns the group's allies against them, or give the party reason to temporarily ally with a faction they're battling.

> **Example:** *During a pitched battle with an infamous thief, you use a GM move to have the thief steal an important artifact from the PCs and attempt to flee. This results in a chase, keeping the story dynamic and forcing the players to adapt.*

Change the Battlefield

During a battle, use a natural phenomenon, an arcane effect, or an adversary's action to alter the environment. This change can be mechanical, such as a raging blizzard reducing visibility, or aesthetic, such as a powerful wizard dominating the sky with arcane runes while channeling a powerful spell.

Some battlefield changes repeat themselves—for example, an earth dragon might occasionally crash into the walls of their lair, dropping boulders and changing the shape of the battlefield. This move might occur on a countdown loop. Other changes only happen once, in which case you might create an Environment move triggered by a specific narrative or mechanical event. A god's champion might sunder the coliseum in a divine realm when she marks her last point of Stress, shattering the floor and dropping the party atop a pane of otherworldly glass surrounded by the rich colors of the cosmos.

If you plan this type of move ahead of time, you might prepare two maps: one for the start of the fight, and another for when the space changes.

Change the Foes

Video games often change their bosses at a certain point in a fight, such as when their health is halved or they're seemingly defeated. Taking a cue from those battles, you can change an adversary in behavior, form, or both: A massive, lumbering enemy splits into multiple, more agile adversaries who act in perfect synchronicity. A defeated foe courses with eldritch power that remolds their flesh into an unspeakable form and grants them sinister new powers.

In Daggerheart, you can create a phase change for an enemy in a few ways. You might give the foe a passive feature that triggers when half of their Hit Points are marked, or you might prepare two adversary stat blocks, one for each phase. This book presents several adversaries with the "Phase Change" feature, which you can use as inspiration for creating your own.

If you didn't prepare a phase change but the party is defeating a major foe more easily than expected, it's okay to let the PCs have the easy win. However, if that feels anticlimactic, feel free to improvise a phase two. Describe how the adversary seems to be defeated, then narrate them standing back up or surging with new energy, clear some of their HP, change some of their statistics or base attack, and improvise a new feature or two to represent how they've changed. An enemy that throws off their armor might lower their damage thresholds but gain Relentless and move about with blistering speed. You might even switch to a different stat block on the fly as the foe transforms into a new and unexpected form.

When an enemy takes a new form, try to draw upon the story to explain the second phase. A blood mage holding out a bloody hand and channeling a powerful spell to transform into an Abomination is both surprising and inevitable. But if the players never learned that the enemy was a blood mage, that reveal won't be as satisfying. Foreshadow information about enemies in advance as much as you can, but if you have to create connective tissue in the moment, you can treat it as a reveal as the transforming enemy boasts about not having demonstrated their full power.

USING DOWNTIME

Downtime lets the players recover resources during short and long rests, but it also provides an opportunity to zoom in on the relationships between characters and how they process the intense emotions of their adventures. You can use downtime scenes as a pressure release valve to vary the intensity of the story and give the PCs room to breathe.

Empower your players to frame their own downtime scenes. Ask the players what it looks like as they tend to their wounds or unwind together, encouraging them to take the reins and work with other players whose characters are involved.

■ PROJECTS DURING DOWNTIME

The Work on a Project downtime move requires more GM input than other downtime moves and is best suited for long-term endeavors the PCs wish to undertake.

These projects are typically tracked using a Progress Countdown. When deciding the starting value of the countdown, consider the complexity of the project, the availability of relevant tools, and the impact of the project on the story. If completing the project will give the group essential information they need to move on, you may want to set the starting value at a low number to ensure the group doesn't have to wait too long for the next clue or story beat. If the project isn't tightly linked to other parts of the story and it simply requires time, you might start the countdown at a higher number.

Simple projects might tick down the countdown each time the player uses the Work on a Project move. However, if the project is skill dependent, you can ask how the PC makes progress and then call for a roll using a trait that matches their approach.

When a player rolls to progress their project, it doesn't feel great if the roll simply ends in failure. If you use the Dynamic Countdown Advancement table in the earlier "Countdowns" section, consider letting a failure give the PC special insight into their goal, which grants them advantage on their next roll for that project. Alternatively, you can instead use the following criteria so the PC always makes progress even on a failure:

- **Critical Success:** 4 ticks
- **Success with Hope:** 3 ticks
- **Success with Fear:** 2 ticks
- **Any failure:** 1 tick

■ GM DOWNTIME

When players use downtime to rest and refresh, you gain Fear and can progress a countdown happening in the background:

- On a short rest, gain 1d4 Fear.
- On a long rest, gain an amount of Fear equal to the number of PCs + 1d4 and advance a long-term countdown.

This helps make the world feel alive—and it reminds players that the more resting they do, the more the world moves without them, so they might want to be careful how much they rest.

■ EXTENDED DOWNTIME

If you're fast-forwarding the story across multiple days (or longer), you probably don't need a separate scene for each long rest during that time. During these longer stretches, consider talking to your players about what their characters want to accomplish, then using montages to illustrate the passage of time. You gain 1d6 Fear per PC and can advance the long-term countdowns as appropriate for the extended period of rest.

Some PC goals might require a single roll (or none at all). Others might call for a series of progress countdown rolls to advance a project across several long rests. It's trivial for a bard to gather rumors during a week-long stay in the city, but you might ask them to make a Presence Roll to see whether they learn some especially important information in the process. Similarly, you could ask your warrior to make a Finesse Roll if they're trying to enhance their armor with rare materials obtained in their last adventure.

CHARACTER DEATH

Adjudicating and overseeing the death of a PC may be among the most difficult tasks for a GM. In a game focused on character relationships, personal story arcs, and heroic adventure, the death of a PC should not happen casually. As the GM, you're charged with honestly portraying the world, and death is more permanent in Daggerheart than in other games of the same genre. Use the following principles to help you navigate these moments fairly and empathetically.

Tip: *Adversaries follow different rules for death than PCs; see "Defeated Adversaries" on page 208 for details.*

■ CHOOSING A DEATH MOVE

When a PC marks their last Hit Point, they must make a death move. Two of the three moves give the player full control over whether their PC lives or dies: with Blaze of Glory, the player is accepting the PC's death, and with Avoid Death, the player is defying the PC's death. Risk It All comes down to a dice roll—the PC has a nearly even chance of living or dying.

When a player is considering which death move to choose, make space for them to work and talk through their decision. You might give them a moment to think by shifting focus to another PC, or keep focus on the dying PC to let the player take the reins of the story.

Character death is not always satisfying in the moment, especially if the character's cause of death isn't directly tied to their personal story. But in a heroic fantasy adventure, death is always a possibility for characters trying to change the world. Death moves give a fatally injured PC a chance for a memorable moment, whether it's going out in a Blaze of Glory or Risking It All on a roll of the dice.

Avoid Death

If a player is certain they aren't ready to say goodbye to their PC, this death move ensures the PC's survival—though they have a chance of taking a scar and permanently crossing out one of their Hope slots. If the character only has one Hope slot remaining when they make this move and they gain a scar, the player must retire the character. Even so, that ending may be preferable for players who would rather see their character give up the adventuring life than die.

Using this move, the PC stays unconscious until healed by an ally or until the party's next long rest. Try to give the player chances to participate in play if the party isn't able to heal their PC or finish a long rest in short order. You might invite them to temporarily control an NPC in the meantime or, for something more character focused, narrate a scene of their PC on the knife's edge between life and death. On this precipice, they could be visited by the spirit of a departed loved one, receive a vision of a disaster they need to avert, or encounter something else that keeps them involved in the story.

Even without gaining a scar, this move still comes with a cost: the current situation worsens, no matter the PC's fate. Work with the player to determine how that manifests. The situation might escalate as a new wave of enemies approaches or a countdown ticks down. Alternatively, the PC's fall might be what turns the tide of battle in the enemy's favor—they might seize an important item from the heroes or draw power from the character's suffering.

Risk It All

This is the move that the GM has the least say in. The Duality Dice decide the character's fate, and with the exception of the 10th-level Resurrection spell (which can only be used once), that roll is final unless you provide another means of resurrection in your story. If the player rolls with Hope, help them decide how to divide the value of the Hope Die between Hit Points and Stress to clear. You might remind the player that if they choose to clear only a small number of Hit Points, they may be forced to make another death move after just one further blow.

Though it is important to reward your player if they roll with Hope by spotlighting this moment when their PC defies death, it is just as important to reward your player if they roll with Fear and their character meets their end. Let them have some final words with a friend or a memory that plays as they fade from consciousness. This gives them a moment to say goodbye to their character in a way that feels important and satisfying.

Blaze of Glory

If the player decides that their character will go out in a Blaze of Glory, work with them to ensure that the one action they take is as meaningful as possible without breaking the integrity of the story. When the seraph goes out in a Blaze of Glory, you might rule that their final attack is fatal, even if the adversary had more HP left than a critical success could possibly deal. But it might be a bad idea to let that same seraph shatter the barrier between the Mortal Realm and the Hallows Above to allow their god to walk freely among mortals. Consider the group's agreements about tone established in your session zero when deciding the scale of action the Blaze of Glory can accomplish.

■ WHEN DISASTER LOOMS

There are times when a fight goes poorly for the PCs and they're bound for total disaster. When multiple PCs are making death moves and there's a real risk that everyone will die, it's important to check in with the players as the scene unfolds. How do they feel about the scene and the chance that the whole party will be left dead or incapacitated? Is this a good place for the campaign's story to potentially end? Should the PCs cut their losses and flee? Since PCs that choose Avoid Death are helpless without assistance, the party is left at the mercy of their adversaries or fate (the GM) if every PC takes that option.

It's also useful to consider the motivation of the adversaries present. Do the adversaries want to kill the PCs, or do they just want the party out of the way so they can pursue their motives? Would they be more likely to leave the PCs for dead, take them prisoner to gloat, or capture them to extract information?

If your players aren't interested in a heroic tragedy at the moment, work with them to decide what makes sense in the scene. Death is a real threat in Daggerheart, but the game is always a collaboration. If the party is going to meet their end, it should be because everyone at the table wants to tell that story. If the players don't want the party to die here but it's difficult to come up with a way they survive, look to their background questions and their relationships with factions and prominent NPCs. Are they taken captive by the enemy? Does an old ally show up with reinforcements to drive off the enemies? Does an agent of the seraph's god or a nature spirit friendly to the druid whisk the PCs away to safety? Does an associate of the Syndicate rogue provide cover for the PCs to withdraw?

If the group decides that their party's story is done but they want to continue the overall campaign, hold a mid-campaign session zero to make new characters and figure out how to connect this new party to the existing story in a way that everyone is excited about. The following section provides additional guidance for introducing new characters, whether one or two new PCs join the party or a new party picks up where the previous one left off.

■ INTRODUCING A NEW CHARACTER

If a PC dies or retires from adventuring, you should collaborate with the player between sessions to develop a new character for them to play at the current level of the party. If your player and group want to, they can answer the usual connection questions, giving them existing relationships to everyone in the party. You can also advance the party's story by taking a more dramatic route—skip the normal connection questions and instead ask one or more of the following questions:

- You have vital information the party needs to continue on their journey. What is it, and how did you obtain it?
- You are in desperate need of help that only the party can provide. What danger follows you, and what do you have for the party in exchange?
- You know somebody in the party very well and have searched them out. What happened the last time you saw this person, and why are you seeking them out now?
- You lost your last adventuring party to something or someone terrible. What caused their downfall, and how is this new party connected to those previous adventurers?
- You are part of a faction that opposed the party, but now you want to align with them. What happened that made you seek them out, and how are you going to prove to the party that you can be trusted?
- You have been charged with delivering a lost item to a member of the party. What is it, and what personal quest is it tied to that requires working with the party?

LEVELING YOUR PARTY

You can level up your party any time you wish, though it's often simplest to do so at the end of an important session—such as when your party reaches the end of a story arc (see the "Planning a Story Arc" section on page 189). All players should level up at the same time, following the "Level Up" section on their character guide. Ask them to reflect on what their character learned in the previous arc and how it might have changed who they are, then choose two options from the list in their Level Up guide.

If you are running a short campaign, you may want to level up every other session (or whatever cadence feels appropriate for your campaign length). This accelerates the power growth of your PCs, but it also allows them to experience the full arc of their characters' mechanics before the campaign ends.

When your PCs level up, they'll gain new abilities, spells, damage thresholds, Experiences, and more, so be sure to review what changed for them. This is a good time to plan opportunities for your players to use those new features over the next arc. For example, if a PC's new ability helps them eavesdrop on conversations, you could begin the next session with an espionage mission where that skill comes in handy. Similarly, if a PC chooses the Animal Whisperer Experience, they'd likely enjoy encountering wild animals that could be tamed during the upcoming arc.

RUNNING A ONE-SHOT

If you want to run a one-shot—a short adventure that only spans one or two sessions—you can use the following guide to build out a quick collaborative session with your players.

First, read the prologue aloud, and when you reach a blank, have a player fill in the answer using one of the available options. Move around the table, having players make decisions until all of the blanks are filled.

Then read the completed prologue to the table. Feel free to ask additional questions, clarify ideas, and expand upon the information until you all feel comfortable moving forward.

> ### PROLOGUE
>
> *Our story takes place within the Kingdom of (1) _____ .*
>
> *We are currently traveling through (2) _____, best known for (3) _____, and the (4) _____ that surround it.*

(1) Atheira | Bellsong | Helmrend | Ruumari | Winter's Sun | Willowfell

(2) Atlas | Dawnhollow | Indigo's Shadow | Rathmire | The Wonder

(3) its massive spires | its sacred wards | the Great Tree | the mysterious powers that keep it afloat | the shimmer hiding it

(4) blistering deserts | dark forests | dense jungles | towering mountains

Now that you know where you're beginning your story, follow the same process for the adventure.

> ### ADVENTURE
>
> *After last night's (1) _____, many here have (2) _____.*
>
> *This morning, we found out that the events of the previous evening (3) _____.*
>
> *To fix this, we'll need to (4) _____.*
>
> *Our story begins as we prepare to leave for the (5) _____, where we might find what we're looking for.*

(1) catastrophic fire | attack by the Horde | terrifying storm | assassination of the queen

(2) been badly injured | decided to leave | been caught in a terrible curse | started an uprising

(3) left someone we care about here near death | destroyed the town's protection rune | awoke a throng of spirits | angered an ancient beast

(4) search for a powerful moonstone relic | retrieve Magister Kharix | bring an offering to the Grave of the Gods | enlist a tricksome fae

(5) Towers of Hyle | Broken Sea | Traveler's End | town of Wildfar | kingdom's capital | Highland Peaks

Next, give your players a fifteen-minute break and answer the prompts in the following section to prep your session. Use the answers as inspiration and build out any necessary details, including any adversaries you think your players might encounter during the session.

> ### GM PREP
>
> *Once the party leaves town, they find (1) _____.*
>
> *As the party journeys toward their destination, (2) _____.*
>
> *As the party reaches their objective, they discover (3) _____.*
>
> *When the party finally finds what they came for, they learn: (4) _____.*

(1) remnants of last night's events | something wild and dangerous | an ominous warning about their destination | they are being followed

(2) they find something important that they missed before | an unlikely ally joins them | a dangerous obstacle impedes their path | they unwittingly enter the home of a dangerous creature

(3) the target is hidden or well-protected | somebody has come to intercept them | this place is unexpectedly dangerous | someone was expecting them

(4) somebody else is looking for it too | it's not quite what they expected | they need something else to succeed | accomplishing their goal will put others in danger

Next, think about the way the characters' backgrounds might tie into the options you and the players chose. Maybe the wild and dangerous creature they find is the monster a player referenced in their PC's backstory, perhaps the mysterious land they travel through is a PC's childhood home, or perhaps the NPC looking for the target is a character one of the PCs has history with. The more you incorporate the PCs' backstories into the present adventure, the more you empower the members of your table to continue making bold choices. When players have agency in story construction, it lessens the responsibility of GMing and welcomes everyone into a shared adventure.

Flesh out any further details as necessary, but don't feel the need to overprep. Now you're ready to play!

RUNNING A CAMPAIGN

You've got your players, you've made your characters, and maybe you've even played a session to get a feel for the game. What's next?

Most tables will start a campaign: a series of connected sessions often played weekly or monthly that let everyone explore their character's story over an extended period of time. When you decide to start a campaign together, you can kickstart your adventure using the guidance in this section, along with the inspiration presented in chapter 5.

In Daggerheart, campaigns are intended to be personal, focused, and responsive. The amount you plan before character creation depends on you and your players' preferences, but the details players provide about their characters should be the primary scaffolding upon which you'll craft the majority of the campaign. Aside from overarching plot beats, you'll often be prepping just the material you need week after week, letting the story evolve naturally through play.

Chapter 5—"Campaign Frames"—provides six scaffoldings for different campaigns. If you're an experienced GM, you may have your own method of campaign prep—as always, feel free to utilize the pieces from this book that help and ignore the pieces that don't.

CHOOSING A CAMPAIGN FRAME

Before your session zero, you might choose to implement a campaign frame to ground the players in the type of fantasy story you're interested in as a GM. The fantasy genre is so wide—providing a campaign frame can give players a strong jumping-off place to start brainstorming their characters.

Daggerheart provides several campaign frames to start you off, but these shouldn't limit the stories you tell with this system. If you have a strong idea about the kind of campaign you want to run for your table, use the structure of the frames to build your own before your session zero.

You can find the following campaign frames in chapter 5:

The Witherwild

When an invading nation attacks an ancient forest deity, a virulent overgrowth spreads throughout the land.

Five Banners Burning

Long-brewing tensions between rival nations boil over, threatening all-out war.

Beast Feast

When a small village's monster defense system fails, the local heroes must venture into the endless caverns below to fix it—and cook up trouble for the creatures that stand in their way!

The Age of Umbra

In a dying world immersed in relentless shadow and nightmarish monsters, small communities hold fast to the light, hoping those who endure can find a way to save this broken realm before all is lost to darkness.

Motherboard

In a world where magic takes the form of the technology left behind by a long-fallen civilization, a new threat rises as a malicious virus spreads through the machines that wander the Wastes.

Colossus of the Drylands

A prosperous region of gunslingers and outlaws has fallen into terror as colossal creatures awaken from beneath the earth.

BUILDING A MAP

At the start of a campaign, one of the most important questions to answer is "Where are we?" To do this, you'll choose one of the blank maps in the appendix or create your own, then print a copy of it out for your table. If you're utilizing a campaign frame, use the map detailed in that section. Digital copies of these maps are available on the Daggerheart website for download.

If you know at character creation that you'll be running a campaign, you can bring a blank map to your session zero to fill out together. Otherwise, you can always introduce it at the top of your next session to integrate into your game moving forward.

To start, place the map on the table and explain to the players that you'll be using it to build the region together. Choose the name of the region from the options available (or make up your own) and write that name on the sheet. If you're using a campaign frame, the name of the region is provided for you.

Next, remind the players about any locations they have already created for the setting. Pass the map around and have them label the locations they created anywhere they'd like.

Then, choose one of the locations from the list on the sheet and add it to the map. Describe this place for the rest of the table—what is it? Why is it called this? What makes it so significant? Then pass the map to another player to do the same. Encourage them to tie in their character's backstory or history with the new location if they wish. As players describe the locations they've chosen, record any important information about them in your notes.

The map should continue around the table like this until it feels like it is populated with enough exciting locations and plot hooks for you to work with. With four players, twice around the table is usually enough. Remember, you can always do this again at the start of another session to fill out the map further, or even introduce a new region that connects to the current one.

After the table feels happy with the details they've added, take the map back and begin the adventure. Maybe it's somewhere the players have already added, or maybe it's a new place—either way, this will help you orient yourself for the campaign moving forward.

FILLING SPACE, LEAVING BLANKS

As part of the prep for your next session, you'll want to review the map your table built together. Think about how the locations your players created might affect the region, and add anything you think might be important or relevant to the sheet. For example, if someone labeled a spot with "The Healing Fields," you might consider adding a town nearby that specializes in creating Health Potions or curing ailments, or a mage's tower that overlooks the fields to protect them. Pay attention to where the PCs currently are in their journey—where might they consider going next?

It's also important to leave blanks. Don't feel the need to fill everything in, and don't worry about planning out what every labeled landmark or town is like. Leaving some things vague gives you the freedom to adapt on the fly and reduces the amount of worldbuilding work you have to do for places your players might never visit.

INCORPORATING PLAYER BACKSTORIES

One of the most important tools in a GM's arsenal is to ask your players questions and incorporate their answers—their responses will tell you what they find exciting. The most important details to utilize while building a campaign are the answers to a character's Background Questions.

The Background Questions are designed to generate story hooks the players care about, which you can leverage for narrative fodder during the campaign. Take good notes during character creation and ask follow-up questions. Don't be afraid to dig deeper into anything the players offer up during this process. If they make up a person, ask them for their name. If they invent a place, ask them what it's called and what it's like. Ensure you record at least one or two things about the world that are important to each player and their character. The more you incorporate these things into the campaign, the more invested that player tends to become.

▪ BACKSTORY NOTES

After character creation, create a simple list of important narrative elements the players have given you, sorted by character. For example, you might make the following notes about the PCs:

Marigold Seok (She/Her)—Seaborne Elf Ranger

Played by Kate (she/her)

Born in the floating city of Bloomfare. Had to leave her mother behind to go on the run.

She is being chased down by the leaders of the Four Elementals for stealing their stone of power during the last ceremony.

Barnabas Britespite (He/Him)—Loreborne Simiah Wizard

Played by Asa (he/him)

Obsessed with finding relics, treasures, and bones of legendary creatures. He thinks these should be collected and utilized for various practical purposes, not stashed away into museums. Wants to gather as much knowledge as he can in his lifetime. Uses bone runes to cast magic.

Served as the advisor to King Guthril, but failed to protect the king's daughter Nira from being killed by wild beasts during her first hunt with him. Left the kingdom in shame.

Is chasing down the fang of the great dragon Krugthar, because it is said to contain knowledge of every creature the dragon has ever consumed.

Is rivals with Maverick, a snobby human treasure hunter who is trying to collect all the bones of legendary creatures to put them in a museum.

Jasper Flores (They/Them)—Highborne Halfling Bard

Played by Emerson (they/them)

Grew up in The Sunbearer's Crescent with the royal Galamore family of halflings. Was in a secret relationship with the princess, Astrid Galamore. They had a secret place they would meet.

Astrid and Jasper were supposed to run away together, but she never showed up. Jasper still wonders what happened. There are rumors that she was forced to marry someone else.

Was trained by Mage Yaro within Illiat's Tower. Yaro is the one who convinced them to travel the world and learn all they can.

They look up to a fellow bard named Quill who plays at the Golden Goose in The Sunbearer's Crescent. Jasper met Quill through Yaro.

Sprout Hilldweller (She/Her)—Wanderborne Fungril Druid

Played by Chen (she/her)

Was chased out of the city of Branishar because she accidentally spent too much time there and decimated the environment around her. She's learned she has to keep moving: she can't stay in one place for too long or bad things happen.

She uses her Death Connection ability to absorb and memorialize the core memories of all people she's slain. She sometimes forgets those histories aren't her own.

TYING BACKSTORIES TOGETHER

Once you've identified key points in each PC's story, identify which of these pieces of information could be related—how these stories could potentially cross paths—and draw some connections between them.

Maybe Maverick, the snobby human treasure collector that Barnabas is rivals with, could be the same person that Astrid Galamore, the halfling princess, was forced to marry? And if that's the case, what if Maverick was now forcing Mage Yaro to use his magic to invade the fungril network and seize more great treasures around the world without having to leave the kingdom? This would create a crossover between Jasper, Sprout, and Barnabas, so it seems like a good place to start our campaign. But let's keep thinking.

This type of conflict would likely eventually lead them to return to the Galamore kingdom to stop Maverick. This journey could be hindered by the fungril forces Mage Yaro is controlling, giving Sprout an opportunity to interact with the corrupted network and get hints of what is to come in a way nobody else would be able to. And when they all finally arrive in the Galamore kingdom, there could be a twist! Maybe Astrid convinced Quill, her and Jasper's bard friend, to use shapeshifting magic to take her place right under Maverick's nose so she could leave the kingdom and search for Jasper? This could be a fun opportunity to flip the "princess in peril" trope on its head and provide an unexpected reveal once they reach the kingdom. If this is the case, we'll also want to brainstorm a clue Astrid could leave behind at the secret place where she and Jasper used to meet so the party can go after her. But that's down the road, no need to flesh that out immediately.

Marigold needs some love—maybe we could put the floating city of Bloomfare in the great dragon Krugthar's path of destruction? This would push Marigold to return home and face the consequences of her actions to save her mother's life, while giving Barnabas an opportunity to chase down the dragon he wants so badly. But given they'll have to face a dragon, this should probably be later in the campaign. So perhaps in the interim, to keep Marigold's backstory involved, we could put some elemental creatures on the party's trail intermittently as they travel. This will keep the threat of her home and the reminder of what she did relevant until she must return to confront them. Maybe we even make that our first encounter of the campaign to set up that long-running danger and tie Marigold in at the start.

A few extra threads to tie up—Sprout should probably have to deal with what she did in Branishar. Either she faces signs of the same thing happening wherever she travels, or something pushes her to return home. Barnabas should probably discover something unexpected about Nira's death—could she still be alive? If so, maybe she finds him to reveal that her father King Guthril secretly set up an ambush to have her killed. It wasn't Barnabas's fault, and Nira wants revenge.

That's more than enough for now! As the campaign plays out, there will be plenty more to work with and some of these plans may change drastically—but this is a great foundation to work from.

PLANNING A STORY ARC

Now that we have some ideas of what could potentially happen in our campaign, it's time to talk about **story arcs**. Arcs are a connected series of sessions within a campaign that focus on a specific objective, theme, character, or idea. Though you won't know for sure the path your players will take, by preparing the structure of the arc, you can ensure that you're giving them the adequate narrative fodder for a satisfying story.

Arcs are typically between three to five sessions in length, though they can be longer depending on how large of a campaign you're running. It's usually good to start small and build up to larger arcs as players get more invested in the story you're telling together, but an arc's structure typically remains the same regardless of the length.

There are a few different structures that stories often take, but we're going to use the Three-Act Structure as our framework because it is the most common and is the easiest to identify in many of today's movies and TV shows. As always, feel free to experiment with your own style of storytelling and only use the things from this section that help you at your table!

The Three-Act Structure is pretty straightforward—Act One is the introduction, Act Two is the trials and tribulations, and Act Three is the finale.

This is something we see in almost every popular movie or TV show—a character wants something, they work hard and face challenges to get that thing, and finally succeed or fail. Either way, they always change because of the journey they went through. Because of this, it's often what players expect out of a good story, even if they don't know it. It's what feels satisfying to us, because it's the way we're used to seeing stories. We can utilize that expectation in our prep to make our work easier.

Let's take the example from the previous "Tying Backstories Together" section to form our first arc. Given how much the NPC Maverick is intertwined in multiple PCs' backstories, he's going to be our focus here, since that will give almost everyone a chance to have their backstories interwoven into the story at the start. Maverick is the snobby human treasure collector who is Barnabas's rival, and we've made the decision that Maverick is the one who stole Astrid Galamore's hand in marriage, even though she has been in love with our party's bard Jasper since childhood. Because Maverick is now residing in the kingdom with her, we've also decided that he is forcing Jasper's old mentor, Mage Yaro, to use his arcane powers to tap into the expansive fungril network and hunt for treasure remotely, disrupting Sprout's connection to the fungril network. And on their way to the kingdom, there will be no waiting around for the perfect opportune moment to act, because Marigold has a set of powerful elemental leaders hot on her trail.

◼ ACT ONE: COLLISION

Let's make an event collide with our party that they can't ignore. It's often best to go to the most obvious answers first, then complicate things from there. In this case, let's set up Maverick going after an artifact that the party has been asked to protect. If he's using the fungril network to do it, then perhaps Maverick has Yaro create plantlike creatures filled with the fungus that he can control! There's our first act encounter—and we can build the rest of this act from there.

The most important thing to keep in mind about Act One is that you want to use it to introduce a bigger conflict the party will encounter later—give them a taste of what's to come and draw them into the arc's story. Using the techniques in the earlier "Running a Session" section, after you've played through Act One with your table, you might end up with something like this:

Beat One: On their way to the city of Helayre, the party runs across the damage left behind by elementals—Marigold recognizes the work of those chasing her.

Beat Two: As the party arrives in Helayre, they notice that large plants have overwhelmed everything. They also meet kind townsfolk who tell them about the attacks on the city by plant creatures at night. Upon inquiry, they'll be taken to where the attacks are the worst—the university.

Beat Three: At the university, the students all know Barnabas by name—the headmistress, Olivia Rose, is a proponent of his work. She shows the party what the plant creatures are after: the Stone Soul, belonging to a griffin from the hidden island of Boga Tiren. Olivia's parents disappeared searching for Boga Tiren when she was a kid, and she has spent her life looking for them. If they extract the memory of its location from one of the plant creatures, then maybe she can find the island.

Beat Four: Olivia captured a plant creature that attacked. When Sprout uses Death Connection, she learns it's full of tiny mushrooms. She gets clearer flashes of the mage in a nearby port town. He cries out for help, looking pained. The mage is consumed by a memory in which a voice tells him to "get to the stone."

Beat Five: Plant creatures descend on the university. The party must hold them back and defend the Stone Soul. As the final creature goes down in battle, the party hears the mage's voice seep through it—the voice calls out to Jasper with a nickname familiar only to Yaro. With the planet creatures defeated and Yaro revealed, Act One is complete.

Though the party's decisions might require you to adapt or make changes, this framework will help you use Act One to set up the rest of the arc. It creates questions for the PCs to chase—why is Yaro doing this? Why did he sound scared? Who was giving him orders? Could it be Maverick, looking for relics? And also—Where is Boga Tiren? Why is it hidden? Dramatic questions like these drive the PCs forward into Act Two.

◼ ACT TWO: COMPLICATIONS

In Act Two, the PCs are thrust into a journey to answer their big questions. Before the end of Act One, you should confirm which direction they're going to go before you dive into planning—they'll almost certainly want to figure out what's happening with Mage Yaro, but what if they decide to instead escort Professor Rose to Boga Tiren? Or something else entirely? It's often best to lead from behind as you approach Act Two—let the players show you the questions they want to answer most, then fill in the gaps as they move toward finding those answers.

Once the party is off on this quest, Act Two is all about the complications that get in the way. As you prep for these next sessions, the complications should matter—they should be personal and speak to the themes and tone of the campaign.

If, for example, the party decides to head north to the Galamore kingdom to find out what's happening with Mage Yaro, we know they'll be on the road for a few days to get up there. It might be tempting to throw in a few random encounters with wild animals, some people asking for help with unrelated issues, or some rolls to see how well they're able to survive the distant travel, but Act Two is all about building up to a climactic finale. So what can we do instead to make it feel like a story, rather than just time passing before we get to the Galamore kingdom?

We know Barnabas is searching for the legendary dragon Krugthar, and we're likely going to have a future arc (when the players are higher level) centered around his attack on Bloomfare (Marigold's home). One option is to foreshadow that event and show the dragon's power. Maybe we put a village decimated by fire on their path, the village's mage dead and the ruins gouged with immense claw marks. Those alive talk about an attack by a massive flying beast that disappeared into the sun—something Barnabas will immediately recognize as Krugthar. But to give the players something to act on now, maybe the beast had small companions or minions that could be creating havoc in the village, dragging important NPCs into the forest, or shapeshifting to replace normal citizens. You can change this encounter depending on the kind of challenge your table enjoys.

We also know from Sprout's backstory that if she stays somewhere too long, she rots away everything around her—perhaps we see the devastating effect that Maverick and Yaro had on the environment. Perhaps the party encounters twisted arcane creatures riddled with fungus and struggles to traverse a sickly land. These events serve as a reminder to Sprout of the place she decimated and the destruction she left behind. She could have the chance at a bit of redemption here, or at least knowledge of this kind of blight that helps keep her friends safe.

Another option might be to encounter an additional place where Maverick's fungril creatures successfully stole another artifact of power—but this relic is something that can be consumed to steal another person's arcane power. Perhaps we decide this was the plan along, for Maverick to use Yaro until he could absorb his magic himself. Even without knowing the full context, the PCs will likely rush to the Galamore kingdom as fast as they can, knowing this powerful object has fallen into the wrong hands.

Whatever the journey may entail, once the PCs have reached the kingdom to confront Yaro and learn about Maverick, we enter the final act of our arc.

◼ ACT THREE: CLIMAX

Act Three will usually see our PCs resolve some of the big questions they have and face off against the powerful force they've been preparing for through Act One and Act Two. Identify which answers the players are most excited about discovering and provide at least some of those answers in this act. Oftentimes, these answers are what launch the next arc of your campaign—having an idea of what they are going into this act will help you prepare for what's to come.

Though not absolutely mandatory, it's also always a good idea to plan some sort of reveal, surprise, or twist in this act—something that isn't quite what it seems. These plot twists keep the players on their toes and make them excited to find out what will happen next. In the case of our current example, we have a few twists prepared—Yaro is being controlled by Maverick, who has squirmed his way into the kingdom by marrying Astrid Galamore, Jasper's childhood love.

As we prepare this act, we should identify the questions we are going to answer—things like "Who is forcing Yaro to do this?" and "What happened to Astrid?" It's important to think through what Maverick would do to keep himself safe and Yaro under his control. Perhaps he orders the king's guard to attack the party when they enter the city, putting Jasper in conflict with the very people they grew up with. Maybe the kingdom is locked down and the drawbridge raised, forcing the group to find another way in. Think about how you can create a last set of complications that ramps up the tension until the final confrontation is inevitable.

The arc will end with a showdown between Maverick and the party. Maybe he still has Yaro under his control and uses the mage as a weapon against them. Maybe he has absorbed Yaro's arcane power using the relic he stole and is now attacking the party with magic himself. Maybe he has turned coward and is attempting to flee with Astrid through a secret tunnel beneath the castle. Whatever the encounter is, it should be a big, exciting, and dangerous ending to the arc that ties up some of the loose ends and creates an opportunity for more adventure in the next arc.

LONG-FORM PLAY

Just as an arc is a collection of scenes and sessions, a campaign can be thought of as a collection of arcs. The shape of your campaign will depend on your campaign frame (whether you're using a formal frame or not)—a campaign focused on the PCs rising to prominence as gladiators in one city-state will have a different shape than a grand tour campaign where PCs travel the world collecting the artifacts needed to defeat a world-ending threat. Some campaigns may be more episodic, with individual and seemingly disconnected adventures that eventually culminate into a larger story, and others might be a more serial narrative of unfolding arcs.

Depending on your campaign, each story arc might end in the party leveling up, or a story arc might span across an entire tier of play (levels 2 through 4, 5 through 7, etc.). There's no wrong way to plan as long as it serves your needs as a GM and the players are enjoying the game. A longer campaign (closer to eight to ten sessions per level) may have several story arcs per level or more complex story arcs, plots with red herrings or tough choices that force the PCs to decide between simultaneous threats. Then you can take the plots that the players did not focus on and progress them so that when the PCs do get around to addressing them, the situations have escalated.

A few sessions into a campaign, once everyone has a solid sense of their characters and their motivations, you can explore options for longer-term planning and how to help the group execute on the table's creative intentions for the campaign. Look at the background answers and connections, especially ones that haven't yet been explored. Ask yourself how these elements could work with what's already happened in the story. If a central character relationship between PCs already changed, what external events or situations could enrich or complicate that relationship? What elements of character backstory could provide dramatic contrast to how a character has presented themselves so far? What elements of the setting would be impacted by what's already happened in the story? What threats have grown while the PCs were taking action elsewhere?

■ CONSTRUCTING ARCS

Imagine a rope. You have dozens of smaller cords twisted around one another to create something stronger and longer lasting than any one thread could be as an individual. That rope is a story arc, and the cords are the plots that weave together to craft it. While the rope always starts frayed, the cords tighten around one another as the story unfolds to create a cohesive and satisfying narrative.

We build story arcs by breaking them into three or four sessions that each cover a major plot beat. These beats are created when we intertwine several ongoing storylines, which we'll call A-, B-, and C-plots. As you chart out arcs, you'll determine which storylines to prioritize when they best deserve focus. By threading storylines into beats, then those beats into arcs, you can weave the arcs together into one thrilling, cohesive campaign.

A-PLOT: The star of the show, often dealing with the primary action of a session. Early in a campaign, this typically involves taking the first steps into revealing a larger world and a looming threat. As a campaign moves forward, A-plots will fall away as B- and C-plots rise into their place.

B-PLOT: This plot is flexible and often throws a wrench into the gears turning the A-plot, forcing the party to divert their attention. The B-plot in one arc should become the A-plot in the next.

C-PLOT: The least-featured plot thread in an arc or beat, the C-Plot exists to seed upcoming and important plot threads. These are best used sparingly—you'll know you did it right when a late-campaign revelation has a trail of breadcrumbs, only visible in hindsight, leading back to some of the earliest story points. C-plots often become B-plots in subsequent arcs.

You can always inject a D/E/F-plot into the story if it calls for it. But even if you have more than three major plot threads in your story, focusing on three in any given session will help keep everything manageable.

In the table below, you'll see four example narratives: "Marigold's Four Elementals," "Sprout's Power," "Krugthar's Destruction," and "Yaro's Return," and how they might weave together into a three-arc campaign.

Example Long-Term Arcs

ARC	1			2				3			
SESSION	1	2	3	1	2	3	4	1	2	3	4
Marigold's Four Elementals	A-Plot	A-Plot	A-Plot								
Sprout's Power		B-Plot	B-Plot	A-Plot	A-Plot	A-Plot	A-Plot				
Krugthar's Destruction				B-Plot	B-Plot	B-Plot		A-Plot	A-Plot	A-Plot	A-Plot
Yaro's Return			C-Plot		C-Plot		C-Plot		B-Plot	B-Plot	B-Plot

■ A LARGER PLOT

When you run a campaign, you might prefer to have PCs explore a number of smaller arcs using the structure above. You can also nest this structure within one overarching plot. In heroic adventures, this often manifests as a quest to stop the villain, protect the kingdom, or save the world—a challenge the PCs must overcome that affects the wider world and the people in it. If you want to include a larger plot, it will appear more or less in each session, remaining throughout your story until the characters finally arrive at the climax of the campaign.

CHAPTER FOUR
ADVERSARIES AND ENVIRONMENTS

This chapter presents the rules and stat blocks for adversaries and environments.

USING ADVERSARIES

This section describes how to use each adversary's stat block, while the "Armed Conflict" section in chapter 3 presents general rules for running combat and tying these scenes into the larger story. Finally, the upcoming "Adversary Stat Blocks" section presents statistics for each adversary, grouped by tier to represent their general threat level.

ADVERSARY BREAKDOWN

Each adversary's **stat block** presents the statistics, or mechanical information, you need to use them in combat.

■ Name

Each stat block has a unique name—see the Jagged Knife Bandit stat block example below. Abilities that affect adversaries with a certain name include all adversaries who use that stat block, regardless of their in-story name.

■ Tier

Each adversary is designed to oppose PCs of a certain tier. You can use stat blocks from other tiers, but you might want to adjust their statistics as described in the upcoming "Improvising Adversaries" section. Tier 1 adversaries are appropriate for level 1 characters, Tier 2 for levels 2–4, Tier 3 for levels 5–7, and Tier 4 for levels 8–10.

■ Type

The adversary's type appears alongside their tier. The Jagged Knife Bandit is a Standard adversary, meaning they're an average member of their faction's forces. The following "Adversary Types" section details possible adversary roles.

■ Description

A summary of the adversary's appearance and demeanor.

■ Motives & Tactics

Each stat block contains the adversary's motives and tactics. When in doubt, the bandit tries to escape (caring more for their own life than victory), profit (by any means necessary, including lying and stealing), and throw smoke (obscuring the battlefield and escape route). These motives and tactics are suggestions rather than rules—feel free to improvise their choices as you would when playing any NPC.

■ Difficulty

Adversaries don't use Evasion like PCs—instead, all rolls against them use their Difficulty. The bandit has a Difficulty of 12, so a roll of 12 or higher succeeds against this adversary. If an adversary's feature doesn't specify a Difficulty (like an Agility Reaction Roll), it always uses the adversary's Difficulty.

■ Damage Thresholds, Hit Points, and Stress

"Thresholds: 8/14" represents this adversary's damage thresholds—so their Major threshold is 8 and their Severe threshold is 14. The bandit has 5 Hit Points and 3 Stress. These systems function the same way they do for PCs.

■ Attack Modifier

When you attack with the adversary, apply this bonus or penalty to your attack roll.

■ Standard Attack

Each adversary has a standard attack listed next to their attack modifier, which contains the attack's name (Daggers), its range (Melee), and its damage on a success (1d8+1 physical damage). You can use this standard attack as an action.

■ Experience

Like PCs, some adversaries have Experiences that make them especially capable in certain situations. This adversary's Experience is Thief +2, which can aid them in rolls related to skulduggery. See the upcoming "Adversary Experiences" section for further details.

■ Features

Features represent the bandit's capabilities in a conflict. There are three kinds of features: **passives, actions,** and **reactions**. For example, the bandit has a passive called "From Above" that deals more damage when they're attacking from above—the 1d10+1 damage replaces their standard attack's 1d8+1. The upcoming "Adversary Features" section details how to use various features.

JAGGED KNIFE BANDIT
Tier 1 Standard
A cunning criminal in a cloak bearing one of the gang's iconic knives.
Motives & Tactics: Escape, profit, steal, throw smoke

Difficulty: 12 | **Thresholds:** 8/14 | **HP:** 5 | **Stress:** 3
ATK: +1 | **Daggers:** Melee | 1d8+1 phy

Experience: Thief +2

FEATURES
Climber - Passive: The Bandit climbs just as easily as they run.
From Above - Passive: When the Bandit succeeds on a standard attack from above a target, they deal **1d10+1** physical damage instead of their standard damage.

ADVERSARY TYPES

An adversary's **type** represents the role they play in a conflict. When building encounters, utilizing a mix of types helps create a dynamic and engaging challenge. The adversary types are as follows:

- **Bruisers** are tough and deliver powerful attacks.
- **Hordes** are groups of identical creatures acting together as a single unit.
- **Leaders** command and summon other adversaries.
- **Minions** are easily dispatched but dangerous in numbers.
- **Ranged** are fragile in close encounters but can attack from a distance for high damage.
- **Skulks** maneuver and exploit opportunities to ambush opponents.
- **Socials** present unique challenges to overcome through conversation rather than combat.
- **Solos** present a formidable challenge to a whole party, with or without support.
- **Standards** are rank-and-file adversaries representative of their fictional group.
- **Supports** enhance their allies and disrupt their opponents.

ADVERSARY EXPERIENCES

Adversaries tend to have fewer but broader **Experiences** than PCs. In situations where you think an adversary's capabilities would come into play, you can spend a Fear to apply an Experience modifier to their Difficulty, attack rolls, and reaction rolls as follows:

■ Difficulty

When a PC makes an action roll against an adversary, you can spend a Fear to add a relevant Experience modifier to the roll's Difficulty.

■ Adversary Attack and Reaction Rolls

When an adversary makes an attack or reaction roll, you can spend a Fear to add a relevant Experience modifier to the roll.

When you use an adversary's Experience, describe how it improves their odds at performing that action. Experiences feel more impactful if you save them for certain dramatic moments or situations, rather than applying them to most rolls.

While some adversaries specialize in combat, others do best in nonviolent situations, and their Experiences reflect that. For example, the Tier 1 Merchant has the Experience "Shrewd Negotiator +3" that can apply whenever a PC tries to haggle with them, increasing the Difficulty to 15 to reflect their keen business acumen.

■ Example Experiences

You can always adjust a stat block's Experiences to fit your story. Here are examples of Experiences you can use:

Acrobatics	Hunt from Above	Navigation
Ambusher	Intimidation	Nobility
Bartering	Intrusion	Quick Reflexes
Blademaster	Keen Senses	Socialite
Bodyguard	Magical Knowledge	Stealth
Commander	Nature's Friend	Tracker

ADVERSARY FEATURES

The bottom of each stat block lists the adversary's **features**. Features can take three forms—actions, reactions, and passives. The following sections describe how to use these features and provide a few examples.

> **Tip:** If an adversary stat block mentions an "ally," it's referring to a fellow adversary, not a PC.

■ Activating Features

For an adversary to use an action, they must have the spotlight. Passives and reactions typically don't require the spotlight. Some features require you to use additional resources, such as:

- **Marking Stress**
  Some moves call for you to "mark a Stress," meaning you mark 1 Stress on the adversary. Other, more powerful moves might tell you to "mark 2 Stress" or more. Each adversary's Stress is tracked individually; if one adversary marks all their Stress, they can't mark a different adversary's Stress to use that move.

- **Spending Fear**
  Some moves say to "spend a Fear." Other, more powerful moves might tell you to "spend 2 Fear" or more. To make one of these moves, you must spend Fear as described, even if you already spent a Fear to spotlight the adversary.

■ Adversary Tokens

Some adversaries require tokens to be placed on their stat blocks for certain features. These adversary tokens are used as counters similar to the players' character tokens.

◼ Adversary Actions

Adversary actions can be divided into three categories:

- **Standard Attacks**

  Each adversary has a standard attack. This includes their attack modifier, the name of the attack, its range, and its damage. When you spotlight an adversary, you can always use their standard attack as long as they are within range or can move within range.

- **Unique Actions**

  Many adversaries have special actions listed on the bottom of their stat block. These represent their innate abilities, magical talents, and other combat techniques. Unique actions might allow the adversary to make an attack, force PCs to make a reaction roll, or even change the landscape. When you spotlight an adversary, you can choose to use one of these instead of making a standard attack.

- **Other Actions**

  Adversaries can do nearly anything a PC can, so if you want to do something that isn't in the stat block, feel free! The "Adversary Action Rolls" section in chapter 3 provides guidance for resolving other actions an adversary might take.

UNIQUE ACTION EXAMPLES

The following features are examples of unique actions. In these examples, "X" represents a number that differs for each stat block.

Haymaker - Action: Make an attack against a target within Very Close range. On a success, deal X direct physical damage.

Shredding Strike - Action: Make an attack against a target within Very Close range. On a success, deal X physical damage and the target must mark an Armor Slot without gaining its benefit (they can still use armor to reduce the damage).

◼ Adversary Reactions

Adversary reactions are features that don't take effect until their specific trigger occurs (such as taking damage or marking a certain number of HP). When it triggers, you can choose to immediately use the reaction, and you don't have to spend Fear to interrupt the PCs with this reaction (unless otherwise specified). The following features are examples of reactions. In these examples, "X" represents a number that differs for each stat block.

Heavy Hitter - Reaction: When this adversary deals damage with a standard attack, you can **spend a Fear** to gain a +X bonus to the damage roll.

Team-Up - Reaction: When another adversary within Very Close range of this adversary deals X damage to a creature, you can **mark a Stress** to make a standard attack against that same creature. On a success, combine the damage.

Momentum - Reaction: When this adversary makes a successful attack against a PC, you gain a Fear.

◼ Adversary Passives

Adversary passives always apply under the circumstances stated in that feature. Some are always in effect (such as the "Arcane Form" passive, which makes the adversary permanently resistant to magic damage). Others automatically come into effect when the stated trigger occurs (such as the "Horde" passive, which reduces the adversary's damage once their Hit Points are halved).

The following features are examples of passives. In these examples, "X" represents a number that differs for each stat block.

Horde (X) - Passive: When the Horde has marked half or more of their HP, their standard attack deals X damage instead.

Minion (X) - Passive: This adversary is defeated when they take any damage. For every X damage a PC deals to this adversary, defeat an additional Minion within range the attack would succeed against.

Relentless (X) - Passive: This adversary can be spotlighted up to X times per GM turn. Spend Fear as usual to spotlight them.

Tip: The "Relentless" feature is useful if you want an adversary who can act multiple times between PCs. This is often best for exceedingly fast or dangerous foes, or for adversaries who are likely to battle the party on their own.

Slow - Passive: When you spotlight this adversary and they don't have a token on their stat block, they can't act yet. Place a token on their stat block and describe what they're preparing to do. When you spotlight this adversary and they have a token on their stat block, clear the token and they can act.

Tip: The "Slow" feature is useful if you want an adversary who narratively takes longer to act than others, like a giant slug or a lumbering ogre. This is usually most effective when the creature has powerful actions that justify the delay.

Arcane Form - Passive: This adversary is resistant to magic damage.

Armored Carapace - Passive: When this adversary takes physical damage, reduce it by X.

Fear Features

Fear Features are rare and powerful adversary features that require spending Fear to activate. These can take the form of passives, actions, or reactions. Each Fear Feature is a scene-defining effect that justifies the expenditure of this valuable GM resource.

> *Explosion - Action:* **Spend a Fear** to erupt in a fiery explosion. Make an attack against all targets within Close range. Targets the adversary succeeds against take **1d8** magic damage and are knocked back to Far range.

Summoning Features

Certain features summon additional adversaries on the battlefield. The summoned adversaries arrive at a specified range relative to the adversary who used the feature. In the following example, the Jagged Knife Lackeys would spawn at Far range from the Leader who summoned them. We recommend you use these features when you feel the fight needs to grow—either in duration or difficulty.

> *More Where That Came From - Action:* Summon three Jagged Knife Lackeys, who appear at Far range.

Spotlighting Features

Some features allow you to immediately spotlight one or more other adversaries. Unless otherwise specified, this doesn't require spending Fear. When a feature tells you to spotlight more than one adversary, you can choose the order in which they act. While an adversary is spotlighted in this way, you can't use another spotlighting feature.

> *Tactician - Action:* **Mark a Stress** to spotlight this adversary and two allies within Close range.

RETURNING RULES

This section repeats a few rules from earlier chapters that are helpful to remember while running adversaries.

Targets and Groups

Often an effect asks you to choose a target within range. This means you choose a single creature to affect. When it makes sense in the story, you can target a single object in range, rather than a creature, adjusting the effects as needed.

To affect a group of targets, those targets must be clumped together in an area within Very Close range of a point you choose. Regardless of the number of targets, you only need to make one attack roll and compare that total to the Difficulty of each eligible target to determine which creatures you succeed against. When your attack deals damage to more than one target, roll damage once and apply the total to each target the attack succeeded against.

Attacking Multiple Targets

By default, an adversary can only hit one target with their standard attack. When an adversary's action lets you make an attack against multiple targets, you make one attack roll and ask if it hits any of the targets. If you're making individual attacks with multiple adversaries during the same GM move, make an attack roll for each adversary.

CHOOSING ADVERSARIES

It's time to build a combat encounter!

The upcoming "Battle Guide" section gives a starting point for building balanced encounters. The following pages break down each type of adversary and provide guidance for building your own.

BATTLE GUIDE

This guide will help you roughly balance an encounter so you can determine how many and which adversaries to use. You'll first calculate your starting Battle Points, which determine your budget for the encounter. Then you'll adjust the budget up and down based on other factors. Finally, you'll build the encounter, spending Battle Points to add adversaries until you have no more to spend.

When planning a battle, start with the following formula to calculate how many Battle Points you should spend:

> ### (3 × the number of PCs in combat) + 2

For example, if you have a party of three PCs, you have 11 Battle Points to spend. If you have a party of five, you have 17 Battle Points to spend.

Keep in mind that you might need to adjust this calculation as you become more acquainted with your party and their power level.

◼ Adjusting Battle Points

Some factors might increase or decrease your Battle Points budget:

- **Subtract 1 point** if the fight should be less difficult or shorter.
- **Subtract 2 points** if you're using 2 or more Solo adversaries.
- **Subtract 2 points** if you add +1d4 (or a static +2) to all adversaries' damage rolls (to increase the challenge without lengthening the battle).
- **Add 1 point** if you choose an adversary from a lower tier.
- **Add 1 point** if you don't include any Bruisers, Hordes, Leaders, or Solos.
- **Add 2 points** if the fight should be more dangerous or last longer.

◼ Spending Battle Points

Once you finish calculating your available Battle Points, craft your combat encounter by spending points until you have none left.

- **Spend 1 point** for each group of Minions equal to the size of the party.
- **Spend 1 point** for each Social or Support adversary.
- **Spend 2 points** for each Horde, Ranged, Skulk, or Standard adversary.
- **Spend 3 points** for each Leader adversary.
- **Spend 4 points** for each Bruiser adversary.
- **Spend 5 points** for each Solo adversary.

> **Tip:** *Some adversaries summon additional enemies when they use their features—you don't need to factor those into your point total.*

> **Example:** *Ben is preparing an encounter for his party of four to help introduce a new enemy faction. Having four PCs means he starts with 14 Battle Points to spend. He wants this encounter to be a little easier, so he adjusts his Battle Points to 13. He spends 8 points on two Bruisers, 4 points on two Standards, and 1 point on four Minions.*
>
> *Later, the party has followed the faction's trail and confronts a group on patrol near the faction's outpost. Ben spends 10 points on five Standard adversaries, 2 points on a Ranged adversary, and 2 points on eight Minions.*
>
> *And finally, because the party has fought through the outpost to confront the faction leader, Ben decides to make the last fight more difficult. He decides he will add +2 to all adversary's damage rolls, giving him 12 points to spend. With this budget, he spends 3 points on a Leader, 4 points on a Bruiser, 4 points on two Hordes, and 1 point on a Support. The Leader also has an action that can bring in Minions as needed.*

BRUISER

A towering giant, a muscle-bound bodyguard for a devious merchant, a hulking construct with fists of iron—this is the Bruiser. These heavyweights can take significant punishment and deal powerful blows.

■ Mechanics

Bruisers are close-quarter combatants. They usually engage the party's melee characters while other adversaries attack from range. They deal high damage and often use area attacks. Sometimes they have the "Slow" feature to play up their lumbering nature, or features that move the PCs around to display their power. If you're using minis in your encounters, consider ones with larger bases to convey their size—bigger minis usually imply a larger threat!

■ Archetypal Example

The Minotaur Wrecker is a paramount example of the Bruiser: big, lumbering, and extremely dangerous. At Tier 2, these juggernauts typically deal Major damage and can land Severe blows on more lightly armored PCs. Their "Ramp Up" passive means they're more costly to spotlight, but they can attack all targets within range with their standard attack. With their "Gore" action, they charge into combat and make big dents in armored units.

MINOTAUR WRECKER

Tier 2 Bruiser
A massive bull-headed firbolg with a quick temper.
Motives & Tactics: Consume, gore, navigate, overpower, pursue

Difficulty: 16 | **Thresholds:** 14/27 | **HP:** 7 | **Stress:** 5
ATK: +2 | **Battleaxe:** Very Close | 2d8+5 phy

Experience: Navigation +2

FEATURES

Ramp Up - Passive: You must **spend a Fear** to spotlight the Minotaur. While spotlighted, they can make their standard attack against all targets within range.

Charging Bull - Action: **Mark a Stress** to charge through a group within Close range and make an attack against all targets in the Minotaur's path. Targets the Minotaur succeeds against take **2d6+8** physical damage and are knocked back to Very Far range. If a target is knocked into a solid object or another creature, they take an extra **1d6** damage (combine the damage).

Gore - Action: Make an attack against a target within Very Close range, moving the Minotaur into Melee range of them. On a success, deal **2d8** direct physical damage.

■ Custom Bruisers

When creating a Bruiser, keep in mind the following guidelines. Offensively, a Bruiser's attack modifiers are usually average or lower, and most of their attacks deal Major or Severe damage (as appropriate for their tier). Defensively, they have average or lower Difficulty, higher than average Hit Points, and slightly higher than average damage thresholds.

■ Making Your Own

Imagine an ogre rising from the grave—let's call them a Dire Wight! This hulking creature might be found feasting on their latest kill or patrolling the outskirts of an ancient castle. This powerful guardian carries a terrifying two-handed mace enchanted with the last cries of their victims. We'll make them at Tier 3.

- Since the wight is a larger, lumbering creature and thus easy to target, a Difficulty of 15 works well.
- We want to make the wight easier to hit, but harder to damage, so let's give them a Major threshold of 26, and a Severe threshold of 42. We can also give them 8 HP and 4 Stress.
- Because they are so big, the wight doesn't attack as accurately, giving them a slightly below-average attack modifier of +2.
- The damage from these attacks should always have an impact when they connect, so we'll use the impressive damage pool of 3d12+5.
- Because we want them to feel reckless and powerful, let's make their Experience a +3 in Throw.
- The wight wields a massive weapon, so taking a swing at multiple targets is a fitting action. The weapon's frightening nature might have an effect as well, so let's have it cause PCs to mark a Stress when it hits. We can also play up the wight's undead nature by saying that heavy-hitting attacks against this foe have an unnerving effect on the PCs, as they watch the creature's rotting skin split open. To make it less overpowered, let's make the feature cost the wight a Stress.

A Bruiser adversary with these features might look like this:

DIRE WIGHT

Tier 3 Bruiser
An undead ogre protective of their territory.
Motives & Tactics: Kill, obey, protect, terrify

Difficulty: 15 | **Thresholds:** 26/42 | **HP:** 8 | **Stress:** 4
ATK: +2 | **Claws and Teeth:** Very Close | 3d12+5 phy

Experience: Throw +3

FEATURES

Terrifying Swing - Action: **Spend a Fear** to force all targets within Very Close range to mark a Stress, then make an attack against them. Targets the Wight succeeds against take **3d10+1** physical damage.

Splitting Skin - Reaction: When the Wight takes Major or greater damage, you can **mark a Stress** to force all targets within Very Close range to make a Presence Reaction Roll. Targets who fail lose a Hope and are knocked back to Close range.

HORDE

Whether a swarm of rats beneath a tavern or a pack of wolves prowling the forest, a Horde represents a massive group of enemies in an easy-to-run way.

■ Mechanics

Hordes are groups of weaker enemies. They deal high damage initially, but less once they've marked at least half of their Hit Points (rounded up). Many of them have interesting passives or reactions that capture their role in the fiction. Every Horde has the "Horde" passive, which is unique to this adversary type:

> *Horde (X) - Passive:* When the Horde has marked half or more of their HP, their standard attack deals X damage instead.

Hordes also have a unique notation of (Y/HP) next to their type in their stat block. The Y represents the number of creatures represented by each Hit Point the Horde has. For example, 2/HP means that every Hit Point represents two members of the Horde. This narrative detail allows you to quickly describe the number of foes brought down with each attack. For example, if a PC deals 2 Hit Points to the Horde, they take down four enemies with their attack. Hordes work well in theater-of-the-mind play because you only need to use a single unit in combat to represent many foes.

■ Archetypal Example

While every Horde has the same basic mechanics, the Zombie Pack is a good example of how to capture the fiction with those features. Their damage is near the top of the tier, but they're less likely to hit with their −1 attack modifier. Since the Horde's purpose in the narrative is to overwhelm the characters, it's fitting that the Zombie Pack has a reaction called "Overwhelm" that allows them to mark a Stress and attack a creature who struck them.

ZOMBIE PACK
Tier 1 Horde (2/HP)
A group of shambling corpses instinctively moving together.
Motives & Tactics: Consume flesh, hunger, maul

| **Difficulty:** 8 | **Thresholds:** 6/12 | **HP:** 6 | **Stress:** 3 |
| **ATK:** −1 | **Bite:** Melee | 1d10+2 phy |

FEATURES
Horde (1d4+2) - Passive: When the Zombies have marked half or more of their HP, their standard attack deals **1d4+2** physical damage instead.

Overwhelm - Reaction: When the Zombies mark HP from an attack within Melee range, you can **mark a Stress** to make a standard attack against the attacker.

■ Custom Hordes

Hordes have low Difficulty and attack modifiers, as well as average damage thresholds. Their damage is initially high, then drops by about half once they've taken substantial damage.

■ Making Your Own

Delving deep into magical mines sometimes exacts a price more permanent than exhaustion. The spirits of miners that perished as a result of their own greed still linger, ever covetous. We'll make them at Tier 3.

- Because of their large numbers, the miners are much easier to hit. However, they're also ghostly, so their Difficulty might be only slightly lower than average at a 16.
- We'll put their thresholds on the low end at Major 15/ Severe 25, as their ties to the Mortal Realm are tenuous. Additionally, we'll give them 6 Hit Points and 3 Stress.
- These miners might have some skill with their tools, but they aren't trained for combat. At best, they might have a +1 attack modifier.
- As these ghosts once did in life, they exploit any weakness. Their attacks are devastating because of their numbers. Putting their standard attack at 3d12+10 means they deal high damage, which drops to 3d6+5 when they're at half HP or fewer.
- Trapped by their greed, the miners are obsessed with gaining wealth. Giving them a feature that demonstrates their ravenous hunger against targets with gold plays into the fiction we've established.

A Horde adversary with these traits might look like this:

COVETOUS MINERS
Tier 3 Horde (5/HP)
A ghostly group of miners trapped by their insatiable greed.
Motives & Tactics: Be free, gain wealth, pay debts

| **Difficulty:** 16 | **Thresholds:** 15/25 | **HP:** 6 | **Stress:** 3 |
| **ATK:** +1 | **Soul Mattock:** Melee | 3d12+10 mag |

FEATURES
Horde (3d6+5) - Passive: When the Miners have marked half or more of their HP, their standard attack deals **3d6+5** magic damage instead.

Hunger for Gold - Action: **Mark a Stress** to make a standard attack with advantage against all targets carrying gold within Very Close range.

LEADER

A Leader can be the antagonist of the whole campaign or just the current encounter—either way, they're only as good as the allies who follow them. This adversary could be the boss of a local thieves' guild or an evil knight whose army lays waste to the countryside. They bring the strength of their forces to bear against those who oppose them.

■ Mechanics

A Leader can spotlight multiple allies in one move, buff them, or summon new combatants to the field, and they create dynamic combat by rallying and maneuvering their forces. But a Leader is also dangerous in their own right—they usually have some of the highest attributes for their tier of play, making them difficult to hit, harder to take down, and deadly when they land a blow. When you build an encounter with a Leader, the most important thing you can do to sell the fiction is to see what types of features they use and pair them with other adversaries who take advantage of those features.

■ Archetypal Example

The Head Guard is an iconic Leader. Their "On My Signal" reaction starts a countdown that commands Archer Guards to attack with advantage against targets near them. However, this feature doesn't function when there are no Archer Guards present in the scene. When attacking on their own, a Head Guard generally deals Major damage to Tier 1 PCs, but you can spend 2 Fear to use their "Rally Guards" action, spotlighting them and some of their allies to deal more damage. Because the cost for "Rally Guards" is so high, having enough allies for the Head Guard to take advantage of it is paramount. This is true for most Leaders—they need sufficient forces to be the greatest threat.

HEAD GUARD

Tier 1 Leader
A seasoned guard with a mace, a whistle, and a bellowing voice.
Motives & Tactics: Arrest, close gates, pin down, seek glory

Difficulty: 15 | **Thresholds:** 7/13 | **HP:** 7 | **Stress:** 3
ATK: +4 | **Mace:** Melee | 1d10+4 phy

Experience: Commander +2, Local Knowledge +2

FEATURES

Rally Guards - Action: **Spend 2 Fear** to spotlight the Head Guard and up to **2d4** allies within Far range.

On My Signal - Reaction: *Countdown (5).* When the Head Guard is in the spotlight for the first time, activate the countdown. It ticks down when a PC makes an attack roll. When it triggers, all Archer Guards within Far range make a standard attack with advantage against the nearest target within their range. If any attacks succeed on the same target, combine their damage.

Momentum - Reaction: When the Head Guard makes a successful attack against a PC, you gain a Fear.

■ Custom Leaders

A Leader should have stats that surpass those of other adversaries in the same tier. These adversaries are difficult to defeat because they deal more damage, have higher damage thresholds, and have a higher Difficulty. Their main weakness is that much of their strength comes from their allies. Take those away and a Leader will struggle.

■ Making Your Own

Wildborne bandit gangs are sometimes led by thieves known as Briarwhips. These experienced rangers know the verdant woods and its bounty. When word of well-guarded treasure reaches a gang, a Briarwhip is chosen to lead the heist. We'll make them at Tier 1.

- They are fierce and nimble rangers, so a Difficulty of 14 suits them. You could let them increase their Difficulty, similar to the Bone domain's "Ferocity" feature.
- They wear scale-like stone armor that would give them higher damage thresholds. Let's do Major 9/Severe 14. Additionally, we'll give them 6 HP and 4 Stress.
- They have deadly accuracy with their whip, giving them an attack modifier of +3.
- They attach poisoned thorns to their whip, so their weapon deals more damage, but the application might be less consistent. To represent this, we choose to use 1d10+2 for their damage.
- We'll give them a few Experiences that reflect both their Leader type and their background as a ranger.
- They command their subordinates through the use of hand signals or whistles. Giving them the ability to command their allies to slink back into the underbrush could be a great Fear Feature, but consider how that would change the scene. If all their allies are *Hidden*, the Briarwhip would become the characters' only target, so we want to give them the ability to take the hits headed their way. Borrowing from the Bone domain's "Brace" feature, we can have them mark a Stress to lessen the blow.

A Leader adversary with these traits might look like this:

BRIARWHIP

Tier 1 Leader
A cunning and capable ranger who takes on the most dangerous missions.
Motives & Tactics: Explore, plan, protect, steal

Difficulty: 14 | **Thresholds:** 9/14 | **HP:** 6 | **Stress:** 4
ATK: +3 | **Poisoned Briarwhip:** Close | 1d10+2 phy

Experience: Hide +2, Intimidation +2, Track +3

FEATURES

Ferocious Defense - Passive: When an attack from the Briarwhip causes a target to mark HP, the Briarwhip gains a +1 bonus to their Difficulty until they mark 1 or more HP.

Into the Bramble - Action: **Spend a Fear** to spotlight up to **1d4** allies within Far range. They move to cover within Close range and become *Hidden* until after their next attack or a PC succeeds on an Instinct Roll to find them.

Brace - Reaction: When the Briarwhip marks 1 or more HP, you can **mark a Stress** to mark 1 fewer HP.

MINIONS

A half-dozen imps tossed away in a single swipe, a room full of reanimated skeletons—no matter their form, Minions increase the scale of a battle without bogging down play.

■ Mechanics

Each Minion has 1 Hit Point and the following features:

> **Minion (X) - Passive:** This adversary is defeated when they take any damage. For every X damage a PC deals to this adversary, defeat an additional Minion within range the attack would succeed against.
>
> **Group Attack - Action:** **Spend a Fear** to choose a target and spotlight all adversaries with this name within a certain range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal X damage each. Combine this damage.

The "Minion" passive creates cinematic experiences at the table while ensuring these adversaries are easily defeated. Each Minion has a different amount of damage that triggers their "Minion" passive, as defined by the number in the feature's heading. For example, the Giant Rat's feature says "Minion (3)," which means that if an attack deals 3 damage to them, the initial target is destroyed, and another Minion within range who the attack roll would succeed against is also defeated. At 6 damage, two additional Minions within range are defeated, and so on. Tell the attacking PC which other Minions within range the attack would succeed against and let them choose which Minions they defeat. For example, if a PC deals 3 damage to a Giant Rat (Difficulty 10) and there's a Rotted Zombie (Difficulty 8) nearby, the PC can choose to defeat the Rotted Zombie in addition to the initial Giant Rat. It's important to note that some weapons have greater range than others, making ranged attackers very effective against Minions.

The "Group Attack" action allows the Minions to attack using only one roll. This speeds up play significantly, as you simply add up the damage of many attacks rather than rolling for each individual attack.

GIANT RAT

Tier 1 Minion
A cat-sized rodent skilled at scavenging and survival.
Motives & Tactics: Burrow, hunger, scavenge, wear down

Difficulty: 10 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: −4 | **Claws:** Melee | 1 phy

Experience: Keen Senses +3

FEATURES

Minion (3) - Passive: The Rat is defeated when they take any damage. For every 3 damage a PC deals to the Rat, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Giant Rats within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 1 physical damage each. Combine this damage.

Because Minions are so easily defeated, keep the tier of play in mind when selecting which adversaries to make Minions—it might be immersion-breaking for a level 1 character to bring down a flight of dragons with one attack.

■ Archetypal Example

The Giant Rat is an example of a typical Minion. Other than the numbers in their stat blocks, Minions vary little from adversary to adversary, as they don't tend to have other distinguishing features. When Minions do have unique features, they should be reserved for cinematic moves that make sense in the fiction (such as the Tangle Bramble Minion's "Drain and Multiply" reaction) or stronger Minions (such as the Hallowed Soldier's "Divine Flight" passive or the Fallen Shock Troop's "Aura of Doom" passive).

■ Custom Minions

In addition to the previous information, Minions have lower Difficulty and do fixed damage.

■ Making Your Own

The Demon of Hubris is a Leader who demands perfection from those beneath them. Who might this sneering king of the Circles Below have as servants to lord over? Idolizing Imps that snivel and bow in deference make perfect sense. We'll make them at Tier 3.

- Minions tend to have a low Difficulty for their tier, but these are nimble adversaries, so we'll give them a Difficulty of 17.
- Because they are Minions, they have 1 HP and 1 Stress.
- The imps spend their hours idolizing their leader and doing little else. An attack modifier of +0 feels appropriate.
- You want Minions to do significant damage at the beginning of a combat, but much less as their numbers thin. Let's do 7 physical damage per Minion.
- In that case, they're likely more fragile—we can incorporate that into their "Minion" passive so the PCs fell many of them in a single blow. "Minion (8)" feels appropriate.

A Minion adversary with these traits might look like this:

IDOLIZING IMP

Tier 3 Minion
A demon who bows in deference to their lord.
Motives & Tactics: Defend, trick, worship

Difficulty: 17 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: +0 | **Claws:** Melee | 7 phy

FEATURES

Minion (8) - Passive: The Imp is defeated when they take any damage. For every 8 damage a PC deals to the Imp, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Idolizing Imps within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 7 physical damage each. Combine this damage.

RANGED

A Ranged adversary could be a spellcaster firing necrotic bolts of energy or an archer on the battlement raining down arrows on an advancing army. These enemies hit hard while staying away from direct conflict.

■ Mechanics

Because of their superior attack range, a Ranged adversary's presence on the battlefield divides the characters' attention. When positioning them, spread them out and put other threats between them and the party. Have them use the terrain to their advantage when they attack, keeping them on the edge of their effective range wherever possible. When you build encounters, consider the party's abilities: Ranged adversaries work well against flying characters and can be difficult for melee-focused PCs to deal with.

■ Archetypal Example

A great example of a Ranged adversary is the War Wizard. This enemy doesn't evoke the traditional idea of a Ranged enemy, but they have all the hallmarks of one: They can move within Far range, they deal lethal damage, and it would take two hits from most PCs to bring them down. It's just a matter of getting to them.

WAR WIZARD

Tier 2 Ranged
A battle-hardened mage trained in destructive magic.
Motives & Tactics: Develop new spells, seek power, shatter formations

Difficulty: 16 | **Thresholds:** 11/23 | **HP:** 5 | **Stress:** 6
ATK: +4 | **Staff:** Far | 2d10+4 mag

Experience: Magical Knowledge +2, Strategize +2

FEATURES

Battle Teleport - Passive: Before or after making a standard attack, you can **mark a Stress** to teleport to a location within Far range.

Refresh Warding Sphere - Action: **Mark a Stress** to refresh the Wizard's "Warding Sphere" reaction.

Eruption - Action: **Spend a Fear** and choose a point within Far range. A Very Close area around that point erupts into impassable terrain. All targets within that area must make an Agility Reaction Roll (14). Targets who fail take **2d10** physical damage and are thrown out of the area. Targets who succeed take half damage and aren't moved.

Arcane Artillery - Action: **Spend a Fear** to unleash a precise hail of magical blasts. All targets in the scene must make an Agility Reaction Roll. Targets who fail take **2d12** magic damage. Targets who succeed take half damage.

Warding Sphere - Reaction: When the Wizard takes damage from an attack within Close range, deal **2d6** magic damage to the attacker. This reaction can't be used again until the Wizard refreshes it with their "Refresh Warding Sphere" action.

■ Custom Ranged

These adversaries have higher than average attack modifiers, lower damage thresholds, and fewer Hit Points. They hit hard but go down quickly once engaged.

■ Make Your Own

In the frozen lands at the top of the world, survival is all that matters. To survive in the most dangerous places, a hunter must have ice in their veins and an unshakable nerve. The settlements in this bitter wasteland depend on these explorers to survive—the Icewaste Hunter is a hero to their people. We'll make them at Tier 2.

- A longbow would give a PC a –1 to their Evasion. Let's incorporate that into our hunter by giving them an average Difficulty of 13.
- These hardy survivors are keenly attuned to the frozen wastes. We can reflect that in their thresholds, Hit Points, and Stress by giving them the following stats: thresholds of Major 7/Severe 14, 5 Hit Points, and 4 Stress.
- Hunters bring down dangerous foes from a distance, so our Ranged adversary needs a weapon that can hit hard from far away. We'll give them a +3 to their attack.
- They should deal high damage, often Major and sometimes Severe. A longbow that deals 2d12+6 damage fulfills these requirements.
- Through years of training, hunters acquire skills that help them survive and use their surroundings to their advantage. We'll reflect that in their Experiences.
- Lastly, we'll give them a few features that build on these Experiences, like taking cover and using traps.

A Ranged adversary with these traits might look like this:

ICEWASTE HUNTER

Tier 2 Ranged
A survivalist who travels the icy wastes in search of dangerous game.
Motives & Tactics: Hunt, persevere, rescue, track

Difficulty: 13 | **Thresholds:** 7/14 | **HP:** 5 | **Stress:** 4
ATK: +3 | **Longbow:** Far | 2d12+6 phy

Experience: Navigate +2, Survivalist +3

FEATURES

Steady Aim - Passive: **Mark a Stress** to give the Hunter advantage on their next attack.

Snowblind Trap - Action: **Spend a Fear** to target a group within Close range. All targets must succeed on an Agility Reaction Roll or be caught in the trap, becoming *Vulnerable* until they escape with a successful Strength or Finesse (14) roll. You gain a Fear when a target who is caught in this trap makes an action roll.

Take Cover! - Reaction: **Mark a Stress** to give an attack against the Hunter disadvantage. If the attack still succeeds, reduce the severity of the damage they take by one threshold.

SKULKS

Skulks come in different types and have different abilities based on their lore. They can be ambushers who lurk in the shadows, skirmishers specializing in hit-and-run tactics, or elusive adversaries who confuse the party through mundane or magical means.

■ Mechanics

A wide breadth of adversaries can fit into the Skulk category, typically those who use misdirection and movement during combat. They might not do damage on every activation, instead opting to hinder the party's ability to move freely through the battlefield or debilitate them with a temporary condition. There are several ways to take advantage of these adversaries in combat: you might open with an ambush from a group of Skulks, or a Leader might summon one midway through the battle, placing them close to PCs who try to stay away from the fight. Like Ranged adversaries, most Skulks don't want to stay within Melee range; they strike and move away whenever possible. If you want your Skulks to be particularly cunning, they should ignore warriors, seraphs, and guardians, instead pursuing softer targets such as wizards and bards.

■ Archetypal Example

The Jagged Knife Shadow is a good example of a Skulk that uses hit-and-run tactics. They can divert attention by using their "Cloaked" action to become *Hidden*, then take advantage of their "Backstab" passive to increase their damage. However, they can only use this combo every other turn.

JAGGED KNIFE SHADOW

Tier 1 Skulk
A nimble scoundrel bearing a wicked knife and utilizing shadow magic to isolate targets.
Motives & Tactics: Ambush, conceal, divide, profit

Difficulty: 12 | **Thresholds:** 4/8 | **HP:** 3 | **Stress:** 3
ATK: +1 | **Daggers:** Melee | 1d4+4 phy

Experience: Intrusion +3

FEATURES

Backstab - Passive: When the Shadow succeeds on a standard attack that has advantage, they deal **1d6+6** physical damage instead of their standard damage.

Cloaked - Action: Become *Hidden* until after the Shadow's next attack. Attacks made while *Hidden* from this feature have advantage.

■ Custom Skulk

Skulks have average or higher attack modifiers and Difficulties. They usually deal moderate damage, but they can deal high damage when they attack an isolated or compromised target. Their own damage thresholds are typically in the fragile range.

■ Make Your Own

The Frostcage Peaks are treacherous at the best of times, when the sun is high and the ice pack has broken up. The warmth of the day brings out dangerous predators searching for an easy meal. Because of their command of the mountain caves and the chilling skies, Glitterwyrms have become the apex predators of this space. We'll make them at Tier 2.

- They are agile fliers, able to deftly maneuver through the frozen skies despite punishing winds. It makes sense to put their Difficulty at 14.
- As ambush hunters, Glitterwyrms have evolved to secrete an oil from their scales that freezes to a mirror-like finish. While this trait helps them to surprise their prey, they are quite fragile. Damage thresholds of Major 9/Severe 18 with 5 Hit Points and 4 Stress are appropriate here.
- These wyrms have keen vision, so a +2 attack modifier is appropriate.
- They approach quietly and dive-bomb into their prey, hoping to push them into the icy depths and fish out the remains later. Because of this, their bite isn't as strong as other wyrms' might be—it only deals 2d8+3 damage.
- Because they're flying predators with sharp vision, we'll give them a few Experiences that reflect those traits.
- The secretion from their tails turns into barbs as they hibernate up on the high basalt cliffs that surround the passage. We can make an "Icicle Barb" action that allows them to use these as weapons to pin down their prey.

A Skulk adversary with these traits might look like this:

GLITTERWYRM

Tier 2 Skulk
A wyvern covered in mirror-like scales of ice.
Motives & Tactics: Ambush, feed, hibernate, hit-and-run

Difficulty: 14 | **Thresholds:** 9/18 | **HP:** 5 | **Stress:** 4
ATK: +2 | **Bite:** Very Close | 2d8+3 phy

Experience: Aerial Predator +2, Keen Vision +3

FEATURES

Arctic Avian - Passive: While flying, the Glitterwyrm can move up to Far range.

Reflective Scales - Passive: Creatures who aren't within Very Close range of the Glitterwyrm have disadvantage on attacks against them.

Swift Claws - Action: **Mark a Stress** to choose a point within Far range. The Glitterwyrm moves to that point and makes an attack against a target within Very Close range. On a success, deal **2d10+5** physical damage and the target must succeed on a Strength Reaction Roll or be knocked back to Close range.

Icicle Barb - Action: **Spend a Fear** to make an attack against a group within Close range. Targets the Glitterwyrm succeeds against take **2d4** physical damage and become *Restrained* by the barbs until they break free with a successful Finesse Roll.

SOCIAL

Whether it's a meeting with a reticent spy or an interrogation of a corrupt leader, not all encounters are solved with the edge of a blade. When the party is faced with a Social adversary, they enter a battle of wits.

◼ Mechanics

When planning a social encounter, you should pay particular attention to the motives and tactics of these adversaries. What are the characters trying to get from this encounter? Why would the adversary want to keep this information from them? What would tip the balance and force an adversary's hand? If you have time to establish this NPC prior to their introduction into the story, let their goals and tactics guide the interaction, and give them a memorable quirk to distinguish them in the PCs' minds.

◼ Archetypal Example

A social encounter that many players have experienced is haggling with a merchant. These traders are shrewd, squeezing every coin they can out of a deal. The Merchant Social adversary uses their features to fluctuate prices and cause characters haggling poorly with them to mark Stress.

MERCHANT

Tier 1 Social
A finely dressed trader with a keen eye for financial gain.
Motives & Tactics: Buy low and sell high, create demand, inflate prices, seek profit

Difficulty: 12 | **Thresholds:** 4/8 | **HP:** 3 | **Stress:** 3
ATK: −4 | **Club:** Melee | 1d4+1 phy

Experience: Shrewd Negotiator +3

FEATURES

Preferential Treatment - Passive: A PC who succeeds on a Presence Roll against the Merchant gains a discount on purchases. A PC who fails on a Presence Roll against the Merchant must pay more and has disadvantage on future Presence Rolls against the Merchant.

The Runaround - Passive: When a PC rolls a 14 or lower on a Presence Roll made against the Merchant, they must mark a Stress.

◼ Custom Socials

While their physical stats might be low, Social adversaries might have other means of putting up defenses against the party. These defenses typically come in the form of passive features. The adversaries in this book are a good starting point for creating social encounters, but many times you'll want to create your own.

◼ Make Your Own

A nearby forest settlement is led by elders who have forged a great connection with nature. In gaining this power, the village leaders become an enigma to their people, hidden behind veils of shadow. We'll make them at Tier 1.

- Their hearts and wills are strong, and they wish only for the good of their people. Let's give them a Difficulty of 14.
- Because they aren't combat-focused, we'll give them 2 Hit Points. That means they only need a Major threshold, so let's set that at 6. To reflect their wisdom and patience, we'll do 4 Stress.
- Many of these elders hold peace above all else and are not trained in the ways of violence. This would make their attack modifier a −2.
- They might carry an old stick or a farm implement covered in vines from the bramble, but everyone knows they're just for show. A weapon like this would deal 1d4+2 physical damage.
- These elders have lived full lives, expressed by having several Experiences with larger bonuses. Their experience can show up in their passive, too—they're world-wise and insightful, so they have advantage in these social situations.
- The people of these settlements have learned to trust the will of their elders, cryptic as it can sometimes be. We'll create an action for social encounters that mechanizes this dynamic called "No Hospitality." They can also invoke the peace of the meadow in dire situations. This feature seems combat-oriented, but it serves a social purpose—to showcase the elders' power, whether used against PCs or the elders' foes. Either way, the "There Will Be Peace" reaction is a one-time-use, evocative feature that conveys their role in their village.

A Social adversary with these traits might look like this:

VILLAGE ELDER

Tier 1 Social
An elder of a forest village who can call upon nature magic to provide for their people.
Motives & Tactics: Care for the community, judge, speak softly, uphold tradition

Difficulty: 14 | **Thresholds:** 6/None | **HP:** 2 | **Stress:** 4
ATK: −2 | **Dagger:** Melee | 1d4+2 phy

Experience: History +2, Nature's Friend +3, Pillar of the Community +3

FEATURES

Age Taught Me Well - Passive: All action rolls to deceive the Elder have disadvantage.

No Hospitality - Action: **Mark a Stress** to forbid any of the Elder's allies from selling or providing comfort to a target or their allies for the next **2d6** days.

There Will Be Peace - Reaction: When a creature attacks someone within the village who the Elder can see, you can **spend 2 Fear**. That creature must lose all Hope, mark **2d4** Stress, and succeed on a Presence Reaction Roll (15) or fall *Unconscious* until **1d4** hours have passed. While *Unconscious*, the target can't make action rolls, can't speak, and automatically fails all reaction rolls. Once the Elder uses this reaction, they can never do so again.

SOLO

From a terrifying dragon capable of destroying cities to the evil that lurks beyond the threshold of the Mortal Realm, these powerful adversaries share little in common with each other, save for their purpose: to create an exciting encounter!

Mechanics

Some Solos have the "Relentless" feature, which allows the GM to spotlight them multiple times during a GM turn. Others have multiple reactions that work in place of the "Relentless" feature. Solo adversaries without these features should have other units with them or an environment that supports them. Because of the number of features a Solo has, they are more complex to run.

Archetypal Example

When looking at the range of Solo adversaries, you might happen across the Juvenile Flickerfly. Their features build on each other in a very interesting way. If the flickerfly uses their "Mind Dance" action, their "Hallucinatory Breath" reaction is even more effective. At Tier 2, their attacks deal moderate damage, but with their "Peerless Accuracy" passive, the flickerfly can hit higher-Evasion targets more often. Most importantly, they can take the spotlight up to three times during a GM turn.

JUVENILE FLICKERFLY

Tier 2 Solo
A horse-sized insect with iridescent scales and crystalline wings moving faster than the eye can see.
Motives & Tactics: Collect shiny things, hunt, swoop

Difficulty: 14 | **Thresholds:** 13/26 | **HP:** 10 | **Stress:** 5
ATK: +3 | **Wing Slash:** Very Close | 2d10+4 phy

FEATURES

Relentless (3) - Passive: The Flickerfly can be spotlighted up to three times per GM turn. Spend Fear as usual to spotlight them.

Peerless Accuracy - Passive: Before the Flickerfly makes an attack, roll a **d6**. On a result of 4 or higher, the target's Evasion is halved against this attack.

Mind Dance - Action: **Mark a Stress** to create a magically dazzling display that grapples the minds of nearby foes. All targets within Close range must make an Instinct Reaction Roll. For each target who failed, you gain a Fear and the Flickerfly learns one of the target's fears.

Hallucinatory Breath - Reaction: *Countdown (Loop 1d6).* When the Flickerfly takes damage for the first time, activate the countdown. When it triggers, the Flickerfly breathes hallucinatory gas on all targets in front of them up to Far range. Targets must succeed on an Instinct Reaction Roll or be tormented by fearful hallucinations. Targets whose fears are known to the Flickerfly have disadvantage on this roll. Targets who fail must mark a Stress and lose a Hope.

Custom Solos

These adversaries might be bosses with loyal lieutenants or puzzling encounters the party must work around. They usually deal high damage, have tough defenses, and a large number of Hit Points. When an adversary is given the "Relentless" feature, consider how much damage they do with each attack—a creature with "Relentless (3)" should usually do less damage on a hit than a creature with "Relentless (2)."

Make Your Own

Deep in the ruins of the Earliest Age lies a structure buried under rubble and scorched sand. Within it is a massive forge covered in eldritch invocations. Its crucible brims with energy stolen from distant stars. Guarding this forge is an inscrutable being of twisted metal and flesh. An amalgam of writhing limbs and clicking gears, this Malefacted Giant waits for those who would claim the Starforge. We'll make them at Tier 2.

- Given their strange and unpredictable nature, 15 seems like an appropriate Difficulty.
- This adversary is somewhere between humanoid and machine, giving them solid defenses. Damage thresholds of Major 16/Severe 26 with 10 HP and 5 Stress will work well for that purpose.
- Because of their sheer size and strength, the giant should have a decent attack modifier at +3.
- Their writhing limbs make for an interesting, evocative weapon. Let's make it deal 2d12+4 physical damage.
- Instead of having the "Relentless" feature, this adversary has the "Sweeping Dread" reaction, which allows them to make multiple attacks on a countdown that ticks down as the characters roll with Fear. As this is an aberrant, eldritch horror, we can lean into the weirdness of their being with features like "Mindbreaker" and "Behold the End." These ramp up the oddity and let you express it in the game, bringing this adversary to life at the table.
- As the giant fights, they batter the minds of their opponents. Giving them a Fear Feature that pierces through their defenses creates additional tension at the table.

A Solo adversary with these traits might look like this:

MALEFACTED GIANT

Tier 2 Solo
A giant humanoid made of twisted metal and melted flesh merged together in unnatural ways.
Motives & Tactics: Collect secrets, rend reality, undo fate

Difficulty: 15 | **Thresholds:** 16/26 | **HP:** 10 | **Stress:** 5
ATK: +3 | **Writhing Limbs:** Close | 2d12+4 phy

FEATURES

Behold the End - Passive: Before a PC would make an action roll that would affect the Giant, they must make a Knowledge Reaction Roll. On a failure, the PC loses a Hope. On a success, the PC is permanently unaffected by this feature.

Scream into the Void - Action: **Spend a Fear** to unleash a psychic scream. All targets within Close range must succeed on a Presence Reaction Roll or take **3d10** direct magic damage and mark a Stress.

Mindbreaker - Action: Make a standard attack. On a success, **mark a Stress** to add a **d8** to the damage roll. If the target marks HP from this attack, they have disadvantage on their next action roll.

Sweeping Dread - Reaction: *Countdown (Loop 1d4).* When the Giant sees a hostile target for the first time, activate the countdown. It ticks down when a PC rolls with Fear. When it triggers, the Giant makes a standard attack against up to three targets within Close range. Targets the Giant succeeds against lose a Hope.

Reject Reality - Reaction: When a creature within Far range of the Giant critically succeeds on an action roll, the Giant clears all Stress.

STANDARD

The town guard, the zombie, the faction agent—Standard adversaries represent the average of their peers and are the backbone of any encounter.

◼ Mechanics

Standard adversaries don't offer heavy damage or amazing defenses. Instead, they fill out the ranks of a combat. They're best utilized as a bulwark that prevents the PCs from reaching their Ranged and Support allies. They might also be a good choice for a Leader to bring into combat to replenish their forces. When creating your own adversaries, you might make Standard enemies for a faction first, then build the rest of the enemies to synergize with their abilities. Standard adversaries might be average, but they don't need to be boring.

◼ Archetypal Example

The Bladed Guard could be one of the first adversaries your party meets in a campaign. They stand at the gates, protect the townsfolk, and patrol the city's streets. Their "Shield Wall" passive immediately tells you that more of them is always better, while their "Detain" action conveys their purpose, lining up well with their motives and tactics.

BLADED GUARD

Tier 1 Standard
An armored guard bearing a sword and shield painted in the settlement's colors.
Motives & Tactics: Arrest, close gates, make it through the day, pin down

Difficulty: 12 | **Thresholds:** 5/9 | **HP:** 5 | **Stress:** 2
ATK: +1 | **Longsword:** Melee | 1d6+1 phy

Experience: Local Knowledge +3

FEATURES

Shield Wall - Passive: A creature who tries to move within Very Close range of the Guard must succeed on an Agility Roll. If additional Bladed Guards are standing in a line alongside the first, and each is within Melee range of another guard in the line, the Difficulty increases by the total number of guards in that line.

Detain - Action: Make an attack against a target within Very Close range. On a success, **mark a Stress** to *Restrain* the target until they break free with a successful attack, Finesse Roll, or Strength Roll.

◼ Custom Standards

Most everything about a Standard adversary is going to be in the average range for the tier. You can use the tables in the upcoming "Improvising Adversaries" section to choose the average for their attack modifier and the moderate damage dice for their tier. This makes them simple to create. Where Standards shine is in the features that define their role in the fiction, such as the Bladed Guard's "Shield Wall," the Spectral Guardian's "Ghost," or the Vampire's "Draining Bite."

◼ Make Your Own

Wanderborne communities speak of a legendary troupe that pops up at a crossroad, luring travelers into a show unlike anything they've ever seen. Only a rare few return to tell the tale of the Empty Sky Circus. The troupe is filled with Bladedance Jesters, who constantly move to a song only they can hear. We'll make them at Tier 4.

- The jesters are quick and nimble, so to represent this, we'll give them a Difficulty of 19.
- They likely wear little armor, so we can do a low Major threshold, and a higher Severe threshold. Major 22/Severe 50 should work well. The rest of their numbers will be average; we'll use 5 Hit Points and 3 Stress.
- Bladedance Jesters are the Empty Sky Circus's first line of defense, more focused on protection than destruction. We'll give them a +3 attack modifier.
- We'll want a weapon that represents them—something that always needs to be in motion or move fluidly to attack. Their Chained Chakrams convey that sense of motion and grace and, as a bonus, double as a performing prop. We'll put their attack damage at 4d8+5.
- To fulfill their role as Standard adversaries, they need to be a plausible threat, which could include interfering with the characters' movement. To do this, we can have their chakrams pull a target closer. We'll also give the jester a reaction to dodge the brunt of some attacks as they move to an unheard dance from realms beyond.

A Standard adversary with these traits might look like this:

BLADEDANCE JESTER

Tier 4 Standard
A lithe circus performer attuned to a dance from realms beyond.
Motives & Tactics: Channel the dance, entertain, lure away

Difficulty: 19 | **Thresholds:** 22/50 | **HP:** 5 | **Stress:** 3
ATK: +3 | **Chained Chakrams:** Very Close | 4d8+5 phy

Experience: Comedy +2, Dance +3

FEATURES

Dance With Me - Action: Make an attack against a target within Very Close range. On a success, the target must succeed on an Agility Reaction Roll or be pulled into Melee range of the Jester, and when they next move, you gain a Fear.

Silent Staccato - Reaction: When the Jester takes damage, you can **mark a Stress** to reduce the damage by **3d6**. The Jester can then move to a point within Close range.

SUPPORT

A Support adversary might be a druid who creates brambles and thorns that slow down pursuers, a bard that inspires their allies to greatness, or any other unit that buffs allies, inflicts conditions, or imposes unique status effects.

◼ Mechanics

Supports are as varied in their abilities as Leaders or Solos. They might bolster an ally or stop foes in their tracks. When selecting adversaries for an encounter, limit the use of Support adversaries—their defeat should be an important part of the tactical calculation. Protect them with Standard adversaries and distract PCs with higher-damage targets, such as a Bruiser or Ranged adversary.

◼ Archetypal Example

The Cult Adept is a great example of what a Support can do. They force targets to mark Stress with their attacks, buff allies with resistance to damage, and restrain their foes. They also clear a Stress when a PC rolls a failure with Fear, which plays into their fiction very well.

CULT ADEPT

Tier 2 Support
An experienced mage wielding shadow and fear.
Motives & Tactics: Curry favor, hinder foes, uncover knowledge

Difficulty: 14 | **Thresholds:** 9/18 | **HP:** 4 | **Stress:** 6
ATK: +2 | **Rune-Covered Rod:** Far | 2d4+3 mag

Experience: Fallen Lore +2, Rituals +2

FEATURES

Enervating Blast - Action: **Spend a Fear** to make a standard attack against a target within range. On a success, the target must mark a Stress.

Shroud of the Fallen - Action: **Mark a Stress** to wrap an ally within Close range in a shroud of *Protection* until the Adept marks their last HP. While *Protected*, the target has resistance to all damage.

Shadow Shackles - Action: **Spend a Fear** and choose a point within Far range. All targets within Close range of that point are *Restrained* in smoky chains until they break free with a successful Strength or Instinct Roll. A target *Restrained* by this feature must spend a Hope to make an action roll.

Fear Is Fuel - Reaction: Twice per scene, when a PC rolls a failure with Fear, clear a Stress.

◼ Custom Support

Supports have similar stats to Standards, if not slightly weaker. They do low damage and have middling Hit Points. As they usually need to mark Stress to use their actions, they typically have higher Stress than other adversaries.

◼ Make Your Own

Many woods are tended to by powerful practitioners of nature magic called Forest Druids. They live in hollowed roots, polished caves, or simple thatched huts. We'll make them at Tier 1.

- We'll make them slightly easier to hit because they are a Support adversary, granting them a Difficulty of 11.
- Forest Druids often wear the wood and lichen of the forests as armor. Thresholds of Major 6/Severe 10 with 4 Hit Points and 5 Stress fits their nature.
- They're likely to carry standard weapons, so we'll give them an attack modifier of +0.
- Similarly, we'll limit their damage to mostly Minor, dealing 1d4+2.
- These druids seek balance in nature, so an action that can undo the effects of a spell or condition on an ally makes sense. Additionally, the druid could leverage their understanding of the forest as a living entity, using its power to weaken their enemies. Perhaps they also summon the barbs of the wandering briar to stymie their foes.

A Support adversary with these traits might look like this:

FOREST DRUID

Tier 1 Support
A reclusive wanderer who understands the speech of beast and leaf.
Motives & Tactics: Call upon nature, leave no trace, protect the woods at all costs

Difficulty: 11 | **Thresholds:** 6/10 | **HP:** 4 | **Stress:** 5
ATK: +0 | **Oak Staff:** Melee | 1d4+2 mag

Experience: Animal Knowledge +2, Lay of the Land +3

FEATURES

Calm of the Vale - Action: **Mark a Stress** to end the effect of a spell or clear any condition affecting the Druid or an ally they can see within Very Close range.

Deafening Whisper - Action: **Mark a Stress** to call on the winds in the canopy. A target within Close range must succeed on an Instinct Reaction Roll or the whistling wind fills their ears. The target is unable to hear anything besides the wind, must mark a Stress, and is *Vulnerable* until they clear a Stress.

Overgrowth - Action: **Spend a Fear** and choose a point within Far range. Brambles and thorns erupt from the ground, filling an area within Close range of that point. A creature who enters that area or tries to move through it takes **2d6+3** physical damage and must succeed on an Agility Reaction Roll or become *Restrained* until they succeed on a Finesse Roll or the Druid takes Severe damage.

IMPROVISING ADVERSARIES

Sometimes you want to use an adversary but they're too powerful (or not powerful enough) for your party's tier. Or you might want to replace a feature or two, then present them as an entirely different creature. When planning your session (or even mid-session), you can adjust an existing adversary's stat block to fit the needs of your battle.

When you're mid-session and you realize you need a new adversary, don't sweat. You can quickly adjust a stat block to a different tier by replacing its existing statistics with those listed on the Improvised Statistics by Tier table, using the column that corresponds to your party's tier.

Improvised Statistics by Tier

ADVERSARY STATISTIC	TIER 1	TIER 2	TIER 3	TIER 4
Attack Modifier	+1	+2	+3	+4
Damage Dice	1d6+2 to 1d12+4	2d6+3 to 2d12+4	3d8+3 to 3d12+5	4d8+10 to 4d12+15
Difficulty	11	14	17	20
Damage Thresholds	Major 7/Severe 12	Major 10/Severe 20	Major 20/Severe 32	Major 25/Severe 45

■ Adjusting Between Tiers

If you're moving an adversary from Tiers 1 or 2 to Tiers 3 or 4, you'll want to consider raising their HP and Stress by 1–3 points depending on how long you want them to last in the battle and how many Stress-based features they have. Also keep an eye out for features that deal a different amount of damage than the adversary's standard attack, as those might need some adjustment, as well.

If you feel comfortable inventing an adversary's features on the fly, you can even improvise a completely new adversary using these statistics.

Using this guidance won't always make the adversary a perfect match for the PCs at your table, but it'll reduce the chances of you unexpectedly overwhelming the party (or the PCs defeating your Solo adversary with just a few rolls).

■ Adding or Changing Features

When scaling an adversary to a higher tier, consider adding a new feature to make them a greater threat instead of just scaling up the damage and Difficulty of their existing features. Similarly, if scaling down to a lower tier, consider removing one of the adversary's most powerful or impactful features.

■ Improvising Hordes, Minions, and Solos

If you're improvising a Horde, Minion, or Solo adversary, keep in mind that their power levels are very different from other adversaries'. The following guidance can help you create these adversaries on the fly:

Horde: Their standard attack should deal high damage, then reduce (roughly by half) when the Horde has marked half or more of their HP.

Minion: Give them a flat damage value for their standard attack, usually between 1 and 5, and use that value for their "Group Attack" feature. You'll also set the value of their "Minion" feature, determining how much damage is needed to defeat additional Minions in one attack. This is usually between 3 and 15, depending on the adversary's tier.

Solo: Give them high damage, high HP, and features that let them act more frequently (like "Relentless") or deal area-of-effect damage.

DEFEATED ADVERSARIES

When an adversary marks their last Hit Point, they are defeated (unless they have a feature that gives them a second chance!), but you and your players decide what this means. For example, the PCs might knock the adversary unconscious, tie them up, or kill them. Important adversaries might have means of cheating or faking death, slipping through the cracks to reappear later in the campaign.

ADVERSARY STAT BLOCKS

This section contains a list of adversaries by tier, followed by the adversary stat blocks.

ADVERSARIES BY TIER

This section contains the following stat blocks:

Tier 1 (Level 1)

Acid Burrower
Bear
Cave Ogre
Construct
Courtier
Deeproot Defender
Dire Wolf
Giant Mosquitoes
Giant Rat
Giant Scorpion
Glass Snake
Harrier
Archer Guard
Bladed Guard
Head Guard
Jagged Knife Bandit
Jagged Knife Hexer
Jagged Knife Kneebreaker
Jagged Knife Lackey
Jagged Knife Lieutenant
Jagged Knife Shadow
Jagged Knife Sniper
Merchant
Minor Chaos Elemental
Minor Fire Elemental
Minor Demon
Minor Treant
Green Ooze
Tiny Green Ooze
Red Ooze
Tiny Red Ooze
Petty Noble
Pirate Captain
Pirate Raiders
Pirate Tough
Sellsword
Skeleton Archer
Skeleton Dredge
Skeleton Knight
Skeleton Warrior
Spellblade
Swarm of Rats
Sylvan Soldier
Tangle Bramble Swarm
Tangle Bramble
Weaponmaster
Young Dryad
Brawny Zombie
Patchwork Zombie Hulk
Rotted Zombie
Shambling Zombie
Zombie Pack

Tier 2 (Levels 2–4)

Archer Squadron
Apprentice Assassin
Assassin Poisoner
Master Assassin
Battle Box
Chaos Skull
Conscript
Courtesan
Cult Adept
Cult Fang
Cult Initiate
Demonic Hound Pack
Electric Eels
Elite Soldier
Failed Experiment
Giant Beastmaster
Giant Brawler
Giant Recruit
Giant Eagle
Gorgon
Juvenile Flickerfly
Knight of the Realm
Masked Thief
Merchant Baron
Minotaur Wrecker
Mortal Hunter
Royal Advisor
Secret-Keeper
Shark
Siren
Spectral Archer
Spectral Captain
Spectral Guardian
Spy
Stonewraith
War Wizard

Tier 3 (Levels 5–7)

Adult Flickerfly
Demon of Avarice
Demon of Despair
Demon of Hubris
Demon of Jealousy
Demon of Wrath
Dire Bat
Dryad
Elemental Spark
Greater Earth Elemental
Greater Water Elemental
Huge Green Ooze
Hydra
Monarch
Stag Knight
Oak Treant
Treant Sapling
Head Vampire
Vampire
Vault Guardian Gaoler
Vault Guardian Sentinel
Vault Guardian Turret
Young Ice Dragon

Tier 4 (Levels 8–10)

Arch-Necromancer
Fallen Shock Troop
Fallen Sorcerer
Fallen Warlord:
  Realm-Breaker
Fallen Warlord:
  Undefeated Champion
Hallowed Archer
Hallowed Soldier
High Seraph
Kraken
Oracle of Doom
Outer Realms Abomination
Outer Realms Corruptor
Outer Realms Thrall
Volcanic Dragon:
  Obsidian Predator
Volcanic Dragon:
  Molten Scourge
Volcanic Dragon:
  Ashen Tyrant
Perfected Zombie
Zombie Legion

ACID BURROWER

Tier 1 Solo

A horse-sized insect with digging claws and acidic blood.

Motives & Tactics: Burrow, drag away, feed, reposition

Difficulty: 14 | **Thresholds:** 8/15 | **HP:** 8 | **Stress:** 3
ATK: +3 | **Claws:** Very Close | 1d12+2 phy

Experience: Tremor Sense +2

FEATURES

Relentless (3) - Passive: The Burrower can be spotlighted up to three times per GM turn. Spend Fear as usual to spotlight them.

Earth Eruption - Action: **Mark a Stress** to have the Burrower burst out of the ground. All creatures within Very Close range must succeed on an Agility Reaction Roll or be knocked over, making them *Vulnerable* until they next act.

Spit Acid - Action: Make an attack against all targets in front of the Burrower within Close range. Targets the Burrower succeeds against take **2d6** physical damage and must mark an Armor Slot without receiving its benefits (they can still use armor to reduce the damage). If they can't mark an Armor Slot, they must mark an additional HP and you gain a Fear.

Acid Bath - Reaction: When the Burrower takes Severe damage, all creatures within Close range are bathed in their acidic blood, taking **1d10** physical damage. This splash covers the ground within Very Close range with blood, and all creatures other than the Burrower who move through it take **1d6** physical damage.

BEAR

Tier 1 Bruiser

A large bear with thick fur and powerful claws.

Motives & Tactics: Climb, defend territory, pummel, track

Difficulty: 14 | **Thresholds:** 9/17 | **HP:** 7 | **Stress:** 2
ATK: +1 | **Claws:** Melee | 1d8+3 phy

Experience: Ambusher +3, Keen Senses +2

FEATURES

Overwhelming Force - Passive: Targets who mark HP from the Bear's standard attack are knocked back to Very Close range.

Bite - Action: **Mark a Stress** to make an attack against a target within Melee range. On a success, deal **3d4+10** physical damage and the target is *Restrained* until they break free with a successful Strength Roll.

Momentum - Reaction: When the Bear makes a successful attack against a PC, you gain a Fear.

ACID BURROWER

CAVE OGRE

Tier 1 Solo

A massive humanoid who sees all sapient life as food.

Motives & Tactics: Bite off heads, feast, rip limbs, stomp, throw enemies

Difficulty: 13 | **Thresholds:** 8/15 | **HP:** 8 | **Stress:** 3
ATK: +1 | **Club:** Very Close | 1d10+2 phy

Experience: Throw +2

FEATURES

Ramp Up - Passive: You must **spend a Fear** to spotlight the Ogre. While spotlighted, they can make their standard attack against all targets within range.

Bone Breaker - Passive: The Ogre's attacks deal direct damage.

Hail of Boulders - Action: **Mark a Stress** to pick up heavy objects and throw them at all targets in front of the Ogre within Far range. Make an attack against these targets. Targets the Ogre succeeds against take **1d10+2** physical damage. If they succeed against more than one target, you gain a Fear.

Rampaging Fury - Reaction: When the Ogre marks 2 or more HP, they can rampage. Move the Ogre to a point within Close range and deal **2d6+3** direct physical damage to all targets in their path.

CONSTRUCT

Tier 1 Solo

A roughly humanoid being of stone and steel, assembled and animated by magic.

Motives & Tactics: Destroy environment, serve creator, smash target, trample groups

Difficulty: 13 | **Thresholds:** 7/15 | **HP:** 9 | **Stress:** 4
ATK: +4 | **Fist Slam:** Melee | 1d20 phy

FEATURES

Relentless (2) - Passive: The Construct can be spotlighted up to two times per GM turn. Spend Fear as usual to spotlight them.

Weak Structure - Passive: When the Construct marks HP from physical damage, they must mark an additional HP.

Trample - Action: **Mark a Stress** to make an attack against all targets in the Construct's path when they move. Targets the Construct succeeds against take **1d8** physical damage.

Overload - Reaction: Before rolling damage for the Construct's attack, you can **mark a Stress** to gain a +10 bonus to the damage roll. The Construct can then take the spotlight again.

Death Quake - Reaction: When the Construct marks their last HP, the magic powering them ruptures in an explosion of force. Make an attack with advantage against all targets within Very Close range. Targets the Construct succeeds against take **1d12+2** magic damage.
COURTIER

Tier 1 Social
An ambitious and ostentatiously dressed socialite.
Motives & Tactics: Discredit, gain favor, maneuver, scheme

Difficulty: 12 | **Thresholds:** 4/8 | **HP:** 3 | **Stress:** 4
ATK: −4 | **Daggers:** Melee | 1d4+2 phy

Experience: Socialite +3

FEATURES

Mockery - Action: **Mark a Stress** to say something mocking and force a target within Close range to make a Presence Reaction Roll (14) to see if they can save face. On a failure, the target must mark 2 Stress and is *Vulnerable* until the scene ends.

Scapegoat - Action: **Spend a Fear** and target a PC. The Courtier convinces a crowd or prominent individual that the target is the cause of their current conflict or misfortune.

DEEPROOT DEFENDER

Tier 1 Bruiser
A burly vegetable-person with grasping vines.
Motives & Tactics: Ambush, grab, protect, pummel

Difficulty: 10 | **Thresholds:** 8/14 | **HP:** 7 | **Stress:** 3
ATK: +2 | **Vines:** Close | 1d8+3 phy

Experience: Huge +3

FEATURES

Ground Slam - Action: Slam the ground, knocking all targets within Very Close range back to Far range. Each target knocked back this way must mark a Stress.

Grab and Drag - Action: Make an attack against a target within Close range. On a success, **spend a Fear** to pull them into Melee range, deal **1d6+2** physical damage, and *Restrain* them until the Defender takes Severe damage.

DIRE WOLF

Tier 1 Skulk
A large wolf with menacing teeth, seldom encountered alone.
Motives & Tactics: Defend territory, harry, protect pack, surround, trail

Difficulty: 12 | **Thresholds:** 5/9 | **HP:** 4 | **Stress:** 3
ATK: +2 | **Claws:** Melee | 1d6+2 phy

Experience: Keen Senses +3

FEATURES

Pack Tactics - Passive: If the Wolf makes a successful standard attack and another Dire Wolf is within Melee range of the target, deal **1d6+5** physical damage instead of their standard damage and you gain a Fear.

Hobbling Strike - Action: **Mark a Stress** to make an attack against a target within Melee range. On a success, deal **3d4+10** direct physical damage and make them *Vulnerable* until they clear at least 1 HP.

GIANT MOSQUITOES

Tier 1 Horde (5/HP)
Dozens of fist-sized mosquitoes, flying together for protection.
Motives & Tactics: Fly away, harass, steal blood

Difficulty: 10 | **Thresholds:** 5/9 | **HP:** 6 | **Stress:** 3
ATK: −2 | **Proboscis:** Melee | 1d8+3 phy

Experience: Camouflage +2

FEATURES

Horde (1d4+1) - Passive: When the Mosquitoes have marked half or more of their HP, their standard attack deals **1d4+1** physical damage instead.

Flying - Passive: While flying, the Mosquitoes have a +2 bonus to their Difficulty.

Bloodsucker - Reaction: When the Mosquitoes' attack causes a target to mark HP, you can **mark a Stress** to force the target to mark an additional HP.

GIANT RAT

Tier 1 Minion
A cat-sized rodent skilled at scavenging and survival.
Motives & Tactics: Burrow, hunger, scavenge, wear down

Difficulty: 10 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: −4 | **Claws:** Melee | 1 phy

Experience: Keen Senses +3

FEATURES

Minion (3) - Passive: The Rat is defeated when they take any damage. For every 3 damage a PC deals to the Rat, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Giant Rats within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 1 physical damage each. Combine this damage.

GIANT SCORPION

Tier 1 Bruiser
A human-sized insect with tearing claws and a stinging tail.
Motives & Tactics: Ambush, feed, grapple, poison

Difficulty: 13 | **Thresholds:** 7/13 | **HP:** 6 | **Stress:** 3
ATK: +1 | **Pincers:** Melee | 1d12+2 phy

Experience: Camouflage +2

FEATURES

Double Strike - Action: **Mark a Stress** to make a standard attack against two targets within Melee range.

Venomous Stinger - Action: Make an attack against a target within Very Close range. On a success, **spend a Fear** to deal **1d4+4** physical damage and *Poison* them until their next rest or they succeed on a Knowledge Roll (16). While *Poisoned*, the target must roll a **d6** before they make an action roll. On a result of 4 or lower, they must mark a Stress.

Momentum - Reaction: When the Scorpion makes a successful attack against a PC, you gain a Fear.

GLASS SNAKE

Tier 1 Standard

A clear serpent with a massive head that leaves behind a glass shard trail wherever they go.

Motives & Tactics: Climb, feed, keep distance, scare

Difficulty: 14 | **Thresholds:** 6/10 | **HP:** 5 | **Stress:** 3
ATK: +2 | **Glass Fangs:** Very Close | 1d8+2 phy

FEATURES

Armor-Shredding Shards - Passive: On a successful attack within Melee range against the Snake, the attacker must mark an Armor Slot without receiving its benefits (they can still use armor to reduce the damage). If they can't mark an Armor Slot, they must mark an additional HP.

Spinning Serpent - Action: Mark a Stress to make an attack against all targets within Very Close range. Targets the Snake succeeds against take **1d6+1** physical damage.

Spitter - Action: **Spend a Fear** to introduce a **d6** Spitter Die. When the Snake is in the spotlight, roll this die. On a result of 5 or higher, all targets in front of the Snake within Far range must succeed on an Agility Reaction Roll or take **1d4** physical damage. The Snake can take the spotlight a second time this GM turn.

HARRIER

Tier 1 Standard

A nimble fighter armed with javelins.

Motives & Tactics: Flank, harry, kite, profit

Difficulty: 12 | **Thresholds:** 5/9 | **HP:** 3 | **Stress:** 3
ATK: +1 | **Javelin:** Close | 1d6+2 phy

Experience: Camouflage +2

FEATURES

Maintain Distance - Passive: After making a standard attack, the Harrier can move anywhere within Far range.

Fall Back - Reaction: When a creature moves into Melee range to make an attack, you can **mark a Stress** before the attack roll to move anywhere within Close range and make an attack against that creature. On a success, deal **1d10+2** physical damage.

ARCHER GUARD

Tier 1 Ranged

A tall guard bearing a longbow and quiver with arrows fletched in the settlement's colors.

Motives & Tactics: Arrest, close gates, make it through the day, pin down

Difficulty: 10 | **Thresholds:** 4/8 | **HP:** 3 | **Stress:** 2
ATK: +1 | **Longbow:** Far | 1d8+3 phy

Experience: Local Knowledge +3

FEATURES

Hobbling Shot - Action: Make an attack against a target within Far range. On a success, **mark a Stress** to deal **1d12+3** physical damage. If the target marks HP from this attack, they have disadvantage on Agility Rolls until they clear at least 1 HP.

BLADED GUARD

Tier 1 Standard

An armored guard bearing a sword and shield painted in the settlement's colors.

Motives & Tactics: Arrest, close gates, make it through the day, pin down

Difficulty: 12 | **Thresholds:** 5/9 | **HP:** 5 | **Stress:** 2
ATK: +1 | **Longsword:** Melee | 1d6+1 phy

Experience: Local Knowledge +3

FEATURES

Shield Wall - Passive: A creature who tries to move within Very Close range of the Guard must succeed on an Agility Roll. If additional Bladed Guards are standing in a line alongside the first, and each is within Melee range of another guard in the line, the Difficulty increases by the total number of guards in that line.

Detain - Action: Make an attack against a target within Very Close range. On a success, **mark a Stress** to *Restrain* the target until they break free with a successful attack, Finesse Roll, or Strength Roll.

HEAD GUARD

Tier 1 Leader

A seasoned guard with a mace, a whistle, and a bellowing voice.

Motives & Tactics: Arrest, close gates, pin down, seek glory

Difficulty: 15 | **Thresholds:** 7/13 | **HP:** 7 | **Stress:** 3
ATK: +4 | **Mace:** Melee | 1d10+4 phy

Experience: Commander +2, Local Knowledge +2

FEATURES

Rally Guards - Action: **Spend 2 Fear** to spotlight the Head Guard and up to **2d4** allies within Far range.

On My Signal - Reaction: Countdown (5). When the Head Guard is in the spotlight for the first time, activate the countdown. It ticks down when a PC makes an attack roll. When it triggers, all Archer Guards within Far range make a standard attack with advantage against the nearest target within their range. If any attacks succeed on the same target, combine their damage.

Momentum - Reaction: When the Head Guard makes a successful attack against a PC, you gain a Fear.

GLASS SNAKE

JAGGED KNIFE BANDIT

Tier 1 Standard

A cunning criminal in a cloak bearing one of the gang's iconic knives.

Motives & Tactics: Escape, profit, steal, throw smoke

Difficulty: 12 | **Thresholds:** 8/14 | **HP:** 5 | **Stress:** 3
ATK: +1 | **Daggers:** Melee | 1d8+1 phy

Experience: Thief +2

FEATURES

Climber - Passive: The Bandit climbs just as easily as they run.

From Above - Passive: When the Bandit succeeds on a standard attack from above a target, they deal **1d10+1** physical damage instead of their standard damage.

JAGGED KNIFE HEXER

Tier 1 Support

A staff-wielding bandit in a cloak adorned with magical paraphernalia, using curses to vex their foes.

Motives & Tactics: Command, hex, profit

Difficulty: 13 | **Thresholds:** 5/9 | **HP:** 4 | **Stress:** 4
ATK: +2 | **Staff:** Far | 1d6+2 mag

Experience: Magical Knowledge +2

FEATURES

Curse - Action: Choose a target within Far range and temporarily *Curse* them. While the target is *Cursed*, you can **mark a Stress** when that target rolls with Hope to make the roll be with Fear instead.

Chaotic Flux - Action: Make an attack against up to three targets within Very Close range. **Mark a Stress** to deal **2d6+3** magic damage to targets the Hexer succeeded against.

JAGGED KNIFE KNEEBREAKER

Tier 1 Bruiser

An imposing brawler carrying a large club.

Motives & Tactics: Grapple, intimidate, profit, steal

Difficulty: 12 | **Thresholds:** 7/14 | **HP:** 7 | **Stress:** 4
ATK: −3 | **Club:** Melee | 1d4+6 phy

Experience: Thief +2, Unveiled Threats +3

FEATURES

I've Got 'Em - Passive: Creatures *Restrained* by the Kneebreaker take double damage from attacks by other adversaries.

Hold Them Down - Action: Make an attack against a target within Melee range. On a success, the target takes no damage but is *Restrained* and *Vulnerable*. The target can break free, clearing both conditions, with a successful Strength Roll or is freed automatically if the Kneebreaker takes Major or greater damage.

JAGGED KNIFE LACKEY

Tier 1 Minion

A thief with simple clothes and small daggers, eager to prove themselves.

Motives & Tactics: Escape, profit, throw smoke

Difficulty: 9 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: −2 | **Daggers:** Melee | 2 phy

Experience: Thief +2

FEATURES

Minion (3) - Passive: The Lackey is defeated when they take any damage. For every 3 damage a PC deals to the Lackey, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Jagged Knife Lackeys within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 2 physical damage each. Combine this damage.

JAGGED KNIFE LIEUTENANT

Tier 1 Leader

A seasoned bandit in quality leathers with a strong voice and cunning eyes.

Motives & Tactics: Bully, command, profit, reinforce

Difficulty: 13 | **Thresholds:** 7/14 | **HP:** 6 | **Stress:** 3
ATK: +2 | **Javelin:** Close | 1d8+3 phy

Experience: Local Knowledge +2

FEATURES

Tactician - Action: When you spotlight the Lieutenant, **mark a Stress** to also spotlight two allies within Close range.

More Where That Came From - Action: Summon three Jagged Knife Lackeys, who appear at Far range.

Coup de Grace - Action: **Spend a Fear** to make an attack against a *Vulnerable* target within Close range. On a success, deal **2d6+12** physical damage and the target must mark a Stress.

Momentum - Reaction: When the Lieutenant makes a successful attack against a PC, you gain a Fear.

JAGGED KNIFE SHADOW

Tier 1 Skulk

A nimble scoundrel bearing a wicked knife and utilizing shadow magic to isolate targets.

Motives & Tactics: Ambush, conceal, divide, profit

Difficulty: 12 | **Thresholds:** 4/8 | **HP:** 3 | **Stress:** 3
ATK: +1 | **Daggers:** Melee | 1d4+4 phy

Experience: Intrusion +3

FEATURES

Backstab - Passive: When the Shadow succeeds on a standard attack that has advantage, they deal **1d6+6** physical damage instead of their standard damage.

Cloaked - Action: Become *Hidden* until after the Shadow's next attack. Attacks made while *Hidden* from this feature have advantage.

JAGGED KNIFE SNIPER

Tier 1 Ranged

A lanky bandit striking from cover with a shortbow.

Motives & Tactics: Ambush, hide, profit, reposition

Difficulty: 13 | **Thresholds:** 4/7 | **HP:** 3 | **Stress:** 2
ATK: −1 | **Shortbow:** Far | 1d10+2 phy

Experience: Stealth +2

FEATURES

Unseen Strike - Passive: If the Sniper is *Hidden* when they make a successful standard attack against a target, they deal **1d10+4** physical damage instead of their standard damage.

MERCHANT

Tier 1 Social

A finely dressed trader with a keen eye for financial gain.

Motives & Tactics: Buy low and sell high, create demand, inflate prices, seek profit

Difficulty: 12 | **Thresholds:** 4/8 | **HP:** 3 | **Stress:** 3
ATK: −4 | **Club:** Melee | 1d4+1 phy

Experience: Shrewd Negotiator +3

FEATURES

Preferential Treatment - Passive: A PC who succeeds on a Presence Roll against the Merchant gains a discount on purchases. A PC who fails on a Presence Roll against the Merchant must pay more and has disadvantage on future Presence Rolls against the Merchant.

The Runaround - Passive: When a PC rolls a 14 or lower on a Presence Roll made against the Merchant, they must mark a Stress.

MINOR CHAOS
ELEMENTAL

MINOR CHAOS ELEMENTAL

Tier 1 Solo

A coruscating mass of uncontrollable magic.

Motives & Tactics: Confound, destabilize, transmogrify

Difficulty: 14 | **Thresholds:** 7/14 | **HP:** 7 | **Stress:** 3
ATK: +3 | **Warp Blast:** Close | 1d12+6 mag

FEATURES

Arcane Form - Passive: The Elemental is resistant to magic damage.

Sickening Flux - Action: **Mark a HP** to force all targets within Close range to mark a Stress and become *Vulnerable* until their next rest or they clear a HP.

Remake Reality - Action: **Spend a Fear** to transform the area within Very Close range into a different biome. All targets within this area take **2d6+3** direct magic damage.

Magical Reflection - Reaction: When the Elemental takes damage from an attack within Close range, deal an amount of damage to the attacker equal to half the damage they dealt.

Momentum - Reaction: When the Elemental makes a successful attack against a PC, you gain a Fear.

MINOR FIRE ELEMENTAL

Tier 1 Solo

A living flame the size of a large bonfire.

Motives & Tactics: Encircle enemies, grow in size, intimidate, start fires

Difficulty: 13 | **Thresholds:** 7/15 | **HP:** 9 | **Stress:** 3
ATK: +3 | **Elemental Blast:** Far | 1d10+4 mag

FEATURES

Relentless (2) - Passive: The Elemental can be spotlighted up to two times per GM turn. Spend Fear as usual to spotlight them.

Scorched Earth - Action: **Mark a Stress** to choose a point within Far range. The ground within Very Close range of that point immediately bursts into flames. All creatures within this area must make an Agility Reaction Roll. Targets who fail take **2d8** magic damage from the flames. Targets who succeed take half damage.

Explosion - Action: **Spend a Fear** to erupt in a fiery explosion. Make an attack against all targets within Close range. Targets the Elemental succeeds against take **1d8** magic damage and are knocked back to Far range.

Consume Kindling - Reaction: Three times per scene, when the Elemental moves onto objects that are highly flammable, consume them to clear a HP or a Stress.

Momentum - Reaction: When the Elemental makes a successful attack against a PC, you gain a Fear.

MINOR FIRE
ELEMENTAL

MINOR DEMON

MINOR TREANT

GREEN OOZE

MINOR DEMON

Tier 1 Solo

A crimson-hued creature from the Circles Below, consumed by rage against all mortals.

Motives & Tactics: Act erratically, corral targets, relish pain, torment

Difficulty: 14 | **Thresholds:** 8/15 | **HP:** 8 | **Stress:** 4
ATK: +3 | **Claws:** Melee | 1d8+6 phy

FEATURES

Relentless (2) - Passive: The Demon can be spotlighted up to two times per GM turn. Spend Fear as usual to spotlight them.

All Must Fall - Passive: When a PC rolls a failure with Fear while within Close range of the Demon, they lose a Hope.

Hellfire - Action: **Spend a Fear** to rain down hellfire within Far range. All targets within the area must make an Agility Reaction Roll. Targets who fail take **1d20+3** magic damage. Targets who succeed take half damage.

Reaper - Reaction: Before rolling damage for the Demon's attack, you can **mark a Stress** to gain a bonus to the damage roll equal to the Demon's current number of marked HP.

Momentum - Reaction: When the Demon makes a successful attack against a PC, you gain a Fear.

MINOR TREANT

Tier 1 Minion

An ambulatory sapling rising up to defend their forest.

Motives & Tactics: Crush, overwhelm, protect

Difficulty: 10 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: −2 | **Clawed Branch:** Melee | 4 phy

FEATURES

Minion (5) - Passive: The Treant is defeated when they take any damage. For every 5 damage a PC deals to the Treant, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Minor Treants within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 4 physical damage each. Combine this damage.

GREEN OOZE

Tier 1 Skulk

A moving mound of translucent green slime.

Motives & Tactics: Camouflage, consume and multiply, creep up, envelop

Difficulty: 8 | **Thresholds:** 5/10 | **HP:** 5 | **Stress:** 2
ATK: +1 | **Ooze Appendage:** Melee | 1d6+1 mag

Experience: Camouflage +3

FEATURES

Slow - Passive: When you spotlight the Ooze and they don't have a token on their stat block, they can't act yet. Place a token on their stat block and describe what they're preparing to do. When you spotlight the Ooze and they have a token on their stat block, clear the token and they can act.

Acidic Form - Passive: When the Ooze makes a successful attack, the target must mark an Armor Slot without receiving its benefits (they can still use armor to reduce the damage). If they can't mark an Armor Slot, they must mark an additional HP.

Envelop - Action: Make a standard attack against a target within Melee range. On a success, the Ooze envelops them and the target must mark 2 Stress. The target must mark an additional Stress when they make an action roll. If the Ooze takes Severe damage, the target is freed.

Split - Reaction: When the Ooze has 3 or more HP marked, you can **spend a Fear** to split them into two Tiny Green Oozes (with no marked HP or Stress). Immediately spotlight both of them.

TINY GREEN OOZE

Tier 1 Skulk

A small moving mound of translucent green slime.

Motives & Tactics: Camouflage, creep up

Difficulty: 14 | **Thresholds:** 4/None | **HP:** 2 | **Stress:** 1
ATK: −1 | **Ooze Appendage:** Melee | 1d4+1 mag

FEATURES

Acidic Form - Passive: When the Ooze makes a successful attack, the target must mark an Armor Slot without receiving its benefits (they can still use armor to reduce the damage). If they can't mark an Armor Slot, they must mark an additional HP.

RED OOZE

Tier 1 Skulk

A moving mound of translucent flaming red slime.

Motives & Tactics: Camouflage, consume and multiply, ignite, start fires

Difficulty: 10 | **Thresholds:** 6/11 | **HP:** 5 | **Stress:** 3
ATK: +1 | **Ooze Appendage:** Melee | 1d8+3 mag

Experience: Camouflage +3

FEATURES

Creeping Fire - Passive: The Ooze can only move within Very Close range as their normal movement. They light any flammable object they touch on fire.

Ignite - Action: Make an attack against a target within Very Close range. On a success, the target takes **1d8** magic damage and is *Ignited* until they're extinguished with a successful Finesse Roll (14). While *Ignited*, the target takes **1d4** magic damage when they make an action roll.

Split - Reaction: When the Ooze has 3 or more HP marked, you can **spend a Fear** to split them into two Tiny Red Oozes (with no marked HP or Stress). Immediately spotlight both of them.

TINY RED OOZE

Tier 1 Skulk

A small moving mound of translucent flaming red slime

Motives & Tactics: Blaze, camouflage

Difficulty: 11 | **Thresholds:** 5/None | **HP:** 2 | **Stress:** 1
ATK: −1 | **Ooze Appendage:** Melee | 1d4+2 mag

FEATURES

Burning - Reaction: When a creature within Melee range deals damage to the Ooze, they take **1d6** direct magic damage

PETTY NOBLE

Tier 1 Social

A richly dressed and adorned aristocrat brimming with hubris.

Motives & Tactics: Abuse power, gather resources, mobilize minions

Difficulty: 14 | **Thresholds:** 6/10 | **HP:** 3 | **Stress:** 5
ATK: −3 | **Rapier:** Melee | 1d6+1 phy

Experience: Aristocrat +3

FEATURES

My Land, My Rules - Passive: All social actions made against the Noble on their land have disadvantage.

Guards, Seize Them! - Action: Once per scene, **mark a Stress** to summon **1d4** Bladed Guards, who appear at Far range to enforce the Noble's will.

Exile - Action: **Spend a Fear** and target a PC. The Noble proclaims that the target and their allies are exiled from the noble's territory. While exiled, the target and their allies have disadvantage during social situations within the Noble's domain.
PIRATE CAPTAIN

Tier 1 Leader

A charismatic sea dog with an impressive hat, eager to raid and plunder.

Motives & Tactics: Command, make 'em walk the plank, plunder, raid

Difficulty: 14 | **Thresholds:** 7/14 | **HP:** 7 | **Stress:** 5
ATK: +4 | **Cutlass:** Melee | 1d12+2 phy

Experience: Commander +2, Sailor +3

FEATURES

Swashbuckler - Passive: When the Captain marks 2 or fewer HP from an attack within Melee range, the attacker must mark a Stress.

Reinforcements - Action: Once per scene, **mark a Stress** to summon a Pirate Raiders Horde, which appears at Far range.

No Quarter - Action: **Spend a Fear** to choose a target who has three or more Pirates within Melee range of them. The Captain leads the Pirates in hurling threats and promises of a watery grave. The target must make a Presence Reaction Roll. On a failure, the target marks **1d4+1** Stress. On a success, they must mark a Stress.

Momentum - Reaction: When the Captain makes a successful attack against a PC, you gain a Fear.

PIRATE RAIDERS

Tier 1 Horde (3/HP)

Seafaring scoundrels moving in a ravaging pack.

Motives & Tactics: Gang up, plunder, raid

Difficulty: 12 | **Thresholds:** 5/11 | **HP:** 4 | **Stress:** 3
ATK: +1 | **Cutlass:** Melee | 1d8+2 phy

Experience: Sailor +3

FEATURES

Horde (1d4+1) - Passive: When the Raiders have marked half or more of their HP, their standard attack deals **1d4+1** physical damage instead.

Swashbuckler - Passive: When the Raiders mark 2 or fewer HP from an attack within Melee range, the attacker must mark a Stress.

PIRATE TOUGH

Tier 1 Bruiser

A thickly muscled and tattooed pirate with melon-sized fists.

Motives & Tactics: Plunder, raid, smash, terrorize

Difficulty: 13 | **Thresholds:** 8/15 | **HP:** 5 | **Stress:** 3
ATK: +1 | **Massive Fists:** Melee | 2d6 phy

Experience: Sailor +2

FEATURES

Swashbuckler - Passive: When the Tough marks 2 or fewer HP from an attack within Melee range, the attacker must mark a Stress.

Clear the Decks - Action: Make an attack against a target within Very Close range. On a success, **mark a Stress** to move into Melee range of the target, dealing **3d4** physical damage and knocking the target back to Close range.

RED OOZE

TINY RED OOZE

SKELETON ARCHER SKELETON WARRIOR SKELETON KNIGHT SKELETON DREDGE

SELLSWORD

Tier 1 Minion
An armed mercenary testing their luck.
Motives & Tactics: Charge, lacerate, overwhelm, profit

Difficulty: 10 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: +3 | **Longsword:** Melee | 3 phy

FEATURES

Minion (4) - Passive: The Sellsword is defeated when they take any damage. For every 4 damage a PC deals to the Sellsword, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Sellswords within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 3 physical damage each. Combine this damage.

SKELETON ARCHER

Tier 1 Ranged
A fragile skeleton with a shortbow and arrows.
Motives & Tactics: Perforate distracted targets, play dead, steal skin

Difficulty: 9 | **Thresholds:** 4/7 | **HP:** 3 | **Stress:** 2
ATK: +2 | **Shortbow:** Far | 1d8+1 phy

FEATURES

Opportunist - Passive: When two or more adversaries are within Very Close range of a creature, all damage the Archer deals to that creature is doubled.

Deadly Shot - Action: Make an attack against a *Vulnerable* target within Far range. On a success, **mark a Stress** to deal **3d4+8** physical damage.

SKELETON DREDGE

Tier 1 Minion
A clattering pile of bones.
Motives & Tactics: Fall apart, overwhelm, play dead, steal skin

Difficulty: 8 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: −1 | **Bone Claws:** Melee | 1 phy

FEATURES

Minion (4) - Passive: The Dredge is defeated when they take any damage. For every 4 damage a PC deals to the Dredge, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Dredges within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 1 physical damage each. Combine this damage.

SKELETON KNIGHT

Tier 1 Bruiser
A large armored skeleton with a huge blade.
Motives & Tactics: Cut down the living, steal skin, wreak havoc

Difficulty: 13 | **Thresholds:** 7/13 | **HP:** 5 | **Stress:** 2
ATK: +2 | **Rusty Greatsword:** Melee | 1d10+2 phy

FEATURES

Terrifying - Passive: When the Knight makes a successful attack, all PCs within Close range lose a Hope and you gain a Fear.

Cut to the Bone - Action: **Mark a Stress** to make an attack against all targets within Very Close range. Targets the Knight succeeds against take **1d8+2** physical damage and must mark a Stress.

Dig Two Graves - Reaction: When the Knight is defeated, they make an attack against a target within Very Close range (prioritizing the creature who killed them). On a success, the target takes **1d4+8** physical damage and loses **1d4** Hope.

SKELETON WARRIOR

Tier 1 Standard
A dirt-covered skeleton armed with a rusted blade.
Motives & Tactics: Feign death, gang up, steal skin

Difficulty: 10 | **Thresholds:** 4/8 | **HP:** 3 | **Stress:** 2
ATK: +0 | **Sword:** Melee | 1d6+2 phy

FEATURES

Only Bones - Passive: The Warrior is resistant to physical damage.

Won't Stay Dead - Reaction: When the Warrior is defeated, you can spotlight them and roll a **d6**. On a result of 6, if there are other adversaries on the battlefield, the Warrior re-forms with no marked HP.

SPELLBLADE

Tier 1 Leader
A mercenary combining swordplay and magic to deadly effect.
Motives & Tactics: Blast, command, endure

Difficulty: 14 | **Thresholds:** 8/14 | **HP:** 6 | **Stress:** 3
ATK: +3 | **Empowered Longsword:** Melee | 1d8+4 phy/mag

Experience: Magical Knowledge +2

FEATURES

Arcane Steel - Passive: Damage dealt by the Spellblade's standard attack is considered both physical and magic.

Suppressing Blast - Action: **Mark a Stress** and target a group within Far range. All targets must succeed on an Agility Reaction Roll or take **1d8+2** magic damage. You gain a Fear for each target who marked HP from this attack.

Move as a Unit - Action: **Spend 2 Fear** to spotlight up to five allies within Far range.

Momentum - Reaction: When the Spellblade makes a successful attack against a PC, you gain a Fear.

SWARM OF RATS

Tier 1 Horde (10/HP)
A skittering mass of ordinary rodents moving as one like a ravenous wave.
Motives & Tactics: Consume, obscure, swarm

Difficulty: 10 | **Thresholds:** 6/10 | **HP:** 6 | **Stress:** 2
ATK: −3 | **Claws:** Melee | 1d8+2 phy

FEATURES

Horde (1d4+1) - Passive: When the Swarm has marked half or more of their HP, their standard attack deals **1d4+1** physical damage instead.

In Your Face - Passive: All targets within Melee range have disadvantage on attacks against targets other than the Swarm.

SYLVAN SOLDIER

Tier 1 Standard
A faerie warrior adorned in armor made of leaves and bark.
Motives & Tactics: Ambush, hide, overwhelm, protect, trail

Difficulty: 11 | **Thresholds:** 6/11 | **HP:** 4 | **Stress:** 2
ATK: +0 | **Scythe:** Melee | 1d8+1 phy

Experience: Tracker +2

FEATURES

Pack Tactics - Passive: If the Soldier makes a standard attack and another Sylvan Soldier is within Melee range of the target, deal **1d8+5** physical damage instead of their standard damage.

Forest Control - Action: **Spend a Fear** to pull down a tree within Close range. A creature hit by the tree must succeed on an Agility Reaction Roll (15) or take **1d10** physical damage.

Blend In - Reaction: When the Soldier makes a successful attack, you can **mark a Stress** to become *Hidden* until the Soldier's next attack or a PC succeeds on an Instinct Roll (14) to find them.

TANGLE BRAMBLE SWARM

Tier 1 Horde (3/HP)
A cluster of animate, blood-drinking tumbleweeds, each the size of a large gourd.
Motives & Tactics: Digest, entangle, immobilize

Difficulty: 12 | **Thresholds:** 6/11 | **HP:** 6 | **Stress:** 3
ATK: +0 | **Thorns:** Melee | 1d6+3 phy

Experience: Camouflage +2

FEATURES

Horde (1d4+2) - Passive: When the Swarm has marked half or more of their HP, their standard attack deals **1d4+2** physical damage instead.

Crush - Action: **Mark a Stress** to deal **2d6+8** direct physical damage to a target with 3 or more bramble tokens.

Encumber - Reaction: When the Swarm succeeds on an attack, give the target a bramble token. If a target has any bramble tokens, they are *Restrained*. If a target has 3 or more bramble tokens, they are also *Vulnerable*. All bramble tokens can be removed by succeeding on a Finesse Roll (12 + the number of bramble tokens) or dealing Major or greater damage to the Swarm. If bramble tokens are removed from a target using a Finesse Roll, a number of Tangle Bramble Minions spawn within Melee range equal to the number of tokens removed.

TANGLE BRAMBLE

Tier 1 Minion
An animate, blood-drinking tumbleweed.
Motives & Tactics: Combine, drain, entangle

Difficulty: 11 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: −1 | **Thorns:** Melee | 2 phy

FEATURES

Minion (4) - Passive: The Bramble is defeated when they take any damage. For every 4 damage a PC deals to the Tangle Bramble, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Tangle Brambles within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 2 physical damage each. Combine this damage.

Drain and Multiply - Reaction: When an attack from the Bramble causes a target to mark HP and there are three or more Tangle Bramble Minions within Close range, you can combine the Minions into a Tangle Bramble Swarm Horde. The Horde's HP is equal to the number of Minions combined.

WEAPONMASTER

Tier 1 Bruiser
A master-at-arms wielding a sword twice their size.
Motives & Tactics: Act first, aim for the weakest, intimidate

Difficulty: 14 | **Thresholds:** 8/15 | **HP:** 6 | **Stress:** 3
ATK: +2 | **Claymore:** Very Close | 1d12+2 phy

FEATURES

Goading Strike - Action: Make a standard attack against a target. On a success, **mark a Stress** to *Taunt* the target until their next successful attack. The next time the *Taunted* target attacks, they have disadvantage against targets other than the Weaponmaster.

Adrenaline Burst - Action: Once per scene, **spend a Fear** to clear 2 HP and 2 Stress.

Momentum - Reaction: When the Weaponmaster makes a successful attack against a PC, you gain a Fear.

YOUNG DRYAD

Tier 1 Leader
An imperious tree-person leading their forest's defenses.
Motives & Tactics: Command, nurture, prune the unwelcome

Difficulty: 11 | **Thresholds:** 6/11 | **HP:** 6 | **Stress:** 2
ATK: +0 | **Scythe:** Melee | 1d8+5 phy

Experience: Leadership +3

FEATURES

Voice of the Forest - Action: **Mark a Stress** to spotlight **1d4** allies within range of a target they can attack without moving. On a success, their attacks deal half damage.

Thorny Cage - Action: **Spend a Fear** to form a cage around a target within Very Close range and *Restrain* them until they're freed with a successful Strength Roll. When a creature makes an action roll against the cage, they must mark a Stress.

Momentum - Reaction: When the Dryad makes a successful attack against a PC, you gain a Fear.

BRAWNY ZOMBIE

Tier 1 Bruiser
A large corpse, decay-bloated and angry.
Motives & Tactics: Crush, destroy, hail debris, slam

Difficulty: 10 | **Thresholds:** 8/15 | **HP:** 7 | **Stress:** 4
ATK: +2 | **Slam:** Very Close | 1d12+3 phy

Experience: Collateral Damage +2, Throw +4

FEATURES

Slow - Passive: When you spotlight the Zombie and they don't have a token on their stat block, they can't act yet. Place a token on their stat block and describe what they're preparing to do. When you spotlight the Zombie and they have a token on their stat block, clear the token and they can act.

Rend Asunder - Action: Make a standard attack with advantage against a target the Zombie has *Restrained*. On a success, the attack deals direct damage.

Rip and Tear - Reaction: When the Zombies makes a successful standard attack, you can **mark a Stress** to temporarily *Restrain* the target and force them to mark 2 Stress.

PATCHWORK ZOMBIE HULK

Tier 1 Solo
A towering gestalt of corpses moving as one, with torso-sized limbs and fists as large as a grown halfling.
Motives & Tactics: Absorb corpses, flail, hunger, terrify

Difficulty: 13 | **Thresholds:** 8/15 | **HP:** 10 | **Stress:** 3
ATK: +4 | **Too Many Arms:** Very Close | 1d20 phy

Experience: Intimidation +2, Tear Things Apart +2

FEATURES

Destructible - Passive: When the Zombie takes Major or greater damage, they mark an additional HP.

Flailing Limbs - Passive: When the Zombie makes a standard attack, they can attack all targets within Very Close range.

Another for the Pile - Action: When the Zombie is within Very Close range of a corpse, they can incorporate it into themselves, clearing a HP and a Stress.

Tormented Screams - Action: **Mark a Stress** to cause all PCs within Far range to make a Presence Reaction Roll (13). Targets who fail lose a Hope and you gain a Fear for each. Targets who succeed must mark a Stress.

PATCHWORK ZOMBIE HULK

ROTTED ZOMBIE

Tier 1 Minion
A decaying corpse ambling toward their prey.
Motives & Tactics: Eat flesh, hunger, maul, surround

Difficulty: 8 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: −3 | **Bite:** Melee | 2 phy

FEATURES

Minion (3) - Passive: The Zombie is defeated when they take any damage. For every 3 damage a PC deals to the Zombie, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Rotted Zombies within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 2 physical damage each. Combine this damage.

SHAMBLING ZOMBIE

Tier 1 Standard
An animated corpse that moves shakily, driven only by hunger.
Motives & Tactics: Devour, hungry, mob enemy, shred flesh

Difficulty: 10 | **Thresholds:** 4/6 | **HP:** 4 | **Stress:** 1
ATK: +0 | **Bite:** Melee | 1d6+1 phy

FEATURES

Too Many to Handle - Passive: When the Zombie is within Melee range of a creature and at least one other Zombie is within Close range, all attacks against that creature have advantage.

Horrifying - Passive: Targets who mark HP from the Zombie's attacks must also mark a Stress.

ZOMBIE PACK

Tier 1 Horde (2/HP)
A group of shambling corpses instinctively moving together.
Motives & Tactics: Consume flesh, hunger, maul

Difficulty: 8 | **Thresholds:** 6/12 | **HP:** 6 | **Stress:** 3
ATK: −1 | **Bite:** Melee | 1d10+2 phy

FEATURES

Horde (1d4+2) - Passive: When the Zombies have marked half or more of their HP, their standard attack deals **1d4+2** physical damage instead.

Overwhelm - Reaction: When the Zombies mark HP from an attack within Melee range, you can **mark a Stress** to make a standard attack against the attacker.
ROTTED ZOMBIE

BRAWNY ZOMBIE

ARCHER SQUADRON

Tier 2 Horde (2/HP)
A group of trained archers bearing massive bows.
Motives & Tactics: Stick together, survive, volley fire

Difficulty: 13 | **Thresholds:** 8/16 | **HP:** 4 | **Stress:** 3
ATK: +0 | **Longbow:** Far | 2d6+3 phy

FEATURES

Horde (1d6+3) - Passive: When the Squadron has marked half or more of their HP, their standard attack deals **1d6+3** physical damage instead.

Focused Volley - Action: **Spend a Fear** to target a point within Far range. Make an attack with advantage against all targets within Close range of that point. Targets the Squadron succeeds against take **1d10+4** physical damage.

Suppressing Fire - Action: **Mark a Stress** to target a point within Far range. Until the next roll with Fear, a creature who moves within Close range of that point must make an Agility Reaction Roll. On a failure, they take **2d6+3** physical damage. On a success, they take half damage.

APPRENTICE ASSASSIN

Tier 2 Minion
A young trainee eager to prove themselves.
Motives & Tactics: Act reckless, kill, prove their worth, show off

Difficulty: 13 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: −1 | **Thrown Dagger:** Very Close | 4 phy

Experience: Intrusion +2

FEATURES

Minion (6) - Passive: The Assassin is defeated when they take any damage. For every 6 damage a PC deals to the Assassin, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Apprentice Assassins within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 4 physical damage each. Combine this damage.

ASSASSIN POISONER

Tier 2 Skulk
A cunning scoundrel skilled in both poisons and ambushing.
Motives & Tactics: Anticipate, get paid, kill, taint food and water

Difficulty: 14 | **Thresholds:** 8/16 | **HP:** 4 | **Stress:** 4
ATK: +3 | **Poisoned Throwing Dagger:** Close | 2d8+1 phy

Experience: Intrusion +2

FEATURES

Grindletooth Venom - Passive: Targets who mark HP from the Assassin's attacks are *Vulnerable* until they clear a HP.

Out of Nowhere - Passive: The Assassin has advantage on attacks if they are *Hidden*.

Fumigation - Action: Drop a smoke bomb that fills the air within Close range with smoke, *Dizzying* all targets in this area. *Dizzied* targets have disadvantage on their next action roll, then clear the condition.

APPRENTICE ASSASSIN

ASSASSIN POISONER

MASTER ASSASSIN

MASTER ASSASSIN

Tier 2 Leader
A seasoned killer with a threatening voice and a deadly blade.
Motives & Tactics: Ambush, get out alive, kill, prepare for all scenarios

Difficulty: 15 | **Thresholds:** 12/25 | **HP:** 7 | **Stress:** 5
ATK: +5 | **Serrated Dagger:** Close | 2d10+2 phy

Experience: Command +3, Intrusion +3

FEATURES

Won't See It Coming - Passive: The Assassin deals direct damage while they're *Hidden*.

Strike as One - Action: **Mark a Stress** to spotlight a number of other Assassins equal to the Assassin's unmarked Stress.

The Subtle Blade - Reaction: When the Assassin successfully makes a standard attack against a *Vulnerable* target, you can **spend a Fear** to deal Severe damage instead of their standard damage.

Momentum - Reaction: When the Assassin makes a successful attack against a PC, you gain a Fear.

BATTLE BOX

BATTLE BOX

Tier 2 Solo
A cube-shaped construct with a different rune on each of their six sides.
Motives & Tactics: Change tactics, trample foes, wait in disguise

Difficulty: 15 | **Thresholds:** 10/20 | **HP:** 8 | **Stress:** 6
ATK: +2 | **Slam:** Melee | 2d6+3 phy

Experience: Camouflage +2

FEATURES

Relentless (2) - Passive: The Box can be spotlighted up to two times times per GM turn. Spend Fear as usual to spotlight them.

Randomized Tactics - Action: **Mark a Stress** and roll a **d6**. The Box uses the corresponding move:

1. *Mana Beam.* The Box fires a searing beam. Make an attack against a target within Far range. On a success, deal **2d10+2** magic damage.
2. *Fire Jets.* The Box shoots into the air, spinning and releasing jets of flame. Make an attack against all targets within Close range. Targets the Box succeeds against take **2d8** physical damage.
3. *Trample.* The Box rockets around erratically. Make an attack against all PCs within Close range. Targets the Box succeeds against take **1d6+5** physical damage and are *Vulnerable* until their next roll with Hope.
4. *Shocking Gas.* The Box sprays out a silver gas sparking with lightning. All targets within Close range must succeed on a Finesse Reaction Roll or mark 3 Stress.
5. *Stunning Clap.* The Box leaps and their sides clap, creating a small sonic boom. All targets within Very Close range must succeed on a Strength Reaction Roll or become *Vulnerable* until the cube is defeated.
6. *Psionic Whine.* The Box releases a cluster of mechanical bees whose buzz rattles mortal minds. All targets within Close range must succeed on a Presence Reaction Roll or take **2d4+9** direct magic damage.

Overcharge - Reaction: Before rolling damage for the Box's attack, you can **mark a Stress** to add a **d6** to the damage roll. Additionally, you gain a Fear.

Death Quake - Reaction: When the Box marks their last HP, the magic powering them ruptures in an explosion of force. All targets within Close range must succeed on an Instinct Reaction Roll or take **2d8+1** magic damage.

CHAOS SKULL

CHAOS SKULL

Tier 2 Ranged
A floating humanoid skull animated by scintillating magic.
Motives & Tactics: Cackle, consume magic, serve creator

Difficulty: 15 | **Thresholds:** 8/16 | **HP:** 5 | **Stress:** 4
ATK: +2 | **Energy Blast:** Close | 2d8+3 mag

FEATURES

Levitation - Passive: The Skull levitates several feet off the ground and can't be *Restrained*.

Wards - Passive: The Skull is resistant to magic damage.

Magic Burst - Action: **Mark a Stress** to make an attack against all targets within Close range. Targets the Skull succeeds against take **2d6+4** magic damage.

Siphon Magic - Action: **Spend a Fear** to make an attack against a PC with a Spellcast trait within Very Close range. On a success, the target marks **1d4** Stress and the Skull clears that many Stress. Additionally, on a success, the Skull can immediately be spotlighted again.

CONSCRIPT

Tier 2 Minion
A poorly trained civilian pressed into war.
Motives & Tactics: Follow orders, gang up, survive

Difficulty: 12 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: +0 | **Spears:** Very Close | 6 phy

FEATURES

Minion (6) - Passive: The Conscript is defeated when they take any damage. For every 6 damage a PC deals to the Conscript, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Conscripts within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 6 physical damage each. Combine this damage.

COURTESAN

Tier 2 Social
An accomplished manipulator and master of the social arts.
Motives & Tactics: Entice, maneuver, secure patrons

Difficulty: 13 | **Thresholds:** 7/13 | **HP:** 3 | **Stress:** 4
ATK: −3 | **Dagger:** Melee | 1d4+3 phy

Experience: Manipulation +3, Socialite +3

FEATURES

Searing Glance - Reaction: When a PC within Close range makes a Presence Roll, you can **mark a Stress** to cast a gaze toward the aftermath. On the target's failure, they must mark 2 Stress and are *Vulnerable* until the scene ends or they succeed on a social action against the Courtesan. On the target's success, they must mark a Stress.

CULT ADEPT

Tier 2 Support
An experienced mage wielding shadow and fear.
Motives & Tactics: Curry favor, hinder foes, uncover knowledge

Difficulty: 14 | **Thresholds:** 9/18 | **HP:** 4 | **Stress:** 6
ATK: +2 | **Rune-Covered Rod:** Far | 2d4+3 mag

Experience: Fallen Lore +2, Rituals +2

FEATURES

Enervating Blast - Action: **Spend a Fear** to make a standard attack against a target within range. On a success, the target must mark a Stress.

Shroud of the Fallen - Action: **Mark a Stress** to wrap an ally within Close range in a shroud of *Protection* until the Adept marks their last HP. While *Protected*, the target has resistance to all damage.

Shadow Shackles - Action: **Spend a Fear** and choose a point within Far range. All targets within Close range of that point are *Restrained* in smoky chains until they break free with a successful Strength or Instinct Roll. A target *Restrained* by this feature must spend a Hope to make an action roll.

Fear Is Fuel - Reaction: Twice per scene, when a PC rolls a failure with Fear, clear a Stress.

CULT FANG

Tier 2 Skulk
A professional killer-turned-cultist.
Motives & Tactics: Capture sacrifices, isolate prey, rise in the ranks

Difficulty: 15 | **Thresholds:** 9/17 | **HP:** 4 | **Stress:** 4
ATK: +2 | **Long Knife:** Melee | 2d8+4 phy

FEATURES

Shadow's Embrace - Passive: The Fang can climb and walk on vertical surfaces. **Mark a Stress** to move from one shadow to another within Far range.

Pick Off the Straggler - Action: **Mark a Stress** to cause a target within Melee range to make an Instinct Reaction Roll. On a failure, the target must mark 2 Stress and is teleported with the Fang to a shadow within Far range, making them temporarily *Vulnerable*. On a success, the target must mark a Stress.

CULT INITIATE

Tier 2 Minion
A low-ranking cultist in simple robes, eager to gain power.
Motives & Tactics: Follow orders, gain power, seek forbidden knowledge

Difficulty: 13 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: +0 | **Ritual Dagger:** Melee | 5 phy

FEATURES

Minion (6) - Passive: The Initiate is defeated when they take any damage. For every 6 damage a PC deals to the Initiate, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Cult Initiates within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 5 physical damage each. Combine this damage.

DEMONIC HOUND PACK

DEMONIC HOUND PACK

Tier 2 Horde (1/HP)
Unnatural hounds lit from within by hellfire.
Motives & Tactics: Cause fear, consume flesh, please masters

Difficulty: 15 | **Thresholds:** 11/23 | **HP:** 6 | **Stress:** 3
ATK: +0 | **Claws and Fangs:** Melee | 2d8+2 phy

Experience: Scent Tracking +3

FEATURES

Horde (2d4+1) - Passive: When the Pack has marked half or more of their HP, their standard attack deals **2d4+1** physical damage instead.

Dreadhowl - Action: **Mark a Stress** to make all targets within Very Close range lose a Hope. If a target is not able to lose a Hope, they must instead mark 2 Stress.

Momentum - Reaction: When the Pack makes a successful attack against a PC, you gain a Fear.

ELECTRIC EELS

Tier 2 Horde (2/HP)
A swarm of eels that encircle and electrocute.
Motives & Tactics: Avoid larger predators, shock prey, tear apart

Difficulty: 14 | **Thresholds:** 10/20 | **HP:** 5 | **Stress:** 3
ATK: +0 | **Shocking Bite:** Melee | 2d6+4 phy

FEATURES

Horde (2d4+1) - Passive: When the Eels have marked half or more of their HP, their standard attack deals **2d4+1** physical damage instead.

Paralyzing Shock - Action: **Mark a Stress** to make a standard attack against all targets within Very Close range. You gain a Fear for each target that marks HP.

ELITE SOLDIER

Tier 2 Standard
An armored squire or experienced commoner looking to advance.
Motives & Tactics: Gain glory, keep order, make alliances

Difficulty: 15 | **Thresholds:** 9/18 | **HP:** 4 | **Stress:** 3
ATK: +1 | **Spear:** Very Close | 2d8+4 phy

FEATURES

Reinforce - Action: **Mark a Stress** to move into Melee range of an ally and make a standard attack against a target within Very Close range. On a success, deal **2d10+2** physical damage and the ally can clear a Stress.

Vassal's Loyalty - Reaction: When the Soldier is within Very Close range of a knight or other noble who would take damage, you can **mark a Stress** to move into Melee range of them and take the damage instead.

FAILED EXPERIMENT

Tier 2 Standard

A magical necromantic experiment gone wrong, leaving them warped and ungainly.

Motives & Tactics: Devour, hunt, track

Difficulty: 13 | **Thresholds:** 12/23 | **HP:** 3 | **Stress:** 3
ATK: +1 | **Bite and Claw:** Melee | 2d6+5 phy

Experience: Copycat +3

FEATURES

Warped Fortitude - Passive: The Experiment is resistant to physical damage.

Overwhelm - Passive: When a target the Experiment attacks has other adversaries within Very Close range, the Experiment deals double damage.

Lurching Lunge - Action: Mark a Stress to spotlight the Experiment as an additional GM move instead of spending Fear.

GIANT BEASTMASTER

Tier 2 Leader

A leather-clad warrior bearing a whip and massive bow.

Motives & Tactics: Command, make a living, maneuver, pin down, protect companion animals

Difficulty: 16 | **Thresholds:** 12/24 | **HP:** 6 | **Stress:** 5
ATK: +2 | **Longbow:** Far | 2d8+4 phy

Experience: Animal Handling +3

FEATURES

Two as One - Passive: When the Beastmaster is spotlighted, you can also spotlight a Tier 1 animal adversary currently under their control.

Pinning Strike - Action: Make a standard attack against a target. On a success, you can **mark a Stress** to pin them to a nearby surface. The pinned target is *Restrained* until they break free with a successful Finesse or Strength Roll.

Deadly Companion - Action: Twice per scene, summon a Bear, Dire Wolf, or similar Tier 1 animal adversary under the Beastmaster's control. The adversary appears at Close range and is immediately spotlighted.

GIANT BRAWLER

Tier 2 Bruiser

An especially muscular giant wielding a warhammer larger than a human.

Motives & Tactics: Make a living, overwhelm, slam, topple

Difficulty: 15 | **Thresholds:** 14/28 | **HP:** 7 | **Stress:** 4
ATK: +2 | **Warhammer:** Very Close | 2d12+3 phy

Experience: Intrusion +2

FEATURES

Battering Ram - Action: **Mark a Stress** to have the Brawler charge at an inanimate object within Close range they could feasibly smash (such as a wall, cart, or market stand) and destroy it. All targets within Very Close range of the object must succeed on an Agility Reaction Roll or take **2d4+3** physical damage from the shrapnel.

Bloody Reprisal - Reaction: When the Brawler marks 2 or more HP from an attack within Very Close range, you can make a standard attack against the attacker. On a success, the Brawler deals **2d6+15** physical damage instead of their standard damage.

Momentum - Reaction: When the Brawler makes a successful attack against a PC, you gain a Fear.

GIANT RECRUIT

Tier 2 Minion

A giant fighter wearing borrowed armor.

Motives & Tactics: Batter, make a living, overwhelm, terrify

Difficulty: 13 | **Thresholds:** None | **HP:** 1 | **Stress:** 2
ATK: +1 | **Warhammer:** Very Close | 5 phy

FEATURES

Minion (7) - Passive: The Recruit is defeated when they take any damage. For every 7 damage a PC deals to the Recruit, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Giant Recruits within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 5 physical damage each. Combine this damage.

GIANT EAGLE

Tier 2 Skulk

A giant bird of prey with blood-stained talons.

Motives & Tactics: Hunt prey, stay mobile, strike decisively

Difficulty: 14 | **Thresholds:** 8/19 | **HP:** 4 | **Stress:** 4
ATK: +1 | **Claws and Beak:** Very Close | 2d6+3 phy

FEATURES

Flight - Passive: While flying, the Eagle gains a +3 bonus to their Difficulty.

Deadly Dive - Action: **Mark a Stress** to attack a target within Far range. On a success, deal **2d10+2** physical damage and knock the target over, making them *Vulnerable* until they next act.

Take Off - Action: Make an attack against a target within Very Close range. On a success, deal **2d4+3** physical damage and the target must succeed on an Agility Reaction Roll or become temporarily *Restrained* within the Eagle's massive talons. If the target is *Restrained*, the Eagle immediately lifts into the air to Very Far range above the battlefield while holding them.

Deadly Drop - Action: While flying, the Eagle can drop a *Restrained* target they are holding. When dropped, the target is no longer *Restrained* but starts falling. If their fall isn't prevented during the PCs' next action, the target takes **2d20** physical damage when they land.

GIANT
BRAWLER

GORGON

Tier 2 Solo

A snake-headed, scaled humanoid with a gilded bow, enraged that their peace has been disturbed.

Motives & Tactics: Corner, hit-and-run, petrify, seek vengeance

Difficulty: 15 | **Thresholds:** 13/25 | **HP:** 9 | **Stress:** 3
ATK: +4 | **Sunsear Shortbow:** Far | 2d20+3 mag

Experience: Stealth +3

FEATURES

Relentless (2) - Passive: The Gorgon can be spotlighted up to two times per GM turn. Spend Fear as usual to spotlight them.

Sunsear Arrows - Passive: When the Gorgon makes a successful standard attack, the target *Glows* until the end of the scene and can't become *Hidden*. Attack rolls made against a *Glowing* target have advantage.

Crown of Serpents - Action: Make an attack roll against a target within Melee range using the Gorgon's protective snakes. On a success, **mark a Stress** to deal **2d10+4** physical damage and the target must mark a Stress.

Petrifying Gaze - Reaction: When the Gorgon takes damage from an attack within Close range, you can **spend a Fear** to force the attacker to make an Instinct Reaction Roll. On a failure, they begin to turn to stone, marking a HP and starting a Petrification Countdown (4). This countdown ticks down when the Gorgon is attacked. When it triggers, the target must make a death move. If the Gorgon is defeated, all petrification countdowns end.

Momentum - Reaction: When the Gorgon makes a successful attack against a PC, you gain a Fear.

GORGON

KNIGHT OF THE REALM

JUVENILE FLICKERFLY

JUVENILE FLICKERFLY

Tier 2 Solo

A horse-sized insect with iridescent scales and crystalline wings moving faster than the eye can see.

Motives & Tactics: Collect shiny things, hunt, swoop

Difficulty: 14 | **Thresholds:** 13/26 | **HP:** 10 | **Stress:** 5
ATK: +3 | **Wing Slash:** Very Close | 2d10+4 phy

FEATURES

Relentless (3) - Passive: The Flickerfly can be spotlighted up to three times per GM turn. Spend Fear as usual to spotlight them.

Peerless Accuracy - Passive: Before the Flickerfly makes an attack, roll a **d6**. On a result of 4 or higher, the target's Evasion is halved against this attack.

Mind Dance - Action: **Mark a Stress** to create a magically dazzling display that grapples the minds of nearby foes. All targets within Close range must make an Instinct Reaction Roll. For each target who failed, you gain a Fear and the Flickerfly learns one of the target's fears.

Hallucinatory Breath - Reaction: Countdown (Loop 1d6). When the Flickerfly takes damage for the first time, activate the countdown. When it triggers, the Flickerfly breathes hallucinatory gas on all targets in front of them up to Far range. Targets must succeed on an Instinct Reaction Roll or be tormented by fearful hallucinations. Targets whose fears are known to the Flickerfly have disadvantage on this roll. Targets who fail must mark a Stress and lose a Hope.

KNIGHT OF THE REALM

Tier 2 Leader

A decorated soldier with heavy armor and a powerful steed.

Motives & Tactics: Run down, seek glory, show dominance

Difficulty: 15 | **Thresholds:** 13/26 | **HP:** 6 | **Stress:** 4
ATK: +4 | **Longsword:** Melee | 2d10+4 phy

Experience: Ancient Knowledge +3, High Society +2, Tactics +2

FEATURES

Chevalier - Passive: While the Knight is on a mount, they gain a +2 bonus to their Difficulty. When they take Severe damage, they're knocked from their mount and lose this benefit until they're next spotlighted.

Heavily Armored - Passive: When the Knight takes physical damage, reduce it by 3.

Cavalry Charge - Action: If the Knight is mounted, move up to Far range and make a standard attack against a target. On a success, deal **2d8+4** physical damage and the target must mark a Stress.

For the Realm! - Action: **Mark a Stress** to spotlight **1d4+1** allies. Attacks they make while spotlighted in this way deal half damage.

MASKED THIEF

Tier 2 Skulk
A cunning thief with acrobatic skill and a flair for the dramatic.
Motives & Tactics: Evade, hide, pilfer, profit

Difficulty: 14 | **Thresholds:** 8/17 | **HP:** 4 | **Stress:** 5
ATK: +3 | **Backsword:** Melee | 2d8+3 phy

Experience: Acrobatics +3

FEATURES

Quick Hands - Action: Make an attack against a target within Melee range. On a success, deal **1d8+2** physical damage and the Thief steals one item or consumable from the target's inventory.

Escape Plan - Action: Mark a Stress to reveal a snare trap set anywhere on the battlefield by the Thief. All targets within Very Close range of the trap must succeed on an Agility Reaction Roll (13) or be pulled off their feet and suspended upside down. A target is *Restrained* and *Vulnerable* until they break free, ending both conditions, with a successful Finesse or Strength Roll (13).

MERCHANT BARON

Tier 2 Social
An accomplished merchant with a large operation under their command.
Motives & Tactics: Abuse power, gather resources, mobilize minions

Difficulty: 15 | **Thresholds:** 9/19 | **HP:** 5 | **Stress:** 3
ATK: −2 | **Rapier:** Melee | 1d6+2 phy

Experience: Nobility +2, Trade +2

FEATURES

Everyone Has a Price - Action: **Spend a Fear** to offer a target a dangerous bargain for something they want or need. If used on a PC, they must make a Presence Reaction Roll (17). On a failure, they must mark 2 Stress or take the deal.

The Best Muscle Money Can Buy - Action: Once per scene, **mark a Stress** to summon **1d4+1** Tier 1 adversaries, who appear at Far range, to enforce the Baron's will.

MINOTAUR WRECKER

Tier 2 Bruiser
A massive bull-headed firbolg with a quick temper.
Motives & Tactics: Consume, gore, navigate, overpower, pursue

Difficulty: 16 | **Thresholds:** 14/27 | **HP:** 7 | **Stress:** 5
ATK: +2 | **Battleaxe:** Very Close | 2d8+5 phy

Experience: Navigation +2

FEATURES

Ramp Up - Passive: You must **spend a Fear** to spotlight the Minotaur. While spotlighted, they can make their standard attack against all targets within range.

Charging Bull - Action: **Mark a Stress** to charge through a group within Close range and make an attack against all targets in the Minotaur's path. Targets the Minotaur succeeds against take **2d6+8** physical damage and are knocked back to Very Far range. If a target is knocked into a solid object or another creature, they take an extra **1d6** damage (combine the damage).

Gore - Action: Make an attack against a target within Very Close range, moving the Minotaur into Melee range of them. On a success, deal **2d8** direct physical damage.

MORTAL HUNTER

Tier 2 Leader
An undead figure wearing a heavy leather coat, with searching eyes and a casually cruel demeanor.
Motives & Tactics: Devour, hunt, track

Difficulty: 16 | **Thresholds:** 15/27 | **HP:** 6 | **Stress:** 4
ATK: +5 | **Tear at Flesh:** Very Close | 2d12+1 phy

Experience: Bloodhound +3

FEATURES

Terrifying - Passive: When the Hunter makes a successful attack, all PCs within Far range lose a Hope and you gain a Fear.

Deathlock - Action: **Spend a Fear** to curse a target within Very Close range with a necrotic *Deathlock* until the end of the scene. Attacks made by the Hunter against a *Deathlocked* target deal direct damage. The Hunter can only maintain one *Deathlock* at a time.

Inevitable Death - Action: **Mark a Stress** to spotlight **1d4** allies. Attacks they make while spotlighted in this way deal half damage.

Rampage - Reaction: *Countdown (Loop 1d6).* When the Hunter is in the spotlight for the first time, activate the countdown. When it triggers, move the Hunter in a straight line to a point within Far range and make an attack against all targets in their path. Targets the Hunter succeeds against take **2d8+2** physical damage.

ROYAL ADVISOR

Tier 2 Social
A high-ranking courtier with the ear of the local nobility.
Motives & Tactics: Curry favor, manufacture evidence, scheme

Difficulty: 14 | **Thresholds:** 8/15 | **HP:** 3 | **Stress:** 3
ATK: −3 | **Wand:** Far | 1d4+3 phy

Experience: Administration +3, Courtier +3

FEATURES

Devastating Retort - Passive: A PC who rolls less than 17 on an action roll targeting the Advisor must mark a Stress.

Bend Ears - Action: **Mark a Stress** to influence an NPC within Melee range with whispered words. That target's opinion on one matter shifts toward the Advisor's preference unless it is in direct opposition to the target's motives.

Scapegoat - Action: **Spend a Fear** to convince a crowd or notable individual that one person or group is responsible for some problem facing the target. The target becomes hostile to the scapegoat until convinced of their innocence with a successful Presence Roll (17).

MINOTAUR

SECRET-KEEPER

Tier 2 Leader
A clandestine leader with a direct channel to the Fallen Gods.
Motives & Tactics: Amass great power, plot, take command

Difficulty: 16 | **Thresholds:** 13/26 | **HP:** 7 | **Stress:** 4
ATK: +3 | **Sigil-laden Staff:** Far | 2d12 mag

Experience: Coercion +2, Fallen Lore +2

FEATURES

Seize Your Moment - Action: **Spend 2 Fear** to spotlight **1d4** allies. Attacks they make while spotlighted in this way deal half damage.

Our Master's Will - Reaction: When you spotlight an ally within Far range, **mark a Stress** to gain a Fear.

Summoning Ritual - Reaction: *Countdown (6).* When the Secret-Keeper is in the spotlight for the first time, activate the countdown. When they mark HP, tick down this countdown by the number of HP marked. When it triggers, summon a Minor Demon who appears at Close range.

Fallen Hounds - Reaction: Once per scene, when the Secret-Keeper marks 2 or more HP, you can **mark a Stress** to summon a Demonic Hound Pack, which appears at Close range and is immediately spotlighted.

SHARK

Tier 2 Bruiser
A large aquatic predator, always on the move.
Motives & Tactics: Find the blood, isolate prey, target the weak

Difficulty: 14 | **Thresholds:** 14/28 | **HP:** 7 | **Stress:** 3
ATK: +2 | **Toothy Maw:** Very Close | 2d12+1 phy

Experience: Sense of Smell +3

FEATURES

Terrifying - Passive: When the Shark makes a successful attack, all PCs within Far range lose a Hope and you gain a Fear.

Rending Bite - Passive: When the Shark makes a successful attack, the target must mark an Armor Slot without receiving its benefits (they can still use armor to reduce the damage). If they can't mark an Armor Slot, they must mark an additional HP.

Blood in the Water - Reaction: When a creature within Close range of the Shark marks HP from another creature's attack, you can **mark a Stress** to immediately spotlight the Shark, moving them into Melee range of the target and making a standard attack.

SIREN

Tier 2 Skulk
A half-fish person with shimmering scales and an irresistible voice.
Motives & Tactics: Consume, lure prey, subdue with song

Difficulty: 14 | **Thresholds:** 9/18 | **HP:** 5 | **Stress:** 3
ATK: +2 | **Distended Jaw Bite:** Melee | 2d6+3 phy

Experience: Song Repertoire +3

FEATURES

Captive Audience - Passive: If the Siren makes a standard attack against a target *Entranced* by their song, the attack deals **2d10+1** damage instead of their standard damage.

Enchanting Song - Action: **Spend a Fear** to sing a song that affects all targets within Close range. Targets must succeed on an Instinct Reaction Roll or become *Entranced* until they mark 2 Stress. Other Sirens within Close range of the target can **mark a Stress** to each add a +1 bonus to the Difficulty of the reaction roll. While *Entranced*, a target can't act and is *Vulnerable*.

SPECTRAL ARCHER

Tier 2 Ranged
A ghostly fighter with an ethereal bow, unable to move on while their charge is vulnerable.
Motives & Tactics: Move through solid objects, stay out of the fray, rehash old battles

Difficulty: 13 | **Thresholds:** 6/14 | **HP:** 3 | **Stress:** 3
ATK: +3 | **Longbow:** Far | 2d10+2 phy

Experience: Ancient Knowledge +2

FEATURES

Ghost - Passive: The Archer has resistance to physical damage. **Mark a Stress** to move up to Close range through solid objects.

Pick Your Target - Action: **Spend a Fear** to make an attack within Far range against a PC who is within Very Close range of at least two other PCs. On a success, the target takes **2d8+12** physical damage.

SPECTRAL CAPTAIN

Tier 2 Leader
A ghostly commander leading their troops beyond death.
Motives & Tactics: Move through solid objects, rally troops, rehash old battles

Difficulty: 16 | **Thresholds:** 13/26 | **HP:** 6 | **Stress:** 4
ATK: +3 | **Longbow:** Far | 2d10+3 phy

Experience: Ancient Knowledge +3

FEATURES

Ghost - Passive: The Captain has resistance to physical damage. **Mark a Stress** to move up to Close range through solid objects.

Unending Battle - Action: **Spend 2 Fear** to return up to **1d4+1** defeated Spectral allies to the battle at the points where they first appeared (with no marked HP or Stress).

Hold Fast - Reaction: When the Captain's Spectral allies are forced to make a reaction roll, you can **mark a Stress** to give those allies a +2 bonus to the roll.

Momentum - Reaction: When the Captain makes a successful attack against a PC, you gain a Fear.

SPECTRAL GUARDIAN

Tier 2 Standard
A ghostly fighter with spears and swords, anchored by duty.
Motives & Tactics: Move through solid objects, protect treasure, rehash old battles

Difficulty: 15 | **Thresholds:** 7/15 | **HP:** 4 | **Stress:** 3
ATK: +1 | **Spear:** Very Close | 2d8+1 phy

Experience: Ancient Knowledge +2

FEATURES

Ghost - Passive: The Guardian has resistance to physical damage. **Mark a Stress** to move up to Close range through solid objects.

Grave Blade - Action: **Spend a Fear** to make an attack against a target within Very Close range. On a success, deal **2d10+6** physical damage and the target must mark a Stress.

SPY

Tier 2 Social

A skilled espionage agent with a knack for being in the right place to overhear secrets.

Motives & Tactics: Cut and run, disguise appearance, eavesdrop

Difficulty: 15 | **Thresholds:** 8/17 | **HP:** 4 | **Stress:** 3
ATK: −2 | **Dagger:** Melee | 2d6+3 phy

Experience: Espionage +3

FEATURES

Gathering Secrets - Action: **Spend a Fear** to describe how the Spy knows a secret about a PC in the scene.

Fly on the Wall - Reaction: When a PC or group is discussing something sensitive, you can **mark a Stress** to reveal that the Spy is present in the scene, observing them. If the Spy escapes the scene to report their findings, you gain **1d4** Fear.

WAR WIZARD

STONEWRAITH

Tier 2 Skulk

A prowling hunter, like a slinking mountain lion, with a slate-gray stone body.

Motives & Tactics: Defend territory, isolate prey, stalk

Difficulty: 13 | **Thresholds:** 11/22 | **HP:** 6 | **Stress:** 3
ATK: +3 | **Bite and Claws:** Melee | 2d8+6 phy

Experience: Stonesense +3

FEATURES

Stonestrider - Passive: The Stonewraith can move through stone and earth as easily as air. While within stone or earth, they are *Hidden* and immune to all damage.

Rocky Ambush - Action: While *Hidden*, **mark a Stress** to leap into Melee range with a target within Very Close range. The target must succeed on an Agility or Instinct Reaction Roll (15) or take **2d8** physical damage and become temporarily *Restrained*.

Avalanche Roar - Action: **Spend a Fear** to roar while within a cave and cause a cave-in. All targets within Close range must succeed on an Agility Reaction Roll (14) or take **2d10** physical damage. The rubble can be cleared with a Progress Countdown (8).

Momentum - Reaction: When the Stonewraith makes a successful attack against a PC, you gain a Fear.

WAR WIZARD

Tier 2 Ranged

A battle-hardened mage trained in destructive magic.

Motives & Tactics: Develop new spells, seek power, shatter formations

Difficulty: 16 | **Thresholds:** 11/23 | **HP:** 5 | **Stress:** 6
ATK: +4 | **Staff:** Far | 2d10+4 mag

Experience: Magical Knowledge +2, Strategize +2

FEATURES

Battle Teleport - Passive: Before or after making a standard attack, you can **mark a Stress** to teleport to a location within Far range.

Refresh Warding Sphere - Action: **Mark a Stress** to refresh the Wizard's "Warding Sphere" reaction.

Eruption - Action: **Spend a Fear** and choose a point within Far range. A Very Close area around that point erupts into impassable terrain. All targets within that area must make an Agility Reaction Roll (14). Targets who fail take **2d10** physical damage and are thrown out of the area. Targets who succeed take half damage and aren't moved.

Arcane Artillery - Action: **Spend a Fear** to unleash a precise hail of magical blasts. All targets in the scene must make an Agility Reaction Roll. Targets who fail take **2d12** magic damage. Targets who succeed take half damage.

Warding Sphere - Reaction: When the Wizard takes damage from an attack within Close range, deal **2d6** magic damage to the attacker. This reaction can't be used again until the Wizard refreshes it with their "Refresh Warding Sphere" action.

STONEWRAITH

ADULT FLICKERFLY

Tier 3 Solo

A winged insect the size of a large house with iridescent scales and wings that move too fast to track.

Motives & Tactics: Collect shiny things, hunt, nest, swoop

Difficulty: 17 | **Thresholds:** 20/35 | **HP:** 12 | **Stress:** 6
ATK: +3 | **Wing Slash:** Very Close | 3d20 phy

FEATURES

Relentless (4) - Passive: The Flickerfly can be spotlighted up to four times per GM turn. Spend Fear as usual to spotlight them.

Never Misses - Passive: When the Flickerfly makes an attack, the target's Evasion is halved against the attack.

Deadly Flight - Passive: While flying, the Flickerfly can move up to Far range instead of Close range before taking an action.

Whirlwind - Action: **Spend a Fear** to whirl, making an attack against all targets within Very Close range. Targets the Flickerfly succeeds against take **3d8** direct physical damage.

Mind Dance - Action: **Mark a Stress** to create a magically dazzling display that grapples the minds of nearby foes. All targets within Close range must make an Instinct Reaction Roll. For each target who failed, you gain a Fear and the Flickerfly learns one of the target's fears.

Hallucinatory Breath - Action: *Countdown (Loop 1d6).* When the Flickerfly takes damage for the first time, activate the countdown. When it triggers, the Flickerfly breathes hallucinatory gas on all targets in front of them up to Far range. Targets must make an Instinct Reaction Roll or be tormented by fearful hallucinations. Targets whose fears are known to the Flickerfly have disadvantage on this roll. Targets who fail lose 2 Hope and take **3d8+3** direct magic damage.

Uncanny Reflexes - Reaction: When the Flickerfly takes damage from an attack within Close range, you can **mark a Stress** to take half damage.

ADULT FLICKERFLY

DEMON OF AVARICE

Tier 3 Support

A regal cloaked monstrosity with circular horns adorned with treasure.

Motives & Tactics: Consume, fuel greed, sow dissent

Difficulty: 17 | **Thresholds:** 15/29 | **HP:** 6 | **Stress:** 5
ATK: +2 | **Hungry Maw:** Melee | 3d6+5 mag

Experience: Manipulation +3

FEATURES

Money Talks - Passive: Attacks against the Demon are made with disadvantage unless the attacker spends a handful of gold. This Demon starts with a number of handfuls equal to the number of PCs. When a target marks HP from the Demon's standard attack, they can spend a handful of gold instead of marking HP (1 handful per HP). Add a handful of gold to the Demon for each handful of gold spent by PCs on this feature.

Numbers Must Go Up - Passive: Add a bonus to the Demon's attack rolls equal to the number of handfuls of gold they have.

Money Is Time - Action: **Spend 3 handfuls of gold (or a Fear)** to spotlight **1d4+1** allies.

DEMON
OF AVARICE

DEMON OF DESPAIR

Tier 3 Skulk

A cloaked demon-creature with long limbs, seeping shadows.

Motives & Tactics: Make fear contagious, stick to the shadows, undermine resolve

Difficulty: 17 | **Thresholds:** 18/35 | **HP:** 6 | **Stress:** 5
ATK: +3 | **Miasma Bolt:** Far | 3d6+1 mag

Experience: Manipulation +3

FEATURES

Depths of Despair - Passive: The Demon deals double damage to PCs with 0 Hope.

Your Struggle Is Pointless - Action: **Spend a Fear** to weigh down the spirits of all PCs within Far range. All targets affected replace their Hope Die with a **d8** until they roll a success with Hope or their next rest.

Your Friends Will Fail You - Reaction: When a PC fails with Fear, you can **mark a Stress** to cause all other PCs within Close range to lose a Hope.

Momentum - Reaction: When the Demon makes a successful attack against a PC, you gain a Fear.

DEMON
OF DESPAIR

DEMON OF WRATH

DEMON OF WRATH

Tier 3 Bruiser
A hulking demon with boulder-sized fists, driven by endless rage.
Motives & Tactics: Fuel anger, impress rivals, wreak havoc

Difficulty: 17	Thresholds: 22/40	HP: 7	Stress: 5
ATK: +3	**Fists:** Very Close	3d8+1 mag	
Experience: Intimidation +2			

FEATURES

Anger Unrelenting - Passive: The Demon's attacks deal direct damage.

Battle Lust - Action: **Spend a Fear** to boil the blood of all PCs within Far range. They use a d20 as their Fear Die until the end of the scene.

Retaliation - Reaction: When the Demon takes damage from an attack within Close range, you can **mark a Stress** to make a standard attack against the attacker.

Blood and Souls - Reaction: Countdown (Loop 6). Activate the first time an attack is made within sight of the Demon. It ticks down when a PC takes a violent action. When it triggers, summon **1d4** Minor Demons, who appear at Close range.

DEMON OF HUBRIS

Tier 3 Leader
A perfectly beautiful and infinitely cruel demon with a gleaming spear and elegant robes.
Motives & Tactics: Condescend, declare premature victory, prove superiority

Difficulty: 18	Thresholds: 18/36	HP: 7	Stress: 5
ATK: +4	**Perfect Spear:** Very Close	3d10 phy	
Experience: Manipulation +2			

FEATURES

Terrifying - Passive: When the Demon makes a successful attack, all PCs within Far range must lose a Hope and you gain a Fear.

Double or Nothing - Passive: When a PC within Far range fails a roll, they can choose to reroll their Fear Die and take the new result. If they still fail, they mark 2 Stress and the Demon clears a Stress.

Unparalleled Skill - Action: **Mark a Stress** to deal the Demon's standard attack damage to a target within Close range.

The Root of Villainy - Action: **Spend a Fear** to spotlight two other Demons within Far range.

You Pale in Comparison - Reaction: When a PC fails a roll within Close range of the Demon, they must mark a Stress.

DEMON OF HUBRIS

DEMON OF JEALOUSY

DEMON OF JEALOUSY

Tier 3 Ranged
A fickle creature of spindly limbs and insatiable desires.
Motives & Tactics: Join in on others' success, take what belongs to others, hold grudges

Difficulty: 17	Thresholds: 17/30	HP: 6	Stress: 6
ATK: +4	**Psychic Assault:** Far	3d8+3 mag	
Experience: Manipulation +3			

FEATURES

Unprotected Mind - Passive: The Demon's standard attack deals direct damage.

My Turn - Reaction: When the Demon marks HP from an attack, **spend a number of Fear equal to the HP marked by the Demon** to cause the attacker to mark the same number of HP.

Rivalry - Reaction: When a creature within Close range takes damage from a different adversary, you can **mark a Stress** to add a **d4** to the damage roll.

What's Yours Is Mine - Reaction: When a PC takes Severe damage within Very Close range of the Demon, you can **spend a Fear** to cause the target to make a Finesse Reaction Roll. On a failure, the Demon seizes one item or consumable of their choice from the target's inventory.

GREATER EARTH ELEMENTAL

DIRE BAT

Tier 3 Skulk
A wide-winged pet endlessly loyal to their vampire owner.
Motives & Tactics: Dive-bomb, hide, protect leader

Difficulty: 14 | **Thresholds:** 16/30 | **HP:** 5 | **Stress:** 3
ATK: +2 | **Claws and Teeth:** Melee | 2d6+7 phy

Experience: Bloodthirsty +3

FEATURES

Flying - Passive: While flying, the Bat gains a +3 bonus to their Difficulty.

Screech - Action: **Mark a Stress** to send a high-pitch screech out toward all targets in front of the Bat within Far range. Those targets must mark **1d4** Stress.

Guardian - Reaction: When an allied Vampire marks HP, you can **mark a Stress** to fly into Melee range of the attacker and make an attack with advantage against them. On a success, deal **2d6+2** physical damage.

DRYAD

Tier 3 Leader
A nature spirit in the form of a humanoid tree.
Motives & Tactics: Command, cultivate, drive out, preserve the forest

Difficulty: 16 | **Thresholds:** 24/38 | **HP:** 8 | **Stress:** 5
ATK: +4 | **Deadfall Shortbow:** Far | 3d10+1 phy

Experience: Forest Knowledge +4

FEATURES

Bramble Patch - Action: **Mark a Stress** to target a point within Far range. Create a patch of thorns that covers an area within Close range of that point. All targets within that area take **2d6+2** physical damage when they act. A target must succeed on a Finesse Roll or deal more than 20 damage to the Dryad with an attack to leave the area.

Grow Saplings - Action: **Spend a Fear** to grow three Treant Sapling Minions, who appear at Close range and immediately take the spotlight.

We Are All One - Reaction: When an ally dies within Close range, you can **spend a Fear** to clear 2 HP and 2 Stress as the fallen ally's life force is returned to the forest.

ELEMENTAL SPARK

Tier 3 Minion
A blazing mote of elemental fire.
Motives & Tactics: Blast, consume, gain mass

Difficulty: 15 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: +0 | **Bursts of Fire:** Close | 5 mag

FEATURES

Minion (9) - Passive: The Elemental is defeated when they take any damage. For every 9 damage a PC deals to the Elemental, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Elemental Sparks within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 5 physical damage each. Combine this damage.

GREATER EARTH ELEMENTAL

Tier 3 Bruiser
A living landslide of boulders and dust, as large as a house.
Motives & Tactics: Avalanche, knock over, pummel

Difficulty: 17 | **Thresholds:** 22/40 | **HP:** 10 | **Stress:** 4
ATK: +7 | **Boulder Fist:** Very Close | 3d10+1 phy

FEATURES

Slow - Passive: When you spotlight the Elemental and they don't have a token on their stat block, they can't act yet. Place a token on their stat block and describe what they're preparing to do. When you spotlight the Elemental and they have a token on their stat block, clear the token and they can act.

Crushing Blows - Passive: When the Elemental makes a successful attack, the target must mark an Armor Slot without receiving its benefits (they can still use armor to reduce the damage). If they can't mark an Armor Slot, they must mark an additional HP.

Immovable Object - Passive: An attack that would move the Elemental moves them two fewer ranges (for example, Far becomes Very Close). When the Elemental takes physical damage, reduce it by 7.

Rockslide - Action: **Mark a Stress** to create a rockslide that buries the land in front of Elemental within Close range with rockfall. All targets in this area must make an Agility Reaction Roll (19). Targets who fail take **2d12+5** physical damage and become *Vulnerable* until their next roll with Hope. Targets who succeed take half damage.

Momentum - Reaction: When the Elemental makes a successful attack against a PC, you gain a Fear.

GREATER WATER ELEMENTAL

Tier 3 Support
A huge living wave that crashes down upon enemies.
Motives & Tactics: Deluge, disperse, drown

Difficulty: 17 | **Thresholds:** 17/34 | **HP:** 5 | **Stress:** 5
ATK: +3 | **Crashing Wave:** Very Close | 3d4+1 mag

FEATURES

Water Jet - Action: **Mark a Stress** to attack a target within Very Close range. On a success, deal **2d4+7** physical damage and the target's next action has disadvantage. On a failure, the target must mark a Stress.

Drowning Embrace - Action: **Spend a Fear** to make an attack against all targets within Very Close range. Targets the Elemental succeeds against become *Restrained* and *Vulnerable* as they begin drowning. A target can break free, ending both conditions, with a successful Strength or Instinct Roll.

High Tide - Reaction: When the Elemental makes a successful standard attack, you can **mark a Stress** to knock the target back to Close range.

HUGE GREEN OOZE

Tier 3 Skulk

A translucent green mound of acid taller than most humans.

Motives & Tactics: Camouflage, creep up, envelop, multiply

Difficulty: 15 | **Thresholds:** 15/30 | **HP:** 7 | **Stress:** 4	
ATK: +3 | **Ooze Appendage:** Melee | 3d8+1 mag	
Experience: Blend In +3	

FEATURES

Slow - Passive: When you spotlight the Ooze and they don't have a token on their stat block, they can't act yet. Place a token on their stat block and describe what they're preparing to do. When you spotlight the Ooze and they have a token on their stat block, clear the token and they can act.

Acidic Form - Passive: When the Ooze makes a successful attack, the target must mark an Armor Slot without receiving its benefits (they can still use armor to reduce the damage). If they can't mark an Armor Slot, they must mark an additional HP.

Envelop - Action: Make an attack against a target within Melee range. On a success, the Ooze *Envelops* them and the target must mark 2 Stress. While *Enveloped*, the target must mark an additional Stress every time they make an action roll. When the Ooze takes Severe damage, all *Enveloped* targets are freed and the condition is cleared.

Split - Reaction: When the Ooze has 4 or more HP marked, you can **spend a Fear** to split them into two Green Oozes (with no marked HP or Stress). Immediately spotlight both of them.

HYDRA

Tier 3 Solo

A quadrupedal scaled beast with multiple long-necked heads, each filled with menacing fangs.

Motives & Tactics: Devour, regenerate, terrify

Difficulty: 18 | **Thresholds:** 19/35 | **HP:** 10 | **Stress:** 5	
ATK: +3 | **Bite:** Close | 2d12+2 phy	

FEATURES

Many-Headed Menace - Passive: The Hydra begins with three heads and can have up to five. When the Hydra takes Major or greater damage, they lose a head.

Relentless (X) - Passive: The Hydra can be spotlighted X times per GM turn, where X is the Hydra's number of heads. Spend Fear as usual to spotlight them.

Regeneration - Action: If the Hydra has any marked HP, **spend a Fear** to clear a HP and grow two heads.

Terrifying Chorus - Action: All PCs within Far range lose 2 Hope.

Magical Weakness - Reaction: When the Hydra takes magic damage, they become *Dazed* until the next roll with Fear. While *Dazed*, they can't use their Regeneration action but are immune to magic damage.

MONARCH

Tier 3 Social

The sovereign ruler of a nation, wreathed in the privilege of tradition and wielding unmatched power in their domain.

Motives & Tactics: Control vassals, destroy rivals, forge a legacy

Difficulty: 16 | **Thresholds:** 16/32 | **HP:** 6 | **Stress:** 5	
ATK: +0 | **Warhammer:** Melee | 3d6+3 phy	
Experience: History +3, Nobility +3	

FEATURES

Execute Them! - Action: **Spend a Fear** per PC in the party to have the group condemned for crimes real or imagined. A PC who succeeds on a Presence Roll can demand trial by combat or another special form of trial.

Crownsguard - Action: Once per scene, **mark a Stress** to summon six Tier 3 Minions, who appear at Close range to enforce the Monarch's will.

Casus Belli - Reaction: Long-Term Countdown (8). **Spend a Fear** to activate after the Monarch's desire for war is first revealed. When it triggers, the Monarch has a reason to rally the nation to war and the support to act on that reason. You gain **1d4** Fear.

STAG KNIGHT

Tier 3 Standard

A knight with huge, majestic antlers wearing armor made of dangerous thorns.

Motives & Tactics: Isolate, maneuver, protect the forest, weed the unwelcome

Difficulty: 17 | **Thresholds:** 19/36 | **HP:** 7 | **Stress:** 5	
ATK: +3 | **Bramble Sword:** Melee | 3d8+3 phy	
Experience: Forest Knowledge +3	

FEATURES

From Above - Passive: When the Knight succeeds on a standard attack from above a target, they deal **3d12+3** physical damage instead of their standard damage.

Blade of the Forest - Action: **Spend a Fear** to make an attack against all targets within Very Close range. Targets the Knight succeeds against take physical damage equal to **3d4** + the target's Major threshold.

Thorny Armor - Reaction: When the Knight takes damage from an attack within Melee range, you can **mark a Stress** to deal **1d10+5** physical damage to the attacker.
HYDRA

OAK TREANT

Tier 3 Bruiser

A sturdy animate old-growth tree.

Motives & Tactics: Hide in plain sight, preserve the forest, root down, swing branches

Difficulty: 17 | **Thresholds:** 22/40 | **HP:** 7 | **Stress:** 4
ATK: +2 | **Branch:** Very Close | 3d8+2 phy

Experience: Forest Knowledge +3

FEATURES

Just a Tree - Passive: Before they make their first attack in a fight or after they become *Hidden*, the Treant is indistinguishable from other trees until they next act or a PC succeeds on an Instinct Roll to identify them.

Seed Barrage - Action: **Mark a Stress** and make an attack against up to three targets within Close range, pummeling them with giant acorns. Targets the Treant succeeds against take **2d10+5** physical damage.

Take Root - Action: **Mark a Stress** to *Root* the Treant in place. The Treant is *Restrained* while *Rooted*, and can end this effect instead of moving while they are spotlighted. While Rooted, the Treant has resistance to physical damage.

TREANT SAPLING

Tier 3 Minion

A small, sentient tree sapling.

Motives & Tactics: Blend in, preserve the forest, pummel, surround

Difficulty: 14 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: +0 | **Branches:** Melee | 8 phy

FEATURES

Minion (6) - Passive: The Sapling is defeated when they take any damage. For every 6 damage a PC deals to the Sapling, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Treant Saplings within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 8 physical damage each. Combine this damage.

HEAD VAMPIRE

Tier 3 Leader

A captivating undead dressed in aristocratic finery.

Motives & Tactics: Create thralls, charm, command, fly, intimidate

Difficulty: 17 | **Thresholds:** 22/42 | **HP:** 6 | **Stress:** 6
ATK: +5 | **Rapier:** Melee | 2d20+4 phy

Experience: Aristocrat +3

FEATURES

Terrifying - Passive: When the Vampire makes a successful attack, all PCs within Far range lose a Hope and you gain a Fear.

Look into My Eyes - Passive: A creature who moves into Melee range of the Vampire must make an Instinct Reaction Roll. On a failure, you gain **1d4** Fear.

Feed on Followers - Action: When the Vampire is within Melee range of an ally, they can cause the ally to mark a HP. The Vampire then clears a HP.

The Hunt Is On - Action: **Spend 2 Fear** to summon **1d4** Vampires, who appear at Far range and immediately take the spotlight.

Lifesuck - Reaction: When the Vampire is spotlighted, roll a **d8**. On a result of 6 or higher, all targets within Very Close range must mark a HP.

VAMPIRE

Tier 3 Standard

An intelligent undead with blood-stained lips and a predator's smile.

Motives & Tactics: Bite, charm, deceive, feed, intimidate

Difficulty: 16 | **Thresholds:** 18/35 | **HP:** 5 | **Stress:** 4
ATK: +3 | **Rapier:** Melee | 3d8 phy

Experience: Nocturnal Hunter +3

FEATURES

Draining Bite - Action: Make an attack against a target within Melee range. On a success, deal **5d4** physical damage. A target who marks HP from this attack loses a Hope and must mark a Stress. The Vampire then clears a HP.

Mistform - Reaction: When the Vampire takes physical damage, you can **spend a Fear** to take half damage.

VAULT GUARDIAN GAOLER

Tier 3 Support

A boxy, dust-covered construct with thick metallic swinging doors on their torso.

Motives & Tactics: Carry away, entrap, protect, pummel

Difficulty: 16 | **Thresholds:** 19/33 | **HP:** 5 | **Stress:** 3
ATK: +2 | **Body Bash:** Very Close | 3d6+2 phy

FEATURES

Blocking Shield - Passive: Creatures within Melee range of the Gaoler have disadvantage on attack rolls against them. Creatures trapped inside the Gaoler are immune to this feature.

Lock Up - Action: **Mark a Stress** to make an attack against a target within Very Close range. On a success, the target is *Restrained* within the Gaoler until freed with a successful Strength Roll (18). While *Restrained*, the target can only attack the Gaoler.

VAULT GUARDIAN SENTINEL

Tier 3 Bruiser

A dust-covered golden construct with boxy limbs and a huge mace for a hand.

Motives & Tactics: Destroy at any cost, expunge, protect

Difficulty: 17 | **Thresholds:** 21/40 | **HP:** 6 | **Stress:** 3
ATK: +3 | **Charged Mace:** Very Close | 2d12+1 phy

FEATURES

Kinetic Slam - Passive: Targets who take damage from the Sentinel's standard attack are knocked back to Very Close range.

Box In - Action: **Mark a Stress** to choose a target within Very Close range to focus on. That target has disadvantage on attack rolls when they're within Very Close range of the Sentinel. The Sentinel can only focus on one target at a time.

Mana Bolt - Action: **Spend a Fear** to lob explosive magic at a point within Far range. All targets within Very Close range of that point must make an Agility Reaction Roll. Targets who fail take **2d8+20** magic damage and are knocked back to Close range. Targets who succeed take half damage and aren't knocked back.

Momentum - Reaction: When the Sentinel makes a successful attack against a PC, you gain a Fear.

Vault Guardian Turret

Dire Bat

Head Vampire

Young Ice Dragon

VAULT GUARDIAN TURRET

Tier 3 Ranged

A massive living turret with reinforced armor and twelve piston-driven mechanical legs.

Motives & Tactics: Concentrate fire, lock down, mark, protect

Difficulty: 16 | **Thresholds:** 20/32 | **HP:** 5 | **Stress:** 4
ATK: +3 | **Magitech Cannon:** Far | 3d10+3 mag

FEATURES

Slow Firing - Passive: When you spotlight the Turret and they don't have a token on their stat block, they can't make a standard attack. Place a token on their stat block and describe what they're preparing to do. When you spotlight the Turret and they have a token on their stat block, clear the token and they can attack.

Mark Target - Action: **Spend a Fear** to *Mark* a target within Far range until the Turret is destroyed or the *Marked* target becomes *Hidden*. While the target is *Marked*, their Evasion is halved.

Concentrate Fire - Reaction: When another adversary deals damage to a target within Far range of the Turret, you can **mark a Stress** to add the Turret's standard attack damage to the damage roll.

Detonation - Reaction: When the Turret is destroyed, they explode. All targets within Close range must make an Agility Reaction Roll. Targets who fail take **3d20** physical damage. Targets who succeed take half damage.

YOUNG ICE DRAGON

Tier 3 Solo

A glacier-blue dragon with four powerful limbs and frost-tinged wings.

Motives & Tactics: Avalanche, defend lair, fly, freeze, defend what is mine, maul

Difficulty: 18 | **Thresholds:** 21/41 | **HP:** 10 | **Stress:** 6
ATK: +7 | **Bite and Claws:** Close | 4d10 phy

Experience: Protect What Is Mine +3

FEATURES

Relentless (3) - Passive: The Dragon can be spotlighted up to three times per GM turn. Spend Fear as usual to spotlight them.

Rend and Crush - Passive: If a target damaged by the Dragon doesn't mark an Armor Slot to reduce the damage, they must mark a Stress.

No Hope - Passive: When a PC rolls with Fear while within Far range of the Dragon, they lose a Hope.

Blizzard Breath - Action: **Spend 2 Fear** to release an icy whorl in front of the Dragon within Close range. All targets in this area must make an Agility Reaction Roll. Targets who fail take **4d6+5** magic damage and are *Restrained* by ice until they break free with a successful Strength Roll. Targets who succeed must mark 2 Stress or take half damage.

Avalanche - Action: **Spend a Fear** to have the Dragon unleash a huge downfall of snow and ice, covering all other creatures within Far range. All targets within this area must succeed on an Instinct Reaction Roll or be buried in snow and rocks, becoming *Vulnerable* until they dig themselves out from the debris. For each PC that fails the reaction roll, you gain a Fear.

Frozen Scales - Reaction: When a creature makes a successful attack against the Dragon from within Very Close range, they must mark a Stress and become *Chilled* until their next rest or they clear a Stress. While they are *Chilled*, they have disadvantage on attack rolls.

Momentum - Reaction: When the Dragon makes a successful attack against a PC, you gain a Fear.

ARCH-NECROMANCER

Tier 4 Leader
A decaying mage adorned in dark, tattered robes.
Motives & Tactics: Corrupt, decay, flee to fight another day, resurrect

Difficulty: 21 | **Thresholds:** 33/66 | **HP:** 9 | **Stress:** 8
ATK: +6 | **Necrotic Blast:** Far | 4d12+8 mag

Experience: Forbidden Knowledge +3, Wisdom of Centuries +3

FEATURES

Dance of Death - Action: **Mark a Stress** to spotlight **1d4** allies. Attacks they make while spotlighted in this way deal half damage, or full damage if you **spend a Fear**.

Beam of Decay - Action: **Mark 2 Stress** to cause all targets within Far range to make a Strength Reaction Roll. Targets who fail take **2d20+12** magic damage and you gain a Fear. Targets who succeed take half damage. A target who marks 2 or more HP must also mark **2 Stress** and becomes *Vulnerable* until they roll with Hope.

Open the Gates of Death - Action: **Spend a Fear** to summon a Zombie Legion, which appears at Close range and immediately takes the spotlight.

Not Today, My Dears - Reaction: When the Necromancer has marked 7 or more of their HP, you can **spend a Fear** to have them teleport away to a safe location to recover. A PC who succeeds on an Instinct Roll can trace the teleportation magic to their destination.

Your Life Is Mine - Reaction: *Countdown (Loop 2d6).* When the Necromancer has marked 6 or more of their HP, activate the countdown. When it triggers, deal **2d10+6** direct magic damage to a target within Close range. The Necromancer then **clears a number of Stress or HP** equal to the number of HP marked by the target from this attack.

FALLEN SHOCK TROOP

Tier 4 Minion
A cursed soul bound to the Fallen's will.
Motives & Tactics: Crush, dominate, earn relief, punish

Difficulty: 18 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: +2 | **Cursed Axe:** Very Close | 12 phy

FEATURES

Minion (12) - Passive: The Shock Troop is defeated when they take any damage. For every 12 damage a PC deals to the Shock Troop, defeat an additional Minion within range the attack would succeed against.

Aura of Doom - Passive: When a PC marks HP from an attack by the Shock Troop, they lose a Hope.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Fallen Shock Troops within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 12 physical damage each. Combine this damage.

FALLEN SORCERER

Tier 4 Support
A powerful mage bound by the bargains they made in life.
Motives & Tactics: Acquire, dishearten, dominate, torment

Difficulty: 19 | **Thresholds:** 26/42 | **HP:** 6 | **Stress:** 5
ATK: +4 | **Corrupted Staff:** Far | 4d6+10 mag

Experience: Ancient Knowledge +2

FEATURES

Conflagration - Action: **Spend a Fear** to unleash an all-consuming firestorm and make an attack against all targets within Close range. Targets the Sorcerer succeeds against take **2d10+6** direct magic damage.

Nightmare Tableau - Action: **Mark a Stress** to trap a target within Far range in a powerful illusion of their worst fears. While trapped, the target is *Restrained* and *Vulnerable* until they break free, ending both conditions, with a successful Instinct Roll.

Slippery - Reaction: When the Sorcerer takes damage from an attack, they can teleport up to Far range.

Shackles of Guilt - Reaction: *Countdown (Loop 2d6).* When the Sorcerer is in the spotlight for the first time, activate the countdown. When it triggers, all targets within Far range become *Vulnerable* and must mark a Stress as they relive their greatest regrets. A target can break free from their regret with a successful Presence or Strength Roll. When a PC fails to break free, they lose a Hope.
ARCH-NECROMANCER

FALLEN WARLORD:
REALM-BREAKER

FALLEN WARLORD:
UNDEFEATED CHAMPION

FALLEN WARLORD: REALM-BREAKER

Tier 4 Solo
A Fallen God, wreathed in rage and resentment, bearing millennia of experience in breaking heroes' spirits.
Motives & Tactics: Corrupt, dominate, punish, break the weak

Difficulty: 20 | **Thresholds:** 36/66 | **HP:** 8 | **Stress:** 5
ATK: +7 | **Barbed Whip:** Close | 4d8+7 phy

Experience: Conquest +3, History +2, Intimidation +3

FEATURES

Relentless (2) - Passive: The Realm-Breaker can be spotlighted up to two times per GM turn. Spend Fear as usual to spotlight them.

Firespite Plate Armor - Passive: When the Realm-Breaker takes damage, reduce it by **2d10**.

Tormenting Lash - Action: **Mark a Stress** to make a standard attack against all targets within Very Close range. When a target uses armor to reduce damage from this attack, they must mark 2 Armor Slots.

All-Consuming Rage - Reaction: *Countdown (Decreasing 8).* When the Realm-Breaker is in the spotlight for the first time, activate the countdown. When it triggers, create a torrent of incarnate rage that rends flesh from bone. All targets within Far range must make a Presence Reaction Roll. Targets who fail take **2d6+10** direct magic damage. Targets who succeed take half damage. For each HP marked from this damage, summon a Fallen Shock Troop within Very Close range of the target who marked that HP. If the countdown ever decreases its maximum value to 0, the Realm-Breaker marks their remaining HP and all targets within Far range must mark all remaining HP and make a death move.

Doombringer - Reaction: When a target marks HP from an attack by the Realm-Breaker, all PCs within Far range of the target must lose a Hope.

I Have Never Known Defeat (Phase Change) - Reaction: When the Realm-Breaker marks their last HP, replace them with the Undefeated Champion and immediately spotlight them.

FALLEN WARLORD: UNDEFEATED CHAMPION

Tier 4 Solo
That which only the most feared have a chance to fear.
Motives & Tactics: Dispatch merciless death, punish the defiant, secure victory at any cost

Difficulty: 18 | **Thresholds:** 35/58 | **HP:** 11 | **Stress:** 5
ATK: +8 | **Heart-Shattering Sword:** Very Close | 4d12+13 phy

Experience: Conquest +3, History +2, Intimidation +3

FEATURES

Relentless (3) - Passive: The Undefeated Champion can be spotlighted up to three times per GM turn. Spend Fear as usual to spotlight them.

Faltering Armor - Passive: When the Undefeated Champion takes damage, reduce it by **1d10**.

Shattering Strike - Action: **Mark a Stress** to make a standard attack against all targets within Very Close range. PCs the Champion succeeds against lose a number of Hope equal to the HP they marked from this attack.

Endless Legions - Action: **Spend a Fear** to summon a number of Fallen Shock Troops equal to twice the number of PCs. The Shock Troops appear at Far range.

Circle of Defilement - Reaction: *Countdown (1d8).* When the Undefeated Champion is in the spotlight for the first time, activate the countdown. When it triggers, activate a magical circle covering an area within Far range of the Champion. A target within that area is *Vulnerable* until they leave the circle. The circle can be removed by dealing Severe damage to the Undefeated Champion.

Momentum - Reaction: When the Undefeated Champion makes a successful attack against a PC, you gain a Fear.

Doombringer - Reaction: When a target marks HP from an attack by the Undefeated Champion, all PCs within Far range of the target lose a Hope.

HALLOWED ARCHER

Tier 4 Ranged
Spirit soldiers with sanctified bows.
Motives & Tactics: Focus fire, obey, reposition, volley

Difficulty: 19 | **Thresholds:** 25/45 | **HP:** 3 | **Stress:** 2
ATK: +4 | **Sanctified Longbow:** Far | 4d8+8 phy

FEATURES

Punish the Guilty - Passive: The Archer deals double damage to targets marked *Guilty* by a High Seraph.

Divine Volley - Action: **Mark a Stress** to make a standard attack against up to three targets.

HALLOWED SOLDIER

Tier 4 Minion
Souls of the faithful, lifted up with divine weaponry.
Motives & Tactics: Obey, outmaneuver, punish, swarm

Difficulty: 18 | **Thresholds:** None | **HP:** 1 | **Stress:** 2
ATK: +2 | **Sword and Shield:** Melee | 10 phy

FEATURES

Minion (13) - Passive: The Soldier is defeated when they take any damage. For every 13 damage a PC deals to the Soldier, defeat an additional Minion within range the attack would succeed against.

Divine Flight - Passive: While the Soldier is flying, **spend a Fear** to move up to Far range instead of Close range before taking an action.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Hallowed Soldiers within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 10 physical damage each. Combine this damage.

KRAKEN

HIGH SERAPH

Tier 4 Leader
A divine champion, head of a hallowed host of warriors who enforce their god's will.
Motives & Tactics: Enforce dogma, fly, pronounce judgment, smite

Difficulty: 20 | **Thresholds:** 37/70 | **HP:** 7 | **Stress:** 5
ATK: +8 | **Holy Sword:** Very Close | 4d10+10 phy

Experience: Divine Knowledge +3

FEATURES

Relentless (2) - Passive: The Seraph can be spotlighted up to three times per GM turn. Spend Fear as usual to spotlight them.

Divine Flight - Passive: While the Seraph is flying, **spend a Fear** to move up to Far range instead of Close range before taking an action.

Judgment - Action: **Spend a Fear** to make a target *Guilty* in the eyes of the Seraph's god until the Seraph is defeated. While *Guilty*, the target doesn't gain Hope on a result with Hope. When the Seraph succeeds on a standard attack against a *Guilty* target, they deal Severe damage instead of their standard damage. The Seraph can only mark one target at a time.

God Rays - Action: **Mark a Stress** to reflect a sliver of divinity as a searing beam of light that hits up to twenty targets within Very Far range. Targets must make a Presence Reaction Roll, with disadvantage if they are marked *Guilty*. Targets who fail take **4d6+12** magic damage. Targets who succeed take half damage.

We Are One - Action: Once per scene, **spend a Fear** to spotlight all other adversaries within Far range. Attacks they make while spotlighted in this way deal half damage.

KRAKEN

Tier 4 Solo
A legendary beast of the sea, bigger than the largest galleon, with sucker-laden tentacles and a terrifying maw.
Motives & Tactics: Consume, crush, drown, grapple

Difficulty: 20 | **Thresholds:** 35/70 | **HP:** 11 | **Stress:** 8
ATK: +7 | **Tentacles:** Close | 4d12+10 phy

Experience: Swimming +3

FEATURES

Relentless (3) - Passive: The Kraken can be spotlighted up to three times per GM turn. Spend Fear as usual to spotlight them.

Many Tentacles - Passive: While the Kraken has 7 or fewer marked HP, they can make their standard attack against two targets within range.

Grapple and Drown - Action: Make an attack roll against a target within Close range. On a success, **mark a Stress** to grab them with a tentacle and drag them beneath the water. The target is *Restrained* and *Vulnerable* until they break free with a successful Strength Roll or the Kraken takes Major or greater damage. While *Restrained* and *Vulnerable* in this way, a target must mark a Stress when they make an action roll.

Boiling Blast - Action: **Spend a Fear** to spew a line of boiling water at any number of targets in a line up to Far range. All targets must succeed on an Agility Reaction Roll or take **4d6+9** physical damage. If a target marks an Armor Slot to reduce the damage, they must also mark a Stress.

Momentum - Reaction: When the Kraken makes a successful attack against a PC, you gain a Fear.

ORACLE OF DOOM

Tier 4 Solo

A towering immortal and incarnation of fate, cursed to only see bad outcomes.

Motives & Tactics: Change environment, condemn, dishearten, toss aside

Difficulty: 20 | **Thresholds:** 38/68 | **HP:** 11 | **Stress:** 10
ATK: +8 | **Psychic Attack:** Far | 4d8+9 mag

Experience: Boundless Knowledge +4

FEATURES

Terrifying - Passive: When the Oracle makes a successful attack, all PCs within Far range lose a Hope and you gain a Fear.

Walls Closing In - Passive: When a creature rolls a failure while within Very Far range of the Oracle, they must mark a Stress.

Pronounce Fate - Action: **Spend a Fear** to present a target within Far range with a vision of their personal nightmare. The target must make a Knowledge Reaction Roll. On a failure, they lose all Hope and take **2d20+4** direct magic damage. On a success, they take half damage and lose a Hope.

Summon Tormentors - Action: Once per day, **spend 2 Fear** to summon **2d4** Tier 2 or below Minions relevant to one of the PC's personal nightmares. They appear at Close range relative to that PC.

Ominous Knowledge - Reaction: When the Oracle sees a mortal creature, they instantly know one of their personal nightmares.

Vengeful Fate - Reaction: When the Oracle marks HP from an attack within Very Close range, you can **mark a Stress** to knock the attacker back to Far range and deal **2d10+4** physical damage.

ORACLE OF DOOM

OUTER REALMS ABOMINATION

Tier 4 Bruiser

A chaotic mockery of life, constantly in flux.

Motives & Tactics: Demolish, devour, undermine

Difficulty: 19 | **Thresholds:** 35/71 | **HP:** 7 | **Stress:** 5
ATK: +2d4 | **Massive Pseudopod:** Very Close | 4d6+13 mag

FEATURES

Chaotic Form - Passive: When the Abomination attacks, roll **2d4** and use the result as their attack modifier.

Disorienting Presence - Passive: When a target takes damage from the Abomination, they must make an Instinct Reaction Roll. On a failure, they gain disadvantage on their next action roll and you gain a Fear.

Reality Quake - Action: **Spend a Fear** to rattle the edges of reality within Far range of the Abomination. All targets within that area must succeed on a Knowledge Reaction Roll or become *Unstuck* from reality until the end of the scene. When an *Unstuck* target spends Hope or marks Armor Slots, HP, or Stress, they must double the amount spent or marked.

Unreal Form - Reaction: When the Abomination takes damage, reduce it by **1d20**. If the Abomination marks 1 or fewer Hit Points from a successful attack against them, you gain a Fear.

OUTER REALMS CORRUPTER

Tier 4 Support

A shifting, formless mass seemingly made of chromatic light.

Motives & Tactics: Confuse, distract, overwhelm

Difficulty: 19 | **Thresholds:** 27/47 | **HP:** 4 | **Stress:** 3
ATK: +7 | **Corroding Pseudopod:** Very Close | 4d8+5 mag

FEATURES

Will-Shattering Touch - Passive: When a PC takes damage from the Corrupter, they lose a Hope.

Disgorge Reality Flotsam - Action: **Mark a Stress** to spew partially digested portions of consumed realities at all targets within Close range. Targets must succeed on a Knowledge Reaction Roll or mark 2 Stress.

OUTER REALMS THRALL

Tier 4 Minion

A vaguely humanoid form stripped of memory and identity.

Motives & Tactics: Destroy, disgust, disorient, intimidate

Difficulty: 17 | **Thresholds:** None | **HP:** 1 | **Stress:** 1
ATK: +3 | **Claws and Teeth:** Very Close | 11 phy

FEATURES

Minion (13) - Passive: The Thrall is defeated when they take any damage. For every 13 damage a PC deals to the Thrall, defeat an additional Minion within range the attack would succeed against.

Group Attack - Action: **Spend a Fear** to choose a target and spotlight all Outer Realm Thralls within Close range of them. Those Minions move into Melee range of the target and make one shared attack roll. On a success, they deal 11 physical damage each. Combine this damage.

VOLCANIC DRAGON: OBSIDIAN PREDATOR

Tier 4 Solo
A massive winged creature with obsidian scales and impossibly sharp claws.
Motives & Tactics: Defend lair, dive-bomb, fly, hunt, intimidate

Difficulty: 19 | **Thresholds:** 33/65 | **HP:** 6 | **Stress:** 5
ATK: +8 | **Obsidian Claws:** Close | 4d10+4 phy

Experience: Hunt from Above +5

FEATURES

Relentless (2) - Passive: The Obsidian Predator can be spotlighted up to two times per GM turn. Spend Fear as usual to spotlight them.

Flying - Passive: While flying, the Obsidian Predator gains a +3 bonus to their Difficulty.

Obsidian Scales - Passive: The Obsidian Predator is resistant to physical damage.

Avalanche Tail - Action: **Mark a Stress** to make an attack against all targets within Close range. Targets the Obsidian Predator succeeds against take **4d6+4** physical damage and are knocked back to Far range and *Vulnerable* until their next roll with Hope.

Dive-Bomb - Action: If the Obsidian Predator is flying, **mark a Stress** to choose a point within Far range. Move to that point and make an attack against all targets within Very Close range. Targets the Obsidian Predator succeeds against take **2d10+6** physical damage and must mark a Stress and lose a Hope.

Erupting Rage (Phase Change) - Reaction: When the Obsidian Predator marks their last HP, replace them with the Molten Scourge and immediately spotlight them.

VOLCANIC DRAGON: MOLTEN SCOURGE

Tier 4 Solo
Enraged by their wounds, the dragon bursts into molten lava.
Motives & Tactics: Douse with lava, incinerate, repel Invaders, reposition

Difficulty: 20 | **Thresholds:** 30/58 | **HP:** 7 | **Stress:** 5
ATK: +9 | **Lava-Coated Claws:** Close | 4d12+4 phy

Experience: Hunt from Above +5

FEATURES

Relentless (3) - Passive: The Molten Scourge can be spotlighted up to three times per GM turn. Spend Fear as usual to spotlight them.

Cracked Scales - Passive: When the Molten Scourge takes damage, roll a number of **d6s** equal to HP marked. For each result of 4 or higher, you gain a Fear.

Shattering Might - Action: **Mark a Stress** to make an attack against a target within Very Close range. On a success, the target takes **4d8+1** physical damage, loses a Hope, and is knocked back to Close range. The Molten Scourge clears a Stress.

Eruption - Action: **Spend a Fear** to erupt lava from beneath the Molten Scourge's scales, filling the area within Very Close range with molten lava. All targets in that area must succeed on an Agility Reaction Roll or take **4d6+6** physical damage and be knocked back to Close range. This area remains lava. When a creature other than the Molten Scourge enters that area or acts while inside of it, they must mark 6 HP.

Volcanic Breath - Reaction: When the Molten Scourge takes Major damage, roll a **d10**. On a result of 8 or higher, the Molten Scourge breathes a flow of lava in front of them within Far range. All targets in that area must make an Agility Reaction Roll. Targets who fail take **2d10+4** physical damage, mark **1d4 Stress**, and are *Vulnerable* until they clear a Stress. Targets who succeed take half damage and must mark a Stress.

Lava Splash - Reaction: When the Molten Scourge takes Severe damage from an attack within Very Close range, molten blood gushes from the wound and deals **2d10+4** direct physical damage to the attacker.

Ashen Vengeance (Phase Change) - Reaction: When the Molten Scourge marks their last HP, replace them with the Ashen Tyrant and immediately spotlight them.

VOLCANIC DRAGON: OBSIDIAN PREDATOR

VOLCANIC DRAGON: MOLTEN SCOURGE

VOLCANIC DRAGON: ASHEN TYRANT

Tier 4 Solo

No enemy has ever had the insolence to wound the dragon so. As the lava settles, it's ground to ash like the dragon's past foes.

Motives & Tactics: Choke, fly, intimidate, kill or be killed

Difficulty: 18 | **Thresholds:** 29/55 | **HP:** 8 | **Stress:** 5
ATK: +10 | **Claws and Teeth:** Close | 4d12+15 phy

Experience: Hunt from Above +5

FEATURES

Relentless (4) - Passive: The Ashen Tyrant can be spotlighted up to four times per GM turn. Spend Fear as usual to spotlight them.

Cornered - Passive: **Mark a Stress** instead of spending a Fear to spotlight the Ashen Tyrant.

Injured Wings - Passive: While flying, the Ashen Tyrant gains a +1 bonus to their Difficulty.

Ashes to Ashes - Passive: When a PC rolls a failure while within Close range of the Ashen Tyrant, they lose a Hope and you gain a Fear. If the PC can't lose a Hope, they must mark a HP.

Desperate Rampage - Action: **Mark a Stress** to make an attack against all targets within Close range. Targets the Ashen Tyrant succeeds against take **2d20+2** physical damage, are knocked back to Close range of where they were, and must mark a Stress.

Ashen Cloud - Action: **Spend a Fear** to smash the ground and kick up ash within Far range. While within the ash cloud, a target has disadvantage on action rolls. The ash cloud clears the next time an adversary is spotlighted.

Apocalyptic Thrashing - Action: Countdown (1d12). **Spend a Fear** to activate. It ticks down when a PC rolls with Fear. When it triggers, the Ashen Tyrant thrashes about, causing environmental damage (such as an earthquake, avalanche, or collapsing walls). All targets within Far range must make a Strength Reaction Roll. Targets who fail take **2d10+10** physical damage and are *Restrained* by the rubble until they break free with a successful Strength Roll. Targets who succeed take half damage. If the Ashen Tyrant is defeated while this countdown is active, trigger the countdown immediately as the destruction caused by their death throes.

PERFECTED ZOMBIE

Tier 4 Bruiser

A towering, muscular zombie with magically infused strength and skill.

Motives & Tactics: Consume, hound, maim, terrify

Difficulty: 20 | **Thresholds:** 40/70 | **HP:** 9 | **Stress:** 4
ATK: +4 | **Greataxe:** Very Close | 4d12+15 phy

FEATURES

Terrifying - Passive: When the Zombie makes a successful attack, all PCs within Far range lose a Hope and you gain a Fear.

Fearsome Presence - Passive: PCs can't spend Hope to use features against the Zombie.

Perfect Strike - Action: **Mark a Stress** to make a standard attack against all targets within Very Close range. Targets the Zombie succeeds against are *Vulnerable* until their next rest.

Skilled Opportunist - Reaction: When another adversary deals damage to a target within Very Close range of the Zombie, you can **spend a Fear** to add the Zombie's standard attack damage to the damage roll.

ZOMBIE LEGION

Tier 4 Horde (3/HP)

A large pack of undead, still powerful despite their rotting flesh.

Motives & Tactics: Consume brain, shred flesh, surround

Difficulty: 17 | **Thresholds:** 25/45 | **HP:** 8 | **Stress:** 5
ATK: +2 | **Tentacles:** Close | 4d6+10 phy

FEATURES

Horde (2d6+5) - Passive: When the Legion has marked half or more of their HP, their standard attack deals **2d6+5** physical damage instead.

Unyielding - Passive: The Legion has resistance to physical damage.

Relentless (2) - Passive: The Legion can be spotlighted up to two times per GM turn. Spend Fear as usual to spotlight them.

Overwhelm - Reaction: When the Legion takes Minor damage from an attack within Melee range, you can **mark a Stress** to make a standard attack with advantage against the attacker.

VOLCANIC DRAGON: ASHEN TYRANT
USING ENVIRONMENTS

Environments represent everything in a scene beyond the PCs and adversaries, such as the physical space, background NPCs, and natural forces.

Much like adversaries, each listed environment has a stat block that provides tools for affecting the PCs and the wider scene. These stat blocks aren't restricted to combat—you can use environment stat blocks to enhance any scene, from the intrigue of a festive gala to the danger of crumbling ruins.

Environments and adversaries are built to interact with and support one another, both mechanically and narratively. While the PCs and adversaries take focus, environments can represent hazards that originate from the world itself or the background characters who don't need entire stat blocks.

This section describes how to use each environment's stat block, and the upcoming "Environment Stat Blocks" section presents examples of environments, grouped by tier to represent their general threat level.

The environment framework is meant to be inspiring and practical, rather than unchangeable and prescriptive. It provides a way to organize and prepare ideas for important scenes. You can customize the environments to fit your game's characters and events—for example, you could change the Imperial Court environment into a Queen's Birthday Feast environment, or create a stat block for a Rebel Uprising based on the Pitched Battle environment features. And if you don't want to use this adversary-like system for environments, you can ignore these stat blocks entirely—Daggerheart is just as enjoyable without them.

RAGING RIVER

Tier 1 Traversal
A swift-moving river without a bridge crossing, deep enough to sweep away most people.
Impulses: Bar crossing, carry away the unready, divide the land

> **Difficulty:** 10
> **Potential Adversaries:** Beasts (Bear, Glass Snake), Jagged Knife Bandits (Hexer, Kneebreaker, Lackey, Lieutenant, Shadow, Sniper)

FEATURES

Dangerous Crossing - Passive: Crossing the river requires the party to complete a Progress Countdown (4). A PC who rolls a failure with Fear is immediately targeted by the "Undertow" action without requiring a Fear to be spent on the feature.

Have any of the PCs forded rivers like this before? Are any of them afraid of drowning?

Undertow - Action: **Spend a Fear** to catch a PC in the undertow. They must make an Agility Reaction Roll. On a failure, they take **1d6+1** physical damage and are moved a Close distance down the river, becoming *Vulnerable* until they get out of the river. On a success, they must mark a Stress.

What trinkets and baubles lie along the bottom of the riverbed? Do predators swim these rivers?

Patient Hunter - Action: **Spend a Fear** to summon a Glass Snake within Close range of a chosen PC. The Snake appears in or near the river and immediately takes the spotlight to use their "Spinning Serpent" action.

What treasures does the beast have in their burrow? What travelers have already fallen victim to this predator?

ENVIRONMENT BREAKDOWN

Each environment's **stat block** presents the statistics you need to utilize them in play. The following example illustrates this format. Each stat block contains the following elements:

◼ Name

Each environment stat block has a unique name—in this case, a Raging River.

◼ Tier

Each environment is designed to challenge PCs of a certain tier. If you use environment stat blocks from other tiers, you might want to adjust their statistics, such as their Difficulty and adversaries.

◼ Type

The environment's type appears alongside its tier, representing the type of scene it most easily supports. The Raging River is a Traversal environment, meaning that the threats and obstacles the PCs encounter there will most likely be physical in nature.

◼ Description

An evocative one-line summary of the environment.

◼ Impulses

Each environment has "impulses," or the narrative way they push and pull on those within them. Places don't have volition, but the people and forces that comprise an environment gravitate toward certain goals and actions (such as a river rushing to carry you away or drown you, or a casino disorienting and pushing people to gamble away their money).

◼ Difficulty

Raging River has a Difficulty of 10, which provides a baseline for action rolls made to directly oppose the elements of this environment. Individual adversaries appearing in the environment may have their own Difficulty.

◼ Potential Adversaries

Many environments suggest specific adversaries that commonly appear in scenes with that environment. Not every listed adversary needs to appear in an environment, and you're free to use others instead.

◼ Features

Features provide inspiration for GM moves you can use that represent the dynamic landscape or situation.

ENVIRONMENT TYPES

An environment's **type** represents the style of scene it most readily supports, but any kind of interaction can happen in any environment. Exciting encounters in unexpected environments can provide contrast or round out the narrative. Don't be afraid to plan a social encounter in a dangerous Traversal environment, or a duel to the death in a Social environment. Environment types include the following:

- **Explorations** are wondrous locations with mysteries and marvels to discover.
- **Socials** are locations that primarily present interpersonal challenges.
- **Traversals** are dangerous locations where moving around the space itself is a challenge.
- **Events** are defined more by the activity taking place than the space they take place in.

ENVIRONMENT FEATURES

The bottom of each stat block lists that environment's **features**.

■ Feature Questions

Below each feature, you'll find italicized questions. These questions are there to inspire plot hooks, provide ideas to fuel the scene, and help connect the scene to other story elements.

For example, the Raging River's *"Undertow"* feature asks, *"What trinkets and baubles lie along the bottom of the riverbed? Do predators swim these rivers?"* These questions invite you to consider who or what has been here before, what their presence has left behind, as well as what predators might take advantage of the powerful undertow for their own benefit.

■ Using Features

When you make a GM move, you can use environment features like you would adversary features. Environment features can take the form of actions (which can be used as your GM move), reactions (which happen freely in response to a trigger), and passives (which automatically apply).

■ Fear Features

Like adversaries, environments can have Fear Features—powerful, scene-defining effects that require spending Fear to activate. Most environment Fear Features take the form of actions, such as the following example:

> *Tunneling Terror - Action*
> **Spend a Fear** to summon an Acid Burrower, who bursts up from the ground where they have been waiting for prey. The Acid Burrower takes the spotlight to use their "Earth Eruption" action.

Not every environment has a Fear Feature—we recommend reserving them for when they're most impactful.

ADAPTING ENVIRONMENTS

Sometimes you want to use an environment but it's at the wrong tier for your party. Or you might want to replace a feature or two, then present it as an entirely different environment. Whether planning your session or even improvising an environment mid-session, you can adjust an existing environment's stat block to fit the needs of your scene or improvise elements as needed. The environments framework is there to help organize ideas, not to stifle creativity.

When you need to quickly adjust a stat block to a different tier, you can simply replace its existing statistics with those listed on the Environment Statistics by Tier table, using the column that corresponds to your party's tier.

Environment Statistics by Tier

Environment Statistic	Tier 1	Tier 2	Tier 3	Tier 4
Damage Dice	1d6+1 to 1d8+3	2d6+3 to 2d10+2	3d8+3 to 3d10+1	4d8+3 to 4d10+10
Difficulty	11	14	17	20

◼ Scaling Environments

Environments are easier to scale than adversaries, since they don't have Hit Points, damage thresholds, or Stress. You'll want to adjust the default Difficulty, any Difficulties listed in features, and the damage dealt by features. If the environment has a feature that involves summoning an adversary, consider replacing the listed adversaries with ones appropriate to the party's tier or or scaling down the listed adversaries.

◼ Adding or Changing Features

When scaling an environment to a higher tier, consider adding a Fear Feature if there isn't one already. Similarly, if scaling down to a lower tier, consider removing the most powerful or impactful feature.

ENVIRONMENT STAT BLOCKS

This section contains a list of environments by tier, followed by the environment stat blocks (see the earlier "Using Environments" section for environment rules).

ENVIRONMENTS BY TIER

This section contains the following stat blocks.

Tier 1 (Level 1)
Abandoned Grove (Exploration)
Ambushed (Event)
Ambushers (Event)
Bustling Marketplace (Social)
Cliffside Ascent (Traversal)
Local Tavern (Social)
Outpost Town (Social)
Raging River (Traversal)

Tier 2 (Levels 2–4)
Cult Ritual (Event)
Hallowed Temple (Social)
Haunted City (Exploration)
Mountain Pass (Traversal)

Tier 3 (Levels 5–7)
Burning Heart of the Woods (Exploration)
Castle Siege (Event)
Pitched Battle (Event)

Tier 4 (Levels 8–10)
Chaos Realm (Traversal)
Divine Usurpation (Event)
Imperial Court (Social)
Necromancer's Ossuary (Exploration)

TIER 1 ENVIRONMENTS (LEVEL 1)

ABANDONED GROVE

Tier 1 Exploration

A former druidic grove lying fallow and fully reclaimed by nature.

Impulses: Draw in the curious, echo the past

Difficulty: 11

Potential Adversaries: Beasts (Bear, Dire Wolf, Glass Snake), Grove Guardians (Minor Treant, Sylvan Soldier, Young Dryad)

FEATURES

Overgrown Battlefield - Passive: There has been a battle here. A PC can make an Instinct Roll to identify evidence of that fight. On a success with Hope, learn all three pieces of information below. On a success with Fear, learn two. On a failure, a PC can mark a Stress to learn one and gain advantage on the next action roll to investigate this environment. A PC with an appropriate background or Experience can learn an additional detail and ask a follow-up question about the scene and get a truthful (if not always complete) answer.

- Traces of a battle (broken weapons and branches, gouges in the ground) litter the ground.
- A moss-covered tree trunk is actually the corpse of a treant.
- Still-standing trees are twisted in strange ways, as if by powerful magic.

Why did these groups come to blows? Why is the grove unused now?

Barbed Vines - Action: Pick a point within the grove. All targets within Very Close range of that point must succeed on an Agility Reaction Roll or take **1d8+3** physical damage and become *Restrained* by barbed vines. *Restrained* creatures until they're freed with a successful Finesse or Strength roll or by dealing at least 6 damage to the vines.

How many vines are there? Where do they grab you? Do they pull you down or lift you off the ground?

You Are Not Welcome Here - Action: A Young Dryad, two Sylvan Soldiers, and a number of Minor Treants equal to the number of PCs appear to confront the party for their intrusion.

What are the grove guardians concealing? What threat to the forest could the PCs confront to appease the Dryad?

Defiler - Action: **Spend a Fear** to summon a Minor Chaos Elemental drawn to the echoes of violence and discord. They appear within Far range of a chosen PC and immediately take the spotlight.

What color does the grass turn as the elemental appears? How does the chaos warp insects and small wildlife within the grove?

AMBUSHED

Tier 1 Event

An ambush is set to catch an unsuspecting party off-guard.

Impulses: Overwhelm, scatter, surround

Difficulty: Special (see "Relative Strength")

Potential Adversaries: Any

FEATURES

Relative Strength - Passive: The Difficulty of this environment equals that of the adversary with the highest Difficulty.

Who cues the ambush? What makes it clear they're in charge?

Surprise! - Action: The ambushers reveal themselves to the party, you gain 2 Fear, and the spotlight immediately shifts to one of the ambushing adversaries.

What do the ambushers want from the party? How do their tactics in the ambush reflect that?

AMBUSHERS

Tier 1 Event

An ambush is set by the PCs to catch unsuspecting adversaries off-guard.

Impulses: Escape, group up, protect the most vulnerable

Difficulty: Special (see "Relative Strength")

Potential Adversaries: Any

FEATURES

Relative Strength - Passive: The Difficulty of this environment equals that of the adversary with the highest Difficulty.

Which adversary is the least prepared? Which one is the most?

Where Did They Come From? - Reaction: When a PC starts the ambush on unsuspecting adversaries, you lose 2 Fear and the first attack roll a PC makes has advantage.

What are the adversaries in the middle of doing when the ambush starts? How does this impact their approach to the fight?

BUSTLING MARKETPLACE

Tier 1 Social

The economic heart of the settlement, with local artisans, traveling merchants, and patrons across social classes.

Impulses: Buy low, and sell high, tempt and tantalize with wares from near and far

Difficulty: 10

Potential Adversaries: Guards (Bladed Guard, Head Guard), Masked Thief, Merchant

FEATURES

Tip the Scales - Passive: PCs can gain advantage on a Presence Roll by offering a handful of gold as part of the interaction.

Will any coin be accepted, or only local currency? How overt are the PCs in offering this bribe?

Unexpected Find - Action: Reveal to the PCs that one of the merchants has something they want or need, such as food from their home, a rare book, magical components, a dubious treasure map, or a magical key.

What cost beyond gold will the merchant ask for in exchange for this rarity?

Sticky Fingers - Action: A thief tries to steal something from a PC. The PC must succeed on an Instinct Roll to notice the thief or lose an item of the GM's choice as the thief escapes to a Close distance. To retrieve the stolen item, the PCs must complete a Progress Countdown (6) to chase down the thief before the thief completes a Consequence Countdown (4) and escapes to their hideout.

What drove this person to pickpocketing? Where is the thief's hideout and how has it avoided notice?

Crowd Closes In - Reaction: When one of the PCs splits from the group, the crowds shift and cut them off from the party.

Where does the crowd's movement carry them? How do they feel about being alone but surrounded?

CLIFFSIDE ASCENT

Tier 1 Traversal

A steep, rocky cliffside tall enough to make traversal dangerous.

Impulses: Cast the unready down to a rocky doom, draw people in with promise of what lies at the top

> **Difficulty:** 12
> **Potential Adversaries:** Construct, Deeproot Defender, Giant Scorpion, Glass Snake

FEATURES

The Climb - Passive: Climbing up the cliffside uses a Progress Countdown (12). It ticks down according to the following criteria when the PCs make an action roll to climb:

- **Critical Success:** Tick down 3
- **Success with Hope:** Tick down 2
- **Success with Fear:** Tick down 1
- **Failure with Hope:** No advancement
- **Failure with Fear:** Tick up 1

When the countdown triggers, the party has made it to the top of the cliff.

What strange formations are the stones arranged in? What ominous warnings did previous adventurers leave?

Pitons Left Behind - Passive: Previous climbers left behind large metal rods that climbers can use to aid their ascent. If a PC using the pitons fails an action roll to climb, they can mark a Stress instead of ticking the countdown up.

What do the shape and material of these pitons tell you about the previous climbers? How far apart are they from one another?

Fall - Action: **Spend a Fear** to have a PC's handhold fail, plummeting them toward the ground. If they aren't saved on the next action, they hit the ground and tick up the countdown by 2. The PC takes **1d12** physical damage if the countdown is between 8 and 12, **2d12** between 4 and 7, and **3d12** at 3 or lower.

How can you tell many others have fallen here before? What lives in these walls that might try to scare adventurers into falling for an easy meal?

LOCAL TAVERN

Tier 1 Social

A lively tavern that serves as the social hub for its town.

Impulses: Provide opportunities for adventurers, nurture community

> **Difficulty:** 10
> **Potential Adversaries:** Guards (Bladed Guard, Head Guard), Mercenaries (Harrier, Sellsword, Spellblade, Weaponmaster), Merchant

FEATURES

What's the Talk of the Town? - Passive: A PC can ask the bartender, staff, or patrons about local events, rumors, and potential work with a Presence Roll. On a success, they can pick two of the below details to learn—or three if they critically succeed. On a failure, they can pick one and mark a Stress as the local carries on about something irrelevant.

- A fascinating rumor with a connection to a PC's background
- A promising job for the party involving a nearby threat or situation
- Local folklore that relates to something they've seen
- Town gossip that hints at a community problem

Who has what kind of information? What gossip do the locals start spreading about the PCs?

Sing For Your Supper - Passive: A PC can perform one time for the guests by making a Presence Roll. On a success, they earn **1d4** handfuls of gold (**2d4** if they critically succeed). On a failure, they mark a Stress.

What piece do you perform? What does that piece mean to you? When's the last time you performed it for a crowd?

Mysterious Stranger - Action: Reveal a stranger concealing their identity, lurking in a shaded booth.

What do they want? What's their impression of the PCs? What mannerisms or accessories do they have?

Someone Comes to Town - Action: Introduce a significant NPC who wants to hire the party for something or who relates to a PC's background.

Did they know the PCs were here? What do they want in this town?

Bar Fight! - Action: **Spend a Fear** to have a bar fight erupt in the tavern. When a PC tries to move through the tavern while the fight persists, they must succeed on an Agility or Presence Roll or take **1d6+2** physical damage from a wild swing or thrown object. A PC can try to activate this feature by succeeding on an action roll that would provoke tavern patrons.

Who started the fight? What will it take to stop it?

CLIFFSIDE ASCENT

LOCAL TAVERN

OUTPOST TOWN

RAGING RIVER
OUTPOST TOWN

Tier 1 Social

A small town on the outskirts of a nation or region, close to a dungeon, tombs, or other adventuring destinations.

Impulses: Drive the desperate to certain doom, profit off of ragged hope

> **Difficulty:** 12
> **Potential Adversaries:** Jagged Knife Bandits (Hexer, Kneebreaker, Lackey, Lieutenant, Shadow, Sniper), Masked Thief, Merchant

FEATURES

Rumors Abound - Passive: Gossip is the fastest-traveling currency in the realm. A PC can inquire about major events by making a Presence Roll. What they learn depends on the outcome of their roll, based on the following criteria:

- **Critical Success:** Learn about two major events. The PC can ask one follow-up question about one of the rumors and get a truthful (if not always complete) answer.
- **Success with Hope:** Learn about two events, at least one of which is relevant to the character's background.
- **Success with Fear:** Learn an alarming rumor related to the character's background.
- **Any Failure:** The locals respond poorly to their inquiries. The PC must mark a Stress to learn one relevant rumor.

What news do the PCs have that they could pass along to curious travelers? What do the locals think about these events?

Society of the Broken Compass - Passive: An adventuring society maintains a chapterhouse here, where heroes trade boasts and rumors, drink to their imagined successes, and scheme to undermine their rivals.

What boasts do the adventurers here make, and which do you think are true?

Rival Party - Passive: Another adventuring party is here, seeking the same treasure or leads as the PCs.

Which PC has a connection to one of the rival party members? Do they approach the PC first or do they wait for the PC to move?

It'd Be a Shame If Something Happened to Your Store - Action: The PCs witness as agents of a local crime boss shake down a general goods store.

What trouble does it cause if the PCs intervene?

Wrong Place, Wrong Time - Reaction: At night, or when the party is alone in a back alley, you can **spend a Fear** to introduce a group of thieves who try to rob them. The thieves appear at Close range of a chosen PC and include a Jagged Knife Kneebreaker, as many Lackeys as there are PCs, and a Lieutenant. For a larger party, add a Hexer or Sniper.

What details show the party that these people are desperate former adventurers?

RAGING RIVER

Tier 1 Traversal

A swift-moving river without a bridge crossing, deep enough to sweep away most people.

Impulses: Bar crossing, carry away the unready, divide the land

> **Difficulty:** 10
> **Potential Adversaries:** Beasts (Bear, Glass Snake), Jagged Knife Bandits (Hexer, Kneebreaker, Lackey, Lieutenant, Shadow, Sniper)

FEATURES

Dangerous Crossing - Passive: Crossing the river requires the party to complete a Progress Countdown (4). A PC who rolls a failure with Fear is immediately targeted by the "Undertow" action without requiring a Fear to be spent on the feature.

Have any of the PCs forded rivers like this before? Are any of them afraid of drowning?

Undertow - Action: **Spend a Fear** to catch a PC in the undertow. They must make an Agility Reaction Roll. On a failure, they take **1d6+1** physical damage and are moved a Close distance down the river, becoming *Vulnerable* until they get out of the river. On a success, they must mark a Stress.

What trinkets and baubles lie along the bottom of the riverbed? Do predators swim these rivers?

Patient Hunter - Action: **Spend a Fear** to summon a Glass Snake within Close range of a chosen PC. The Snake appears in or near the river and immediately takes the spotlight to use their "Spinning Serpent" action.

What treasures does the beast have in their burrow? What travelers have already fallen victim to this predator?

CULT RITUAL

Tier 2 Event

A Fallen cult assembles around a sigil of the defeated gods and a bonfire that burns a sickly shade of green.

Impulses: Profane the land, unite the Mortal Realm with the Circles Below

Difficulty: 14

Potential Adversaries: Cult of the Fallen (Cult Adept, Cult Fang, Cult Initiate, Secret-Keeper)

FEATURES

Desecrated Ground - Passive: Cultists dedicated this place to the Fallen Gods, and their foul influence seeps into it. Reduce the PCs' Hope Die to a **d10** while in this environment. The desecration can be removed with a Progress Countdown (6).

How do the PCs first notice that something is wrong about this place? What fears resurface while hope is kept at bay?

Blasphemous Might - Action: A portion of the ritual's power is diverted into a cult member to fight off interlopers. Choose one adversary to become *Imbued* with terrible magic until the scene ends or they're defeated. An *Imbued* adversary immediately takes the spotlight and gains one of the following benefits, or all three if you **spend a Fear**:

- They gain advantage on all attacks.
- They deal an extra **1d10** damage on a successful attack.
- They gain the following feature:
  Relentless (2) - Passive. This adversary can be spotlighted up to two times per GM turn. Spend Fear as usual to spotlight them.

How does the enemy change in appearance? What fears do their blows bring to the surface?

The Summoning - Reaction: *Countdown (6).* When the PCs enter the scene or the cult begins the ritual to summon a demon, activate the countdown. Designate one adversary to lead the ritual. The countdown ticks down when a PC rolls with Fear. When it triggers, summon a Minor Demon within Very Close range of the ritual's leader. If the leader is defeated, the countdown ends with no effect as the ritual fails.

What will the cult do with this leashed demon if they succeed? What will they try to summon next?

Complete the Ritual - Reaction: If the ritual's leader is targeted by an attack or spell, an ally within Very Close range of them can **mark a Stress** to be targeted by that attack or spell instead.

What does it feel like to see such devotion turned to the pursuit of fear and domination?

HALLOWED TEMPLE

Tier 2 Social

A bustling but well-kept temple that provides healing and hosts regular services, overseen by a priest or seraph.

Impulses: Connect the Mortal Realm with the Hallows Above, display the power of the divine, provide aid and succor to the faithful

Difficulty: 13

Potential Adversaries: Guards (Archer Guard, Bladed Guard, Head Guard)

FEATURES

A Place of Healing - Passive: A PC who takes a rest in the Hallowed Temple automatically clears all HP.

What does the incense smell like? What kinds of songs do the acolytes sing?

Divine Guidance - Passive: A PC who prays to a deity while in the Hallowed Temple can make an Instinct Roll to receive answers. If the god they beseech isn't welcome in this temple, the roll is made with disadvantage.

- **Critical Success:** The PC gains clear information. Additionally, they gain **1d4** Hope, which can be distributed between the party if they share the vision and guidance they received.
- **Success with Hope:** The PC receives clear information.
- **Success with Fear:** The PC receives brief flashes of insight and an emotional impression conveying an answer.
- **Any Failure:** The PC receives only vague flashes. They can mark a Stress to receive one clear image without context.

What does it feel like as you are touched by this vision? What feeling lingers after the images have passed?

Relentless Hope - Reaction: Once per scene, each PC can mark a Stress to turn a result with Fear into a result with Hope.

What emotions or memories do you connect with when fear presses in?

Divine Censure - Reaction: When the PCs have trespassed, blasphemed, or offended the clergy, you can **spend a Fear** to summon a High Seraph and **1d4** Bladed Guards within Close range of the senior priest to reinforce their will.

What symbols or icons do they bear that signal they are anointed agents of the divinity? Who leads the group and what led them to this calling?

HALLOWED TEMPLE

CULT RITUAL
HAUNTED CITY

Tier 2 Exploration

An abandoned city populated by the restless spirits of eras past.

Impulses: Misdirect and disorient, replay apocalypses both public and personal

Difficulty: 14

Potential Adversaries: Ghosts (Spectral Archer, Spectral Captain, Spectral Guardian), ghostly versions of other adversaries (see "Ghostly Form")

FEATURES

Buried Knowledge - Passive: The city has countless mysteries to unfold. A PC who seeks knowledge about the fallen city can make an Instinct or Knowledge Roll to learn about this place and discover (potentially haunted) loot.

- **Critical Success:** Gain valuable information and a related useful item.
- **Success with Hope:** Gain valuable information.
- **Success with Fear:** Uncover vague or incomplete information.
- **Any Failure:** Mark a Stress to find a lead after an exhaustive search.

What greater secrets does the city contain? Why have so many ghosts lingered here? What doomed adventurers have met a bad fate here already?

Ghostly Form - Passive: Adversaries who appear here are of a ghostly form. They have resistance to physical damage and can **mark a Stress** to move up to Close range through solid objects.

What injuries to their physical form speak to their cause of death? What unfulfilled purpose holds them in the Mortal Plane?

Dead Ends - Action: The ghosts of an earlier era manifest scenes from their bygone era, such as a street festival, a revolution, or a heist. These hauntings change the layout of the city around the PCs, blocking the way behind them, forcing a detour, or presenting them with a challenge, such as mistaking them for rival thieves during the heist.

What do the ghosts want from you? What do you need from them?

Apocalypse Then - Action: **Spend a Fear** to manifest the echo of a past disaster that ravaged the city. Activate a Progress Countdown (5) as the disaster replays around the PCs. To complete the countdown and escape the catastrophe, the PCs must overcome threats such as rampaging fires, stampeding civilians, collapsing buildings, or crumbling streets, while recalling history and finding clues to escape the inevitable.

Is this the disaster that led the city to be abandoned? What is known about this disaster, and how could that help the PCs escape?

MOUNTAIN PASS

Tier 2 Traversal

Stony peaks that pierce the clouds, with a twisting path winding its way up and over through many switchbacks.

Impulses: Exact a chilling toll in supplies and stamina, reveal magical tampering, slow down travel

Difficulty: 15

Potential Adversaries: Beasts (Bear, Giant Eagle, Glass Snake), Chaos Skull, Minotaur Wrecker, Mortal Hunter

FEATURES

Engraved Sigils - Passive: Large markings and engravings have been made in the mountainside. A PC with a relevant background or Experience identifies them as weather magic increasing the power of the icy winds. A PC who succeeds on a Knowledge Roll can recall information about the sigils, potential information about their creators, and the knowledge of how to dispel them. If a PC critically succeeds, they recognize that the sigils are of a style created by ridgeborne enchanters and they gain advantage on a roll to dispel the sigils.

Who laid this enchantment? Are they nearby? Why did they want the weather to be more daunting?

Avalanche - Action: **Spend a Fear** to carve the mountain with an icy torrent, causing an avalanche. All PCs in its path must succeed on an Agility or Strength Reaction Roll or be bowled over and carried down the mountain. A PC using rope, pitons, or other climbing gear gains advantage on this roll. Targets who fail are knocked down the mountain to Far range, take **2d20** physical damage, and must mark a Stress. Targets who succeed must mark a Stress.

How do the PCs try to weather the avalanche? What approach do the characters take to find one another when their companions go hurtling down the mountainside?

Raptor Nest - Reaction: When the PCs enter the raptors' hunting grounds, two Giant Eagles appear at Very Far range of a chosen PC, identifying the PCs as likely prey.

How long has it been since the eagles last found prey? Do they have eggs in their nest, or unfledged young?

Icy Winds - Reaction: Countdown (Loop 4). When the PCs enter the mountain pass, activate the countdown. When it triggers, all characters traveling through the pass must succeed on a Strength Reaction Roll or mark a Stress. A PC wearing clothes appropriate for extreme cold gains advantage on these rolls.

What parts of the PC's bodies go numb first? How do they try to keep warm as they press forward?

BURNING HEART OF THE WOODS

Tier 3 Exploration

Thick indigo ash fills the air around a towering moss-covered tree that burns eternally with flames a sickly shade of blue.

Impulses: Beat out an uncanny rhythm for all to follow, corrupt the woods

Difficulty: 16

Potential Adversaries: Beasts (Bear, Glass Snake), Elementals (Elemental Spark), Verdant Defenders (Dryad, Oak Treant, Stag Knight)

FEATURES

Chaos Magic Locus - Passive: When a PC makes a Spellcast Roll, they must roll two Fear Dice and take the higher result.

What does it feel like to work magic in this chaos-touched place? What do you fear will happen if you lose control of the spell?

The Indigo Flame - Passive: PCs who approach the central tree can make a Knowledge Roll to try to identify the magic that consumed this environment.

- **On a success**: They learn three of the below details. On a success with Fear, they learn two.
- **On a failure**: They can mark a Stress to learn one and gain advantage on the next action roll to investigate this environment.
- **Details:** This is a result of Fallen magic. The corruption is spread through the ashen moss. It can be cleansed only by a ritual of nature magic with a Progress Countdown (8).

What Fallen cult corrupted these woods? What have they already done with the cursed wood and sap from this tree?

Grasping Vines - Action: Animate vines bristling with thorns whip out from the underbrush to ensnare the PCs. A target must succeed on an Agility Reaction Roll or become *Restrained* and *Vulnerable* until they break free, clearing both conditions, with a successful Finesse or Strength Roll or by dealing 10 damage to the vines. When the target makes a roll to escape, they take **1d8+4** physical damage and lose a Hope.

What painful memories do the vines bring to the surface as they pierce flesh?

Charcoal Constructs - Action: Warped animals wreathed in indigo flame trample through a point of your choice. All targets within Close range of that point must make an Agility Reaction Roll. Targets who fail take **3d12+3** physical damage. Targets who succeed take half damage instead.

Are these real animals consumed by the flame or merely constructs of the corrupting magic?

Choking Ash - Reaction: Countdown (Loop 6). When the PCs enter the Burning Heart of the Woods, activate the countdown. When it triggers, all characters must make a Strength or Instinct Reaction Roll. Targets who fail take **4d6+5** direct physical damage. Targes who succeed take half damage. Protective masks or clothes give advantage on the reaction roll.

What hallucinations does the ash induce? What incongruous taste does it possess?

BURNING HEART OF THE WOODS

CASTLE SIEGE

PITCHED BATTLE

CASTLE SIEGE

Tier 3 Event

An active siege with an attacking force fighting to gain entry to a fortified castle.

Impulses: Bleed out the will to fight, breach the walls, build tension

Difficulty: 17

Potential Adversaries: Mercenaries (Harrier, Sellsword, Spellblade, Weaponmaster), Noble Forces (Archer Squadron, Conscript, Elite Soldier, Knight of the Realm)

FEATURES

Secret Entrance - Passive: A PC can find or recall a secret way into the castle with a successful Instinct or Knowledge Roll.

How do they get in without revealing the pathway to the attackers? Are any of the defenders monitoring this path?

Siege Weapons (Environment Change) - Action: *Consequence Countdown (6).* The attacking force deploys siege weapons to try to raze the defenders' fortifications. Activate the countdown when the siege begins (for a protracted siege, make this a long-term countdown instead). When it triggers, the defenders' fortifications have been breached and the attackers flood inside. You gain 2 Fear, then shift to the Pitched Battle environment and spotlight it.

What siege weapons are being deployed? Are they magical, mundane, or a mixture of both? What defenses must the characters overcome to storm the castle?

Reinforcements! - Action: Summon a Knight of the Realm, a number of Tier 3 Minions equal to the number of PCs, and two adversaries of your choice within Far range of a chosen PC as reinforcements. The Knight of the Realm immediately takes the spotlight.

Who are they targeting first? What formation do they take?

Collateral Damage - Reaction: When an adversary is defeated, you can **spend a Fear** to have a stray attack from a siege weapon hit a point on the battlefield. All targets within Very Close range of that point must make an Agility Reaction Roll.

- Targets who fail take **3d8+3** physical or magic damage and must mark a Stress.
- Targets who succeed must mark a Stress.

What debris is scattered by the attack? What is broken by the strike that can't be easily mended?

PITCHED BATTLE

Tier 3 Event

A massive combat between two large groups of armed combatants.

Impulses: Seize people, land, and wealth, spill blood for greed and glory

Difficulty: 17

Potential Adversaries: Mercenaries (Sellsword, Harrier, Spellblade, Weaponmaster), Noble Forces (Archer Squadron, Conscript, Elite Soldier, Knight of the Realm)

FEATURES

Adrift on a Sea of Steel - Passive: Traversing a battlefield during an active combat is extremely dangerous. A PC must succeed on an Agility Roll to move at all, and can only go up to Close range on a success. If an adversary is within Melee range of them, they must mark a Stress to make an Agility Roll to move.

Do the combatants mistake you for the enemy or consider you interlopers? Can you tell the difference between friend and foe in the fray?

Raze and Pillage - Action: The attacking force raises the stakes by lighting a fire, stealing a valuable asset, kidnapping an important person, or killing the populace.

What is valuable here? Who is most vulnerable?

War Magic - Action: **Spend a Fear** as a mage from one side uses large-scale destructive magic. Pick a point on the battlefield within Very Far range of the mage. All targets within Close range of that point must make an Agility Reaction Roll. Targets who fail take **3d12+8** magic damage and must mark a Stress.

What form does the attack take—fireball, raining acid, a storm of blades? What tactical objective is this attack meant to accomplish, and what comes next?

Reinforcements! - Action: Summon a Knight of the Realm, a number of Tier 3 Minions equal to the number of PCs, and two adversaries of your choice within Far range of a chosen PC as reinforcements. The Knight of the Realm immediately takes the spotlight.

Who are they targeting first? What formation do they take?

CHAOS REALM

Tier 4 Traversal

An otherworldly space where the laws of reality are unstable and dangerous.

Impulses: Annihilate certainty, consume power, defy logic

Difficulty: 20

Potential Adversaries: Outer Realms Monstrosities (Abomination, Corruptor, Thrall)

FEATURES

Impossible Architecture - Passive: Up is down, down is right, right is starward. Gravity and directionality themselves are in flux, and any attempt to move through this realm is an odyssey unto itself, requiring a Progress Countdown (8). On a failure, a PC must mark a Stress in addition to the roll's other consequences.

What does it feel like to move in a space so alien to the Mortal Realm? What landmark or point do you fixate on to maintain your balance? What bizarre landmarks do you traverse on your journey?

Everything You Are This Place Will Take from You - Action: Countdown (Loop 1d4). Activate the countdown. When it triggers, all PCs must succeed on a Presence Reaction Roll or their highest trait is temporarily reduced by **1d4** unless they mark a number of Stress equal to its value. Any lost trait points are regained if the PC critically succeeds or escapes the Chaos Realm.

How does this place try to steal from you that which makes you legendary? What does it feel to have this power taken from you?

Unmaking - Action: **Spend a Fear** to force a PC to make a Strength Reaction Roll. On a failure, they take **4d10** direct magic damage. On a success, they must mark a Stress.

What glimpse of other worlds do you catch while this place tries to unmake you? What core facet of your personality does the unmaking try to erase?

Outer Realms Predators - Action: **Spend a Fear** to summon an Outer Realms Abomination, an Outer Realms Corruptor, and **2d6** Outer Realms Thralls, who appear at Close range of a chosen PC in defiance of logic and causality. Immediately spotlight one of these adversaries, and you can **spend an additional Fear** to automatically succeed on that adversary's standard attack.

What half-consumed remnants of the shattered world do these monstrosities cast aside in pursuit of living flesh? What jagged reflections of former personhood do you catch between moments of unquestioning malice?

Disorienting Reality - Reaction: On a result with Fear, you can ask the PC to describe which of their fears the Chaos Realm evokes as a vision of reality unmakes and reconstitutes itself to the PC. The PC loses a Hope. If it is their last Hope, you gain a Fear.

What moment do they see? If it's a memory, how is it warped by this place? How hard will it be to hold on to the real memory?

DIVINE USURPATION

Tier 4 Event

A massive ritual designed to breach the gates of the Hallows Above and unseat the New Gods themselves.

Impulses: Collect power, overawe, silence dissent

Difficulty: 20

Potential Adversaries: Arch-Necromancer, Fallen Shock Troops, Mortal Hunter, Oracle of Doom, Perfected Zombie

FEATURES

Final Preparations - Passive: When the environment first takes the spotlight, designate one adversary as the Usurper seeking to overthrow the gods. Activate a Long-Term Countdown (8) as the Usurper assembles what they need to conduct the ritual. When it triggers, spotlight this environment to use the "Beginning of the End" feature. While this environment remains in play, you can hold up to 15 Fear.

What does the Usurper still require: The heart of a High Seraph? The lodestone of an ancient waygate? The loyalty of two archenemies? The heartbroken tears of a pure soul?

Divine Blessing - Passive: When a PC critically succeeds, they can spend 2 Hope to refresh an ability normally limited by uses (such as once per rest, once per session).

What god favors you as you fight against this usurpation? How does your renewed power reflect their influence?

Defilers Abound - Action: **Spend 2 Fear** to summon **1d4+2** Fallen Shock Troops that appear within Close range of the Usurper to assist their divine siege. Immediately spotlight the Shock Troops to use a "Group Attack" action.

Which High Fallen do these troops serve? Which god's flesh do they wish to feast upon?

Godslayer - Action: If the Divine Siege Countdown (see "Beginning of the End") has triggered, you can **spend 3 Fear** to describe the Usurper slaying one of the gods of the Hallows Above, feasting upon their power and growing stronger. The Usurper clears 2 HP. Increase their Difficulty, damage, attack modifier, or give them a new feature from the slain god.

Which god meets their end? What are their last words? How does the Usurper's new stolen power manifest?

Beginning of the End - Reaction: When the "Final Preparations" long-term countdown triggers, the Usurper begins hammering on the gates of the Hallows themselves. Activate a Divine Siege Countdown (10). Spotlight the Usurper to describe the Usurper's assault and tick down this countdown by 1. If the Usurper takes Major or greater damage, tick up the countdown by 1. When it triggers, the Usurper shatters the barrier between the Mortal Realm and the Hallows Above to slay the gods and take their place. You gain a Fear for each unmarked HP the Usurper has. You can immediately use the "Godslayer" feature without spending Fear to make an additional GM move.

How does the Mortal Realm writhe as the natural order is violated? What mortals witness this blasphemy from afar?

Ritual Nexus - Reaction: On any failure with Fear against the Usurper, the PC must mark **1d4** Stress from the backlash of magical power.

What visions of failures past torment you as your efforts fall short? How are these memories twisted by the Usurper?

CHAOS REALM

IMPERIAL COURT

Tier 4 Social

The majestic domain of a powerful empire, lavishly appointed with stolen treasures.

Impulses: Justify and perpetuate imperial rule, seduce rivals with promises of power and comfort

Difficulty: 20

Potential Adversaries: Bladed Guard, Courtesan, Knight of the Realm, Monarch, Spy

FEATURES

All Roads Lead Here - Passive: While in the Imperial Court, a PC has disadvantage on Presence Rolls made to take actions that don't fit the imperial way of life or support the empire's dominance.

How does the way language is used make even discussing alternative ways of living difficult? What obvious benefits for loyalty create friction when you try to discuss alternatives?

Rival Vassals - Passive: The PCs can find imperial subjects, vassals, and supplicants in the court, each vying for favor, seeking proximity to power, exchanging favors for loyalty, and elevating their status above others'. Some might be desperate to undermine their rivals, while others might even be open to discussions that verge on sedition.

How do they benefit from vassalage, and what has it cost them? What exploitation drives them to consider opposing the unstoppable?

The Gravity of Empire - Action: **Spend a Fear** to present a PC with a golden opportunity or offer to satisfy a major goal in exchange for obeying or supporting the empire. The target must make a Presence Reaction Roll. On a failure, they must mark all their Stress or accept the offer. If they have already marked all their Stress, they must accept the offer or exile themselves from the empire. On a success, they must mark **1d4** Stress as they're taxed by temptation.

What do the PCs want so desperately they might consider throwing in with this ruthless power? How did imperial agents learn the PC's greatest desires?

Imperial Decree - Action: **Spend a Fear** to tick down a long-term countdown related to the empire's agenda by **1d4**. If this triggers the countdown, a proclamation related to the agenda is announced at court as the plan is executed.

What display of power or transfer of wealth was needed to expedite this plan? Whose lives were disrupted or upended to make this happen?

Eyes Everywhere - Reaction: On a result with Fear, you can **spend a Fear** to have someone loyal to the empire overhear seditious talk within the court. A PC must succeed on an Instinct Reaction Roll to notice that the group has been overheard so they can try to intercept the witness before the PCs are exposed.

How has the empire compromised this witness? Why is their first impulse to protect the empire, even if doesn't treat them well?

NECROMANCER'S OSSUARY

Tier 4 Exploration

A dusty crypt with a library, twisting corridors, and abundant sarcophagi, spattered with the blood of ill-fated invaders.

Impulses: Confound intruders, delve into secrets best left buried, manifest unlife, unleash a tide of undead

Difficulty: 19

Potential Adversaries: Arch-Necromancer's Host (Perfected Zombie, Zombie Legion)

FEATURES

No Place for the Living - Passive: A feature or action that clears HP requires spending a Hope to use. If it already costs Hope, a PC must spend an additional Hope.

What does it feel like to try to heal in a place so antithetical to life?

Centuries of Knowledge - Passive: A PC can investigate the library and laboratory and make a Knowledge Roll to learn information related to arcana, local history, and the Necromancer's plans.

What are the names of the tomes? What project is the necromancer working on and what does it communicate about their plans?

Skeletal Burst - Action: All targets within Close range of a point you choose in this environment must succeed on an Agility Reaction Roll or take **4d8+8** physical damage from skeletal shrapnel as part of the ossuary detonates around them.

What ancient skeletal architecture is destroyed? What bones stick in your armor?

Aura of Death - Action: Once per scene, roll a **d4**. Each undead within Far range of the Necromancer can clear HP and Stress equal to the result rolled. The undead can choose how that number is divided between HP and Stress.

How does their renewed vigor manifest? Do they look more lifelike or, paradoxically, are they more decayed but vigorous?

They Just Keep Coming! - Action: **Spend a Fear** to summon **1d6** Rotted Zombies, two Perfected Zombies, or a Zombie Legion, who appear at Close range of a chosen PC.

Who were these people before they became the necromancer's pawns? What vestiges of those lives remain for the heroes to see?
NECROMANCER'S OSSUARY

CHAPTER FIVE:
CAMPAIGN FRAMES

When starting a Daggerheart campaign, you may wish to begin with a campaign frame.

These frames provide inspiration, tools, and mechanics to support the story your table will tell. You can choose one of the campaign frames from the following pages or use their structure to inspire your own.

Every campaign frame has a complexity rating that indicates how challenging the campaign is to run. Campaign frames with a lower complexity rating often sit squarely within the kind of genre Daggerheart is built for and don't have many additional mechanics to consider. Campaign frames with a higher complexity rating often push the genre of the campaign outside the bounds of traditional fantasy, contain more in-depth mechanics to implement, and require a GM who is comfortable creating new game elements (often known as "homebrewing")—such as stat blocks, equipment, and similar content—for their players.

Each campaign frame includes the following sections.

- A pitch to present to players
- Suggestions for the campaign's tone, feel, themes, and cultural touchstones that helped shaped it
- An overview of the campaign's background
- Guidance for how certain communities, ancestries, and classes fit into the setting
- Principles for players and GMs to consider during the campaign
- Unique setting distinctions
- An inciting incident to launch the campaign
- Special mechanics to use during the campaign
- Questions to consider during session zero

You can find each campaign frame map in the appendix or at www.daggerheart.com/downloads.

CAMPAIGN FRAME BREAKDOWN

The following steps highlight the important parts of a campaign frame and describe how to use a frame to start a new campaign.

STEP 1:
PITCH THE CAMPAIGN

Use the **pitch** to give your players a brief idea of what the campaign will be like. You can also pull from the **touchstones** section (eliminating or adding your own as you'd like) and share the **tone & feel** and **themes**. Answer any question they might have and ensure they are interested in the campaign.

STEP 2:
PROVIDE THE FOUNDATIONS

Once the players are onboard, give them the **overview** and **player principles**. You may also choose to read them your **GM principles**. Additionally, provide them any information from **distinctions** you think might be relevant, as well as any **campaign mechanics** they should know.

STEP 3:
GUIDE THEIR CHARACTERS

As they are brainstorming what kind of characters they want to make, you can share the information from the **communities**, **ancestries**, and **class** sections as applicable. These can be overwhelming to engage with all at once, so as they become relevant, discuss as needed with your players.

STEP 4:
BUILD THE MAP

Once players have made their characters, pass a copy of the **campaign frame map** around the table, adding locations to it collectively from either the available list or your imaginations. Follow the rest of the Session Zero prep as usual.

STEP 5:
RUN A SESSION ZERO

Choose any of the **session zero questions** from the campaign frame to ask your players.

STEP 6:
BEGIN THE ADVENTURE

Finally, use the provided **inciting incident**—or write your own—to start the campaign!

Each campaign frame in the following section is written by a unique team of writers and is specialized to the needs of the campaign it facilitates. Because of this, their style, voice, complexity, and approach vary more than other sections of this book. Use these frames as inspiration when developing your own campaign. We don't want you to be hemmed in by a strict template, so expand upon the pieces that work for your table and let the rest fall away.

THE WITHERWILD

When an invading nation attacks an ancient forest deity, a virulent overgrowth spreads throughout the land.

Designed by Carlos Cisco, Rowan Hall, & Spenser Starke

Complexity Rating: ●

THE PITCH

Read this section to your players to introduce them to the campaign.

Fanewick was once a place of great abundance and peace—dangerous to those unfamiliar with the land, but a cornucopia to those who respected its ways. When Haven invaded the wilds and forced the land into eternal spring, a dangerous bloom known as the Witherwild took hold and now threatens the lives of all who live there. In a Witherwild campaign, you'll play unlikely heroes from humble beginnings who are reckoning with their newfound duty to save Fanewick's people from dangerous corruption.

TONE & FEEL

Adventurous, Dynamic, Epic, Heroic, Thrilling, Uncanny, Whimsical

THEMES

Cultural Clash, Ends Justify Means, Grief, People vs. Nature, Transformation and Change, Survival

TOUCHSTONES

Princess Mononoke, The Legend of Zelda, The Dark Crystal, Nausicaä of the Valley of the Wind

OVERVIEW

If your group decides to play this campaign, give your players the following information before character creation.

Fanewick is a wild and untamed land, long avoided by outside forces. The woods are dark and twisting, filled with Faint Divinities who perform small miracles and services for its inhabitants, but are just as likely to lure travelers off narrow paths to their ruin. Seemingly harmless expanses of field hide bogs that engulf entire armies, consuming heavy artillery as quickly as it can cross the border. This wilderness fosters hardy people who are bold enough to raise families where others have not and strictly follow the unique rules that keep them safe. These Wicklings remained insulated from their neighbors' wars until plague forced the people of Haven to desperate acts.

Haven was once the most powerful force in the region; for centuries, the high stone walls into the capital bore the phrase "The Godless Gate." While the original meaning has been lost to common knowledge, some dusty tomes and ancient records state that the founders of Haven wished to be free of the influence of the Faint Divinities that dominated the surrounding regions. They hatched a plan to kill one of the mightiest of these deities, known as **Shun'Aush the Granite Ophid**. While their exact method of deicide is forgotten, their victory ensured Haven's dominance in the region for centuries to come. They made their home behind his remains, which became the mighty walls that Haven is known for.

But Shun'Aush would have his revenge. As the Havenites carved through his stone body, the fine dust left behind settled into the surrounding earth. There was a time of prosperity over many centuries while the scales of the god remained undisturbed. But progress is its own pressure. The growing population demanded increased productivity, and as farmers tilled deeper soil and miners hacked into hidden stone, the ancient stone dust rose to the surface. The same walls that brought the city security became the crucible that incubated a virulent plague.

Over the last two years, over half of Haven's populace fell to a disease known as the **Serpent's Sickness**. First, victims cough up dust. Soon after, their skin breaks out in a scaling rash. Finally, their body hardens—first the flesh, bones, and soft tissue, spreading until, finally, their organs ossify. Once within the organs, "the serpent" moves so quickly that sufferers petrify where they stand, filling Haven with statues of victims in their last moments of agony.

The High Magus of Haven, **Archmage Phylax**, discovered a rare red flower called the crimson lady's veil that could cure the Serpent's Sickness. These buds grow prolifically across Fanewick in the spring—but for every ten thousand of the common white-petaled blossoms, only one red flower blooms.

Desperate to save their people from the plague, Haven invaded Fanewick to amass the scarce red buds. Their forces plunged into the deep wood and, under the guidance of Archmage Phylax, plucked out the **Reaping Eye** from the most powerful Faint Divinity that protected the land: **The Great Owl Nikta**, the Shepherd of the Seasons. The Shepherd kept Fanewick in balance by turning her eyes upon the land, first for ripening, then ruination. Thus Nikta maintained the cycle of seasons—of growth and decay, of death and rebirth. With her Reaping Eye removed, Nikta can only watch over Fanewick with the **Sowing Eye**, forcing the land into everlasting spring.

In the year since, Haven has conquered the bogs, turning them into fields to harvest red flowers. The endless growth that once seemed like a gift quickly evolved into a scourge known as the **Witherwild**—Fanewick's flora and fauna flourished, unchecked and uncontrolled. Animals swell to massive size; trees warp, twist, and begin to hunt people; and vines creep along the forest floor, strangling all they touch. This explosive growth is unconquerable and unrelenting, with no force able to stop the burgeoning verdance for long.

Prior to the Serpent's Sickness and the Shepherd's endless growth, your party lived a peaceful life in Fanewick or a life of toil and conquest in Haven. But when the danger demands a response, even the unprepared—and unwilling—must make a stand.
COMMUNITIES

All communities are available, but some have unique aspects within a Witherwild campaign. As needed, provide the following information to your players and choose one or more of the questions to ask them during your session zero.

◼ Loreborne and Highborne

In Fanewick, knowledge is the most valuable commodity, and those who have expertise have the most power. This economy of information functions primarily through gifting and trading, and wisdom would be considered acceptable collateral for a weapon or warm meal. As such, loreborne community members are the wealthiest in Fanewick and might be smaller, distinct groups of hunters, historians, or artisans within larger villages.

- What knowledge did your community teach you that you must now protect or share?
- What are you able to accomplish because of your upbringing that others outside your community do not understand?
- You once traded important knowledge for something terrible. What did you impart and what did you gain in return?

In Haven, the wealthiest members are highborne, having inherited riches built in the walled city over generations. While the highborne of Haven were more insulated from the Serpent's Sickness, none were immune.

- Who have you lost to the Serpent's Sickness? How did it affect you?
- How did your family make their wealth? Have you rejected or embraced their core set of ethics?
- You grew up in a world of abundance but were kept from learning something about the world. What was this knowledge and when did you discover it?

◼ Ridgeborne, Underborne, and Wildborne

Characters from these communities were likely raised in Fanewick's deadly environs, which have only become more dangerous as the Witherwild grows. Each community has unique customs, some freely shared and others kept secret, that allow them safe passage through dangerous terrain and the Faint Divinities' territories.

In exchange for protection from the Witherwild for themselves and their families, some Wicklings from these groups have been forced to take jobs as farmers in Haven's flower fields. Though it is backbreaking work performed for a nation destroying their land, the farmers are offered safety by the Haven fires that burn back the ever-creeping Witherwild.

- What Faint Divinities do you give tribute to, and how have you been rewarded in kind?
- You displeased a god of Fanewick. What did you do, and what misfortune befell you or a loved one?
- You fled the place of your birth. What circumstances drove you to leave?

◼ Orderborne

Players might choose to build orderborne characters if they want to play current or former members of the Haven Army that invaded Fanewick. Though the army brings violence into this land, they also carry overwhelming grief for a homeland succumbing to disease.

- What regrets do you carry with you from your conquest of foreign soil?
- What kindness did an enemy combatant bestow upon you in an hour of need? How did this change your view of the people of Fanewick?
- You were charged with planting a rumor in a Fanewick community. What is the rumor, and do you plan to carry out this mission?

◼ Slyborne

As the Haven Army is the current martial power in Fanewick, those who wish to play slyborne characters might come from Fanewick rebel groups seeking to expel the invading forces from their lands. Depending on the tactics their group employs, a character from a slyborne community might align with or go against their upbringing.

- Who among the Haven Army do you wish to exact revenge upon and why?
- You joined an insurgent group working to free this land from Haven's grasp. What has given you doubts about the leadership's methods?
- Someone you love is a member of the Haven Army. How have you used your position in the rebellion to protect them?
Seaborne

Both Fanewick and Haven have a coastal border. The majority of Fanewick's seaborne communities live in small seaside groups and focus on local travel to neighboring regions, while Havenites tend to live in large ports that ship and receive goods from distant lands.

- You recently traveled by sea over a vast distance. What went terribly wrong on that passage, and how has it changed you?
- Growing up on the sea taught you a skill few have. What did you learn, and how did it save your life?
- You used to sail with a companion. Who were they, and how do you remain connected?

Wanderborne

Wanderborne communities can be found in both Fanewick and Haven, though safe travel has been severely restricted due to the military occupation and the expansion of the Witherwild. Whether a wanderborne character comes from Fanewick, Haven, or elsewhere, the player should determine their character's personal views on the invasion of Fanewick, and how that aligns or departs from their community's views.

- What do you do to keep your small community safe, independent, and hidden from Haven's forces?
- Because of your community's transience, you have loved ones in both Fanewick and Haven. How has this affected your relationship with the invasion?
- Your community travels to protect something. What is it, and why does it keep you from settling down?

ANCESTRIES

All ancestries are available, but some have unique aspects within a Witherwild campaign. As needed, provide the following information to your players.

Clanks

Clanks from Haven are commonly made from iron and steel, while clanks from Fanewick are typically constructed from wood and stone.

Fungril

Since the Witherwild spread throughout Fanewick, some fungril inhabiting the forests have grown noticeably larger than fungril from other regions.

Drakona, Fauns, Firbolgs, and Infernis

After the Witherwild corrupted Fanewick, some drakona, fauns, firbolgs, and infernis have noticed their horns growing faster and longer.

Galapa and Ribbets

Many families of galapa and ribbets who lived in the bogs of Fanewick were displaced when Haven's army invaded.

Havenites and the Serpent's Sickness

Anyone, but especially those from Haven, may carry the Serpent's Sickness, which stiffens their movements and gives them limited time to survive without a cure.

CLASSES

All classes are available, but some have unique aspects within a Witherwild campaign. As needed, provide the following information to your players.

Druids, Rangers, and Sorcerers

Druids, rangers, and sorcerers are commonly found throughout Fanewick. If players choose one of these classes, they should consider how their character's connection to the natural world might be impacted by the Witherwild.

Warriors and Wizards

Warriors and wizards are prevalent in Haven. A large wizarding school in Haven teaches fighters and healers, and the Haven Army is largely composed of warriors and School of War wizards. If a PC is either of these classes, consider their personal relationship to the Haven Army.

Vengeance Guardian

Many Wicklings who seek revenge on Haven or to expel them from Fanewick become Vengeance guardians. If players choose this subclass, they should consider what ideals or institutions their character protects.

Syndicate Rogue

The Haven Army sends spies into Fanewick communities to gain information on planned attacks and manipulate public perception. When selecting the Syndicate rogue subclass, players should consider how their character might be connected to or impacted by these covert operatives.

PLAYER PRINCIPLES

If your group decides to play this campaign, give your players the following information before character creation.

◼ Make the Invasion Personal

Consider how Haven's invasion of Fanewick deeply impacts your character. Let these details inform what they want and what they're willing to do to get it. Everyone has lost a loved one to the Witherwild or the Serpent's Sickness, and more are dying by the day. Consider how the growing conflict caused your character to act in ways they aren't proud of, or transformed personal truths they once believed were unshakable.

◼ Treat Death with Importance

Taking a life should not be done without consideration, desperation, and consequences. As your character journeys, they should remember those they've lost and those they've slain, allowing each death to affect their choices in the future.

◼ Embrace Vulnerability

Find your character's humanity and showcase it whenever you can. They should be as vulnerable during quiet moments as they are vicious during violent ones, opening up to their allies even if they close themself off to everyone else.

GM PRINCIPLES

Keep the following guidance in mind while you GM this campaign.

◼ Paint the World in Contrast

Subvert expectations by giving space for the nightmarish to charm and the beautiful to terrify. Give the PCs visions of the natural beauty of Fanewick that has run roughshod across the region, breaking the bounds of the bogs and forests and devastating homes and communities. Show the grim and ordered life behind Haven's walls, but also show the culture, art, and progress that has come out of centuries of safety. Contrast the capricious nature of the Faint Divinities with the devotion of the Wicklings and Havenites fighting to save their home. In a place of long nights and days, dual seasons, and two nations in conflict, look for ways to highlight bold dualities.

◼ Show Them True Danger

Though it may be tragic, bodily harm is not the worst tragedy that can befall the characters. To illustrate what's truly at stake, use the PCs' origins in Fanewick or Haven to show them what they stand to lose, be it their homes, family, friends, communities, or even their core truths and beliefs. The events of this campaign may change, threaten, or destroy these aspects of their past—when your players create and are invested in their character's backstory, they have something to fight for.

◼ Offer Alternatives to Violence

By illuminating nonviolent approaches to problem-solving, the PCs can help break the brutal cycle that binds this world. For example, showing compassion—rather than swordpoint—to a corrupted beast can free them from the Witherwild. Similarly, the conflict between Haven and Fanewick shouldn't only be solved with blood and blade. What threatens both could also unify them. Give the PCs opportunities to mend old wounds, right past wrongs, and heal the rift between Haven and Fanewick from within.

◼ Create Multidimensional Allies and Adversaries

No adversary or ally is all good or all bad, and they each have multidimensional lives. Even the most congenial ally should be hiding darkness inside them, hoping their failings will go undiscovered. Those painted as evil should sometimes do the right thing, even if it's for the wrong reason. Just because a PC or NPC is from Haven doesn't make them a villain, and, conversely, not all the inhabitants of Fanewick are virtuous. Finding the nuance, complications, and deeper motivations of the people of Haven and Fanewick will lead to richer interactions, more complex moral choices, and a deeper sense of attachment to the world for the players.
DISTINCTIONS

Use this information to prepare your campaign. You can also share it with your players as needed.

■ The Weeks of Day and Night

The day and night cycle occurs weekly, meaning the sun rises for an entire week before setting into a nighttime of the same length. This has an impact on everything from agriculture to trade, as many merchants refuse to travel through the night.

But this cycle doesn't just affect Wicklings, it's dictated how Fanewick's wondrous ecology has evolved. Days and nights are accompanied by entirely different natural soundscapes as Fanewick's nocturnal denizens sleep through the long days and stalk the woods in times of darkness while their diurnal counterparts sleep. The plants similarly live on this strange day-night loop, and many live out their entire life cycles in a week. Sun rose vines make a thorny ascent to the top of the tree canopy over the course of the week, only to wilt under the light of the moon. Conversely, night bloom, a bioluminescent flower that emits the smell of burnt sugar and decay, only blossoms when evening falls, illuminating patches of forest—a godsend to anyone forced to travel in the dark.

■ The Serpent's Sickness

The plague sweeping across Haven spares no one. Since the initial outbreak, Haven officials have worked tirelessly to quarantine those in the early stages of the disease, but this effort has done little to stop its spread. Due to the rarity of crimson lady's veil, many citizens began to carry or consume all manner of flowers and snake sheddings in an attempt to protect or cure themselves.

In the initial stages, victims are afflicted with a hacking cough laden with dust that resembles powdered bone. Then a scaled rash erupts across their skin, cracking their flesh in a unique and painful pattern that resembles a snake's skin. Not long after, the victims' bodies harden until their organs solidify and cease to function. The final stages of the Serpent's Sickness is so quick that many transform into statues where they stand, leaving all of Haven a cenotaph to a once-great power.

■ Lady's Veil

These small flowers grow in patches of sun throughout Fanewick. For every ten thousand blossoms of white-petaled flowers, one blooms a unique and vibrant red. These flowers have long been used in herbal teas across the region, with the crimson flowers holding a place in specific ceremonies. Even so, they were only foraged until the Havenites discovered crimson lady's veil—the only known cure for Serpent's Sickness.

Thus, the Haven Army invaded Fanewick and began cultivating the flowers on massive farms that have overtaken the region's bogs. Though the theft of the Reaping Eye has created an indefinite growing season, the red flowers remain just as rare, and Fanewick is permeated by a sickly sweet smell as the Haven Army races to mass-produce a cure for the Serpent's Sickness.

The Witherwild

This corruption, empowered by the endless spring, is spreading throughout Fanewick. Some believe the overgrowth began in the forest, while others claim it sprang from the bogs. But no matter its origins, this flourishing malignancy induces horrific changes and massive growth on anything it touches, transforming them into Withered beings. Plants spring to life with a desire to consume all around them. Animals grow to immense proportions, with onerous dispositions to match their exaggerated teeth, tusks, and claws. Even harmless creatures that were once hunted for food have become dangerous and formidable adversaries.

When a person is corrupted by the Witherwild, either from a purposeful attack or accidental harm (see the upcoming "Corruption from the Witherwild" section), they are transformed. They become a nightmarish hybrid—their body warped and intertwined with plant or beast. The Witherwild slowly replaces the personality of its victims with the same drive to consume exhibited by the rest of the corrupted Fanewick. Though the Withered may retain a semblance of who they are for a time, they eventually face the final loss of their personhood. Some Wicklings believe the Withered are gifted this power by Nikta's wrath to drive the forces of Haven from Fanewick and return the Shepherd's Reaping Eye.

The Gods of Fanewick

Gods in this land aren't ethereal concepts that exist in another realm; instead, they wander the land as incarnate beings, residing in both the natural world as well as within homes and small villages. As such, they're generally present in Wicklings' lives. Many communities, and some larger families, even have their own small god or tutelary spirit who watches over them.

Belief and worship take on a different meaning in Fanewick—there is a constant push and pull between the goals of people and their deific neighbors. The gods must curry worship from mortals, often by performing small miracles, acts of service, or by testing their resolve with tricks and curses. Mortals rely on the small blessings from the gods to keep them safe when traveling and working in Fanewick. The most powerful and widely acknowledged Faint Divinity is the Shepherd of Seasons, Nikta, as the loss of her eye had the most recent and visible impact on everyone in Fanewick.

Fanewick's various divinities each have their own opinion concerning the Witherwild corruption. While some enjoy nature's newfound dominance, many of the lesser deities are wary of how out of balance Fanewick has become. While their behavior and motives may be inscrutable, these deities are more accessible than gods who watch from on high.

Fulg, Stacker of Stones: A small god who favors tribute in the form of smooth, stacked river rocks. Under his power, bivalves and limpets grow abundantly on rocks where they can be easily harvested. He is largely uninformed about the problems Fanewick faces, and he prefers it that way.

Hyacynis, They Who Spread Small Blossoms: A friend of bees and tiny flowers who has embraced the Witherwild after seeing their influence and domain swell (literally) to immense proportions. They're enjoying this rampant growth and do not see a reason to end it.

Ikla, the Sky Painter: Ikla's artistic prowess and talent are unmatched, painting the skies of each weekly sunrise and sunset over Fanewick in a myriad of scintillating colors. They could not be lazier the rest of the week, and their demeanor is exceedingly unpleasant, offended that anyone would ask a favor of them during their time off.

Oove, the Watcher of the Night Bloom: He is one of the few local gods who has never been seen, but he is often heard in the wilds at night, whispering directions to lost travelers, pointing them to the nearest source of night bloom. Locals claim he leads those who displease him or harm nocturnal creatures into dangerous terrain. It's rumored that he watches over Fanewick nights from his home on the moon.

Qui'Gar, Whispered Sweetness for a Thorny End: A quiet god who presides over the deaths of those who pass in thorny bushes and briar patches. Traditionally, she doesn't receive many visitors, but the Witherwild's corruptive growth has made her job harder and upended her quiet existence.

Rohkin, the Wandering Horn: Rohkin watches over the many herds of horned creatures that reside in Fanewick. In happier times, he preserved the balance of nature and civilization, preventing overhunting. But since the corruption of the Witherwild has taken hold, he's seen his herds change into unrecognizable, dangerous beasts.

These are but a small slice of the hundreds, if not thousands, of Faint Divinities lurking, relaxing, hunting, and playing throughout Fanewick.

- What Faint Divinities do the PCs acknowledge and pay tribute to, if any?
- How has the Witherwild changed the outlook, personality, and dispositions of the Faint Divinities the characters encounter?
- Which gods ally themselves with Haven to preserve the endless spring? Which align with Fanewick?

THE INCITING INCIDENT

You can use the prompt below to start your campaign, or create your own.

The Reaping Eye is stowed in a secure vault beneath the central tower of Haven's wizarding school, seemingly impossible to recover. A secretive and dangerous rebel group, led by a mysterious figure known only as the **Fanewraith** (she/her), has hatched a plan to end the curse of the Witherwild: find the Great Owl, Nikta, and pluck out the Sowing Eye. While this may solve the immediate problem, the long-term consequences are not being considered, just as they weren't when Haven invaded.

Haven's beleaguered spymaster, **Kreil Dirn** (he/him), is not a popular person in Haven. He is responsible for rooting out insurgents, stopping schemes before they have a chance to start, and keeping a close watch on Haven's internal activities. Kreil has never agreed—at least not openly—with **Archmage Phylax's** (they/them) decision to steal the Reaping Eye, and the consequences they've all paid for that decision have been grimly vindicating.

Recently, Kreil uncovered the Fanewraith's plot and is horrified by the possibility of her success. Knowing he can't send a troop of Haven soldiers deep into the woods to hunt down and stop the Fanewraith from stealing the Sowing Eye, Kreil uses his vast network of informants and spies to find a group of adventurers who can bring the Fanewraith to swift justice.

The party is sent an invitation from Haven to meet with Kreil. But is his information correct? Does he have his own motivation or secret ambition? Whether they come from Fanewick or Haven, the party must extend some trust to a person who is equally as dangerous and mercurial as the "enemy" they pursue. And what will they do when they find the Fanewraith? Bring her to justice? Side with her? Attempt to recover the Reaping Eye?

Kreil advises the party to start their hunt for the Fanewraith in the treetop village of Alula, where he suspects she runs her operation.

CAMPAIGN MECHANICS

The following mechanics are unique to this campaign.

▪ Corruption from the Witherwild

Adversaries and environments in this campaign can gain an additional type called Withered. When an adversary is Withered, describe how the Witherwild changed or impacted how they would normally appear or operate. You also need about 20 Wither tokens (these can be the same as the tokens you use for Fear).

Any time a PC takes Severe damage from a Withered adversary or environment, gain a Wither token and place it on that PC's character sheet. When you do, the PC must roll their Fear Die. If they roll equal to or below the number of Wither tokens on their sheet, they immediately gain a scar and clear all tokens, describing how the Witherwild changes them permanently.

At the end of each session, clear all Wither tokens from the PCs' sheets and gain an equal amount of Fear. If a character ever dies with Wither tokens on their sheet, their body is permanently taken over by the Witherwild.

SESSION ZERO QUESTIONS

Ask any of these questions to your players, or make your own.

- What dangerous animal comes out during the week of night that isn't out during the week of day?
- What unique trait (such as appearance, smell, or taste) does anything tainted by the Witherwild have?
- What superstitions does your character or their community have about traversing Fanewick during the long nights?
- Your character has witnessed something beautiful that came from the Witherwild. What is it and how has it transformed their view of the corruption?
- If your character is from Fanewick, what commodity do they secretly enjoy that comes from Haven? If they're from Haven, what delicacy from Fanewick can they not get enough of?

FIVE BANNERS BURNING

Long-brewing tensions between rival nations boil over, threatening all-out war.

Designed by Mike Underwood

Complexity Rating: ● ●

THE PITCH

Read this section to your players to introduce them to the campaign.

Five years into an armistice that ended a decade of warfare, the threat of renewed conflict looms over the continent of Althas. Five nations in a delicate web of alliances and rivalries seek to exploit the opportunities granted by this period of rapid magical, political, and social change. All five nations deploy agents to strengthen alliances, sabotage foes, and tip the balance of power in their favor. In a Five Banners Burning campaign, you'll play heroes caught up in the twisting and ever-escalating conflict between nations, contending with competing loyalties, generational grudges, and opportunistic villains.

TONE & FEEL

Adventurous, Dramatic, Intimate, Political, Serious, Sweeping

THEMES

Divided Loyalties, The Nature of Power, The Price of Ambition, Tradition vs. Innovation

TOUCHSTONES

A Song of Ice & Fire, Avatar: The Last Airbender, Babylon 5, Friends at the Table's PARTIZAN, Born to the Blade, Court of Blades, Dragon Age: Inquisition, Eberron: Rising from the Last War

OVERVIEW

If your group decides to play this campaign, give your players the following information before character creation.

The following five nations comprise the continent of Althas:

Armada is a federation of city-states founded by pirates-turned-merchants. Uninterested in paying back the fortunes stolen by their forebears, they seek strength and recognition through naval superiority. Armada is allied with Jesthaen and is disliked by Voldaen and Hilltop.

Hilltop is a rich theocracy that exerts a monopoly on access to the gods, giving them holdings in the other nations' settlements from capitals down to villages. Hilltop is an old ally of Voldaen and is unfriendly toward Armada and Jesthaen.

Jesthaen is a young republic recently independent from Voldaen after a bloody but short war. They seek to prove their strength through displays of military might. Jesthaen is allied with Armada and allies of convenience with Polaris.

Polaris is a progress-focused magocracy at the beginning of a magical industrial revolution. They are ideological rivals with Voldaen and allies of convenience with Jesthaen.

Voldaen is a proud monarchy with traditional authority and riches, recently shaken by Jesthaen's secession. They are an old ally of Hilltop and ideological rivals of Polaris.

These five nations once flew under one banner. In the age of gods, the divinities protected their mortal creations, clashing with primordial powers of chaos and striking them down. With victory secured, the peoples of Althas crowned their first queen—a dwarven seraph named Arvold—and founded the nation of Voldaen. Meanwhile, the gods established their seat in what is now known as Hilltop, but departed centuries later to fight otherworldly foes.

Over the next several centuries, factional differences within Voldaen grew untenable. With the gods absent, their priests asserted their authority as divine regents of Hilltop. Later, a group of scholars and mages who wished to push the boundaries of arcane knowledge broke off and founded the nation of Polaris. Alliances of pirate navies began settling down in trade cities, forming the federation of Armada. And just fifteen years ago, groups of workers and anti-monarchists declared independence from Voldaen to establish their own nation, known as Jesthaen. This bloody revolution consumed the continent, with Hilltop coming to Voldaen's aid while Polaris and Armada supported the Jesthaen rebels. Active combat ended five years ago with an armistice, but the peace remains tenuous.

The emergence of Jesthaen as a nascent military force has redrawn the lines of power, challenging Voldaen and Hilltop's traditional authority. But the alliance between Polaris and the upstart nations of Armada and Jesthaen is fragile, and there are many in both Voldaen and Jesthaen with unfinished business from the war. Minor border clashes and trade disputes threaten to boil over. Many believe that war is coming again—it's only a matter of when and how.

Five Banners Burning is an emotionally intense campaign with a large cast and sweeping scope, where the characters will find themselves in the crucible that forges the fate of nations. The campaign leans toward a nuanced moral landscape, with morality and ethics in tension with duty and allegiance. Heroes may do terrible things that weigh upon them, and most villains are motivated by love and loyalty as often as ambition or vengeance.

COMMUNITIES

All communities are available, but some have unique aspects within a Five Banners Burning campaign. As needed, provide the following information to your players and choose one or more of the questions to ask them during your session zero.

■ Highborne and Orderborne

Althas' highborne and orderborne communities play an especially central role in this campaign, as they are most strongly associated with the centers of power in the five nations. Highborne characters are likely connected to the ruling class of the five major nations of Althas.

- Are you a member of the aristocracy or nobility, or the scion of a prominent merchant or priest family?
- What expectations does your community have of you, and do you intend to live up to them?

Defined by their relationship to strongly held tenets, orderborne communities are most common in Hilltop and Voldaen. An orderborne character will have their community's ideals tested by the conflict between nations—those that live by a code will be called to die for it.

- How do you see the tenets you grew up with being changed or broken as tensions rise?
- What lines are you willing to cross to protect the people you love?

■ Ridgeborne, Underborne, and Wildborne

Althas is a mountainous continent, and Ridgeborne communities are common in every nation, often feeling more kinship with one another than the lowlander communities. Underborne communities can be found beneath mountaintops, in oceanside caverns, and deeper still. Wildborne communities are more rare, often founded by people interested in escaping the larger conflicts of Althas.

- What resources or assets does your community have that other nations might want to take for themselves?
- Who from your community was conscripted in past conflicts, and what tales do they tell of their battles?

■ Loreborne

Loreborne communities are especially prominent in Polaris—including magic academics, engineers, architects, and other scholars—but these communities exist in every nation. For example, priests safeguard religious histories and knowledge in Hilltop, while sages advise families and maintain the continuity of knowledge in Voldaen.

- What kind of knowledge does your community prioritize, and how does it influence the powerful figures in your home nation?
- What secrets does your community protect or control? What impact would those secrets have on the burgeoning conflict?

■ Seaborne

Seaborne communities are common across Althas, save in landlocked Polaris. They are home to the continent's most accomplished sailors, navigators, and fisherpeople, torn between a life lived tide-to-tide and the pull to duty in serving nations once more on the brink of war.

- How is naval power being exercised in your community?
- What do you fear will happen if the conflict comes to your community by land?

■ Slyborne

Slyborne communities are found across Althas, but are especially prominent in Jesthaen and Armada. There, criminal organizations have been instrumental in improving their nations' fortunes, from smugglers supporting the Jesthaen revolution to the tight-knit pirate families that founded Armada with goods taken from Voldaen, Polaris, and Hilltop.

- What is your community's relationship to their nation? How are they using the political instability to their advantage?
- What communities from other nations does your community do business with? How are those connections strained?

■ Wanderborne

Wanderborne characters belong to no single region of Althas—but though they may consider themselves outside the authority of the five nations, it will be very difficult to avoid the brewing conflict.

- Are your people claimed as subjects of one of the nations?
- How has the growing conflict altered your community's travels?

ANCESTRIES

All ancestries are available, but some have unique aspects within a Five Banners Burning campaign.

CLASSES

All classes are available, but some have unique aspects within a Five Banners Burning campaign.

PLAYER PRINCIPLES

If your group decides to play this campaign, give your players the following information before character creation.

### ■ Make Your Actions Reflect or Refute Your Allegiances

You will be implicated in the actions of your superiors, who may, at times, give questionable orders and condemn you for any signs of dissent. Consider your character's loyalty to those they serve—every action they take is a chance to strengthen their reflection of an ideal or stand against something they oppose. Weave your character's arc through bold choices until there's a clear, compelling difference between where they once stood and where they now stand.

■ Stick to Your Principles or Break Them for Good Reasons

Decide where you draw your lines and what it will take for you to cross them. Share your character's struggle with the party as they try to reconcile their actions with the ideals they profess.

■ Take Small Actions That Have Big Implications

Find your moment to make a difference, to push back against the overwhelming external forces that strain the people of this continent to their breaking point. Build the future you want one step at a time—a small gesture for you might mean the world to someone else.

■ Grapple with the Impact of Your Actions on Everyday People

Treat every person as important and foster hope in places where fear moves people to wrath or despair. When your character becomes a symbol people look up to when things are dire, explore whether they embody that heroism or reject the lionizing.

GM PRINCIPLES

Keep the following guidance in mind while you GM this campaign.

■ Force Them to Choose Between Their Loyalties

Put allies at cross purposes and force the characters to take a side. Make it impossible to keep everyone happy, forcing the characters to pay the price of compromise, whether personal, political, or both.

■ Entangle Them in a Web of Old Grudges and New Schemes

Show how people are motivated by both inherited ideology and personal ambitions. Highlight the rising tensions and dramatize the breaking points. Pull on the characters with the weight of history and the gravity of ambition.

■ Put the Party in the Crucible of History

Manifest dramatic moments through drastic action. For example, create a historic opportunity for compromise and peace, then fill the room with NPCs who will do anything to stop it. Position the party so they can always impact these major events—that they are the catalysts and fulcrums of history.

■ Zoom In and Out to Show the Far-Reaching Impact of Decisions

Show the wide impact an individual's actions can have, and draw the line of influence from their motivations to the consequences. Whether that be an adversary's zeal influencing their militant government to battle, or the character's bold decisions, make their actions reverberate, playing out cause and effect like a stack of falling dominos.

DISTINCTIONS

Use this information to prepare your campaign. You can also share it with your players as needed.

◼ A World on the Edge

Five Banners Burning features a setting on the verge of open warfare. When that war will break out depends on you, but it is almost inevitable. The conflict between nations will be fought in ballrooms and back alleys as much as in castles and valleys, and people from all backgrounds will be caught in the growing conflict despite their best efforts.

◼ Tipping the Scales of History

The party will be in a unique position to have a significant impact on the conflict between these nations. Ensure they're connected to the major players, factions, leaders, or other catalysts so they're always in the thick of the conflict.

◼ Big Questions

To best engage with the thematic elements of this campaign, keep these questions in mind throughout each session:

- Does power always corrupt?
- In what ways is the road to disaster paved with good intentions?
- What does just governance look like?
- How do you decide who to protect and uplift with limited resources?
- How do you manage divided loyalties without betraying someone, including yourself?

◼ Collateral Damage

As conflict escalates, it will displace monsters from their ecosystems, upset the natural and magical balance of Althas, and drive people from their homes to become refugees within or beyond their nation's borders.
THE INCITING INCIDENT

You can use the prompt below to start your campaign, or create your own.

Clover of Towers (orderborne firbolg, they/them), the child of Jesthaen revolutionary hero **Adamant Towers** (orderborne firbolg, she/her), was kidnapped on the way to a political marriage to **Enchanter Kalashae** (loreborne orc, she/her), a rising star in Polaris's High Circle of mages.

Polaris is wary of Jesthaen's claim that Clover has been kidnapped and demands that Jesthaen follow through with the political marriage. Voldaen denies all involvement and sends a diplomatic investigative party to Lightning Valley, a border town known both for the giant lightning rods that protect the town from magical storms and for hosting the talks that ended official hostilities between Voldaen and the revolutionary faction. However, days later, reports tell of some kind of "disaster" during the initial meetings between Voldaen and Jesthaen's representatives.

The party is sent to Lightning Valley to investigate what happened. There, they find representatives from other nations doing the same—the apprentice of a disappeared mage-inquisitor, a divine seeker from Hilltop investigating potential divine implications, a Voldaen judge who once served as the town magistrate "returning to visit family," and a merchant-diplomat from Armada.

The following NPCs comprise the cast embroiled in this mystery:

Clover of Towers wants to make their mother proud and find a way to be happy far from home. Before their kidnapping, they were last seen drinking with city guards at the Three Poles tavern, built between several lightning poles. They were too young to fight in the war, and they have a sense of inferiority about not having bled for the freedom they now enjoy.

Oziver of Storms, sheriff of Lightning Valley (ridgeborne simiah, he/him), is trying to keep the peace but is quickly becoming overwhelmed by the attention and stakes. Oziver is eager for help but needs reassurance of any outsider's goodwill. He knows that a city guard was the last to be seen with Clover, but he's convinced the still-missing guard isn't to blame.

Cerulean Prism, apprentice Mage-Inquisitor of Polaris (loreborne clank, he/him), is quiet and diligent, though worried by Clover's sudden disappearance. While working for Enchanter Kalashae, Cerulean managed correspondence with Clover during the marriage negotiations. They've fallen for the firbolg and will take reckless action to find them.

Kostren, Seeker of Hilltop (orderborne halfling, she/her), is a formidable presence used to being obeyed. She takes over the local temple as her base of operations, conscripting the clergy for a divination ritual that will locate Clover. She tells anyone that will listen of her vision that "proves" foul play by the mages of Polaris. Kostren is exaggerating the certainty of this vision to stoke renewed conflict so that Hilltop can claim more fertile land.

Zeshthon, County Judge of Voldaen (highborne dwarf, they/them), is an elderly dwarf with a compelling silence about them that people can't help but fill with conversation. They volunteered for the inquiry so they could visit their grandniece, a cobbler residing in the town. A dedicated art collector, Zesthon hopes to procure embargoed tapestries from Goledraelle, which could lead to exposing the merchant's true identity as a spy.

Goledraelle, merchant of Armada (seaborne elf, he/him), is a charming but hapless-seeming textiles merchant. This image of incompetence is a cover he deploys to throw off suspicion of his true agenda; in truth, Goledraelle is an Armadan spy dispatched to ensure the marriage happens as planned.

The original investigators arrived two days after Clover's disappearance and set out into the hills to the east, but have not checked in for over a week. Did they suffer the same fate as the firbolg? What help from the townsfolk did the kidnappers have, and who else knows about it? Which enemies of Jesthaen, Polaris, or Armada were in position to sabotage the marriage? Was the marriage sabotaged by someone within Jesthaen for other reasons?

Did some danger or threat lead Clover from the town without their escort? Or was this part of Clover's plan all along, a chance to live free of their mother's expectations?

Which of the second wave of investigators will be the first to learn where Clover went? Who escalates to violence first, and what version of that story catches on like wildfire?

CAMPAIGN MECHANICS

The following mechanics are unique to this campaign.

■ Faction Relationships

Use a campaign sheet to track the relationships between the nations, as well as their major assets and problems. Each nation has a relationship rating with the other nations, ranging from Nemeses (−3) to Close Allies (+3). The more intense the relationship, the more the nation will act for or against the other nation, even at risk to themselves. Nations that are Friendly (+1) will render help if it does not require much effort or risk, but nations that are Nemeses (−3) will go out on a limb just to see the other suffer.

ARMADA

Relationships: Allies (+2) with Jesthaen, Friendly (+1) with Polaris, Unfriendly (−1) with Voldaen, Enemies (−2) with Hilltop

Assets: Large and powerful navy, superior maps of ocean & wind currents, allied water monsters

Problems: Small land area, limited overland access to the main continent, lingering reputation as pirates and thieves

Major Objectives: Build friendly port infrastructure in Voldaen and Polaris for trade

Minor Objectives: Acquire airship technology, deploy privateers against adversaries

HILLTOP

Relationships: Allies (+2) with Voldaen, Enemies (−2) with Armada, Enemies (−2) with Jesthaen, Nemeses (−3) with Polaris

Assets: Wealth from tithes, a devout army, priests and seraphs, divine power and authority, influence and intelligence through temples and shrines

Problems: Surrounded by adversaries, negligible navy, scarcity of domestically produced food

Major Objective: Bring the Armadan miscreants back into the fold and redeem them

Minor Objectives: Beseech the gods for a bountiful harvest, implicate Polaris as the supporters of a Fallen cult

JESTHAEN

Relationships: Allies (+2) with Armada, Friendly (+1) with Polaris, Enemies (−2) with Hilltop, Nemeses (−3) with Voldaen

Assets: A strong land-based military, natural resources, large amounts of arable land

Problems: Political instability as a new nation, remaining conservative elements loyal to Voldaen

Major Objective: Take revenge on Voldaen for injustices across centuries

Minor Objectives: Secure enduring trade partnerships with Armada and Polaris, take control of local temples from Hilltop

POLARIS

Relationships: Friendly (+1) with Armada, Friendly (+1) with Jesthaen, Enemies (−2) with Voldaen, Nemeses (−3) with Hilltop

Assets: Skilled mages, magitech innovations, airships, magical creatures

Problems: Lack of workers, poor quality and scarce raw materials

Major Objective: Perfect magical servitor enchantments

Minor Objectives: Secure new mines and quarries, foster immigration through job programs

VOLDAEN

Relationships: Allies (+2) with Hilltop, Unfriendly (−1) with Armada, Enemies (−2) with Polaris, Nemeses (−3) with Jesthaen

Assets: Traditional political and cultural authority, seemingly boundless wealth

Problems: Strategic vulnerability due to major settlements close to large borders with Polaris and Jesthaen, political upheaval following Jesthaen's separatist revolution

Major Objective: Reclaim key resources from Jesthaen without starting another war

Minor Objectives: Turn Armada against their allies, steal magical talent and technology from Polaris

ARMADA   HILLTOP

JESTHAEN   POLARIS   VOLDAEN
Objective Countdowns

Due to the large scale of this campaign, you're encouraged to use special long-term countdowns to track each nation's efforts to exploit their assets, address their problems, and pursue their major and major objectives.

Each in-game week, pick one countdown for each nation to advance (step down the countdown by one tick) as they make progress on their goal. These countdowns can also tick up or down if their progress is influenced by the fiction.

A completed countdown represents a nation gaining access to an asset, removing a problem, developing new technology or initiatives, changing political or social fortunes, or acquiring an equally useful benefit. When a countdown is completed, pick a new objective based on the fiction and start a new countdown. Each nation can have one major objective countdown and up to two minor objective countdowns at a time.

Completing major objectives requires a 10-step countdown, while minor objectives have 4 to 6 steps depending on the scale of the endeavor. Stagger the nations' countdowns so that as they start completing, only one or two are reaching an objective and changing the political landscape each week; if you trigger all five nations' countdowns at the same time, there will be weeks of inactivity afterward, lessening the tension of the brewing conflicts.

The party may often be dispatched or mobilized to complete or block these objectives. Meanwhile, completed countdowns generate major narrative shifts for the party to respond to.

SESSION ZERO QUESTIONS

Ask any of these questions to your players, or make your own.

- Should all the characters come from and/or have allegiance to the same nation? Why are they allied and traveling together?
- How big of a role will war play in this campaign compared to other elements like diplomacy, intrigue, or mystery?
- How much conflict do we want between PCs? What safety tools will we use to negotiate those conflicts when they occur?

Example: *The party spends a week traveling by airship from Armada to Polaris to seek counsel from High Circle scholars about ancient script discovered in an abandoned ruin. During that time, the GM chooses one countdown per nation to advance as time passes.*

First, they tick down Voldaen's 10-step countdown to seize one of Armada's shipping fleets from 7 to 6, representing the nation's scouts and sailors observing the current state of Armada's navy: how many ships the pirates have, what kinds of ships they are, and what they're being used for.

Inspired by a scene where the PCs had to prove their magical prowess to the Polaris captain to secure passage, the GM chooses to tick down Armada's 4-step countdown to acquire airship technology from Polaris, representing Armada's diplomatic and trade efforts to access the carefully guarded magitech.

For Hilltop, the GM ticks down their 4-step countdown—representing a massive ritual to bless this year's harvest and increase their yield—from 1 to 0, completing the countdown. The GM makes a note to spread news of its success, as this addresses Hilltop's food shortage. They also note to think of a new countdown for Hilltop.

Polaris has two projects with 3 ticks remaining, so the GM decides to tick down their major countdown to perfect their servitor technology to 2 as the magitechnicians scale up wider tests of the promising prototype.

Lastly, the GM ticks down Jesthaen's project—taking religious authority in their nation from Hilltop—to 4. This countdown had recently ticked up from 4 to 5 after the PCs chose to investigate cult rumors in Armada rather than assist Jesthaen in convincing Hilltop priests to cede authority.

BEAST FEAST

When a small village's monster defense system fails, the local heroes must venture into the endless caverns below to fix it—and cook up trouble for the creatures that stand in their way!

Designed by Banana Chan, Rowan Hall, & Spenser Starke

Complexity Rating: ● ●

THE PITCH

Read this section to your players to introduce them to the campaign.

The rustic, peaceful village of Elmore sits atop the Plover Caves, a labyrinthine system of caverns full of dangerous and delectable creatures. When the powerful magic keeping the villagers safe begins to fail, the bravest among them must descend into the caves to save the day. In a Beast Feast campaign, you'll play everyday heroes diving into the Plover Caves to reignite the magic lure that lies in its depths—and cook up delicious meals. Welcome to a culinary world of zoophagous delight, where the beasts you fight become the food you eat!

Absurd, Comedic, Creepy, Fun, Lighthearted, Silly

THEMES

Circle of Life, Friendship & Loyalty, Nature's Bounty, Overcoming Fear, Violence & Peace

TOUCHSTONES

Delicious in Dungeon, Monster Hunter World, One Piece

OVERVIEW

If your group decides to play this campaign, give your players the following information before character creation.

Long ago, within the heart of the **Plover Caves**, **Hylaeus the Forest Mage** (she/her) cast a powerful spell, creating a Lure that draws dangerous creatures from the surrounding area into the caverns. For centuries, this kept any harm from coming to the village of **Elmore**. However, the caves are now filled to the brim with strange, unexpected creatures from across the region—and the remnants of outsiders brave or foolhardy enough to venture into them. But nobody from Elmore is foolish enough to be caught dead in the caves. The quiet, rustic village is full of bakers and weavers, farmers and cobblers, with ne'er a sword in sight. The villagers are more concerned about not mucking up their contribution to the yearly Stewpot Festival than the dangers outside their walls.

That was until the village's beloved halfling mayor **Doug Dougle** (he/him) was attacked by a dangerous creature during his daily hike through Plover Woods. The Lure created by Hylaeus all those years ago is fading, and with it, Elmore's protection. As increasingly dangerous beasts stalk the woods, the villagers have banded together to reignite the ancient spell, calling on anyone who might pick up a blade to descend into the caves and save their people. Unfortunately, the defenseless people of Elmore have ceased hunting and foraging in Plover Woods for fear of attack until the Lure is reactivated—there isn't much to spare, so every bite in town is precious. Anyone venturing into the caves will have to hunt and prepare their own food while they're down there!

The easiest way to find the Plover Caves is to take the western road out of Elmore and follow the birdsong of piping plovers. Old tales from this area say these small birds are the only creatures that move freely in and out of the tunnels without losing themselves to the depths, so following them almost always leads to an entrance—or an exit.

The old tales also say the Plover Caves are endless—this isn't true, but it might as well be. They stretch on for hundreds of miles underground, deeper and more sprawling than even the most adventurous explorer could map in their lifetime. The entry path leads down on a sharp decline for miles until it finally splits into many branches leading to various regions within the cave system. Here, different biomes are home to unique creatures, wonderous flora, and valuable treasures left behind by adventurers past. The deeper you go, the more dangerous and delicious the creatures are, and the more precious and powerful the treasure is. And even deeper still lies the Lure.

Those from Elmore might be surprised to find there are many people happily living and working in the dark, dangerous caverns. Most reside in camps, but more permanent residents have small cabins carved out of rock along the tunnels. The culture in the Plover Caves is very communal, and ambitious folks have set up shops for bartering or trade. Most major caverns even host a Berry's—the chain of small restaurants that serve the catch of the day, fresh and hot, in exchange for gold. Residents might stop in when they're too tired or ingredient-poor to cook for themselves, but Berry's restaurants are also hubs for gossip, entertainment, and warnings about what dangerous beasts might be lurking nearby.
COMMUNITIES

All communities are available, but some have unique aspects within a Beast Feast campaign. As needed, provide the following information to your players and choose one or more of the questions to ask them during your session zero.

All Communities

In a Beast Feast campaign, the characters are villagers from Elmore. If a player wants to create a character whose chosen community wouldn't be found in this peaceful village, work with them to determine where their character originally came from. Perhaps they grew up in an orderborne community and moved to Elmore to be in a less restrictive environment, or they were a slyborne adventurer who settled in the village after retiring from their shady deeds. The following sections describe a few communities in more detail and how they could tie into this campaign.

Underborne

Underborne folk may be from the Plover Caves, but even if not, they will likely thrive in this labyrinth. Their eyes need not adjust to the darkness, nor do their hands quake at the touch of the sour ants crawling in the dirt. This is home for them.

- Despite being accustomed to your own underground environment, what's something you've heard is unique about the Plover Caves?
- You have a particular dish from your own cave system that you're hoping to cook on this adventure. What makes it special?
- You were injured by a cave creature once. How did that experience change you?

Ridgeborne

The rocky, rough environment is familiar to ridgeborne characters. Though the cuisine is probably much different than they're used to, they're likely accustomed to catching, killing, and preparing their own food.

- What specific dish do you miss from home?
- You struggle with a lack of open space. What do you plan to carry with you to help steady your nerves?
- You think a lesson from the mountains will help you in the Plover Caves. What did you learn, and how did you learn it?

Loreborne

As devourers of knowledge, loreborne characters might believe the Plover Caves provide a unique opportunity to observe a strange ecosystem that brings together beasts that would never normally live in the same environment.

- What rumor about the beasts in Plover Caves have you heard? How has that changed how you operate in the caverns?
- What specific piece of knowledge are you seeking while underground?
- You plan to record information to bring back to someone. Who is it, and why is this so important to you?

ANCESTRIES

All ancestries are available, but some have unique aspects within a Beast Feast campaign. As needed, provide the following information to your players.

Clanks

Clanks can consume organic matter, but they may lack the ability to taste the food. Instead, they might enjoy the culinary arts for other qualities, such as texture or aesthetics.

Fungril

Fungril can hear mushrooms screaming as they are harvested. Unfortunately, a majority of plant life in the Plover Caves is fungi—adventurers might need to find alternative ingredients if it helps make cooking a more shame-free activity.

CLASSES

All classes are available, but some have unique aspects within a Beast Feast campaign. As needed, provide the following information to your players.

All Classes

The people of Elmore have lived peacefully for generations. Thanks to Hylaeus, the region's dangerous creatures are enticed to the caves; meanwhile, other towns or armies have largely left the unassuming village alone. When players select martial abilities or spells, they should consider how and why their characters learned these techniques or what skills they've adapted on this journey.

PLAYER PRINCIPLES

If your group decides to play this campaign, give your players the following information before character creation.

■ Build on Humble Origins

When you make a character for this campaign, they should be a villager from Elmore who has gathered what tools they can to descend into the Plover Caves in hopes of saving their people. Think about what quaint or mundane job your character holds in the village and how it might have prepared them for their new role as a hero. Perhaps they're a florist who knows about plants, a clockmaker with dexterous fingers, a mage who runs a humble potion shop, a blacksmith with a strong hammer-arm, or a chef with a particular adeptness for knives. Use your character's occupation as inspiration for their experiences, the kind of weapon they carry, and how to flavor any features you choose for your character.

■ Slay and Filet

Have you tried eating it? No? Well, then how do you know it's not food? Carry a curious mindset with you as your character explores the caves, learning about the various beasts and blooms that could make a delicious meal (and potentially an excellent addition to your cookbook).

■ Balance Comedy and Heart

If there's a place for a silly character name, a low-stakes yet important life goal, a weird personality quirk, or a zany aesthetic, it's this campaign frame. Embrace the fun, make bold choices, and look for opportunities to set up your character's allies for comedic moments. Additionally, let your character experience vulnerability, reveal a hard personal truth, or bond with another character over something important to them. Strive to balance comedic and heartfelt moments.

GM PRINCIPLES

Keep the following guidance in mind while you GM this campaign.

■ Make It Delicious

Describe the world through a fun, over-the-top culinary lens. When describing beasts, highlight the parts of them that could be particularly useful in a dish or valuable to a specific recipe. When describing the environment, lean on the PCs' senses—especially smell and taste—to draw them in and provide details they don't see. Use food-related colors ("the glass orb you find is the color of rich honey"), names ("she introduces herself as Penelope Pepperbottom"), and comparisons ("you march your way through the sludge of the tunnel, thick like molasses") to immerse your players in the world.

■ Give Them Purpose

Though it can be fun to slay some beasts and make some meals, the novelty will soon wear off if the story you're telling doesn't have purpose and stakes. While the long-term goal might be to reach the Lure and revitalize its magic, ensure you introduce short-term goals and break the adventure up into more session-to-session story developments. Give players a reason to return to Elmore every few sessions to contrast the world above and the world below.

■ Create Personal Conflict

Crafting meals isn't just about slaying beasts to make great dinner; it's also about competing with other Plover Caves delvers for the finest ingredients! Introduce conflict, such as rivals who want to see the PCs fail so they can gain control of the Plover Caves. Make ingredients scarce so that when word breaks out that a popular protein is nearby, the party must race to claim it before others do.

DISTINCTIONS

Use this information to prepare your campaign. You can also share it with your players as needed.

■ A Cave of Wonders

Plover Caves' biomes are as varied as any surface biomes, and often stranger and more disconcerting. A windstorm might whip through the tunnels, uprooting massive plants and blocking exits. A sudden, excessive expulsion of moisture from the weeping skyflowers overhead might cause a torrential downpour that floods a cave. A cavern's ground might be so soft and thick that you begin to sink if you stand still too long. Some even refer to the Plover Caves as a distinct entity itself—not just a cave system, but a massive creature of its own.

Additionally, there are distinct features within the caves most adventurers will stumble across:

Layers of the cavern represent how deep an adventurer is within the Plover Caves, with each layer representing between 200 and 500 vertical feet. Common adventurers generally stay within the first layer, but the most ambitious venture deeper. Most stories describe four distinct layers (The Shallows, Twilight, Abyss, and Hadral), but veteran explorers have told tales of many, many more.

Brilliance is a geodesic dome that shines so brightly it mimics the sunlight from the outside world. Some veteran explorers practice meditation and morning rituals in this dome, often asking one another, "Will you be at Brilliance today?"

Reflection of the Stars is Plover Caves' primary lake. It's fed by an underground spring and sits beneath a ceiling dotted with bioluminescent morsels, such as the glowing mantis and the brightclaw scorpion. The aquatic creatures who call this place home range from small almond guppies to medium-sized jellyfish to the dreaded ironshark and the massive angler squid, whose many eyes are considered a delicacy.

The Catacombs are the deepest point of the third layer of the cavern, thus named because the ground is covered in so many layers of bones, one cannot step without breaking a few and drawing attention to themself. Some of Plover Caves' residents say the most horrifying beasts bring their prey to the Catacombs for consumption, making it a hotbed of dangerous creatures. Passing through the Catacombs successfully is the only way to explore deeper than the Abyss.

■ Beasts and Blooms

This campaign uses the terms **beasts** and **blooms** for the animals and plants/fungi that are edible in this world. Anything with distinct personhood isn't considered a beast or a bloom, even if they resemble something that would otherwise be edible—for example, fungril and drakona. Because the magical Lure compels creatures from across the region into the Plover Caves, an endless variety of strange beasts and blooms live within them—not just ones normally found in caves! In this world, it would make sense to find a pack of velociraptors descending on a six-legged dire ostrich that is, in turn, snacking on a patch of starfish mushrooms. These caves hold an ecosystem unlike any other, and every edible thing that could exist down here likely does.

■ The Lure

The Lure is the orb of concentrated magic created by Hylaeus the Forest Mage to trap dangerous creatures within the Plover Caves. It's most commonly believed the Lure resides somewhere in the lowest levels of the Hadral layer, but no one is certain where. Because so little is known about this great source of power, there are many questions to answer about it over the course of the campaign:

- How was it made?
- What was sacrificed to create it?
- Why has its power started to fade?
- What will the PCs need to do to activate it again?
THE INCITING INCIDENT

You can use the prompt below to start your campaign, or create your own.

After the attack on Mayor Dougle, the local alchemist, **Carat** (they/them), approaches the party. Worried for the safety of the town, they ask the party to delve into the Plover Caves to locate a particular ingredient—ghost scorpion venom. Carat can transmute twelve drops of this venom into a spicy paste, which they can spread around the borders of the village to temporarily keep dangerous creatures at bay.

Carat explains that ghost scorpions tend to make their nests by flattening the tall grasses of the Overgrowth into strange circular patterns. To get to the Overgrowth, the party can follow the smell of jasmine through the northernmost chamber of the Shallows. But if they ever smell lavender—RUN.

What will the characters encounter that makes them realize the failing Lure is a problem that needs addressing? What will they accomplish that shows them they're capable of exploring further in? What about the community will coax them into returning—and what competition will light a fire in their veins? And most importantly, what culinary experience will change their view on beast-feasting forever?

CAMPAIGN MECHANICS

The following mechanics are unique to this campaign.

BEAST FEAST STARTING EQUIPMENT

As everyday heroes with no access to standard weapons, PCs must choose their Tier 1 starting equipment from the following tables instead of the equipment tables in chapter 2.

Primary Physical Weapons

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Cleaver	Agility	Melee	d8 phy	One-Handed	*Reliable*: +1 to attack rolls
Sharpened Rake	Agility	Melee	d8+3 phy	Two-Handed	—
Butcher's Axe	Strength	Melee	d12+3 phy	Two-Handed	*Heavy*: −1 to Evasion
Iron Skillet	Strength	Melee	d8+1 phy	One-Handed	—
Pitchfork	Strength	Melee	d10+3 phy	Two-Handed	—
Sledgehammer	Strength	Melee	d10+3 phy	Two-Handed	*Massive*: −1 to Agility; on a successful attack, roll an additional damage die and discard the lowest result.
Cooking Knife	Finesse	Melee	d8+1 phy	One-Handed	—
Walking Staff	Instinct	Melee	d10+3 phy	Two-Handed	—
Rolling Pin	Presence	Melee	d8+1 phy	One-Handed	—
Sickle	Presence	Melee	d8 phy	One-Handed	*Quick*: When you make an attack, you can mark a Stress to target another creature within range.
Forge Poker	Strength	Very Close	d8+2 phy	Two-Handed	—
Crop Scythe	Finesse	Very Close	d8+2 phy	Two-Handed	—
Fishing Rod	Agility	Far	d6+3 phy	Two-Handed	—
Slingshot	Finesse	Far	d6+3 phy	Two-Handed	—
Firework Launcher	Agility	Very Far	d6+3 phy	Two-Handed	*Cumbersome*: −1 to Finesse

Primary Magic Weapons

> *All magic weapons require a Spellcast trait.*

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Enchanted Hammer	Strength	Melee	d10+1 mag	One-Handed	—
Enchanted Mop	Strength	Melee	d10+3 mag	Two-Handed	—
Enchanted Scissors	Finesse	Very Close	d10 mag	One-Handed	—
Enchanted Broomstick	Instinct	Very Close	d10+2 mag	Two-Handed	—
Exploding Potions	Finesse	Close	d8 mag	One-Handed	
Enchanted Forge Lighter	Instinct	Close	d8 mag	One-Handed	—
Enchanted Boomerang	Instinct	Far	d6+3 mag	Two-Handed	—
Enchanted Kite	Presence	Far	d6 mag	Two-Handed	*Versatile*: This weapon can also be used with these statistics—Presence, Melee, d10.
Whisk Wand	Knowledge	Far	d6+1 mag	One-Handed	—
Sparkling Staff	Knowledge	Very Far	d6 mag	Two-Handed	*Powerful*: On a successful attack, roll an additional damage die and discard the lowest result.

Secondary Weapons

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Large Fork	Agility	Melee	d8 phy	One-Handed	*Paired*: +2 to primary weapon damage to targets within Melee range
Barrel Lid Shield	Strength	Melee	d4 phy	One-Handed	*Protective*: +1 to Armor Score
Table Shield	Strength	Melee	d6 phy	One-Handed	*Barrier*: +2 to Armor Score; −1 to Evasion
Paring Knife	Finesse	Melee	d8 phy	One-Handed	*Paired*: +2 to primary weapon damage to targets within Melee range
Festival Whip	Presence	Very Close	d6 phy	One-Handed	*Startling*: Mark a Stress to crack the whip and force all adversaries within Melee range back to Close range.
Towline Hook	Finesse	Close	d6 phy	One-Handed	*Hooked*: On a successful attack, you can pull the target into Melee range with you.
Flare Launcher	Finesse	Far	d6+1 phy	One-Handed	*Bright*: This weapon temporarily lights up the area the flare lands in.

Armor

ARMOR	BASE THRESHOLDS	BASE SCORE	FEATURE
Quilted Clothing	5 / 11	3	*Flexible*: +1 to Evasion
Leather Apron	6 / 13	3	
Tree Bark Armor	7 / 15	4	*Heavy*: −1 to Evasion
Baking Tray Breastplate	8 / 17	4	*Very Heavy*: −2 to Evasion; −1 to Agility

MAKING A BEAST FEAST

■ A Big Book of Recipes!

The party will create a cookbook together as they play through this campaign frame. The players should choose a small notebook they can share, then decorate it as they'd like (stickers, colored markers, and paint are highly encouraged). This notebook is their cookbook—during downtime, they'll record each recipe they make, including its name, the ingredients, the cooking method, and how it turned out. The cookbook is shared by the players, who should all get the chance to contribute to it. The more the characters practice making meals with the same flavor profile, the easier that combination becomes to prepare!

■ The Beast Feast!

During downtime, the PCs recover from their adventuring by making a meal from the bounty of ingredients gathered from the caverns.

Every ingredient PCs gather has a **flavor profile**, which is determined by the 1–3 flavors that comprise it and the strength of those flavors.

Each flavor has a die size associated with it:

→ **Sweet** (d4)
→ **Salty** (d6)
→ **Bitter** (d8)
→ **Sour** (d10)
→ **Savory** (d12)
→ **Weird** (d20)

A flavor's strength is a value between 1 and 3, which is the number of the flavor's associated dice the players roll when cooking with the ingredient. A PC can hold a number of ingredients equal to the value of their highest character trait. The following list provides examples of ingredients and their flavor profiles:

- **Mushroom caps:** Bitter (1), Savory (2)
- **Wyvern tongue:** Sour (1), Savory (1), Weird (1)
- **Ooze marrow:** Sweet (1), Bitter (2)
- **Direbear meat:** Savory (3)
- **Acid dragon saliva:** Sour (2)
- **Cave boar milk:** Salty (1), Savory (1)
- **Rileroot:** Bitter (1)
- **Ogre kidney stone:** Sweet (1), Weird (1)

Example: In this case, mushroom caps would contribute 1d8 and 2d12 to the meal.

Hunting Beasts for Ingredients!

Every beast that PCs fight provides ingredients they can harvest. A beast's maximum Hit Points determine how many ingredients they produce.

Hit Point Guide

→ **4 or lower:** 1 ingredient
→ **5–7:** 2 ingredients
→ **8–10:** 3 ingredients
→ **12 or higher:** 4 ingredients

While the adversary's Hit Points determine the number of ingredients, you set the flavor profile and strength. Use the narrative details of the adversary to inform these choices. Often, less difficult adversaries have flavor profiles with smaller dice (Sweet, Salty, and Bitter), and more powerful adversaries have flavor profiles with larger dice (Sour, Savory, and Weird).

Gathering Blooms for Ingredients!

PCs can also obtain ingredients from their environment—these are called blooms. Once per rest, each PC can spend a Hope to gather blooms from their surroundings. You can tell them what they find or have them roll their Hope Die and gain one bloom with a flavor profile based on the following table:

1–2	3–4	5–6	7–8	9–10	11–12
Sweet (1)	Salty (1)	Bitter (1)	Sour (1)	Savory (1)	Weird (1)
Making a Feast!

During downtime, players can't choose downtime moves to clear Stress, clear Hit Points, or gain Hope. Instead, they have a new downtime move: Make a Feast. When they choose this move, the PCs can contribute any ingredients they're carrying to the party's collective meal and gain the benefits of the resulting feast.

The PCs who choose to Make a Feast during downtime prepare the food together. They should collaborate to decide which ingredients they're using, then erase those ingredients from their inventory. Then they come up with a name and description for the dish and record it in their party's cookbook.

When the PCs begin cooking, they roll the appropriate number of flavor dice. For example, the party decides to make a steak dinner with the following recipe:

- 1 serving of direbear meat → 3d12
- 1 serving of mushroom caps → 2d12 + 1d8
- 1 serving of ooze marrow → 2d8 + 1d4

This gives the party 5d12, 3d8, and 1d4 as the meal's flavor dice. They roll the dice and look for any matching values. If there are no matching values, they discard a single die of their choice, then roll the pool again to continue cooking. When they get any number of matching values, players collect those dice off to the side and continue rolling. When they have only one die left, the meal is done!

Next, players take each set of matched dice (which can consist of two or more dice per set) and add their values together. For example, a d6 and a d8 that rolled matching 3s would be worth 3. A d10 and d12 that rolled matching 4s would be worth 4. A d8 and a d20 that rolled matching 4s (on a different roll) would also be worth 4. Together, they have a Meal Rating of 11.

All PCs who eat the meal can individually use the value of the Meal Rating to clear Hit Points, clear Stress, and gain Hope, dividing this value however they'd like. For example, with a Meal Rating of 11, one PC might choose to clear 6 Hit Points, clear 4 Stress, and gain 1 Hope. Another might choose to clear 5 Hit Points, clear 4 Stress, and gain 2 Hope.

Anytime a party makes a dish with the same flavor profile as another recipe they've previously recorded in their cookbook, they should add a number of tokens equal to the party's current tier to their pool of flavor dice. When they must discard a die, they can instead discard one of these tokens.

QUICK INGREDIENT GENERATOR!

When the PCs harvest an ingredient, roll a d20 on each relevant table and use the combination to inspire what they gather. If one of the options doesn't fit the scenario, choose another that does.

Beast:

What kind of ingredient is it?

1	Feet
2	Powder
3	Limb
4	Belly
5	Fat
6	Eggs
7	Marrow
8	Tongue
9	Brain
10	Ribs
11	Organ
12	Flesh
13	Stones
14	Eyes
15	Jelly
16	Horn
17	Meat
18	Scales
19	Wings
20	Secretion

Bloom:

What kind of ingredient is it?

1	Flower
2	Roots
3	Stems
4	Leaves
5	Bulbs
6	Nuts
7	Seeds
8	Bark
9	Berries
10	Fruit
11	Sap
12	Pollen
13	Fungi
14	Nectar
15	Pods
16	Herbs
17	Algae
18	Moss
19	Grain
20	Rind

Any Ingredient:

What's interesting about it?

1	It's particularly tender.
2	It's still wriggling.
3	It looks like something it isn't
4	It has a pungent smell.
5	It's brightly colored.
6	It's completely translucent.
7	It's an odd size or shape.
8	It has unique markings.
9	It recoils from the light.
10	It withers in the dark.
11	It smells unbelievably good.
12	It has an unexpected texture.
13	It's encased in something.
14	It's filled with something.
15	It's emitting a colorful gas.
16	It comes apart in layers.
17	It must be prepared in a strange way.
18	It's leathery or cartilaginous.
19	It's brittle.
20	It's deadly when consumed raw.

NEXT LEVEL FEAST!

Once your table is comfortable with the basics, you can give the PCs opportunities to gather specific ingredients they're looking for based on what they've learned about the world. You might also create ingredients that include features, giving them additional details to consider when making their dishes. These should be rarer than typical ingredients, only harvested from Leader or Solo adversaries.

■ Example Ingredients with Features

DIREGAZELLE SKULL MARROW
Sweet (1), Salty (1), Sour (1)
Built for Speed: You gain a +1 bonus to your Agility until your next short rest.

HOLY COW'S MILK
Weird (1)
Last Drop: When you have only one die remaining while cooking, roll it and add the result to your Meal Rating.

GHOST SCORPION VENOM
Sour (1), Savory (1)
Spicy: If your flavor dice match on results of 8 or higher, you can't clear Stress using this dish.

DEATHFLOWER
Bitter (2)
Risky: If you roll no matches on your flavor dice, you clear all Hit Points and Stress and gain 3 Hope. If you roll any matches on your flavor dice, your Meal Rating is 0 and you must make a death move.

■ Berry's Restaurant

When the PCs are near an open Berry's Restaurant during their downtime, they can each spend a handful of gold to order food and choose a downtime move to clear Stress, clear Hit Points, or gain Hope. Only 2 handfuls of gold can be spent per PC during downtime.

SESSION ZERO QUESTIONS

Ask any of these questions to your players, or make your own.

- What dangerous creature attacked Mayor Dougle in the Plover Woods?
- While your character is in the caves, who will they miss the most back in Elmore?
- What personal life goal does your character feel they may be able to finally accomplish while in the caverns?
- Why was your character so eager to leave Elmore to go on this adventure?
- What rumor did your character hear about the caves?
- If your character is able to reestablish the Lure's power, what favor do they plan to ask of the mayor?
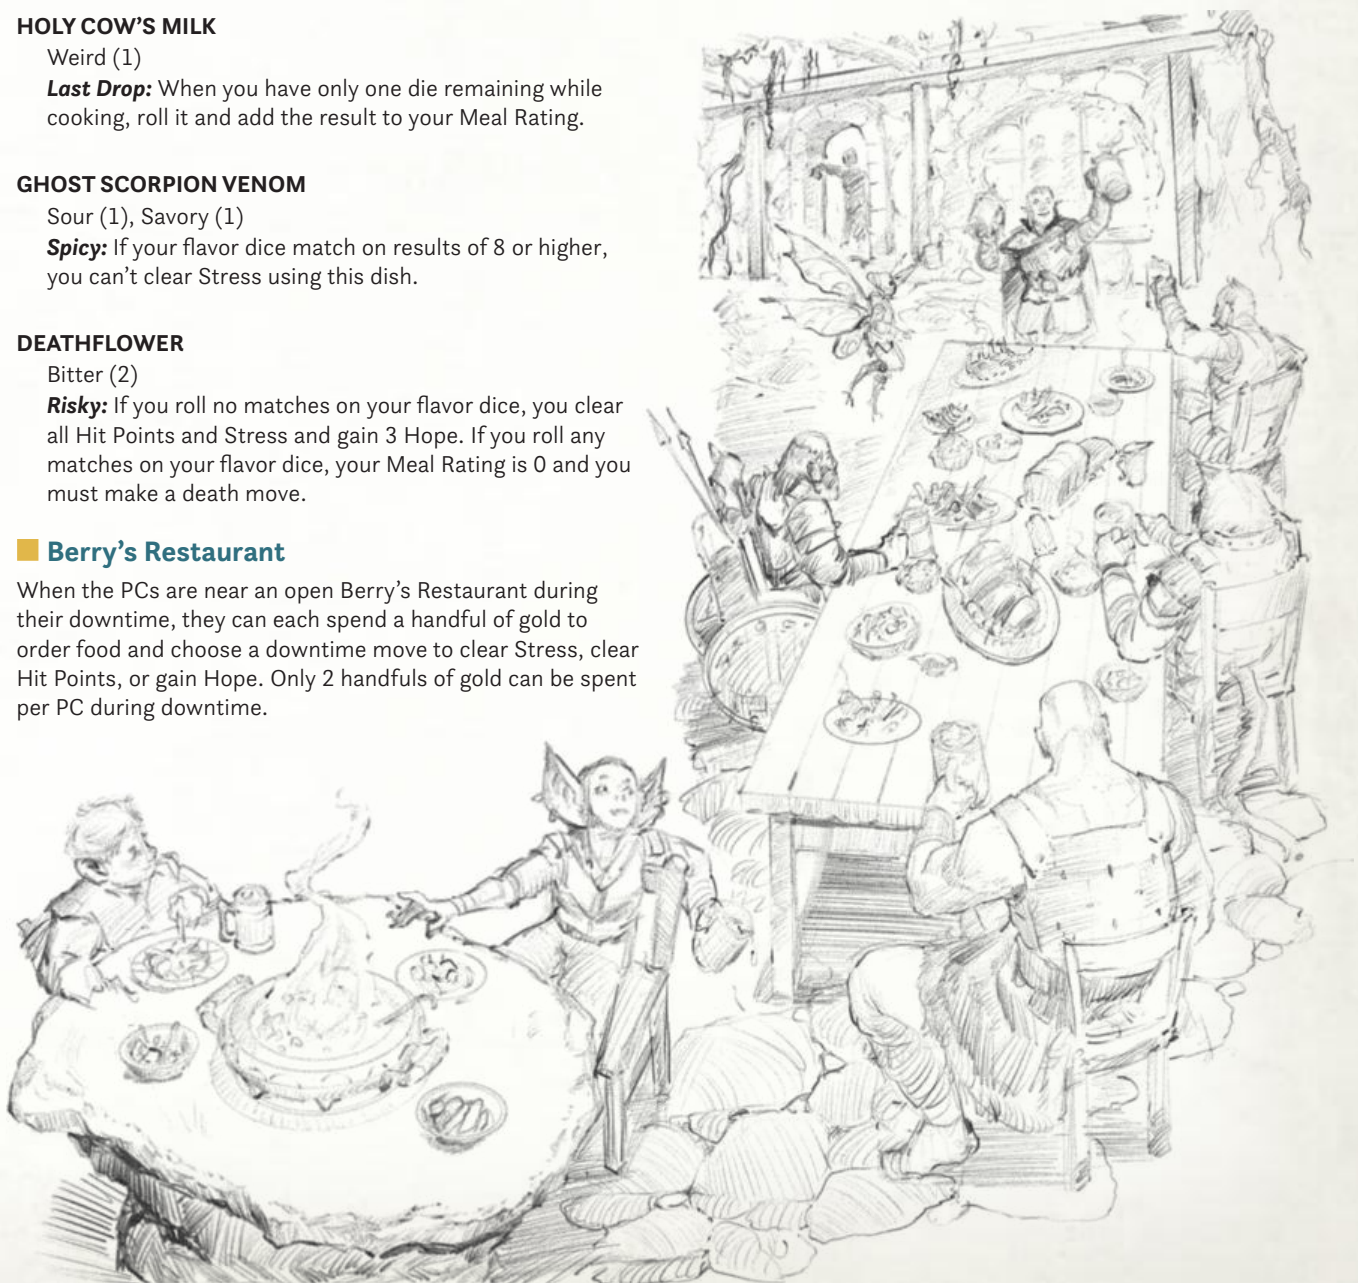

THE AGE OF UMBRA

In a dying world immersed in relentless shadow and nightmarish monsters, small communities hold fast to the light, hoping those who endure can find a way to save this broken realm before all is lost to darkness.

Designed by Matthew Mercer

Complexity Rating: ● ● ●

THE PITCH

Read this section to your players to introduce them to the campaign.

A century has passed since the God-King Othedias betrayed the Pantheon, provoking divine punishment and abandonment by the gods that left the realm of the Halcyon Domain shattered, desolate, and eternally cursed. Throughout this shadow-choked land of decaying fortresses and dreadful monstrosities, surviving communities cling to hope in the face of lightless oblivion. In an Age of Umbra campaign, you'll play heroic survivors who protect their community from the terrors beyond their walls, venture out into the unknown to hunt the nightmares that twist and grow with each fallen soul, seek answers to the curses that corrupt this world, and perhaps even discover a way to change its fate.

TONE & FEEL

Ancient, Daunting, Epic, Grim, Ominous, Terrifying, Tragic

THEMES

Apocalypse, Corruption, Darkness vs Light, Hope, Redemption, Survival

TOUCHSTONES

Dark Souls, Kingdom Death: Monster, Berserk, The Seventh Seal, Blasphemous

OVERVIEW

If your group decides to play this campaign, give your players the following information before character creation.

The **Age of Umbra** is a dark and broken age within the realm known as the Halcyon Domain, which rots in the wake of its Pantheon's abandonment. Grandiose cities and awe-inspiring cathedrals to the Veiled Gods now crumble slowly into ruin, fallen bastions of the prosperous epoch ruled by the guiding hand of God-King Othedias. Othedias, chosen by the Veiled Gods as the bridge to divinity, conspired with his Grand Ordinants and Aetherlords to enact clandestine machinations that could shift the balance in celestial power, enraging the pantheon.

His blasphemy was met with cataclysmic retribution. The gods rained destruction upon the land, ending the Old World and forsaking the surviving peoples of the Halcyon Domain to an existence of growing desolation. The Veiled Gods then abandoned this world in what is referred to as the Apostasy, leaving what remains to wither under ever-growing shadow, the clouded skies growing darker with each passing generation as they herald the world's slow death march into entropy and oblivion.

The cycle of the soul has been sundered, cursing all who live or ever will live with the "soul blight," a mark upon every mortal ensuring that, upon their death, they will rise again as a corrupted revenant bent on destroying everything they loved in their former life. If their risen body is destroyed, the marked soul withdraws into the dark, ethereal mass known as the Umbra, seeking others to haunt and corrupt.

It's now been nearly a century within the Age of Umbra, and those who remain rebuild what they can among the ruins of the Old World. Referring to themselves as the Enduring, these scattered communities of survivors huddle within reinforced battlements where Sacred Pyres burn as a beacon of hope and safety. All Enduring are trained to survive and defend themselves in this bleak land from a young age, many honed into fierce warriors and Aetherweavers through hardship and necessity by the time they reach adulthood. Bands of hunters brave the cracked and twisted landscape beyond their walls each day to gather sustenance, recover materials, and connect or trade with other surviving settlements.

However, many of the outside world's wandering beasts have mutated from the corruption of the Umbra; this transient storm of twisted souls merges with and contorts the creatures into nightmarish monsters that stalk, rage, and evolve with each newly fused specter. When these monstrosities slay those who confront the wilds, their victims' blighted souls join the horrors that claimed them. In the absence of the gods, dreams turn ominous and empty, and oracles imagine great alien minds glimpsing into this world, reaching beyond the cosmic veil left unguarded.

The diaspora of surviving communities hold against the doom through grit, ingenuity, and faith. Within the swampy flood plains of the mountain-crowned region known as the **Idol Hollows**, an emergent fort village called **Okros** has stood resilient against the surrounding swampland dangers for over fifty years. Its massive walls of melted shields and stone encircle the village and central Sacred Pyre, whose flames climb above the tallest ramparts, a burning symbol of strength and safety visible from across the Idol Hollows.

A recent seismic event within the valley conjured a massive sinkhole referred to as the **Shalk Chasm**, uncovering an expanse of long-buried structures and vestiges from before the Old World. Concerned and curious about what boons or banes might await discovery within this subterranean catacomb, brave Enduring slowly investigate the mysteries below, while scouts seek allies from erudite places, such as the Celsians of Amber Reach.

Nestled against the **Griefcleft Mountains** that buttress the eastern edge of the Idol Hollows, dividing it from the tainted jungles of Aveidoora, the glorious city of **Amber Reach** lays fallen and haunted in the wake of the Apostasy. The once-prosperous capital's expansive cityscape of overbearing gates, gothic towers, and staggering fortresses lies damaged and derelict, with empty households now sheltering horrors and looters. Within the city's Ashcall Quarter, the **Celsian Athenaeum**, a grand college and library repurposed into a stronghold, still holds against the dark. Here, hundreds of Enduring work against the deadly spirits and ghastly killers that torment the city ruins, seeking to reclaim control of Amber Reach's streets. A rising faction of hedonic, ruthless scoundrels and raiders known as the Damask Queens expand their territory from the far side of the debris-strewn Cinnabar Quarter, their crossings with the Celsians growing more violent with each encounter.

As despondent as existence may seem in the Halcyon Domain, within these communities of the Enduring, hope continuously sparks aflame. Whispers speak of remnants of divine power lingering within lost shrines and holy sites that can rebuke the soul blight. Rumors spread between settlements of heroic figures felling greater evils and reclaiming ancient relics for the might of the Enduring. Spirited leaders and champions rouse their fellow Enduring with promises of expanding their walls and avenging their fallen. Zealot factions fervently seek means to commune with the absent gods, forever searching for ways to repent for Othedias's crimes. Those who can access the Aetherweave see visions of distant sanctums and uncorrupted fanes that cast aside the clouded skies to preserve light and life—or even redeem those touched by the soul blight. Hermetic societies claim to carry tomes and truths of God-King Othedias and his great tragedy, along with prophecies that speak of a chance at salvation for the realm. The lands may be dark, but the points of light burn ever so bright.

COMMUNITIES

All communities are available, but some have unique aspects within an Age of Umbra campaign. As needed, provide the following information to your players and choose one or more of the questions to ask them during your session zero.

■ Highborne and Slyborne

Some communities manage to carve out a surviving section of an Old World cityscape, reinforcing barricades and battlements within a deadly urban ruin while enjoying the spoils of sacking the remnants of the past age's high society. Others were lucky enough to build a new township near a resource-rich location, where those who rose to power could enjoy an uncommon life of comparable luxury. It is in these places that factions of thieves and thugs thrive, whether in the employ of the leadership, or by eroding them from below.

Highborne communities within the Age of Umbra are extremely rare, and are often either based on the ghost of an Old World political power or a newly forged tyranny built on recovered or stolen resources. Opulence in these dark times is scarce but hedonistic, reserved for those close to ruling powers and protected with promises of influence or threats of violence.

- Who are the leaders of your community, and how close are you to their inner circles to have tasted the finer things in this dire life?
- How did you or your bloodline manage to accumulate enough resources or reputation to carve some influence within your community?
- Among the upper echelon of your community, who do you trust the most? Who do you trust the least?

Slyborne characters are skulkers and thieves who flourish alongside those of influence or wealth across the land. Whether they work for highborne factions that try to maintain power or manipulate them for personal gain, those who know how to remain unnoticed or unexploited excel at seizing opportunities. Many slyborne characters also make a name for themselves as scouts or messengers between settlements, trading in goods or rumors as they go. Others still could be members of roguish communities such as the Damask Queens of the Amber Reach, self-crowned leaders in the lawless echo of bygone power.

- You've built a rapport with a highborne figure. Who are they, and do you trust them, or are they just an easy mark?
- Who among your community have you knowingly cheated, and are they aware?
- You were part of a botched job not long ago, and the stain still lingers on your reputation. What happened, and who was at fault?

■ Loreborne and Orderborne

Many grandiose cities and centers of higher learning dotted the Halcyon Domain during the prosperous previous age, but these monuments are now ruled by cults of shattered will, overtaken by monstrous entities, or lost to complete ruin. Loreborne and orderborne characters hail from a crumbling bastion of Old World academia, upholding aspects of this lost knowledge within their local community. Consider which facets of the Old World they cling to and, if a character's community exists within the remains of a major Old World city, which district of that city is important enough for the Enduring to make such a dangerous place home.

Loreborne and orderborne communities typically rise within or near ancient libraries, temples, or other dilapidated urban environments where knowledge was once plentiful. Others might have taken up in caverns and hidden places where recovered historical records can be safeguarded and studied. A number of these factions remain obsessed with discovering the truths of the ancient Grand Ordinants and Aetherlords, such as those who claim refuge in the Celsian Athenaeum.

- What secret about the Old World have you been entrusted with or discovered alongside your community?
- How much of your community still remains? If it has fallen completely, what led to its destruction?
- What heirloom of the Old World do you carry with you, and what is its significance to you?
- What did you leave behind that still haunts you as you try to sleep?

For orderborne characters, players should consider the remnants of the Old World that still guide their character and their people through this ruined landscape, and how (if at all) your ideologies might have changed in the face of a withering world.

- What tenets or virtues of your community have changed since the Age of Umbra began? Which tenets do your community hold on to unaltered, even if they no longer apply to this broken world?
- Which of your community's tenets or virtues do you wish to embody and spread across the Halcyon Domain?
Ridgeborne

The mountain ranges of the Halcyon Domain are varied, imposing, and prone to extended cold winds that carve the rock into jagged spires and winding valley clefts. Networks of ancient wood and stone bridges stretch across wide gaps in mountain passes, and the ones that haven't fallen to weather or time become deeply important and well protected by the nearby ridgeborne communities that maintain them. Hardened and sturdy people forged by the harsh environment, ridgeborne characters might be scouts, hunters, or trade sentinels within their community. Some ridgeborne villages keep vigil over mountainside tombs and sites of Old World knowledge, clinging to ancient oaths that fades more with each generation.

- Who is a childhood friend or rival you formed a kinship with? What task had them leave home a year ago, never to be seen again?
- What mountain predator's call fills you with abject fear, and why?
- One of your village elders entrusted you with an heirloom. What is it, and what or who did they request you keep it from?

Seaborne

The scattering of coastal cities that still span the Halcyon Domain's shores are defined by an existence straddling the dangerous waters of the Ashen Seas and the ever-expanding threat of shadow that corrodes the land. Even so, these communities remain important places of commerce and resources, with mighty fishmongers and sailors battling the masses of deadly threats from under the waves as they sail. Still, seaborne characters are often more carefree than others, taking inspiration from the mercurial nature of their nearby lakes or seas in an otherwise dour world.

- What is the one tale you've heard about the depths of the sea that still makes you nervous?
- When you were younger, you swam deep beneath the waters and encountered something unexpected. What was it, and why does it wander back to your thoughts on occasion?
- A traveler once came through your town and said something to you that shook you to your core. What was it, and what do you wish to tell them should you see them again?

Underborne

Numerous underground societies claimed space within caverns beneath the surface, but only some of these communities have made contact with the surface since the abandonment of the gods. Some cavernous metropolises, now half-buried by crumbling earth, fight to survive against the terrors that stalk the underworld tunnels. Others build anew within the vacant remains of societies of yore, hoping to uncover secrets to better their fortunes.

Underborne characters could be scrappy scavengers and tomb delvers who feel at home in lightless, dust-filled spaces away from the tumultuous skies and flying nightmares of the surface world. With the arrival of the Shalk Chasm, some underborne communities might have been exposed to the surface for the first time since the fall of the world.

- When you are alone in quiet places, what sound do you believe you hear, and what do you think it means?
- You've spent much of your upbringing within a reclaimed subterranean structure. What was its original purpose, and what did you discover about it that you'll never forget?
- What is a place beneath your community that everyone knows to avoid at all costs? What happened when you snuck into it when you were younger?

Wildborne

The natural world beyond any settlement's walls is as dangerous and dark as it is expansive and beautiful. Sprawling, haunted woodlands filled with deadly, mutated wildlife often hide vibrant glades of natural aether, where bioluminescent flora offers signs of solace or magical protection against the consuming darkness. When a player creates a wildborne character, they should consider how their character's homeland carved its place of peace among the twisting vines and brambles. Some wildeborne societies of the Old World remain within their ancient fanes to hold hope for a better future, living symbiotically with the rare, uncorrupted pockets of nature. Other wildborne communities stem from lost soldiers or fleeing survivors who the spirits of the wild protect in their time of need.

- What landmark within the forest has appeared in your dreams since childhood? What do you think it means?
- Which nature spirit does your community rely on the most for protection? What early signs of their corruption are you worried about?
- What did you witness within the wilds that makes you fear your home doesn't have much time left?

Wanderborne

Many wanderborne communities either flee destruction to start anew elsewhere or uproot themselves frequently for fear of attracting the wilds' worst horrors. Others might be made up of survivors with common purpose, a life where braving the deadly chaos of the world is also a quest for answers. A wanderborne character might have spent their life on the run due to circumstance or danger, or felt the subtle desperation of the realm and refused to sit still.

- Why does your community keep picking up their roots and moving on? What do some fear is following them each time they do?
- What is the one place you lived that you quietly wish you could return to? What is there that still holds a place in your heart?
- You've had a recurring nightmare about a particular location. What about this place frightens you?

ANCESTRIES

All ancestries are available, but some have unique aspects within an Age of Umbra campaign. As needed, provide the following information to your players.

■ All Ancestries

Consider how the harsher setting and environment can intermingle with Daggerheart's ancestries to inspire dark, weird, and unique interpretations.

■ Clanks

Clanks are often carved from stone and iron and were originally developed as vessels for holy spirits and messengers. Many stopped functioning and became statues when the gods left the Halcyon Domain.

■ Ribbets

Ribbets are large, often 6 to 8 feet tall, and prefer to skulk on all fours when not leaping or standing still.

■ Drakona

In the Halcyon Domain, Drakona are taller and more reptilian in both physicality and proportions. They lean forward as they move, using their tails to balance their weight.

■ Faeries

Faeries are more sensitive to the soul blight than other ancestries, causing their physical appearance to develop in jagged and monstrous ways.

CLASSES

All classes are available, but some have unique aspects within an Age of Umbra campaign. As needed, provide the following information to your players.

■ Bards, Druids, Rogues, Rangers, Sorcerers, and Wizards

The forces of spellcraft and magic—especially dark magic—that flow unseen through the world are referred to as the Aetherweave, and those uncommon few who can manipulate it are known collectively as Aetherweavers. This art is difficult to teach to mortals, and they rarely wield it instinctively. With many of these secrets lost with the previous age, the presence of an Aetherweaver is remarkable and often met with awe, fear, and sometimes mistrust. Players who create an Aetherweaver should consider the responsibility they carry with these gifts, and determine how brazenly they use these mystical abilities.

■ Splendor Domain

Since the gods' abandonment and the fall of the Grand Ordinants, the great clerics of old, access to divine powers and healing rituals is a fading art. Many fear the very essence of such magic is dying with the light, so it is not uncommon for some to foist sudden worship and expectation onto those who display such gifts. However, while some see hope, others see those with these abilities as an opportunity to express their hate for the absent gods. Seraphs and wizards who display their Splendor domain abilities or spells might make a profound impact or draw unwanted attention, depending on their current company. Players who create seraphs or wizards should consider how open or guarded their character would be with their abilities.

PLAYER PRINCIPLES

If your group decides to play this campaign, give your players the following information before character creation.

■ Treat Community as a Means of Survival

You have grown up in a world of despair, raised to rage against the dying of the light. No matter the differences or challenges between you and others you meet, forging and protecting the bonds of community close and abroad is a goal that surmounts most others. If the Enduring cannot work together, then all truly is lost.

■ Remember That Not All Darkness Is Evil

Most of the shadow that plagues this land is born out of tragedy, big and small. Keep in mind that many threats you face have a history—a sad and solemn story—that set them on this terrible path. With the right inquisitiveness and creativity, you can oftentimes parlay with or even redeem what hunts you before resorting to complete destruction. Many lost to the dark still retain some aspects of themselves to appeal to, and rumored magics could hold the key to cleansing elements of the Umbra's corruption.

■ Embrace Lethality

The Age of Umbra is a realm of hardship, challenge, and loss, which allows for momentous revelations and incomparable victories. Still, very few groups of heroes who venture out into the Halcyon Domain carry any of the same faces when their journey is done. Find joy in the risks, relish the opportunities for epic and memorable character deaths, and excitedly create new characters that the others can meet at the next encampment or landmark.

■ Consider Your Role

Everyone in this world is driven to survive, whether on their own or as part of a larger group. A character's backstory can define their previous role in this realm, the relationships they've already established, and where they honed their knowledge and skills. For example, your character might have been a hunter, scavenger, philosopher, storyteller, oracle, scoundrel, leader, demagogue, or bandit before the campaign begins. Do they continue to enjoy this role, or do they yearn to reinvent themself in the dying light? How does their role define their goals for the future?
GM PRINCIPLES

Keep the following guidance in mind while you GM this campaign.

■ Relish in the Omnipresent Threat

Enjoy setting the scene for each ominous locale beyond the walls of safety, weaving descriptions of solemn colors and the dark beauty of crumbled antiquity with the perpetual sense that nowhere is truly safe. Many things go bump in the night, whether or not the characters are in immediate danger, so be willing to play with shadows, noises, and even monstrous shapes that lumber on the horizon just as your players grow comfortable. When the time comes for a dangerous conflict, exemplify just how harrowing it is with baleful descriptions and menacing energy.

■ Shine Light in the Darkness Often

Even as you thrill your players with epic displays of seemingly insurmountable odds, deeply tragic narratives, and an ever-oppressive, gloomy atmosphere, always strive to highlight opportunities for hope, joy, and victory. Be mindful of balancing the starkly terrifying, bleak realm you're navigating together with scattered locales of untainted beauty, moments of inspiring humanity, and chances to truly make a difference for a better and brighter future. The highest highs leave room for the most memorable lows, and vice versa.

■ Emphasize Compassion Amidst Hardship

When society is challenged with facing annihilation, the community often comes together in passionate and wonderful ways. Create and allow room for story moments where the downtrodden and fearful find courage and strength in their fellow survivors and rise to the occasion. Let the people who fight to endure alongside the player characters be vulnerable with them, share their fears and aspirations, forge bonds with the characters, and express why they may invest their future in the characters' actions.

■ Create Many Goals Across the Many Minds

This realm of darkness breeds a plethora of aspirations. The need to survive in a harsh world can forge deeply conflicted and complicated personalities, ranging from the genuinely altruistic to the deeply selfish, and sometimes both. Consider the wide range of communities, factions, and influential NPCs and how they've adapted to this dire age. Some may wish to carve a sanctuary for their people, some may embrace the chaos to indulge in their worst impulses, some may place their hopes in uncovering ancient secrets, and some may be driven only by sorrow and vengeance. Everything, even the terrible beasts and malformed fallen that haunt these lands, has a wish and a story that drives them, as futile as some may seem.

■ Build Combat as a Test, a Puzzle, and a Journey

There are many deadly and terrifying entities throughout the Halcyon Domain, and sometimes a grand old throwdown to test the characters' mettle is a thrilling experience for all involved. Even so, much of what is so monstrous in this realm has become so through corruption, guilt, exploitation, or circumstance. Bringing a bit of pathos and humanity to some threats can lead to a deliciously conflicted showdown, and might guide the players to consider other means to victory than just slaughter. Pay some mind to alternative victory conditions that you can tease out through adversary behavior, environmental descriptions, historical recollection, or dialogue. If the players start developing a unique theory on how to cleanse, befriend, or absolve their foe of their violent views in ways you hadn't accounted for, be open to following the logic and excitement of that narrative thread and ask the players questions that can help you explore that avenue together.

DISTINCTIONS

Use this information to prepare your campaign. You can also share it with your players as needed.

■ Eternal Gloom and Volatile Weather

Since the Veiled Gods abandoned the world, an endless gloom has engulfed the skies, leaving the nights black as pitch and even the zenith of day a dreary haze. The somber grays of the mist and sky are occasionally broken by heavy rains or strange, erratic weather events, while the more cursed regions are home to never-ending storms of vibrant hues. Some say even underground, cavernous spaces are occasionally host to strange weather phenomena.

This gloom only ever breaks over hallowed grounds or on mysterious, unpredictable days, revealing golden sunbeams or gossamer moonlight that grants esoteric boons (or curses) to those present. There are beliefs among the Enduring that the highest mountain peaks can pierce the gloom and offer new homelands free of turmoil.

■ Death Becomes a Curse

The places not protected by the Sacred Pyres are vulnerable to the Umbra, the flow of malevolent, unholy spirits that cling to lightless spaces. This amorphous necrotic energy courses through the Halcyon Domain like a dark wind, transient and with unknowable intelligence, as it calls to the souls of the dead like a mother to its children and draws them into its shape. The Umbra is a terrifying force of malice and corruption, a swirling, wailing black mist invoking delirium and despair at its threshold while physically corrupting and transforming the bodies of those that surrender to it.

Many of the horrifying monsters prowling these lands have been changed by the Umbra, leaving part of its ever-expanding mass within them like a foul seed, mutating the host and perpetuating its own cancerous expansion through wanton destruction and death. Those who live with the Umbra within them are but a shade of their former selves, taken to extreme emotion and fractured memory. Now twisted into an abominable form and warped with the features of others lost to the Umbra, these victims malevolently lash out at any pinprick of life and light. While whispers spread of those who have been cleansed of the Umbra's touch, for most they remain just that—whispers.

■ The Rarity of Respite

Everywhere the gloom touches, danger lurks. Ancient evils thrive in this age of shadow, while warped spirits marked by the soul blight mingle and corrupt whatever they can subsume. Those who persist must seek the rare, scattered places of safety and respite: where a Sacred Pyre burns. These hallowed fires were lit by the waning conclave of Ordinants before they vanished, and their flames are one of the few wonders that keep the horrors of the Umbra at bay (see the upcoming "Campaign Mechanics" section).

The Enduring formed communities around many of these Pyres and kindle them daily for fear of them dying out, while smaller consecrated embers are said to persist undiscovered in distant places, in danger of going cold. But even still, the Enduring must take heed: not all evil is repelled by the Pyres' flickering light.

■ The Shadow of Society

The Old World was one of grandiose castle fortresses, sprawling cityscapes, and imposing temples towering over the lush lands that surrounded them. However, the wrath of the Veiled Gods toppled much of that extravagance to ruin, the kingdoms and cabals that basked in opulence shattered and forgotten.

What remains is a ghost of what once was. Surviving remnants of the old ways struggle to reclaim a forgotten glory while most survivors lead grueling lives across the splintered communities of this broken realm. This tattered tapestry of heritage and history is fading with the light, yet the Enduring forge new culture through hardship, determination, and ambition, picking through the debris of what was in hopes of building what will be.

■ Magic Is Suspicious

In ancient times, the practice of Aetherweaving was paramount to the Halcyon Domain's construction and prosperity. Yet, while rune-marked arms and enchanted relics of the Old World are considered boons by the surviving people of the Halcyon Domain, the Aetherweave is believed to be responsible for the wrath of the Veiled Gods, and thus the Age of Umbra.

Much of the world is now suffused in dark magic that saturates the wilds, chaotic and corrupting, wielded by those who worship the gloom of the new age or yield entirely to it. The superstitious disdain for spellcraft is pervasive within many communities, with tales of Aetherweaver hubris taught as fables to youth to dissuade them from such temptation. Places that harbor lingering fonts of magic are instinctively shunned and avoided by many. While Aetherweaving can be used to protect and preserve, it is deeply mistrusted in many social circles, leading to confrontation or exile if care is not taken.

THE INCITING INCIDENT

You can use the prompt below to start your campaign, or create your own.

Recently, one of Okros's hunting bands, led by **Huntmaster Evrados** (ridgeborne giant, he/him), delved into the Shalk Chasm in search of resources. There, they stumbled upon an eroded, forgotten temple to an obscure Veiled God. The huntmaster was caught by a monster and dragged into the depths of the temple, and though the remaining three hunters sought to find him, a terrible odor forced them to withdraw out of fear and revulsion.

When the band returned to the settlement and shared the news, **Elder Akadona** (wanderborne orc, she/her) and the village speakers debated the best course of action. Their heated dispute was interrupted—by Evrados's voice screaming for help from beyond the walls of the camp. Though scouts couldn't see Evrados in the murky swamp, the hunting band left the light of the Pyre to rush to their huntmaster's aid. The screams mercifully halted for a time.

Then the screams broke out again, Evrados's lament joined by the wails of his hunters.

The denizens of Okros are now terrified, the unsettling din heightening their agitation and fear. The shrieking doesn't change or wane over time, further exemplifying the unearthly nature of their cries. Desperate for an answer, Elder Akadona has gathered the party and requested that they investigate what happened to the huntmaster and his crew, seeking to save them if possible, and end their suffering if not.

The gates of the settlement are opened, revealing the forlorn willows and mist-choked wetland valley beyond. The party must investigate the source of these cries for help and attempt to recover Okros's lost hunters. However, what monster is responsible, and how do they steal the voices of those missing? What is the monster's connection to the uncovered temple, and if they recoil back into their lair, what dangers lie within? Are Huntmaster Evrados and his team beyond rescue? What other macabre revelations might require reaching out to another settlement?

CAMPAIGN MECHANICS

The following mechanics are unique to this campaign.

■ The Strength of Hate

The Umbra can seep into all manner of beings, twisting them into a malformed mockery of their former selves instilled with preternatural strength.

Adversaries and environments in this campaign can gain an additional type called Umbra-Touched. When an adversary is Umbra-Touched, describe how the Umbra has warped their essence and form. All Umbra-Touched adversaries critically succeed on attacks against a PC on a die roll of 19–20.

As the PCs gain scars, they themselves become slowly corrupted by the Umbra. When a PC deals damage, they deal extra damage equal to their number of scars. When a PC marks their last Hope slot with a scar, they don't retire, instead succumbing to the Umbra's influence and charging forever into the dark to join the terrors that stalk lightless spaces.

■ Fiery Beacons

Every surviving settlement within the Halcyon Domain huddles around the relative safety of a Sacred Pyre, a vibrantly burning flame that is sparked by a Blessed Branch and continuously kindled by those given the mantle of Pyrekeeper. Blessed Branches are a rare and hallowed artifact carried as reliquaries by those who wish to expand the reach of the Enduring and found new encampments.

If the characters acquire a Blessed Branch, they can reignite an extinguished Sacred Pyre or create a new Sacred Pyre that stands as a bastion of warmth and safety.

BLESSED BRANCH

An ashen relic from the Old World that carries a splinter of divinity. When ignited, all Enduring present gain 3 Hope, and the flame it emits repels all but the most powerful monsters from its immediate vicinity as long as it burns. Only a bit of kindling must be provided daily to maintain this slow-burning blaze.

Lurking Darkness

The Lurking Darkness represents the ever-present dangers of the Umbra. When the party finishes a short or long rest while not in the vicinity of a Sacred Pyre, roll a d12 for the Lurking Darkness and consult the following list:

1–2: Describe how something monstrous found them in the dark. An adversary of the GM's choice initiates conflict.

3–5: Describe how something terrifying stalks nearby. You gain 2 Fear.

6–9: Describe how the imposing darkness intensifies. You gain a Fear.

10–11: Describe how the characters rest undisturbed. No effect.

12: Describe how the characters stumble upon a hopeful omen. Each PC gains a Hope.

With danger ever abounding, those who brave the shadowed wilds can keep watch in hopes of preventing the terrors of the Umbra from finding them. Parties have access to an additional downtime move:

> **Keep Watch:** Describe how you stay vigilant against what lurks beyond your camp. When the GM makes a Lurking Darkness roll at the end of downtime, you roll your Hope Die and choose whether to replace their roll with yours. If multiple players choose this move, you can take the highest die roll.

Soul Blight

If a humanoid NPC or any PC dies, the GM can spend a Fear to immediately raise them as a Shambling Zombie—or 2 Fear to raise them as a Brawny Zombie—who tirelessly seeks to kill everyone they once cared for. Once their zombie form has been destroyed, the victim's blighted soul withdraws and joins the Umbra. Their features can appear on future Umbra-Touched adversaries.

SESSION ZERO QUESTIONS

Ask any of these questions to your players, or make your own.

- If members of the party hail from different communities, why did they leave, and what called them to this particular settlement? Do their home communities still exist? What rumors and mysteries surrounding or permeating their communities still linger in their minds?

- Are any characters burdened with burgeoning oracle sight? If so, what visions have begun to creep into their sleep?

- What do your characters see when they stare into the inky void of night too long?

- How deadly does the group wish this campaign to be? Would you enjoy a possible churn of many character deaths across a campaign, or do you want a more balanced flow where danger is real, but not stacked so hard against you?

MOTHERBOARD

In a world where magic takes the form of the technology left behind by a long-fallen civilization, a new threat rises as a malicious virus spreads through the machines that wander the Wastes.

By Meguey Baker, Rowan Hall, & Spenser Starke

Complexity Rating: ● ● ●

THE PITCH

Read this section to your players to introduce them to the campaign.

Among the ancient ruins of the fallen world, the great walled cities of the Echo Vale sit as bastions of hope in an otherwise hostile land. Utilizing technology powered by a mysterious language that runs through metal threads tethered high above the valley, these citadels insulate their citizens from the Wastes, where autonomous machines roam wild and massive wandering cities scour the land for scrap. But when a malicious virus infects the machine beasts that work alongside the people of the valley, the once-docile creations turn violent. In a Motherboard campaign, you'll use technology instead of magic as you play extraordinary heroes leaving the safety of the walled cities to travel the Wastes and bring peace to the Vale once more.

TONE & FEEL

Adventurous, Epic, Innovative, Mysterious, Post-Post-Apocalyptic, Technological

THEMES

Artificial Intelligence, Identity & Personhood, Innovation, Technology vs. Humanity

TOUCHSTONES

Horizon Zero Dawn, Mortal Engines, Mad Max: Fury Road, The Final Fantasy Series, Fullmetal Alchemist, Slugblaster

OVERVIEW

If your group decides to play this campaign, give your players the following information before character creation.

The **Echo Vale** is so named because its people live among the remains—the "echoes"—of a fallen civilization and attempt to use ancient technology for new purposes. In the hundreds of years since the fallen ones' mysterious annihilation, the steel and concrete of the old world succumbed to the plants and animals of the valley. Grasses grew in the cracks of ancient roads, trees made homes in derelict skyscrapers, and history forgot the names of figures depicted in crumbling statues, leaving those who built homes in the husks of these once-great cities to muddle their way through the powerful programs and machines left behind.

Now, formidable settlements such as **Argent** make home among decaying ruins, building walls to keep violence out and workers in. Meanwhile, **Carrowcroft Walkaway** and other wandering cities move through the valley on all manner of vehicles, towns atop lumbering machines like travelers hauling their packs.

Above the valley lies the **Network**, a dense web of glimmering metal wire that shepherds information and communication across the disparate cities of the Echo Vale. Though the valley's inhabitants have long used this ancient technology, the complex language used to create and modify the network was lost when the previous civilization fell.

Throughout the Echo Vale roam autonomous machines of the fallen world, called **remnants**. These automatons come in two primary forms. Some resemble animals, with features that match their living counterparts. Others were designed with a function in mind, such as defenders, builders, watchers, or domestic laborers that carried out tasks alongside their long-dead creators. Some remnants live within cities and are considered "tame," while others roam "wild" in the Wastes, often territorial and hunting for sources of energy. Some are large enough to hold entire wandering cities on their backs, while others are small creatures that serve no apparent function aside from supplying scrap parts for the working machines people need to use each day.

These machines gain energy from a variety of sources. Remnants are drawn to power and information like organic animals to food; while tame remnants can gather theirs from connections to the Networks within cities, their wild counterparts must resort to other means. Remnants can produce energy through photosynthesis, kill other remnants for their power stores, or hunt people to siphon their energy. They act like other wild animals—always focused on their next meal, whatever they must do to get it. Rumors say that some wild remnants are able to harvest information from the brains of the creatures they kill.

The **Wastes** are the overgrown, hostile lands between cities that are filled with wild remnants and ancient ruins. The average citizen spends most of their life within a walled or wandering city, but needs arise that require trips out into the Wastes. City defenders must stop attacks from wild remnants, messengers run between cities when portions of the Network need repair, and some cities rely on hunting parties for food. Out in the Wastes, travelers and remnants alike can still access the Network through free data wells.

To access the vast information left behind by the ancient world, inhabitants both mortal and machine use the ports at the base of **data wells**, slender towers that reach up to the lines of the Network. Data wells can be found across the valley, but many exist within walled cities, rendering them inaccessible to the rest of the region. The wells in the Wastes that remain freely available become hotbeds of violence, as wild remnants use them like a watering hole for power and information. In contrast, the **Pilgrims of the Spire** are a group known to strongly value and protect free data wells, as they're considered sacred places connected to the Motherboard.
The tallest spire at the center of the Echo Vale is the **Motherboard**, from which all threads of the Network originate. Though no one has ever been able to enter this daunting tower, each city has their own beliefs about its ancient power. Most citizens revere the massive presence within as a god, believing it was worshipped by the fallen civilization and carries their wisdom forward to bless today's information-scarce world. Others believe it is a "master program" the technomancers of the fallen world left behind, and is therefore as fallible as any other remnant. Though the Motherboard herself does not communicate with people directly, she shepherds all data and power through the Network. Without her operating system, the valley's technology would eventually fail. Despite what is commonly believed, some technomancers and pilgrims claim to speak to the Motherboard in the machine language, known as "kohd."

Technomancers are the datacrafters who utilize ancient machines for new purposes. Historians work to decipher kohd, while practitioners work directly with remnants and other technology to gain a deeper understanding of this arcane language. Some forgo study of kohd entirely in favor of simply utilizing machines for their power. Most have a general understanding of how to employ the effects of the fallen world's technology, allowing them to operate and control its powerful programs, even without understanding its inner workings. Because this tech isn't fully understood by the people of the modern age, technomancers can manage only temporary repairs on the remnants.

Machinists are more focused on the physical aspects of remnants. Many of them work in factories or scrap works, repairing gears, wires, and processors for a variety of machines, including remnants and mechanicals (operator-driven machines). Some machinists can cobble together new remnants from spare parts, but they must use old remnant cores from the fallen world to give them life. Stories tell of wild remnants creating more of their own kind, but most consider these myths told by travelers.

Recently, a disaster occurred known as the **Remnant's Fury**—a virus spread through the Network that caused the remnants to attack in the dead of night. These machines, which once worked peacefully in homes and businesses, assailed hundreds of unsuspecting people in both walled and wandering cities. In the Wastes, travelers found themselves suddenly facing particularly violent packs of wild remnants. Autonomous machines have always posed unique dangers—working remnants short out, wild remnants kill for energy—but this was different. This was a massacre.

More and more remnants are becoming violent, and those who live under the Network must figure out what to do before the Echo Vale meets a fate like the fallen world. No one knows who or what caused the malicious virus taking hold of the remnants, but for it to be this widespread, there's growing certainty that it must somehow involve the Motherboard.
COMMUNITIES

All communities are available, but some have unique aspects within a Motherboard campaign. As needed, provide the following information to your players and choose one or more of the questions to ask them during your session zero.

◼ Loreborne

Many loreborne communities are devoted to the history of the fallen world and the technology they left behind, whether spiritually or practically. Loreborne characters could be experts in the machine workings of mechanicals or remnants, technomancers attempting to use kohd, or academics studying the history of the fallen civilization. If they have careers in any of these fields, they'll be highly sought after wherever they go.

- You discovered something about the fallen ones you've never shared with anyone. What secret do you keep?
- You've trained as a technomancer for many years, but one thing baffles you about the remnants. What is it?
- You have a trick to get any machine up and running. What do you do, and who taught it to you?
Orderborne

In the Echo Vale, most orderborne characters belong to a group focused on protecting a larger community. They might defend a walled or wandering city, or work as contractors hired to hunt and scrap remnants in the Wastes. These characters use their skills for a price—sometimes the benefits are housing, other times scrap parts, or simply profit. Groups associated with a city often have regimented operations, while contractors who travel the valley are more likely to have unique systems and skills.

- You were once a member of a small group of contractors, but now you're stationed in the Argent guard. What made you choose to stay within the walls?
- You have a trick for catching and scrapping wild remnants that city officials pay handsomely for. What is it, and who taught it to you?
- A loved one was badly injured in an accident during a scrap run. What happened, and why do you feel it was your fault?

Ridgeborne

The mountains bordering the valley support the spider-like web of the Network, making their peaks neutral territory. All cities are expected to contribute citizens to the Tower Watch, an independent group who tends to the towers and wires and protects the Network from the effects of wildlife and weather. Players might choose the ridgeborne community if they want to build a character who belongs to the Tower Watch or one of the smaller wandering or walled cities that make a home on the cliffs for safety.

- Do you consider yourself at home in the lower valley? Why or why not?
- There is a secret that only the Tower Watch knows. What is it?
- You once saw someone fall from a tower into the Wastes below. What led to this?

Wanderborne

Wanderborne characters may be worshippers of the Motherboard who identify as Pilgrims of the Spire. These devotees leave the cities to traverse the Wastes, facing wild remnants and violent travelers to reach the central spire. Though the tower is sealed to entrants, other worshippers establish large camps at its base and attempt to connect to the "voice of the Mother."

- You're certain you once heard the voice of the Motherboard. What did she tell you?
- You don't believe the Motherboard is a god, but you traveled with the Pilgrims anyway. Why?
- The Pilgrims of the Spire protect a secret. What is it?

Other wanderborne characters are citizens of a roaming city. These civilizations range in size from only a few homes to massive metropolises that move through the Wastes. Wandering cities eschew walls, favoring movement as a means of protection from remnants and other dangers. Some wandering cities are built on mechanicals and must be driven or controlled by people, while others are built on the backs of giant remnants. After the Remnant's Fury, the wandering cities atop remnants were forced into a dangerous position: if they can't keep their remnant pacified, they risk losing not just their home, but their entire community.

- You were part of the team that cares for your city's giant remnant. What do you know about its personality that others don't?
- You were training to pilot your wandering city's mechanical, but you left to live somewhere else. What happened that drove you out?
- Your wandering city's remnant follows the same path through the valley and will not stray from it. Why is this?

Underborne

The fallen ones not only paved the valley in pliable gray stone, they also dug into the earth and created labyrinthine buildings underground. Underborne characters are likely members of communities that avoid the danger and strife of the valley above in the dark and twisting passages below. These underground cities fiercely protect their few aboveground entry points, but they still face danger from remnants that can dig beneath the earth—in particular, underborne communities are often threatened by old farming remnants operating in the wild.

- The buildings that make up your underground community once had a unified purpose. What do you believe this purpose was?
- Members of your community have a unique way of dispatching remnants underground. How do they accomplish this?
- Your community protects something important. What is it?

ANCESTRIES

Some ancestries are not available for a Motherboard campaign. As needed, provide the following information to your players.

■ Clanks

Clanks are unavailable in a Motherboard campaign. All autonomous robotic beings are remnants, and though they have many unique forms, none have sapience.

■ Magical Ancestries

Some ancestries in Daggerheart have inherent magical features, like the Drakona's Elemental Breath. Consider how these would manifest in a world where magic comes from technology, then adapt the flavor of each feature accordingly.

CLASSES

All classes are available, but some have unique aspects within a Motherboard campaign. As needed, provide the following information to your players.

■ All Classes with Spellcasting

Rather than magic, characters who use a Spellcasting trait instead utilize technology to carry out their abilities. Some come to technomancy through years of study, while others feel an innate call to the ancient ways. Characters with a spellcasting trait should decide how they utilize technology to mirror spellcraft and consider what tools, processes, or systems they need to accomplish their goals.

■ Sorcerers & Wizards

Since magic is technology in this campaign, sorcerers are biohackers that incorporate technology into their physical form, whereas wizards tinker with what they find and combine programs and machines together to build something new.

■ Druids

When druids transform into a Beastform, it wraps around them as a mechanized suit that can enhance their senses, change the way they move, or grant them unique abilities. A druid's Beastform can look similar to the remnants of the Echo Vale or more closely resemble living animals.
Beastbound Rangers

In a Motherboard campaign, a Beastbound ranger's companion can be a living creature, but organic fauna are considered both rare and valuable within the cities. Alternatively, they may have developed a close relationship with a remnant.

OPTIONAL RULE: CORRUPTION TRACK

If a Beastbound ranger has a remnant companion, they can use the following rules to make the remnant subject to the same threat of corruption from the Remnant's Fury.

Record the following Corruption track on the Companion sheet. At the beginning of downtime, the ranger rolls their Fear Die. If it lands on a 1, they must mark a Corruption and describe the temporary glitch that overcomes their companion.

Corruption Track: ☐☐☐☐☐☐

Specialized technomancers may be able to temporarily repair the remnant (which clears 1d4 Corruption), but the only way to truly save them is to stop the malicious virus coming from the Motherboard. If the companion's last Corruption is ever marked, the remnant becomes violent and can no longer be commanded or repaired. The ranger must take a new companion with two new Experiences. They carry over the same number of level-up options they've already chosen to this new companion.

Seraphs

Generally, seraphs worship the Motherboard as their god, kohd as a holy language, and treat the many programs and pieces of technology that come from them as power imparted by their faith. Others believe there are many gods, known as the Faint Divinities, that live within the Network, shifting their presence to different areas across the vale as needed. Players should determine why their character relates to technology on a spiritual level, rather than simply employing it. They should also consider if and how they offer their devotion to the Motherboard or Faint Divinities.

Warriors

The warrior's "Combat Training" feature is replaced with the following new feature:

Ikonis Training: You start with one Force augment already crafted and installed in your Ikonis.

For more information on Ikonis, see the "Campaign Mechanics" section on page 301.

PLAYER PRINCIPLES

If your group decides to play this campaign, give your players the following information before character creation.

◼ Replace Magic with Technology

In a Motherboard campaign, all magic is technology. When your character casts spells, consider how the effect manifests in this world. Each time they use a weapon, consider how to align it with the repurposed and rebuilt technology of the fallen world.

- Does your character wear gauntlets with a screen that allows them to scroll through their grimoire? Does their staff crackle with electricity?
- How do they store information from the network when they aren't connected?
- Do they have personal or shared devices that can be loaded with a variety of information types? How is this done? Do they use discs, drives, or plugs?

◼ Contrast the Technological with the Emotional

While the Echo Vale is filled with exciting technologies and unique adaptations, it's also filled with people experiencing hardship, fear, and love. As your character travels through the valley, fighting remnants and political adversaries, consider how the wider story affects them personally. Each time your character interacts with new people and technology, consider how they feel about them and take action based on their emotional response.

- How does your character feel about the power of the Motherboard?
- Has your character ever formed a close connection with a remnant?
- How does your character's history influence their interactions with particular cities or individuals?

◼ Create a Shared Language

The Echo Vale is built atop an ancient society that perished long ago. The lifestyle and language of the fallen ones was incredibly advanced, yet it still remains obscure to the Echo Vale's modern people. It's up to you to make a shared lexicon to describe the technology they use, working with the table to determine what your characters do and do not understand about the fallen world. This includes the terminology, application, and meaning of places and objects. Your characters may use a language that developed from the one spoken and written by their predecessors, but they'll likely have a different understanding of words because they lack necessary context. Similarly, their people might have ascribed meaning and function to objects with an entirely different original purpose.

- What items from the old world were made of materials strong enough to survive the test of time? If portions of an object degraded, what remained?
- How much of an object's original function is known to the people? Have they adapted items to a new purpose?
- Have they assigned spiritual value to mundane objects? Do they use items that were once culturally significant for mundane tasks?
- What words have a different meaning to today's people than they originally carried in the fallen world?

GM PRINCIPLES

Keep the following guidance in mind while you GM this campaign.

■ Fill the World with the Ruins of Technology

Because the innovation of the fallen ones was so advanced, the people who live in the Echo Vale today have molded their lives around the technology that remains. Even so, they don't understand it well enough to rebuild the systems that gave the fallen world its immense power. Fill the world with the ruins of state-of-the-art buildings and machines, weather them with centuries of nature's intrusion, and then describe the less-advanced world built among them. You may also want to decide what led to the downfall of the past civilization, then use that to flavor the world they left behind.

- What does the wreckage of a strip mall look like with a small encampment of wooden homes built within?
- What particular pieces of technology have people been able to keep running? How have they adapted them?

Additionally, you're encouraged to reflavor Daggerheart adversaries as remnants.

- How would an adversary's abilities manifest if they were made of circuits and steel? How does their appearance change? Do they have different motivations?

■ Make the Details Fantastical and the Conflicts Grounded

Though the Echo Vale is filled with fantastical technology that causes large-scale problems, each confrontation should center the struggles of its people, be they cultural, political, or spiritual. Use technology as window dressing for grounded conflict to blend the exciting details of the campaign with personal stakes for each character. You can use the abilities of remnants and the aspects of cities as allegories for the emotional experiences of the party. For example, if a member of the party recently lost a family member, you could introduce them to an NPC in the Wastes who's protecting a remnant they were raised alongside, despite the fact that its recent corruption has caused it to become violent.

- How does the use of technology highlight a conflict between individuals or groups?
- What remnants can act as physical representations of emotional turmoil?

■ Pit Tradition Against Progress

There are numerous conflicting ideologies among the cities and travelers of the Echo Vale, but most can be distilled into two schools of thought: Some people want to reject their predecessor's technology, allowing the people of today the chance to define themselves and make their own way in this new world. Others believe they must dig further into the past to harness the powerful machines the fallen world left behind.

- How do these opposing viewpoints come into conflict?
- How do the political and social conflicts affect characters personally?

DISTINCTIONS

Use this information to prepare your campaign. You can also share it with your players as needed.

◼ Technomancy

Imagine trying to explain our modern technology to our distant ancestors—it would seem like magic. This is how technology from the fallen world should be engaged with and described by the people of the Echo Vale. Reading the ancient language of kohd and pressing buttons on screens to perform supernatural feats is impossible without the Network. People who use technology are known as technomancers, and the way they use technology is only limited by your and your players' imaginations. Consider how this prowess will look for each player character and NPC, allowing the technological to become extraordinary.

◼ The Fallen World

The fallen ones were a powerful people who developed the very systems that likely destroyed them, but the world they left behind is as rich as it is obscure. The shimmering wire Network overhead, steel skyscrapers, concrete buildings, and machines with their own consciousness fill the Echo Vale even as nature works to reclaim it. Here, rivers pass through cities, buildings fill with new growth, and ancient monitors hang on the wall like panes of shattered glass.

◼ Scrap Operations

Because the modern world is built on an ancient civilization's ruins, it relies on the scraps they left behind. Thus, there is a unique economy and set of terms built around the concept of scraps.

Scrap operations often begin with the salvagers, those brave enough to venture out into the wastes to unearth ancient technology and hunt remnants for their parts. Those who survive stand to earn considerable commission depending on what they bring back and where they sell it. Some cities only want replacement parts for their remnants, while others search for artifacts of historical significance.

Within the cities, scrappers process and sell parts for mechanical repair and technomancy. Scrap shacks are the (often illegal) businesses run by individuals, but some cities require that all machine parts pass through government hands before going to the individual market.

Those who work with remnants or practice technomancy might adopt a variety of terms. Mechanists and scrap hackers repair or rebuild machines, autonomous or otherwise, while the technomancers who work with datacraft might be called techs.

◼ Quantum

Quantum is the currency that runs the Echo Vale's economy. How much quantum a person has is generally stored on a small black disc that can be inserted into devices throughout the valley. People often decorate and personalize their discs to distinguish them from one another.

◼ Network Tethers

When wandering cities and travelers want to access the Network in the Wastes, they throw large hooks known as tethers over the wires above, allowing them to charge technology and collect data from any location. Some technomancers can even intercept Network messages using tethers, though this requires specialized knowledge and equipment.

Sometimes more ambitious or desperate individuals, known as skimmers, climb up to the lines and use smaller hooks or contraptions to slide along the Network cables, allowing them to gather data and traverse the Wastes from above.

◼ Wandering Cities

The wandering cities are a true testament to the ingenuity of the people in the Echo Vale. Most cities precariously balance atop a remnant or a specially crafted vehicle piloted by a single driver or team. These vehicles come in all shapes and sizes and very often have collections of smaller crafts that travel with them for hunting, defense, or the general expansion of their populace.

CARROWCROFT WALKAWAY

This behemoth is one of the largest of its kind, with layers of buildings crowded atop a walking machine and guns jutting out at all angles from its turtle-like form. Recently, Carrowcroft leaders became dissatisfied with sending out small Croft Walkers to pick on less protected towns and travelers, leading them to try something much more ambitious.

For decades, the leaders of Carrowcroft have had their sights set on the abundance of technology and scrap behind the walls of Argent. They've recently made a number of attacks against the formidable city. The Argent guard has held them off for the time being, but not without considerable loss of life on both sides.

Now, with Argent thrown into violence by the Remnant's Fury, politicians in the walled city worry that the Croft Walkers will come back to attack while they're vulnerable. There's even a rumor circulating that Carrowcroft Walkaway somehow infiltrated the Motherboard and initiated the virus, allowing them to harvest scrap from the other settlements in the valley one by one. As they use only operator-driven mechanicals, they have a considerable advantage until someone can access the Motherboard to understand the cause.

There's also a rumor in the Wastes that, though Carrowcroft doesn't use remnants for labor, they are harvesting their cores to use in unique ways no other technomancers have been able to before.

ARGENT

Argent has long been the target of attention across the valley. With the most well-preserved ancient skyscrapers, the best fortifications, and the largest collection of tame remnants in the Echo Vale, this heavily stratified city is also a bastion of wealth. Their strictly regimented guard protects the streets and borders, and their prison labor system keeps government scrap operations working twenty-four hours a day.

In the wake of the Remnant's Fury, the leader of Argent, known as the Priv, sent messengers to all walled cities within the valley to try to unify and uncover a solution. There's talk that they will organize and attempt to enter the tower of the Motherboard, but this would violate many of the most devout orders of the Vale.

OTHER WALLED CITIES

You can populate the Echo Vale with the walled cities below or create your own.

Calcarus: This city consists of a single ancient skyscraper, now filled with its own small forest. Its citizens have grafted numerous wooden buildings onto the tower's exterior, using Calcarus's height to keep themselves safe from remnants.

The Northern Oracle: The site of many pilgrimages, this small village hosts a massive amphitheater filled with screens. The High Oracle claims she can use the screens to speak to the Motherboard, but only her most devout followers have ever claimed to see it.

Switch Withawick: This city is entirely underground, and its citizens' eyes are sensitive to light because the people rarely come up to the surface. There are two prominent rumors about the Switch: that its citizens are cannibals (unlikely), and that they know how to create new remnant consciousnesses (possible).

■ Designing a City

When you design your own wandering or walled city, you can start with the following questions:

- Does this city wander? If so, what is it built on? If not, what do its walls or fortifications look like?
- What does this place look like? What architectural elements are from the fallen world? What portions are new?
- In what unique ways have the people used fallen world scraps and technologies?
- How do the citizens feel about remnants? The Motherboard?
- What cultural custom is unique to this city?
- What do these people want that they don't have? What do they have to offer others in trade?

OTHER WANDERING CITIES

You can populate the Echo Vale with the wandering cities below or create your own.

The May Trader Caravan: A collection of smaller vehicles, this ragtag group travels the Wastes together hunting wild remnants for scrap and trading with anyone with quantum or a rare piece of technology from the fallen world. May Traders are considered especially brave, as they don't use walls or a tall walker to keep them safe from remnants. Their caravan is a collection of **mechanicals** that sit low to the ground, and they sacrifice strong defenses for speed and maneuverability.

The Library: Built atop a large, spider-like remnant, the Library is a prime example of the insular nature of many valley cities, wandering or walled. Those who live here aren't interested in adapting and developing new technologies as much as protecting items and information from the fallen world.

Nereidus: A long, centipede-like ship with hundreds of oars that snakes through the water off the coast of the Echo Vale. Those who live here share a very communal way of life. Instead of having one leader, they elect a new Mouth of the People each season.

■ Walled Cities

Most stationary cities in the Echo Vale were built into ancient ruins, with new walls constructed around their borders to protect citizens from remnants and raiders. Some cities also use geographical formations and ancient structures for defense, while others are rapidly developing innovative defense systems.

THE INCITING INCIDENT

You can use the prompt below to start your campaign, or create your own.

After the outbreak of the Remnant's Fury, Argent's city guard scrambled to subdue the violent machines. But wave after wave succumbed to the malicious virus, and politicians grew more desperate to avoid widespread fear.

Priv Maelor Rhodek (orderborne elf, she/her), the city's charismatic leader, sent a messenger to assemble a team that has the skill and experience to handle remnants, go undercover as civilians in the machinists' Build Sector, and figure out what's causing the remnant attacks.

Priv Rhodek gives her word that any scrap the party acquires while protecting the city is theirs to keep. In return, she asks that they collect as many remnant cores as possible so she can pass them to her technomancers to diagnose the cause of the violence. She also gives the party the name of a surprising contact to see before they head into the scrap factory where many attacks have occurred.

The contact is **Mac the Scrap Jack** (wanderborne faun, he/him), who runs an illegal scrap operation, making him an unlikely friend for the very person that outlaws his work. But on the Priv's word, he gives the party a Hotspot. This illegal device can be carried as a backpack and, when set down and activated, it stalls out nearby remnants for a few moments, allowing the party to get out of a bind.

He also gives the party an offer: save one of the remnant cores they recover and bring it to him instead of Rhodek. He'll pay them a few quantum, and they'll have the opportunity to look at the data from the core to try and see what's "causing all this ruckus with the rems."

As they fight their way through the factory, does the party have compassion for the once-tame remnants, or do they dispose of them indiscriminately? Will the players try to talk to the factory workers to learn more about the Remnant's Fury, or will they operate like a cleanup crew, keep their eye on the scrap they stand to gain? Will they bring the Priv all the remnant cores they collect, or will they save one for Mac and risk trouble from the city guard? If they perform well, will Priv Rhodek tell the party more about the Remnant's Fury and the involvement of the Motherboard?

FOR THE GM

As the party defeats violent remnants within the factory, provide each PC one remnant core alongside the scrap they would normally obtain from their battles (see the upcoming "Crafting & Trading" section). The following item description explains the Hotspot's mechanics and lists the scrap requirements to craft a new one.

Hotspot: *(Consumable)* Activate to make all remnants within Very Close range *Restrained*.

Scrap: 5 triggers, 8 wires, 9 copper, 6 fuses, 3 relays, 1 battery

CAMPAIGN MECHANICS

The following mechanics are unique to this campaign.

◼ Tech Damage

In a Motherboard campaign, magic damage is instead called tech damage. This damage is caused by technomancy; it might be a piercing shrill, a concussive blast, a blinding flash, swarming nanobots, a drone emitting a high-powered plasma beam, or anything other product of supremely advanced technology.

◼ Ikonis & Other Tools

The following sections detail how weapons, armor, and other technology are used in a Motherboard campaign.

IKONIS

Characters don't have access to Daggerheart's normal selection of primary and secondary weapons during this campaign.

Instead, characters receive a personalized weapon known as an **Ikonis**, a special weapon given to citizens of the Echo Vale when they come of age. It starts as a simple rod of metal and is designed to receive modifications as the bearer ages, shaped according to their needs. It can evolve to become many types of weapons—a staff with webs of colorful wire wrapped around its hilt, an ornate bow humming with energy, a heavy hammer designed for the forge, a spear with knobs and triggers that allow for different attachments, or anything else that might suit the wielder.

Players will design their character's Ikonis using the Motherboard module sheet (available in the appendix or at www.daggerheart.com/downloads). Each player should take a copy of the module and slide it under the right side of their character sheet. Then, they will make selections about trait, range, and damage in the top section of the module, then make up a name and description for their weapon. Finally, they'll record the weapon's details in the Primary Weapon slot of their character sheet.

Ikonis are always considered to be two-handed weapons and start with the "Bonded" feature:

> **Bonded:** Gain a bonus to your damage rolls equal to your level.

AUGMENTS

Ikonis also allow PCs to install augments. A character's Ikonis starts with two Augment slots at Tier 1, showing that it has evolved from its most basic form, and it gains an additional slot at each subsequent tier. Augments can be crafted as a downtime move when PCs have the scrap to do so. (See the upcoming "Crafting & Trading" section for more information.)

An Ikonis starts with no augments installed. A character may build as many augments as they'd like, but they can only install a number equal to the Augment slots they have available. For example, even if a level 1 PC has three augments built, they can only install two on their Ikonis at a time. When they progress to level 2 (and they become a Tier 2 PC), they can have all three augments installed. While installed, augments are treated as additional features for that weapon. PCs may freely swap augments they've already crafted during downtime.

The Motherboard character sheet module includes a selection of base augments for PCs to choose from, but GMs are encouraged to make more to offer their players as well, using the provided options as a template.

ARMOR

Characters have access to Daggerheart's normal selection of armor, but should flavor it to their preference within the campaign setting.

NETWORK TETHER

Each PC adds a Network tether to their inventory at character creation. Tethers are typically large hooks attached to a data cable. These allow travelers to toss the hook onto an overhead wire to charge their technology and gain access to the Network while moving through the Wastes. PCs must have access to the Network, via a tether or other means, to perform downtime moves.
Crafting & Trading

In this campaign frame, gold is not used as a currency. Instead, PCs can gather scrap to trade for a currency known as quantum. The Motherboard character sheet module helps to track their current scrap, along with how much quantum they have to spend. All PCs start with 5 quantum.

The Quantum Economy

Use the following conversion for Daggerheart when pricing other goods and services using quantum.

10 quantum = 1 handful of gold
100 quantum = 1 bag of gold
1000 quantum = 1 chest of gold

Gathering Scrap

When the PCs defeat remnant adversaries, they can collect scrap after the combat. There are three categories of scrap, each with an associated die size: Shards (d6), Metals (d8), and Components (d10). When the PCs are collecting scrap, determine which categories of scrap and how many of each (which determines the number of dice they roll) they can find.

Each player individually rolls the dice you determine, and the result of each die is compared to the associated scrap category table, listed here and on the Motherboard character sheet module, to determine what scrap a character receives. If a rolled result falls between two values, select the lower numbered option. A character receives one piece of scrap per die, which is recorded on the line next to that kind of scrap on the character sheet module.

Tip: Think of the numbers on the roll table as thresholds; when you reach that threshold, you get that scrap.

Example: After a standard fight with some remnants, the GM tells the players to each roll two dice for Shards, two dice for Metals, and a die for Components. The first player rolls a 2 and a 4 for Shards, gaining a coil and a trigger. They roll a 5 and a 7 for Metals and gain a cobalt and a platinum. Finally, they roll a 9 for components and gain a capacitor. The second player rolls a 1 and a 6 for Shards, 3 and 6 for Metals, and a 5 for Components. They gain a gear, crystal, copper, silver, and circuit.

SCRAP CATEGORY TABLES

Shards (d6)

1	2	3	4	5	6
Gear	Coil	Wire	Trigger	Lens	Crystal

Metals (d8)

1	3	5	6	7	8
Aluminum	Copper	Cobalt	Silver	Platinum	Gold

Components (d10)

1	3	6	8	9	10
Fuse	Circuit	Disc	Relay	Capacitor	Battery

Scrap Reward Table

Use the following table as general guidance for scrap rewards after encounters:

SCRAP REWARDS	EASY FIGHT	STANDARD FIGHT	DIFFICULT FIGHT	VERY DIFFICULT FIGHT
A few remnants	2 Shards	2 Shards, 1 Metal	2 Shards, 1 Metal, 1 Component	2 Shard, 2 Metals, 1 Component
Mostly remnants	2 Shards, 1 Metal	2 Shards, 2 Metals, 1 Component	3 Shard, 2 Metals, 1 Component	3 Shard, 3 Metals, 2 Components
All remnants	2 Shards, 1 Metal, 1 Component	3 Shards, 2 Metals, 2 Components	3 Shards, 3 Metals, 2 Components	4 Shards, 3 Metals, 3 Component

RELICS

There is an additional category of scrap called **Relics**. These are unique pieces of scrap only found on specific remnant adversaries. When PCs defeat a particularly important or powerful remnant adversary, you might grant them each a Relic along with scrap from the table above. These relics should be customized based on the adversary, such as steelhorn of the stag, lens of the flickering falcon, jaw piston of the cryodrake, or gold scales of the scrappersnap. Relics are worth 20 quantum and are often used to craft powerful augments.

You should also provide opportunities for PCs to seek specific Shard, Metal, or Component rewards, whether that be through NPC contracts, hunting down particular adversaries, exploring certain areas, or through scrap shacks.

> **Tip:** The values on the Scrap Reward Table above are designed for a campaign of around 50 sessions, with 1-2 fights per session. If you plan to do a shorter or longer campaign, adjust your rewards accordingly.

Crafting with Scrap

The characters can use their collected scrap to craft augments for their Ikonis and other items. When they have enough scrap to build an augment, they can use a downtime move and spend the appropriate amount of scrap. When an augment calls for a generic Relic, a PC can spend any Relic they have.

Some augments have prerequisites called **precompiles**. When this precompile is met, the augment is available to be crafted. The base augments have precompiles that require a PC to be in a certain tier, but a precompile can be anything: a certain value for the PC's Strength or Evasion, a specific domain or class, or anything else you'd like. Augments can always be broken back into their scrap for parts as needed.

You're also encouraged to give PCs additional tasks or challenges that utilize scrap, such as building a specific machine for a task or collecting scrap for an ally who's trying to repair a remnant.

Selling Scrap for Quantum

Local scrap shacks in each city generally trade scrap for quantum and quantum for scrap. By default, each piece of scrap is worth its value on the previous roll table (whether players are buying or selling), and each shop has a daily stock equal to 1d10 of each Shard, 1d8 of each Metal, and 1d6 of each Component. When PCs want to buy a certain type of scrap, roll to determine how many are in stock. These values can always change at your discretion.

> **Example:** A PC wants to sell Components at a local scrap shack: 2 circuits and 1 battery. Because circuits are worth 3 quantum each and batteries are worth 10, they would get 6 quantum for the circuits and 10 quantum for the battery, for a total of 16 quantum. They also want to sell some Shards: 2 lenses and 6 springs. Each lens is worth 5 quantum and each spring is worth 2, earning them an additional 22 quantum. They now have 38 quantum.
>
> They need to buy 1 crystal and 4 silver to craft an augment. The GM says the scrap shack has enough in stock, so they pay 6 for the crystal and 12 for the silver for a total of 18 quantum. They leave the shack with 20 quantum, 1 crystal, and 4 silver.
WRITING IN KOHD

Language designed by Chris Willett

Kohd, the language of the fallen world's technology, has long been a mystery to the people of the Echo Vale. If you'd like to give your players the opportunity to learn how to decipher and write in it over the course of a campaign, you're encouraged to use this language. We recommend delivering them messages early on from the Motherboard that they can't read, having technomancers reveal pieces of the language to them as they progress through the story, and then finally giving them the tools to read and write the full language by the climax.

SUBROUTINE 1.
NODAL WORD GLYPH CONSTRUCTION

Example Word - MOTHERBOARD

An individual language unit (word) has no discrete letters. Kohd is based on nine nodes, each representing 3 letters (other than the YZ node).

Each word is a circuit that flows from Charge

to

Ground.

■ Construction Step 1

To begin making the word Motherboard, draw a single node (the circle) and connect the charge indicator (the line). This is called the charge node and indicates where the word begins. Take note of the position of the **charge node** for the word you are writing relative to the other nodes. Both **M** and **O** are in the center node.

■ Construction Step 2

Locate the second node for the next letter in the word. In this case, **T** is down and left. Add a **trace line** to connect the circuit between the charge node and the new node. Every trace line runs from a **source node** to an **end node**.
■ Construction Step 3

The source node has the letter M in its first position, N in its second, and O in its third. For M, add one **subnode** (the dot) to the trace line, and for O, add three subnodes.

subnode for M

subnodes for O
T is in the second position on its node, so as we connect the trace line to the node containing H, we add two subnodes.

H

M, O

T
Continuing, we can get all the way to MOTHERB. At that point, if we were to connect the trace to the MNO node, the order of letters would become vague. To keep this from happening, draw a ring around or within the MNO node and connect the trace line to that ring.
Continue on, adding trace lines, subnodes, and node rings as needed until you reach the last letter of the word.
■ Construction Step 4

Lastly, add the ground indicator to place the last subnode and terminate the trace.
■ Construction Step 5

Constructed words sometimes include too few nodes, so their orientation on the nine-node grid is vague. For example, words like felled, mount, and homing require just two diagonal nodes. In these cases, we add a null modifier to a remote corner of the glyph to indicate the relative position of the nodes involved in the word.

FELLED

MOUNT

HOMING
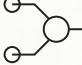

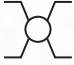

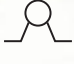

SUBROUTINE 2. SENTENCE CONSTRUCTION

Our example for this subroutine will be this sentence: The network carries communication from city to city.

A few of these words in kohd have simplified, non-nodally constructed forms, such as "the" and "from/to."
Refer to the following lexicon for a full breakdown of these words:

And

Or

True. Is.

False. Not.

Because. Since.

So. This. Causing.

If

If-Then

There is.
There exists.

Unique. There exists exactly one.

From-to. Transition.

■ Construction Step 1

First, we signify the beginning of a sentence with a coupler, a complex series of solder points where the kohders could fuse one sentence circuit to another. An example of a coupler can be seen here; there is no significance to the various lengths in its bars.
■ Construction Step 2

Next, lay out all nodally constructed words in a line in order. Ignore any words with a shortened version in the lexicon.

NETWORK   CARRIES   COMMUNICATION   CITY   CITY

■ Construction Step 3

Apply articles. In this case, only Network needs to be modified with an article, which slots into the charge node.

The ‹definite›

NETWORK

THE
NETWORK

ARTICLES
MODIFY THE
CHARGE NODE

The ‹definite›

A ‹indefinite›
■ Construction Step 4

Add words from the lexicon. Note here that from-to replaces two words, not just one. Like if-then, it goes between two glyphs, changing it from "from city to city" to "city from-to city." Small words from the lexicon can go anywhere they fit.

*from
to*
■ Construction Step 5

Affix periods, exclamations, and question marks to the ground node of the final word of the sentence. Commas divide the trace lines (made in the next step) with two vertical lines.

Examples:

⊢● *Period*   ◁ *Exclamation*   ⌐○ *Question*

⊣├ *Comma (intersects a trace between words)*
■ Construction Step 6

Connect the circuit between constructed words by connecting the ground of one word to the charge of the next. Include lexicon words in this circuit. These circuit connections always begin and terminate in a simple bar. Add a trace from the coupler to the first charge node.
■ Final Sentence

THE NETWORK   CARRIES   COMMUNICATION   CITY   FROM-TO   CITY.
SESSION ZERO QUESTIONS

Ask any of these questions to your players, or make your own.

- What is your character's relationship with remnants? How do they rely on them?
- How did your character use technology or technomancy in their daily life before the Remnant's Fury? What, if anything, has changed since that catastrophic event?
- Describe a structure built by the fallen civilization that your character has seen before. What do you think it was originally used for? What is it used for now?
- How do remnants physically change as they begin to deteriorate into violence?
- Describe a wandering city your character once visited. What was unique about it?
COLOSSUS OF THE DRYLANDS

A prosperous region of gunslingers and outlaws has fallen into terror as colossal creatures awaken from beneath the earth.

Designed by Carlos Cisco, Rowan Hall, Spenser Starke, & Mike Underwood

Complexity Rating: ● ● ● ●

THE PITCH

Read this section to your players to introduce them to the campaign.

The Drylands were a place that put the old stories aside. While superstitious miners have long said that the crystals growing wild in this desert are made from the very life-essence of Forgotten Gods, the folk around here had real work to do, and actual deities were left for campfire stories. That is, until a massive colossus answered the call of something ancient and apocalyptic, rising from the earth and devastating the lands. The bold prospectors, tired laborers, and born-again worshippers in the dusty town of Wyllin's Gulch were thrown from their routine of industry and exploitation, forced to raise scattered armies and watch them die to the behemoth's strength. And this is only the first of many titanic beasts poised to terrorize the land. In a Colossus of the Drylands campaign, you'll play a heroic posse of mavericks who must save their home from a legion of colossi and a primordial god seeking vengeance.

TONE & FEEL

Awe-Inspiring, Dusty, Eerie, Gritty, Larger than Life, Terrifying

THEMES

Breaking Cycles, The Burden of Heroism, Faith vs. Doubt, Greed, Ordinary People Accomplishing the Extraordinary

TOUCHSTONES

Shadow of the Colossus, Red Dead Redemption, Deadlands, On the Shoulders of Colossus

OVERVIEW

If your group decides to play this campaign, give your players the following information before character creation.

The **Prophecy of the Drylands God** begins as thus: In the center of the world there is a mountain, and deep beneath that mountain there is an ancient and terrible god—a Forgotten God—struggling to break free of his confinement. One day Kudamat, the First Doom will escape his earthen tomb with the help of his nine colossi, the Children of Godfell, to sunder the world, his hated prison, and tear down the sky like fabric. As the New Gods fall from the Hallows Above, Kudamat will slay them with his stone sickle that their blood will flood the Mortal Realm. In this sanguine tide, Kudamat and the new generation of colossi, each made from the god's very being, will destroy the creatures of the Mortal Realm and make room for abhorrent creations to repopulate the land, sea, and sky. In his triumph, Kudamat will free the many trapped gods of his generation and become the high lord among all divinities.

At least, that's how the old story went. Most people believed it was just another tall tale of the Drylands.

The **History of the Gods** is a myth known by many and believed by few: When the Forgotten Gods built the Mortal Realm in the Earliest Age, they made a place of joys and sorrows, freedom and labor. All the creatures of the land, sea, and sky worked for the many gods and enjoyed the spoils and trials of deities that had nothing but time and endless curiosity. These immortals could not fathom that the New Gods would one day rise and overthrow them in a violent battle, tossing them from their place in the high Hallows Above and entrapping them in the Mortal Realm and the Circles Below.

Many Forgotten Gods imprisoned in the Mortal Realm were trapped within the ground, buried over the centuries beneath the rise and fall of civilizations. The deific essence of these gods bleeds from their lasting wounds—and whether this enervation was intentional or not, their power seeped into the earth where they're entombed, running like veins of stone up to the surface. The crystal born from these veins is known as "essentia," and all magic in the Mortal Realm comes from its power. As such, there's a mad scramble for any opportunity to harvest this precious resource, and in the eyes of those in power, land with a vein of essentia is worth the millions of lives sacrificed to the mines built to dig the crystals up.

Godfell Mountain is one such land. Sitting in the middle of a crowd of high mesas, amid arid countryside peppered by meager lakes and sparse forests, this peak marks the richest essentia mines on the continent. Though it's not the center of the world as the stories say, it's the hub of a region filled with newfound wealth, industry, and an ever-expanding network of dusty towns run by crooked sheriffs.

The numerous veins of essentia running from Godfell Mountain come from the power of **Kudamat, the First Doom**, a Forgotten God seeking freedom and the destruction of the entire Mortal Realm. As these makeshift towns follow the veins of crystal ever closer to Godfell, they move toward the blighted earth the New Gods left to keep mortals from the prison of the ancient god. This mountain is a desolate and dangerous place where few can survive, but that doesn't stop powerful mining operations and bold prospectors from trying their luck.

Kudamat was trapped within Godfell Mountain, or rather, the mountain was formed around him when the Forgotten Gods lost to the New Gods at the end of the Earliest Age. Ever since, like many of his kind, Kudamat was forced to wait for the day he could finally break free. But it wasn't a simple burial the New Gods performed. To trap the First Doom, the usurper gods split part of his being into nine pieces and tasked nine mortals with hiding the soul shards so Kudamat could not reach his full power.

But they should not have given such a paramount task to mere mortals. The nine riders took the shards as far from the mountain as they could manage and buried them in the arid earth, but it wasn't far enough. Over the centuries, Kudamat reached out through the dirt and stone, veins of crystalline essentia stretching out like tendrils to find his missing pieces. Over time, the godly strife of the Earliest Age and the hidden resting places of the soul shards drifted out of memory and into stories and legends. Legends most sensible folk ignored or forgot.

When Kudamat found the first piece of his soul, he began channeling its power to restore his godhood, and a single thundering quake tore a fissure through the center street of Wyllin's Gulch—a terrible earthquake, they believed, not understanding the apocalyptic toll ringing out across the sands. Kudamat then used a fragment of his divine might to craft a colossus and droves of accompanying aberrations that would guard the soul shard while he siphons the remainder of his power and seeks out the other eight shards. Even with only the barest portion of his power restored, Kudamat's reawakening is all but inevitable. He grows stronger by the day, searching out the remaining pieces and building more colossi to guard them. If left unchecked, he will reclaim the power of all nine shards and break his earthen shackles, rising again to bring doom to this world.

Preacher Rayos (he/him) was the first, or perhaps only the loudest, to recognize the rise of the colossus outside **Wyllin's Gulch** as the first step in the Prophecy of the Drylands God. He proclaimed the story of Kudamat, warning people of the increased dangers of the god's charged essentia. Above all else, he stressed the importance of finding the soul shards and keeping the god from siphoning them. To get the word out, he took his flock from their home in the Left Luck Outpost to Wyllin's Gulch, the unofficial capital of the western line, where he continues to preach, growing more popular with each passing day. He already had enough of a following in his community—and now times are apocalyptic enough that people are eager for a spiritual leader.

Wyllin's Gulch worships no gods but the earning and spending of gold, and it will take more than a violent colossus to get the people of this town to pay attention to an ancient prophecy. In the early days of the Essentia Rush, roughly 40 years ago, the Gulch was established as the first western outpost in the region surrounding Godfell Mountain, just a few miles from a rich vein of essentia. As more and more of the crystals were unearthed, powerful moguls established processing plants to speed up the time between mine and money. Belching factories were built up the sides of the Twin Turtles, two great mesas that bordered the burgeoning town, their massive conveyor lifts hauling tons of essentia to the manufactories that process the crystals into the conductive batteries most folk use to power their homes, weapons, and all manner of magical items.

Today, with its natural fortifications and wealthy elite, Wyllin's Gulch is the gatekeeper for anyone approaching Godfell Mountain on the western train line. As such, the townspeople either work mining and processing essentia or host money traps that appeal to new fools who come to try their hand at prospecting the crystals.

A wide variety of folks inhabit Wyllin's Gulch. The arid plains, breathtaking skies, and the possibility of boundless riches attract all types. Living away from the prying eye of larger law enforcement is another perk—while there are sheriffs in Wyllin's Gulch, they're paid to protect the mines and manufacturing rather than uphold any version of "justice." It's common for outlaw gangs to seek their fortunes by stealing the valuable crystals, while others, who see these mining operations as anathema, destroy the equipment that tears essentia from the ground. But most outlaws find greater success at the smaller essentia outposts than this bastion of dusty fortitude.

Essentia outposts range in size from a small collection of tents to a thriving town. Some outposts are formed when just a few folks get together to mine the same vein or sift the same river. Others are created when a company purchases a parcel of land containing a vein and installs a small settlement of workers. Still others are larger towns built by people wanting a bit of community along with their work. Though essentia outposts can vary in size, style, and operating procedure, one thing is always true: where there is an outpost around Godfell Mountain, there's a vein of essentia. Now, these outposts face the coming threat of more colossi rising from the earth as Kudamat locates his soul shards and uses the essentia veins to siphon back his power.

COMMUNITIES

All communities are available, but some have unique aspects within a Colossus of the Drylands campaign. As needed, provide the following information to your players and choose one or more of the questions to ask them during your session zero.

■ Loreborne

In the Drylands, many folks hold fervent beliefs about the Forgotten Gods, the New Gods, and the essentia crystals that power the world. Loreborne communities take a more scholarly, possibly even evangelical, approach to these beliefs. Some follow the "forgotten ways" and utilize raw essentia in their spiritual practice, while others abstain from essentia entirely, believing it's a profanity to the New Gods they worship.

- What were you taught about the origins of the Mortal Realm, and how did the colossi emerging affect that worldview?
- Kudamat's impending return changed the beliefs of many, but not you. What did you experience in the past that makes your faith unshakeable?
- You refuse to use the magic of essentia because you follow the "new ways." How has your devotion to the New Gods helped you? How has it hindered you?

■ Orderborne

Some orderborne characters come from the law. Whether sheriff or deputy, these individuals are often seen as the most powerful members of their town. Though these officers are usually in the pocket of rich essentia mine moguls, if not fully on the payroll, they're often the most prepared to protect civilians in times of danger. Other orderborne communities are organized bands of outlaws—some who steal and sabotage essentia outposts with a moral goal in mind, and others who just need crystals to sell or power their own magic. Either way, they always operate by a code, unique as it may be.

- What incident during your time working for the sheriff prepared you to help panicking civilians worried about the colossus?
- You and your posse have killed to get what you need. What rules do you have about who you'll never harm?
- You once took a bribe to do something you regret. What happened, and what was your reward?

Highborne

In the Drylands, most true highborne folk come from elsewhere, seeking to further enrich themselves using the industries surrounding essentia. Some were born into wealth, while others are fallen business owners forced to move out to the desert for their "next big venture." Regardless of how highborne characters originally found fortune, they often find themselves at odds with the beating sun and the clinging dust, though they have employees to do any task that could even vaguely be classified as "work." The grand myth that keeps people prospecting is that anyone can find an essentia vein or river deposit and change their lives with riches untold. Though some have done it, they're few and far between. Most earn enough to keep on working for another day, and a few live comfortably with a little to spare.

- What disaster befell your family's fortune that precipitated your move to the Drylands?
- What local custom or practice do you find refreshing that people from home would balk at?
- How has your lineage, title, or other highborne affectations gotten you in trouble in the Drylands?

Ridgeborne and Underborne

In this region of mountains, mines, high deserts, and sparse greenery, both ridgeborne and underborne communities thrive. Ridgeborne characters could come from small outposts, family encampments, or other groups that make home atop the dangerous crags of the region. Some of these communities may even be bold enough to live where others will not—on Godfell Mountain. Though it is dangerous, desolate, and blighted, the mountain yields the richest essentia for those willing to risk everything.

An underborne character could be part of a community that took to old essentia mines for refuge, building homes in the darkness beneath the earth. Others are essentia miners who create small underborne communities with fellow members of their profession who spend most of their life excavating the crystals from the stone. This is one of the most dangerous yet common jobs in the region, and it makes for a hardy lot. Whether a character grew up in a Drylands outpost or moved to one to prospect, there are more than enough communities peppered throughout the Drylands that any of these places could be called home.

- You were born in the mountains and mesas of the Drylands. What do you know about this land that new prospectors will never understand?
- You are afraid of the dark, but venture into the mines every day anyway. What keeps you going back?
- You once found something unexpected near Godfell Mountain. What was it, and who did you tell about your discovery?

Slyborne

With its untold veins of essentia bringing folks seeking to make their fortune from the earth, the Drylands also appeal to people seeking to make their fortune from the exploitation of others. There's no small share of bad actors who want to get rich and get out quick, either by selling useless parcels of land, shilling water-and-vinegar "snake oil," or outright theft. But some slyborne communities are more interested in stopping major operations from stripping essentia from the desert than robbing the innocent. The "Harlan Family," a small but active posse of thieves led by **Trace Harlan** (they/them), works out of Wyllin's Gulch for one purpose: to stop ambitious tycoons from mining and producing essentia batteries. They hope to one day tear the factories from the walls of the mesa and drive out the greedy moguls that put profit over people.

- What darkness in your past did you attempt to leave behind when coming to the Drylands?
- You once betrayed a close accomplice. What happened and why haven't you spoken since the incident?
- You had to go through a terrifying initiation to join your posse. What did you do, and how has it changed you forever?

Wanderborne

Wanderborne characters are just as likely to originate from within the region as arrive from elsewhere. As most things in the Drylands do, their wanderings gravitate toward the essentia veins. Some wanderborne communities are as old as Godfell Mountain itself, and they have stores of essentia they visit across the desert. Others are new groups of unprepared prospectors who are more likely to die by sun or snake than find any ease in the Drylands.

- What common practice of outpost living do you find utterly baffling or uncomfortable?
- You have a small cache of emergency items hidden in the desert. What did you hide?
- You used to live in an outpost, but something terrible happened that caused you to leave. What happened, and why will you never return?
ANCESTRIES

All ancestries are available, but some have unique aspects within a Colossus of the Drylands campaign. As needed, provide the following information to your players.

■ All Ancestries

Many folks of all ancestries profess to feel the presence of essentia in the ground—especially while Kudamat is using it to siphon back his power. No one can prove if this is true or not, but many use these claims to get high-paying positions working for mining operations.

■ Clanks

Clanks are powered by essentia. If a player creates a clank, they should consider how their character regularly obtains this resource and what happens if they're unable to get enough.

■ Infernis

Players who have chosen the Infernis ancestry should consider how their character's relationship with their heritage from the demons of the Circles Below plays into the various faiths of the Drylands.

■ Fungril, Galapa, and Ribbets

Fungril, galapa, and ribbets native to the Drylands are most often well adapted to the desert, but those who aren't from these deserts commonly live near the few lakes in the region or devise systems to travel with large amounts of water.

CLASSES

All classes are available, but some have unique aspects within a Colossus of the Drylands campaign. As needed, provide the following information to your players.

■ Druids

Druids in the Drylands are more equipped than many to navigate the inhospitable environment. They're familiar with the unique qualities of desert flora and fauna, and their spells and abilities reflect that.

■ Rangers

Many rangers in the Drylands are "lone riders" who prefer only the company of their mount and ride from outpost to outpost, never stopping for long. They're often defenders of the weak who stand up against local law enforcement when deputies push people around.

■ Seraphs

Many seraphs have strong relationships with their faith, either worshiping the Forgotten Gods (such as Kudamat) or the New Gods. This also affects their relationship with the use of essentia—the former utilize the crystals prolifically, while the latter may have a fraught relationship with magic. When playing a seraph, players should consider how their character feels about magic, as well as the way their character engages with their faith within the community. Many choose to become preachers, healers, and prophets of the land.

■ Syndicate Rogue

These rogues often operate as deputies, mining operation overseers, or members of outlaw posses. Though any of these groups might work publicly, it takes a master of charm and negotiation, as well as clandestine activity, to accomplish the organization's more covert goals.
PLAYER PRINCIPLES

If your group decides to play this campaign, give your players the following information before character creation.

■ Embrace the Drylands

When building your character, consider how their place in the Drylands impacts their aesthetics and approach to the world. Find reasons for them to love the land despite its harshness as they work desperately to protect the region from the monsters trying to tear it asunder.

■ Face the Unstoppable

In this campaign, your character stands against creatures taller than the largest buildings, whose destructive power is only matched by the most devastating natural disasters. Decide what makes your character particularly equipped to destroy colossi and, more importantly, what's personally at stake for them should they fail.

■ Navigate Your Faith

The Drylands are a land of extremes: it's extremely hot, extremely harsh, and extremely easy to die. Folks approach religion the same way. Some people believe that the gods never existed and the stories about the origins of essentia are just marketing and grandstanding. Others continue to worship the Forgotten Gods, attributing a spiritual aspect to their use of essentia. Still others believe essentia is a profanity and commit crimes to close up the mines in the name of the New Gods. Consider the beliefs your character held before the rise of first colossus and how they might have changed since.

■ Ride Like the Wind

Just about everyone born in the Drylands can ride a mount from the moment they can walk, and newcomers are expected to learn quickly. Unless you choose a feature for your character that provides an animal companion or applicable spell with benefits, their mount will not change their mechanics or give them an advantage in combat. They can, however, use their mount to pass between towns and portions of the desert with added ease and speed. The colossal children of a vengeful god are on the rise, and the party has no time to waste.

Compared to what other creatures people of the Drylands ride, is your character's mount unique? Select their mount from the list below, or make up your own.

Horse	Dire Wolf	Giant Turtle
Buffalo	Rhinoceros	Giant Toad
Deer	Giant Goat	Giant Scorpion
Elk	Giant Jackalope	Giant Centipede
Bear	Giant Rattlesnake	Shadow Beast
Mountain Lion	Giant Lizard	Robotic Mount

GM PRINCIPLES

Keep the following guidance in mind while you GM this campaign.

■ Contrast the Mundane and the Extraordinary

Before the first colossus appeared in Wyllin's Gulch, things were pretty ordinary. Folks came in on the one train, sought their fortunes mining or panning for essentia, spent their meager earnings on liquor at the bar, kept their mount fed and their belly (mostly) full, and tried to stay out of the way if a posse rode through town. Now, with the colossus rampaging, the mines are flush with power to the point of explosion, and creatures are forming seemingly overnight. Unfortunately, the impending arrival of the First Doom does nothing to dissuade the impending arrival of debt collectors, and the essentia refineries still hunger for fuel. The cataclysmic foes threatening the Drylands become more apocalyptic when juxtaposed against mundane moments found only in these small towns.

■ Emphasize Scope and Scale

The Drylands are a big place. The mesas are massive, the sky stretches as far as the eye can see, and something about the darkness of the nights feels infinite. This is a place that makes one feel small, even on a normal day. The sprawling geography is a perpetual reminder of the true insignificance of civilization's footprint. Confrontations with the colossi should serve as a reminder: the adventurers are but ants to them, scaling their bodies and stinging them with tiny weapons. Their destruction is calamitous—a single footstep could level a town. Let both the colossi and the landscape feel immense.

■ Make Colossi an Allegory for Personal Woe

The colossi are destructive beings formed from aspects of Kudamat's soul and the environment they inhabit—but they can also serve as allegories for the PCs' personal journeys. When you can, use these behemoths to address the themes of the campaign, informed by the PCs' choices and their backstories. In your session zero, make note of themes or struggles the players want to highlight in their characters' backstories... then make them gigantic.

For example, if one of the characters has a past with a corrupt small-town sheriff with too much influence and a finger in everyone's business, you could utilize Zuudra, the Many Arms of Calamity (see the upcoming "The Children of Godfell" section) as a metaphor to represent the sheriff's destructive overreach and the inescapable grip he holds on the outpost.

■ Offer Chances for Creative Solutions to Colossal Problems

Some players may be satisfied with simply climbing a colossus and jabbing sharp things into their weak points until they die. Other players might come up with elaborate plans and traps, or even attempt to tame a colossus. Lean into these opportunities for player creativity, giving them plenty of nails until they figure out what hammer they want to use when tackling these monstrous beasts. Each colossi should have a unique personality, physicality, and weakness that encourages the players' ingenuity.

DISTINCTIONS

Use this information to prepare your campaign. You can also share it with your players as needed.

▪ The Children of Godfell

Each of Kudamat's nine soul shards are protected by a colossus known as a Child of Godfell. These beings are physical manifestations of the god's will, hellbent on protecting their soul shard as its power is siphoned back to the mountain. Formed by elements of the soul shard's surroundings, each is unique in personality, form, and capabilities.

You'll need nine colossi to populate the area around Godfell Mountain and guard Kudamat's soul shards. You can use any of the colossi from the list below as inspiration, or make your own. (See the "Colossal Adversaries" section on page 318 for mechanical guidance on building a colossus.)

▪ Example Children of Godfell

Aandira, the One Who Devours: Her form is a mix of humanoid and spider, and she scurries across the Drylands on bent-back limb with a dozen mouths of broken teeth.

Aikar, Shepherd of the Meek: This bipedal colossus has two arms affixed with bladed shields, allowing them to deflect and deliver blows with ease. Aikar's howl can stop living creatures in their tracks.

Aphedos, the Creeping Darkness: Aphedos is formed from thousands of flies that operate independently. Impossible to climb, he must be brought down by alternate means.

Balorma, the Blooming Hornwolf: This wolf bears elk horns formed of flourishing plant life. When she steps, she plants roots that suck the life from all they touch.

Chakantis, He Who Knows the End: This crystalline beetle's wingbeats rain down deadly shards onto the ground, and his abdomen can vibrate at high frequency, shattering even stone.

Daktadae, the Cleaver: A massive steel rhinoceros formed from a steam train, a cleaver emerging from his head instead of a horn. He seeks vengeance upon those who've harmed him in the past.

Eriphisia, the Radiant Light of Eternal Cleansing: A crystalline statue whose dozens of eyes cast blinding light upon the world. They reflect the sun upon victims as a ray of white, hot death.

Ga'mor, the Shade of Quick Death: Ga'mor is formed from the shadows of mountains, buildings, and people. When this amalgam steps into new darkness, they can adjust their shape to match the bounds of the shadow.

Heladra, Sower of Sorrows: This cloaked figure weeps waterfalls from unseen eyes, flooding the land wherever she travels.

Ikeri, Injuries Untold: This apelike creature has the face of a bird. They are made of stone and carry an enormous mesa upon their back.

Impahk, They Who Know No Rest: This massive desert cyclone never stops moving and consumes all they touch.

Kelir, the Virulent Hate and Her Hundred, Hundred Children: A crablike, mountainous beast whose children scurry in and around her, bringing food as tribute.

Mirmett, the Lover of the Hollow Hearts. This giant humanoid cage places enemies inside themself to be killed or eaten by the creatures that live within them.

Moraidus, the Keeper of Graves: This centipede is formed from grave dirt and tombstones. Their arms are made of skeletons that hang from their composite form, reaching and scrabbling for anything that comes near.

Nocte, the Invisible Tide: Imperceptible to the eye, Nocte swims through the ground like a fish through water and attacks from below, pulling his victims into an early grave.

Oosha, Eerrae, and Yyisu, Three Who Parse Infinity: These three humanoid figures can fight separately or come together as one terrifying form. They cut their victims into pieces with rusted blades.

Poy, Sky Skimmer of the Dust Sea: This massive shoebill stork is formed from the dust of the Drylands and traps enemies in their cavernous beak.

Quelle, the Innocent Pain: A feline creature covered in thousands of burrowing tendrils, Quelle is fascinated by living beings and tears their enemies apart to look inside.

Syan'til, the Serpent of the Last Light: A serpent of lightning, Syan'til races down from the sky to strike with blazing speed.

Takkan, the Bone Bearer: Built from hundreds of bones from deep within the earth, Takkan's form is ever-shifting and ever-grinding as she moves.

Usandi, the Bear of Five Faces: Able to see in all directions, Usandi has a ring of snapping teeth around his neck, sharpened spine bones jutting out of his back, and thrashing claws running up his limbs.

Vian and Naiv, the Makers of Undoing: These vespertilian beasts corrode what they touch until it falls to dust. They can only be killed by simultaneously striking weak points on both creatures.

Xehamras, the Last Breath: Xehamras suffocates his victims, consuming their dying breath to increase his power, all while barking raspy laughter from his coyote head.

Zuudra, the Many Arms of Calamity: This cephalopod has eight writhing limbs that rapidly shift between hardened stone spikes and rivers of flowing magma.

◼ Designing Your Own Colossus

When you create colossi, ask yourself the following questions:

- What do they look like? Are they similar to an animal, do they resemble a particular player ancestry, or are they built from pieces of the physical landscape? Alternatively, they could be an amalgamation of many things.

- What is their personality? Are they quick to dispatch their enemies, or do they toy with their victims? Are they completely loyal to Kudamat, or do they enjoy learning about mortals? They could have many different aspects to their thinking and worldview.

- How do they move? Do they lumber across the landscape, fly on feathered wings, or disappear into the earth and appear elsewhere? They could also utilize different forms of movement based on the terrain or situation.

- What abilities do they have? They may attack many enemies at once with a flurry of arms, conjure an army of ravenous shadow beasts, or rip memories from the minds of their targets. Consider how they'd attack at their strongest, but also how they'd act when they're gravely injured.

- What is their weakness? Are they vulnerable to fire or another element? Do they undergo a transformation that leaves them open to attack? Are they a pair of colossi who are strong together but weak when separated? Find ways to give the characters openings to defeat these larger-than-life enemies.

- How does the colossus relate to the themes the players want to explore? You might create a colossus that animates the dead if characters have experienced grief, a colossus that grows plants wherever they step if the campaign focuses on the destruction of the environment, or a colossus that corrodes all they touch if characters begin to doubt if their actions are heroic.

◼ The Soul Shards

No one knows exactly where each soul shard is located, but regions overrun with aberrations and supercharged essentia indicate that a shard is nearby. When Kudamat locates a soul shard and begins siphoning power from it, the ground around it quakes with a single, powerful tremor, and the vein of essentia supercharged by his power glows brightly, day and night. This helps the locals pinpoint the soul shard's location with more accuracy, so to prevent it from being found, Kudamat simultaneously creates a sentinel: a colossus who stalks and guards that entire region.

Once a colossus is slain, the soul shard they defended shatters deep beneath the earth, causing a ring of essentia to violently erupt out of the ground in a mile radius around the shard's location. Destroying these shards prevents Kudamat from absorbing further power—the sooner each shard is shattered, the less power Kudamat will have when he emerges from the mountain at the end of the campaign (see the upcoming "Emergence of Kudamat" section for more details).

◼ The Aberrations

From the divine power surging through the veins of essentia come new and terrible beasts. These aberrations are smaller than the colossi, but share the same goal: keep all creatures away from the soul shards. Some even resemble the colossi they serve, wielding similar forms or abilities as their titanic counterparts.

Any existing adversaries can be reflavored as an aberration, but you can build your own as well. When creating aberrations, ask yourself the following questions:

- What do they look like? Similar to the colossi, these are twisted and terrible beings never before seen in the Mortal Realm. They usually resemble their surrounding landscape, a characteristic they embody, or the colossi they serve.

- Where can they be found? When you imagine them in the Drylands, consider how they might hunt in the environment they populate. These creatures range in size from miniscule to the size of a house, and each aberration will operate differently.

- What powers do they have? Do they resemble a nearby colossus? Or are they something else entirely? Some of the aberrations might fight in packs, have only one powerful ability, or wear the party down with sheer numbers.

◼ Essentia

All magic in the Drylands is powered by essentia, and without the crystals and batteries made from them, magic users cannot access this power. Had the life forces of the Forgotten Gods not crystallized on the Mortal Plane, its inhabitants would never have harnessed the power of magic. Across the realm, since the dawn of mortalkind, people have mined the earth and plumbed the seas for these crystals of power. But it's only within the recent past that people learned that, while the raw essentia crystals can provide enormous power, it's more reliable (and often a more efficient use of less-potent stones) to manufacture batteries. These "essentia cells" are now widely available across the realm, making magic more accessible and the Drylands increasingly wealthy.

Ask players about their character's relationship with essentia.

- Are they willing to harness the life essence of ancient gods, or do they consider it a profanity?

- Do they install raw or polished essentia crystals in their armor or weapons, or do they utilize modern essentia cells?

- How do they acquire new essentia when their crystals or cells wear out? Do they purchase it in shops, steal it, or mine it as they travel?

Drylands Outposts

Since the Essentia Rush began about 40 years ago, settlements like Wyllin's Gulch formed around Godfell Mountain. Some are small encampments, while others are bustling towns cut through by dirt streets. But no matter their size, they're always referred to as outposts, because everyone knows that once the local essentia veins are cleaned out, people will have their town packed up overnight.

Below are a few of the larger outposts, but you're encouraged to make your own:

The Cinderline: Named for the unique black sand the town is built upon, the Cinderline sprung up around a river that washed bits of essentia into a nice deposit downstream, though no one has successfully panned for essentia in the last few years. Locals are fiercely protective of their water supply, as this outpost is the last stop for fresh water before a long stretch of desert.

Havalaugh: The name sounds as cordial as the folks in this encampment. Though there isn't a permanent building in sight, the tents that form this town stretch for at least a mile. Run by someone known only as **Pickens** (they/them), Havalaugh is fairly receptive to outsiders. The outpost is considered to host the premier marketplace on the eastern side of the mountain, and its High Summer Festival is famous—enough for Havalaugh to nearly quintuple its size for a week. There's no sheriff in Havalaugh, but anyone who harms a citizen is never heard from again.

The Iron Kettle: One of the more industrialized outposts in the region, the Iron Kettle is built around a massive mine owned by Iron Tusk Corp. Because of the talent needed to construct the mining infrastructure, it's a rustic place full of skilled smiths and crafters, many of whom sell goods to travelers outside their work for Iron Tusk. This need for steel goods has given the smiths more power than Iron Tusk would prefer. But a powerful trade union formed by the smiths keeps them in check and governs "The Kettle," taking the onus (and liability) off the company.

Pryor: Built into a long-abandoned essentia mine, Pryor is often unnoticed by those who don't know where to look as they ride by. The folk that live in this insular outpost are not known to welcome guests, but if you have a contact who can get you in their good graces, you're likely to learn the best tricks of the Drylands from the citizens of Pryor. Most of these families stretch back to the time before the Essentia Rush, when there were only a few folk mining these lands.

Defiance: Famous for its position high atop a mesa, Defiance is an outpost rumored to have been established by a band of thieves looking to escape the law—and its position certainly provides a good view of anyone coming their way. These vagrants have a considerable cache of artillery aimed at the ground below, and they aren't known to fire warning shots.

THE INCITING INCIDENT

You can use the prompt below to start your campaign, or create your own.

When the first colossus rose outside Wyllin's Gulch, most people spent a considerable amount of time panicking. The sheriff raised a small army to fight it, a band of brave miners piled old equipment in its path, and the factories shuttered to protect their stores of essentia. But every effort was ineffective in stopping the massive creature's path of destruction

After seeing most of his deputies die in a single crushing blow, **Mayor Logan Hartly** (she/her) put out an ad. "Help Wanted. Whoever can dispatch the colossus and its pack of abberations will receive a chest of fully processed essentia." It's a good deal for anyone who can manage to fight the gigantic force of nature and live to tell the tale.

Meanwhile, **Baron Ryder Destry** (he/him)—his name, not a title—recently learned that Kudamat's efforts to siphon the power of his soul has supercharged the veins of essentia connected to the shard, making the stones ten times as valuable. He's offering "an army's supply of powerful essentia" to anyone who will collaborate with the colossus to stand guard around the soul shard until Kudamat completes his ritual. Destry swears his factory guard can keep Wyllin's Gulch safe, and he'll keep his teams mining the powerful essentia night and day.

The party was assembled by the mayor's "Help Wanted" ad, but Destry's offer put more than a few wrenches in an already near-impossible plan. Numerous groups with their eye on Destry's prize are already on their way to the colossus to help it guard Kudamat's soul shard. In addition, smaller aberrations have begun to rise from the veins of essentia to aid their titanic counterpart. If the party can manage to fight their way through these smaller adversaries, they'll have to topple a colossus, a feat no one in the Drylands has ever accomplished.

Will the party take the offer from the mayor, or give up the effort to stand alongside the colossus while Destry continues to mine the supercharged essentia? Can they play both sides? Will Hartly keep her word if they manage to topple the colossus? Can the party kill the massive creation before it destroys Wyllin's Gulch, or any of the smaller outposts nearby? Once they've destroyed this colossus, are the stories true, with another rise to fulfill the Prophecy of the Drylands?

CAMPAIGN MECHANICS

The following mechanics are unique to this campaign.

■ Tools of the Trade

From firearms to dynamite, the Drylands' communities have developed impressive technology thanks to the Essentia Rush. Encourage PCs to reflavor any of the standard equipment and loot as something appropriate for the genre. Additionally, they may choose from the following options.

PRIMARY WEAPONS

The following primary weapons are also available in this campaign.

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Revolver	Finesse	Far	**Tier 1:** d6+1 phy **Tier 2:** d6+4 phy **Tier 3:** d6+7 phy **Tier 4:** d6+10 phy	One-Handed	*Six Shot:* Place 6 Ammo tokens on your character sheet. Spend 1 Ammo token to make an attack. You can mark a Stress to regain spent Ammo tokens.
Rifle	Agility	Very Far	**Tier 1:** d8+2 phy **Tier 2:** d8+5 phy **Tier 3:** d8+8 phy **Tier 4:** d8+11 phy	Two-Handed	*Sightline:* Spend 2 Hope to gain advantage on an attack roll.
Shotgun	Strength	Very Close	**Tier 1:** d6+2 phy **Tier 2:** d6+5 phy **Tier 3:** d6+8 phy **Tier 4:** d6+11 phy	Two-Handed	*Scattershot:* When you make an attack, target all creatures in front of you within range.

SECONDARY WEAPONS

The following secondary weapons are available in this campaign.

NAME	TRAIT	RANGE	DAMAGE	BURDEN	FEATURE
Lasso	Agility	Very Close	**Tier 1:** d4 phy **Tier 2:** d4+3 phy **Tier 3:** d4+6 phy **Tier 4:** d4+9 phy	One-Handed	*Roped:* On a successful attack, you can temporarily *Rope* the target instead of dealing damage. While *Roped*, the target is *Restrained* and *Vulnerable*, but you must remain within Very Close range of the target. When the target clears this condition, you can make a Strength Reaction Roll. On a success, they remain *Roped*.
Small Revolver	Finesse	Far	**Tier 1:** d6 phy **Tier 2:** d6+3 phy **Tier 3:** d6+6 phy **Tier 4:** d6+9 phy	One-Handed	*Quick Shot:* Spend 2 Hope to gain a +4 bonus to primary weapon damage.

CONSUMABLE

The following consumable is available in this campaign.

Dynamite: *(Consumable)* You can light this dynamite and toss it within Close range. All creatures within Very Close range of where the dynamite lands must make a Reaction Roll (14). Targets who fail take 1d20+5 physical damage. Targets who succeed must mark a Stress. Dynamite deals double damage to inanimate objects or structures.

COLOSSUS OF THE DRYLANDS

■ Hunts and Interludes

Play in this campaign frame is broken into two distinct phases—**hunts** and **interludes**.

Once the party finds out a new colossus has risen in the Drylands, they are in the hunt phase. During the hunt phase, they should be riding into the relevant outpost, gathering information they need for their hunt, saving innocents from newly released aberrations, tracking down the colossus, and battling them. During a hunt, the threat of the colossus should always feel present, even from a distance. A hunt might last a few days to a week, but it should feel as though every moment counts as Kudamat siphons power from his soul shard and the colossus wreaks havoc.

Once the colossus is slain, the party moves into the interlude phase. During the interlude phase, PCs have time to take on smaller, more personal tasks throughout the region—perhaps a band of ruffians keeps robbing people outside the local saloon, a train was derailed by an eruption of essentia and is now missing, or a farmer's cattle keep was devoured by something strange in the night. An interlude might last a few days to a few weeks or more, depending on the players' desires.

■ Colossal Adversaries

This campaign frame introduces a unique adversary type: **Colossus**. If you are running this campaign, you'll need to build colossi for your party to fight. This section provides some Colossus adversary examples, as well as guidance for how to design and run your own.

Colossus Stat Blocks

Because they're so large, colossi use multiple adversary stat blocks, each one representing a **segment** of their form. For example, you might decide you want to build out Ikeri, Injuries Untold. You could divide their segments into six stat blocks: two legs, two arms, a torso, and a head. Additionally, these segment stat blocks exist within the **colossus framework**, a stat block that holds the information and features that apply to the colossus as a whole.

Some segments can be *Broken*. While *Broken*, the segment can't use actions or reactions until the condition is cleared. When a segment marks its last Hit Point, it's considered *Destroyed*. A *Destroyed* segment can no longer use any of its features. A colossus is defeated when all their segments are *Destroyed*, but colossi often have an alternative way to be defeated, as well. When a segment is *Destroyed*, that doesn't mean it's gone or detached—it simply doesn't work anymore.

You can use the following Tier 1 stat block as your party's first colossus encounter, and it also serves as a template you can use to make your own colossi. The sections after the Tier 1 colossus stat blocks provide additional feature examples, guidance for running colossi, and more example stat blocks at higher tiers.

IKERI, INJURIES UNTOLD

Tier 1 Colossus
This apelike creature has the face of a bird. They are made of stone and carry an enormous mesa upon their back.
Motives & Tactics: Entangle, intimidate, peck stomp

Size: 95 ft. tall, 60 ft. wide
Segments: 2 Legs, 2 Arms, 1 Torso, and 1 Head
Thresholds: 11/22 | **Stress:** 6

Experience: Eagle Eyes +3, Huge +2

FEATURES

Colossal Power - Reaction: When Ikeri fails an attack, you gain a Fear.

Swatting Pests - Reaction: When Ikeri is attacked by a flying target within Far range, you can make a Peck (Head) or Punch (Arm) standard attack against the attacker. On a success, add a **d20** to the damage roll and the target is knocked to the ground at the feet of the colossus.

IKERI HEAD

Adjacent Segments: Torso

Difficulty: 16 | **HP:** 5
ATK: +2 | **Peck:** Melee | 1d10+1 phy

FEATURES

Fatal - Passive: When the Head is *Destroyed*, Ikeri is defeated.

Strike (Melee) - Passive: The Head is immune to damage from attacks not made within Melee range.

Follow-Up - Reaction: When the Head succeeds on an attack against a target, it can immediately make an attack against another target it hasn't attacked during this GM turn.

IKERI TORSO

Adjacent Segments: Head, Arms, Legs

Difficulty: 14 | **HP:** 8

FEATURES

Fatal - Passive: When the Torso is *Destroyed,* Ikeri is defeated.

Shake Off - Action: **Spend a Fear** to throw off foes. All creatures on Ikeri must make a Strength Reaction Roll. Targets who fail fall to the ground and must mark a HP. Targets who succeed must mark a Stress.

IKERI ARM (2)

Adjacent Segments: Torso

Difficulty: 13 | **HP:** 3 (each)
ATK: +2 | **Punch:** Very Close | 1d8+6 phy

FEATURES

Chain (A) - Passive: When all segments in Chain A are *Destroyed*, Ikeri is defeated.

Crush - Action: **Spend a Fear** to make an attack against a target on another segment of Ikeri. On a success, Ikeri grabs and crushes the target, dealing **1d20+4** physical damage and *Restraining* them until this Arm takes Major or greater damage. When this Arm takes the spotlight while the target is still in Ikeri's hand, the target takes **1d20** physical damage.

IKERI LEG (2)

Adjacent Segments: Torso, Leg

Difficulty: 13 | **HP:** 3 (each)
ATK: +2 | **Stomp:** Very Close | 1d6+3 phy

FEATURES

Chain (A) - Passive: When all segments in Chain A are *Destroyed*, Ikeri is defeated.

Massive Stomp - Action: **Spend a Fear** to make a standard attack with advantage against a group.

COLOSSUS OF THE DRYLANDS

EXAMPLE FEATURES

The following list of features are designed specifically for Colossus adversaries, and we encourage you to add the ones you like to all the colossi you build for your campaign.

PASSIVES

The following are examples of passive features.

Fatal - Passive: When this segment is *Destroyed*, the colossus is defeated.

Chain - Passive: When all segments in this chain are *Destroyed*, the colossus is defeated.

> *This feature might appear as Chain (A) or Chain (B) for clarity across multiple segment chains.*

Strike (Melee) - Passive: This segment is immune to damage from attacks not made within Melee range.

> *Melee could be replaced with any range to change up this feature.*

Armored - Passive: When this segment marks HP from an attack, it marks 1 fewer HP.

Climbing (+3) - Passive: This segment's Difficulty gains a +3 bonus against action rolls made to climb it.

> *This could also be a negative number, such as −3, which would mean the Difficulty to climb is reduced.*

Not Climbable - Passive: This segment can't be climbed.

Weak Point - Passive: The colossus has a weak point on this segment. When this segment marks HP from an attack made within Melee range, it marks an additional HP.

> *Typically, hitting the weak point of a segment while within Melee range causes the colossus to mark an additional HP, but hitting weak points can have other effects! Feel free to experiment with other outcomes. Maybe that segment can't be used for a few GM turns, or its damage is halved the next time it's spotlighted.*

ACTIONS

The following are examples of action features.

Shake Off - Action: **Spend a Fear** to throw off foes. All creatures on the colossus must make a Strength Reaction Roll. Targets who fail fall to the ground and must mark a HP. Targets who succeed must mark a Stress.

Kudamat's Rage - Action: **Spend 2 Fear** to force all PCs within Very Far range to succeed on a Presence Reaction Roll or become *Shaken*. While *Shaken*, they don't gain Hope on a result with Hope and instead clear the *Shaken* condition.

REACTIONS

The following are examples of reaction features.

Swatting Pests - Reaction: When the colossus is attacked by a flying target within Far range, you can make a standard attack against the attacker. On a success, add a **d20** to the damage roll and the target is knocked to the ground within Far range.

Collapsed - Reaction: When the colossus marks at least 1 HP on all Leg segments, it *Collapses*. While the colossus is *Collapsed*, segments that aren't accessible from the ground can be climbed.

> *This reaction is typically used in conjunction with the "Not Climbable" passive feature. You can always change the trigger out for something that makes more sense within the fiction as it occurs.*

Colossal Power - Reaction: When the colossus fails an attack, you gain a Fear.

Segment vs. Colossus Effects

When a feature refers to a specific segment's name, such as "the Head," it's only referring to that specific part of the colossus. For example, the Head might be immune to physical attacks or be more difficult to climb. When a feature refers to the colossus's name, such as "Ikeri," it's talking about the adversary as a whole. For example, a reaction feature might trigger an attack after Ikeri marks 2 or more Hit Points from a single attack. This would mean that when any segment marks 2 or more Hit Points from a single attack, the reaction is triggered.

Adjacent Segments

Make sure to note which segments are adjacent to one another. When climbing on a colossus, PCs will only be able to traverse segments that are adjacent (see the upcoming "Moving PCs Around a Colossus" section).
Building Colossi as a Puzzle

When approaching creating a colossus, consider how you can make them more than just a bag of Hit Points to strike until they die. Perhaps certain segments can only be attacked once other segments are *Destroyed*, or each segment has its own damage thresholds, or a certain parameter has to be satisfied before the colossus can be hit at all. Maybe the colossus only takes Major damage, ignoring other severities, or is only harmed by a certain type of weapon, requiring the party to hunt down those weapons before the fight. The earlier example features, particularly the passives, can help you create these puzzles, but feel free to invent your own. As you become more comfortable with epic-scale fights, we encourage you to ramp up the adversaries to your preferred level of complexity—but don't be afraid to start simple!

Running Colossus Fights

Because of the scale of the fight, battles against colossi have some unique rules to use and guidance to follow.

SCALE

Unlike normal range in Daggerheart, we use a standard form of measurement when talking about a colossus's scale. (In our case, we use feet—but you should use whatever you find easiest.) Normal range bands still apply when taking actions and are at GM discretion as usual, but expressing the height or width of a creature through recognizable sizes helps the table to understand the scale of the colossus they're facing.

MOVING PCS AROUND A COLOSSUS

During an encounter, it's expected that PCs will scale the colossus. Rather than the normal movement rules, use the following guidelines:

- PCs can climb onto each colossus segment unless a segment notes otherwise in its stat block.
- Once a PC is on a segment, they can usually move around that segment of the colossus without having to make additional rolls.
- To move to an adjacent segment, the PC must make the appropriate action roll (usually Agility or Strength) to leap onto it.

TEAMWORK

While fighting a colossus, PCs may initiate any number of Tag Team Rolls.

USING A COLOSSUS IN BATTLE

On your GM turn, treat each segment of a colossus as its own adversary when moving the spotlight. You can spotlight a segment as your GM move, then spend a Fear to spotlight an additional segment as you would during a fight with regular adversaries. Some colossi also have actions in their colossus framework; you can spotlight the framework to use this action as you would spotlight a segment, but you should highlight the colossus as a whole in the narrative. You can still spotlight additional segments on your turn.

While a PC is on a segment of the colossus:

- They have advantage on attacks against that segment.
- The segment's standard attack cannot be used on that PC.

For example, they can't grab a PC who's riding on their hand! The colossus would need to use a different segment to attack them. Any feature that allows a segment to attack a PC who's currently on that segment will call it out in its description. For example, the "Shake Off" feature specifies "all creatures on the colossus," meaning it would include creatures on that segment.

Any features that would pull or push normal adversaries can't move a colossus; instead, the feature pulls or pushes the PC making the attack. For example, using a grappler against a colossus can't pull them toward you, but instead pulls you toward them. Any time an effect is targeting the colossus, use the Difficulty of the segment being targeted. If an effect targets a colossus as a collective, use the highest Difficulty amongst all the segments. If a PC's feature targets multiple adversaries, it can target multiple segments.

Typically when fighting a colossus, there is no need to add additional adversaries to the encounter—colossi are powerful enough on their own! If you do want to have other adversaries involved, think about their relationship with the colossus. Are they an aberration? Do they find the colossus useful for their own purposes? We recommend keeping additional adversaries limited and purposeful, or a fight can become unwieldy.

Lastly, give the characters information about how to take down a colossus, and consider how that information can be creatively delivered. Part of the hunt phase should include the PCs tracking down knowledge about the colossus before facing it; you're encouraged to seed rumors from townspeople about what they've seen, then provide payoff when some of those rumors are proven true during the fight. Additionally, examine the colossus's stat block and plan ways you might give clues about its physical body using color, light, and shape to telegraph important information. If you describe heavy armor that surrounds a delicate blue light pulsing in the core of the chest, they'll have a pretty good idea where the weak point is and the armor they need to contend with. Think about how you can use all of a character's senses to convey the mechanics of the colossus and use them to narratively guide your players along the monstrous beast. For example, this segment's skin feels squishier than the other parts of this creature they've been on, or the smell is getting more putrid the higher they climb, or they can hear a shrill cry getting louder as they move toward the tail.

Colossus Maps

If you'd like to use maps and minis to help you and the players maintain spacial awareness of a colossus fight, but you're struggling with how to represent the fight without a massive figurine, you can build out the basic shape of your colossus using notecards, such as the following example visuals. When a PC climbs onto a segment of the colossus, place their miniature directly on the notecard. This setup can help you and the players remember where each PC is and which segments are adjacent to them. It can also help you visualize how you can use each segment's features and shake up the battle.
Example Colossi

The following stat blocks provide example colossi for each additional tier of play.

DAKTADAE, THE CLEAVER

Tier 2 Colossus
A massive steel rhinoceros formed from a steam train, a cleaver emerging from his head instead of a horn.
Motives & Tactics: Clear forests, cleave, hew, stomp

> **Size:** 130 ft. tall, 220 ft. long
> **Segments:** 2 Forelegs, 2 Hindlegs, 1 Torso, and 1 Head
> **Thresholds:** 16/25 | **Stress:** 6
>
> **Experience:** Huge +2, Trampling +2

FEATURES

Steam-Powered - Action: Scalding fountains of steam erupt from Daktadae's form. Spotlight any segment to make an attack with a +1 attack modifier against a target on that segment. On a success, deal **2d6+3** physical damage.

Roll - Action: **Spend a Fear** to have Daktadae drop to the ground and roll. All PCs on Daktadae or within Close range must succeed on an Instinct Reaction Roll (14) or take **2d20+5** physical damage; succeed or fail, the PCs are thrown off Daktadae onto the ground within Melee range of the colossus.

Slow Recovery - Action: Clear a token from one *Broken* or *Collapsed* segment.

Colossal Power - Reaction: When Ikeri fails an attack, you gain a Fear.

DAKTADAE HEAD

Adjacent Segments: Torso

> **Difficulty:** 15 | **HP:** 5
> **ATK:** +2 | **Cleaver:** Melee | 2d20+8 phy

FEATURES

Invulnerable - Passive: The Head can only take damage while it's *Broken*.

Godcleaver - Action: Make a standard attack against a target. On a success, **mark a Stress** to deal **3d20+12** physical damage instead.

Head Toss - Action: **Mark a Stress** and make a standard attack against all targets within range who are not on this segment or the Torso. On a success, place 2 tokens on this segment. It is *Broken* until all tokens are cleared.

Cleaver Recovery - Reaction: After making a standard attack, place a token on this segment. It is *Broken* until all tokens are cleared.

DAKTADAE TORSO

Adjacent Segments: Head, Forelegs, Hindlegs

> **Difficulty:** 14 | **HP:** 6

FEATURES

Fatal - Passive: When this segment is *Destroyed*, Daktadae is defeated.

Climbing (+3) - Passive: The Torso's Difficulty gains a +3 bonus against action rolls made to climb it unless the Head is *Broken*.

Protected - Passive: The Torso is covered with external rib plates of unbreakable minerals. This segment can't be damaged unless the Head is currently *Broken* or *Destroyed*.

Weak Point - Passive: The underbelly of the Torso has a weak point. When this segment marks HP from an attack within Melee range while the Head is *Broken* or *Destroyed*, it must mark an additional HP.

DAKTADAE FORELEGS (2)

Adjacent Segments: Torso, Forelegs

Difficulty: 14 | **HP:** 3 (each)
ATK: +1 | **Stomp:** Very Close | 2d10+8 phy

FEATURES

Massive Hoof - Passive: This segment's standard attack is made with advantage and can target a group.

Shake The Earth - Action: Daktadae rears up on their hind legs and slams down, creating a shockwave that knocks back all PCs within Very Close range that aren't on Daktadae back to Close range and *Rattles* them until their next roll with Hope. While *Rattled*, the PC has disadvantage on reaction rolls.

Collapse - Reaction: If one Foreleg is *Destroyed*, place a token on this segment. Until it is cleared, Daktadae is *Collapsed*, allowing PCs to climb directly onto the Torso and Head. If both Forelegs are *Destroyed*, Daktadae is *Collapsed* permanently.

DAKTADAE HINDLEGS (2)

Adjacent Segments: Torso, Hindlegs

Difficulty: 14 | **HP:** 3 (each)
ATK: +1 | **Stomp:** Very Close | 2d10+8 phy

FEATURES

Massive Hoof - Passive: This segment's standard attack is made with advantage and can target a group.

Backward Kick - Action: All targets within Very Close range behind Daktadae must succeed on an Agility Reaction Roll or take **2d8+10** physical damage.

Collapse - Reaction: If one Hindleg is *Destroyed*, place a token on this segment. Until it is cleared, Daktadae is *Collapsed*, allowing PCs to climb directly onto the Torso and Head. If both Hindlegs are *Destroyed*, Daktadae is *Collapsed* permanently.

POY, SKY SKIMMER OF THE DUST SEA

Tier 3 Colossus
This massive shoebill stork is formed from the dust of the Drylands and traps enemies in their cavernous beak.
Motives & Tactics: Corral, intimidate, maintain distance

Size: 220 ft. long, 160 ft. wingspan
Segments: 1 Head, 1 Neck, 2 Wings, 1 Body, 2 Talons, 1 Tail
Thresholds: 25/48 | **Stress:** 6

Experience: Attack From Above +3, Huge +3, Maneuver +2

FEATURES

Flying - Passive: Poy can fly unless one of their Wings is *Destroyed*. While Poy is flying, each segment's Difficulty gains a +2 bonus against action rolls made by PCs who aren't on Poy.

Strong Winds - Passive: While Poy is flying, no other flying creature can come within Close range of Poy without being blown backward by their powerful wings.

Fall Off - Reaction: When a PC falls off Poy while the colossus is flying, they take **3d20+6** physical damage if they hit the ground.

Colossal Power - Reaction: When Poy fails an attack, you gain a Fear.

POY HEAD

Adjacent Segments: Neck

Difficulty: 16 | **HP:** 5
ATK: +3 | **Screech:** Very Far | 3d8+2 mag

FEATURES

Bill Trap - Action: **Spend a Fear** to make an attack against a target on Poy. On a success, the target takes **3d6+6** physical damage and is *Trapped* inside Poy's bill until the Head takes Major or greater damage. Poy's damage thresholds are doubled against damage dealt by *Trapped* targets.

Cascade - Reaction: When this segment is *Destroyed*, the Neck must mark 3 HP.

POY NECK

Adjacent Segments: Head, Body

Difficulty: 13 | **HP:** 6

FEATURES

Fatal - Passive: When this segment is *Destroyed*, Poy is defeated.

Protected - Passive: Poy's Neck is protected by swirling magic. The Neck only marks HP from the "Cascade" feature.

POY BODY

Adjacent Segments: Wings, Neck, Tail, Talons

Difficulty: 15 | **HP:** None

FEATURES

Invulnerable - Passive: This segment is immune to all damage.

Dive-Bomb - Reaction: When this segment is successfully attacked, Poy dive-bombs the attacker and all targets within Very Close range of them. The targets must make an Instinct Reaction Roll. Targets who fail take **2d6+9** physical damage. Targets who succeed can mark a Stress to climb onto one of Poy's Talons.

POY WINGS (2)

Adjacent Segments: Body

Difficulty: 16 | **HP:** 5 (each)
ATK: +2 | **Swipe:** Melee | 3d12+9 phy

FEATURES

Dust Storm - Action: Poy bats their wings, filling the air and making it much harder to see. Any attacks made by PCs beyond Melee range have disadvantage until the next GM turn.

Flap - Action: Poy violently flaps a Wing. **Mark a Stress** to make an attack against all targets on the Wing. Targets Poy succeeds against take **3d8+4** physical damage and are knocked back onto the Tail. If the Tail is *Destroyed*, they instead fall off Poy.

POY TALONS (2)

Adjacent Segments: Body, Tail

Difficulty: 14 | **HP:** 5 (each)
ATK: +2 | **Talon Strike:** Melee | 3d10+5 phy

FEATURES

Pick Up - Action: **Spend a Fear** to make an attack against a target within Melee range. If there's an additional target within Very Close range of them, you can spotlight both Talons at once and make an attack against both targets instead. On a success, Poy picks up their targets, flies straight upwards, and drops them. If a target hits the ground, they take **5d20+4** physical damage.

Cascade - Reaction: When this segment is *Destroyed*, the Neck must mark a HP.

POY TAIL

Adjacent Segments: Body, Talons

Difficulty: 15 | **HP:** 3
ATK: +1 | **Whip:** Very Close | 3d12+12 phy

FEATURES

Sweep - Action: Poy's tail curls up and sweeps across another segment. **Spend a Fear** to choose another segment and make an attack against all targets on that segment. Targets Poy succeeds against take **3d8+5** physical damage and are knocked back to an adjacent segment of your choice.

Cascade - Reaction: When this segment is *Destroyed*, the Neck must mark 2 HP.

KELIR, THE VIRULENT HATE & HER HUNDRED, HUNDRED CHILDREN

Tier 4 Colossus

A crablike, mountainous beast whose children scurry in and around her, bringing food as tribute.

Motives & Tactics: Consume, ravage, swarm

Size: 275 ft. tall, 150 ft. wide
Segments: 1 Head, 1 Shell, 1 Body Cavity, 2 Claws, and 4 Legs
Thresholds: 30/65 | **Stress:** 6

Experience: Contempt +2, Huge +4, Sense Movement +4

FEATURES

Brood Attack - Action: Spotlight any segment to make an attack with a +6 attack modifier against a PC on that segment as Kelir's hundred, hundred children swarm the target with their pincers. On a success, deal **4d8** physical damage.

Swatting Pests - Reaction: When Kelir is attacked by a flying target within Far range, you can make a Pincer (Claws) standard attack against the attacker. On a success, add a **d20** to the damage roll and the target is knocked to the ground within Far range.

Colossal Power - Reaction: When Kelir fails an attack, you gain a Fear.

KELIR BODY CAVITY

Adjacent Segments: Shell

Difficulty: 17 | **HP:** 6

FEATURES

Fatal - Passive: If this segment is *Destroyed*, Kelir is defeated.

Hateful Heart - Passive: Kelir's heart is suspended within the body cavity, connected by thick veins and arteries. The Body Cavity is immune to damage unless her heart is the target of a successful attack. The heart can only be attacked from Far or greater range, or a PC must succeed on an Agility Roll while inside the Body Cavity to reach the heart to make an attack against it within Melee range.

Grab and Rend - Action: Make an attack using Kelir's "Brood Attack" action against a target in the Body Cavity. On a success, **spend a Fear** to deal double damage and *Restrain* the target until they're freed with a successful Strength Roll.

Protective Swarm - Reaction: Kelir's Body Cavity is filled with her children, who protect her heart. A PC who makes an action roll in the Body Cavity must mark a Stress as they fight off Kelir's children and their shearing pincers.
KELIR HEAD

Adjacent Segments: Body

Difficulty: 18 | **HP:** 4
ATK: +4 | **Eye Beams:** Close | 4d6+6 mag

FEATURES

Strike (Very Close) - Passive: The Head is immune to damage from attacks not made within Very Close range.

Hateful Gaze - Action: All targets within Far range that Kelir can see must succeed on a Presence Reaction Roll or mark **1d6** Stress as Kelir's hate tries to consume their mind.

KELIR CLAWS (2)

Adjacent Segments: Shell

Difficulty: 15 | **HP:** 5 (each)
ATK: +5 | **Pincer:** Very Close | 3d20+8 phy

FEATURES

Strike (Very Close) - Passive: The Claws are immune to damage from attacks not made within Very Close range.

Sever Hope - Action: Make a standard attack against a PC. On a success, **mark a Stress** to cause the target to lose **1d4** Hope. Gain as many Fear as the Hope lost.

Grab & Hurl - Action: Make a standard attack against a target. On a success, instead of dealing damage, hurl the target within Far range in any direction. They must succeed on an Agility Reaction Roll or suffer **3d20** physical damage from the fall.

KELIR SHELL

Adjacent Segments: Head, Legs, Claws, Body Cavity

Difficulty: 16 | **HP:** 6

FEATURES

Armored - Passive: When the Shell marks HP from an attack, it marks 1 fewer HP.

Contagious Fury - Action: All PCs in front of the Head within Far range replace their Hope Die with a **d8** the next time they make an action roll as they struggle to keep Kelir's hatred from consuming them.

KELIR LEGS (4)

Adjacent Segments: Shell

Difficulty: 15 | **HP:** 3 (each)
ATK: +4 | **Stomp:** Very Close | 4d10+6 phy

FEATURES

Climbing (–2) - Passive: An action roll made to climb on the leg gains a -2 penalty to its Difficulty.

Destructive Scuttle - Action: **Mark a Stress** to move up to Far range in any direction. All creatures in that path must make an Agility Reaction Roll. Targets who fail take **4d10+6** physical damage and must mark a Stress. Targets who succeed mark a Stress. Kelir can't use this action if she is *Collapsed*.

Full Collapse - Reaction: Once three Legs are *Destroyed*, Kelir *Collapses* and PCs can climb on the Shell and Head from the ground.

■ Leveling Up

Upon defeating each colossus, the soul shard in that location shatters and the PCs immediately level up as a reward. After defeating all nine colossi, the PCs will be at level 10 and ready to take on Kudamat as their last hunt.

■ Emergence of Kudamat

During the campaign, you'll keep track of the power Kudamat is siphoning from the soul shards. Copy the following trackers into your notebook.

Siphoning Track: ☒☐☐☐☐☐☐☐☐ *Kudamat's Power:* ___

The Siphoning Track starts with one slot marked, and Kudamat's power starts at a value of 0. When the PCs take a short rest during the hunt phase, mark the Siphoning Track once. When the PCs take a long rest during the hunt phase, mark the Siphoning Track twice. Each time a colossus is defeated, or when the Siphoning Track is full, roll as many d12s as marked slots to determine how much power the soul shard gives back to Kudamat. Increase Kudamat's Power by the highest value rolled, then reset the Siphoning Track to 1.

Once all nine colossi have been slain or his Power reaches 100, Kudamat emerges from Godfell Mountain. Build him as a Colossus adversary with a Severe threshold equal to the value of Kudamat's Power and a Major threshold equal to half that value (rounded up).

SESSION ZERO QUESTIONS

Ask any of these questions to your players, or make your own.

- Is your character native to the Drylands, or did they come from elsewhere? How have they been treated by the locals and incoming prospectors?

- What is your character's favorite thing about the geography of the Drylands? Do they have a notable landmark they're drawn to?

- Since the rise of the colossi, who or what has your character lost, and how did that event change them?

- Some believe that, despite the prophecy, Kudamat will bring prosperity to mortals when he rises. Does your character believe this? How do they interact with the people who do?

- Describe an outpost your character visited in the past. What did they love about it? What worried them?

- What terrors has your character seen roaming the desert now that Kudamat is raising ever more aberrations?

- What themes are you most interested in exploring with your characters, and how might they manifest in some of the colossi?

APPENDIX

This section contains additional information and reference sheets.

DOMAIN CARD REFERENCE

ARCANA DOMAIN

■ RUNE WARD
Level 1 Arcana Spell
Recall Cost: 0

You have a deeply personal trinket that can be infused with protective magic and held as a ward by you or an ally. Describe what it is and why it's important to you. The ward's holder can spend a Hope to reduce incoming damage by **1d8**.

If the Ward Die result is 8, the ward's power ends after it reduces damage this turn. It can be recharged for free on your next rest.

■ UNLEASH CHAOS
Level 1 Arcana Spell
Recall Cost: 1

At the beginning of a session, place a number of tokens equal to your Spellcast trait on this card.

Make a **Spellcast Roll** against a target within Far range and spend any number of tokens to channel raw energy from within yourself to unleash against them. On a success, roll a number of **d10s** equal to the tokens you spent and deal that much magic damage to the target. **Mark a Stress** to replenish this card with tokens (up to your Spellcast trait).

At the end of each session, clear all unspent tokens.

■ WALL WALK
Level 1 Arcana Spell
Recall Cost: 1

Spend a Hope to allow a creature you can touch to climb on walls and ceilings as easily as walking on the ground. This lasts until the end of the scene or you cast Wall Walk again.

■ CINDER GRASP
Level 2 Arcana Spell
Recall Cost: 1

Make a **Spellcast Roll** against a target within Melee range. On a success, the target instantly bursts into flames, takes **1d20+3** magic damage, and is temporarily lit *On Fire*.

When a creature acts while *On Fire*, they must take an extra **2d6** magic damage if they are still *On Fire* at the end of their action.

■ FLOATING EYE
Level 2 Arcana Spell
Recall Cost: 0

Spend a Hope to create a single, small floating orb that you can move anywhere within Very Far range. While this spell is active, you can see through the orb as though you're looking out from its position. You can transition between using your own senses and seeing through the orb freely. If the orb takes damage or moves out of range, the spell ends.

■ COUNTERSPELL
Level 3 Arcana Spell
Recall Cost: 2

You can interrupt a magical effect taking place by making a reaction roll using your Spellcast trait. On a success, the effect stops and any consequences are avoided, and this card is placed in your vault.

■ FLIGHT
Level 3 Arcana Spell
Recall Cost: 1

Make a **Spellcast Roll (15)**. On a success, place a number of tokens equal to your Agility on this card (minimum 1). When you make an action roll while flying, spend a token from this card. After the action that spends the last token is resolved, you descend to the ground directly below you.

■ BLINK OUT
Level 4 Arcana Spell
Recall Cost: 1

Make a **Spellcast Roll (12)**. On a success, **spend a Hope** to teleport to another point you can see within Far range. If any willing creatures are within Very Close range, **spend an additional Hope** for each creature to bring them with you.

■ PRESERVATION BLAST
Level 4 Arcana Spell
Recall Cost: 2

Make a **Spellcast Roll** against all targets within Melee range. Targets you succeed against are forced back to Far range and take **d8+3** magic damage using your Spellcast trait.

■ CHAIN LIGHTNING
Level 5 Arcana Spell
Recall Cost: 1

Mark 2 Stress to make a **Spellcast Roll**, unleashing lightning on all targets within Close range. Targets you succeed against must make a reaction roll with a Difficulty equal to the result of your Spellcast Roll. Targets who fail take **2d8+4** magic damage. Additional adversaries not already targeted by Chain Lightning and within Close range of previous targets who took damage must also make the reaction roll. Targets who fail take **2d8+4** magic damage. This chain continues until there are no more adversaries within range.

■ PREMONITION
Level 5 Arcana Spell
Recall Cost: 2

You can channel arcane energy to have visions of the future. Once per long rest, immediately after the GM conveys the consequences of a roll you made, you can rescind the move and consequences like they never happened and make another move instead.

RIFT WALKER
Level 6 Arcana Spell
Recall Cost: 2

Make a **Spellcast Roll (15)**. On a success, you place an arcane marking on the ground where you currently stand. The next time you successfully cast Rift Walker, a rift in space opens up, providing safe passage back to the exact spot where the marking was placed. This rift stays open until you choose to close it or you cast another spell.

You can drop the spell at any time to cast Rift Walker again and place the marking somewhere new.

TELEKINESIS
Level 6 Arcana Spell
Recall Cost: 0

Make a **Spellcast Roll** against a target within Far range. On a success, you can use your mind to move them anywhere within Far range of their original position. You can throw the lifted target as an attack by making an additional Spellcast Roll against the second target you're trying to attack. On a success, deal **d12+4** physical damage to the second target using your Proficiency. This spell then ends.

ARCANA-TOUCHED
Level 7 Arcana Ability
Recall Cost: 2

When 4 or more of the domain cards in your loadout are from the Arcana domain, gain the following benefits:

- +1 bonus to your Spellcast Rolls
- Once per rest, you can switch the results of your Hope and Fear Dice.

CLOAKING BLAST
Level 7 Arcana Spell
Recall Cost: 2

When you make a successful **Spellcast Roll** to cast a different spell, you can **spend a Hope** to become *Cloaked*. While *Cloaked*, you remain unseen if you are stationary when an adversary moves to where they would normally see you. When you move into or within an adversary's line of sight or make an attack, you are no longer *Cloaked*.

ARCANE REFLECTION
Level 8 Arcana Spell
Recall Cost: 1

When you would take magic damage, you can **spend any number of Hope** to roll that many **d6s**. If any roll a 6, the attack is reflected back to the caster, dealing the damage to them instead.

CONFUSING AURA
Level 8 Arcana Spell
Recall Cost: 2

Make a **Spellcast Roll (14)**. Once per long rest on a success, you create a layer of illusion over your body that makes it hard to tell exactly where you are. **Mark any number of Stress** to make that many additional layers. When an adversary makes an attack against you, roll a number of **d6s** equal to the number of layers currently active. If any roll a 5 or higher, one layer of the aura is destroyed and the attack fails. If all the results are 4 or lower, you take the damage and this spell ends.

EARTHQUAKE
Level 9 Arcana Spell
Recall Cost: 2

Make a **Spellcast Roll (16)**. Once per rest on a success, all targets within Very Far range who aren't flying must make a Reaction Roll (18). Targets who fail take **3d10+8** physical damage and are temporarily *Vulnerable*. Targets who succeed take half damage.

Additionally, when you succeed on the Spellcast Roll, all terrain within Very Far range becomes difficult to move through and structures within this range might sustain damage or crumble.

SENSORY PROJECTION
Level 9 Arcana Spell
Recall Cost: 0

Once per rest, make a **Spellcast Roll (15)**. On a success, drop into a vision that lets you clearly see and hear any place you have been before as though you are standing there in this moment. You can move freely in this vision and are not constrained by the physics or impediments of a physical body. This spell cannot be detected by mundane or magical means. You drop out of this vision upon taking damage or casting another spell.

ADJUST REALITY
Level 10 Arcana Spell
Recall Cost: 1

After you or a willing ally make any roll, you can **spend 5 Hope** to change the numerical result of that roll to a result of your choice instead. The result must be plausible within the range of the dice.

FALLING SKY
Level 10 Arcana Spell
Recall Cost: 1

Make a **Spellcast Roll** against all adversaries within Far range. **Mark any number of Stress** to make shards of arcana rain down from above. Targets you succeed against take **1d20+2** magic damage for each Stress marked.

BLADE DOMAIN

GET BACK UP
Level 1 Blade Ability
Recall Cost: 1

When you take Severe damage, you can **mark a Stress** to reduce the severity by one threshold.

NOT GOOD ENOUGH
Level 1 Blade Ability
Recall Cost: 1

When you roll your damage dice, you can reroll any 1s or 2s.

WHIRLWIND
Level 1 Blade Ability
Recall Cost: 0

When you make a successful attack against a target within Very Close range, you can **spend a Hope** to use the attack against all other targets within Very Close range. All additional adversaries you succeed against with this ability take half damage.

A SOLDIER'S BOND
Level 2 Blade Ability
Recall Cost: 1

Once per long rest, when you compliment someone or ask them about something they're good at, you can both gain 3 Hope.

RECKLESS
Level 2 Blade Ability
Recall Cost: 1

Mark a Stress to gain advantage on an attack.

SCRAMBLE
Level 3 Blade Ability
Recall Cost: 1

Once per rest, when a creature within Melee range would deal damage to you, you can avoid the attack and safely move out of Melee range of the enemy.

VERSATILE FIGHTER
Level 3 Blade Ability
Recall Cost: 1

You can use a different character trait for an equipped weapon, rather than the trait the weapon calls for.

When you deal damage, you can **mark a Stress** to use the maximum result of one of your damage dice instead of rolling it.

DEADLY FOCUS
Level 4 Blade Ability
Recall Cost: 2

Once per rest, you can apply all your focus toward a target of your choice. Until you attack another creature, you defeat the target, or the battle ends, gain a +1 bonus to your Proficiency.

FORTIFIED ARMOR
Level 4 Blade Ability
Recall Cost: 0

While you are wearing armor, gain a +2 bonus to your damage thresholds.

CHAMPION'S EDGE
Level 5 Blade Ability
Recall Cost: 1

When you critically succeed on an attack, you can **spend up to 3 Hope** and choose one of the following options for each Hope spent:

- You clear a Hit Point.
- You clear an Armor Slot.
- The target must mark an additional Hit Point.

You can't choose the same option more than once.

VITALITY
Level 5 Blade Ability
Recall Cost: 0

When you choose this card, permanently gain two of the following benefits:

- One Stress slot
- One Hit Point slot
- +2 bonus to your damage thresholds

Then place this card in your vault permanently.

BATTLE-HARDENED
Level 6 Blade Ability
Recall Cost: 2

Once per long rest when you would make a Death Move, you can **spend a Hope** to clear a Hit Point instead.

RAGE UP
Level 6 Blade Ability
Recall Cost: 1

Before you make an attack, you can **mark a Stress** to gain a bonus to your damage roll equal to twice your Strength.

You can Rage Up twice per attack.

BLADE-TOUCHED
Level 7 Blade Ability
Recall Cost: 1

When 4 or more of the domain cards in your loadout are from the Blade domain, gain the following benefits:

- +2 bonus to your attack rolls
- +4 bonus to your Severe damage threshold

GLANCING BLOW
Level 7 Blade Ability
Recall Cost: 1

When you fail an attack, you can **mark a Stress** to deal weapon damage using half your Proficiency.

BATTLE CRY
Level 8 Blade Ability
Recall Cost: 2

Once per long rest, while you're charging into danger, you can muster a rousing call that inspires your allies. All allies who can hear you each clear a Stress and gain a Hope. Additionally, your allies gain advantage on attack rolls until you or an ally rolls a failure with Fear.

FRENZY
Level 8 Blade Ability
Recall Cost: 3

Once per long rest, you can go into a *Frenzy* until there are no more adversaries within sight.

While *Frenzied*, you can't use Armor Slots, and you gain a +10 bonus to your damage rolls and a +8 bonus to your Severe damage threshold.

GORE AND GLORY
Level 9 Blade Ability
Recall Cost: 2

When you critically succeed on a weapon attack, gain an additional Hope or clear an additional Stress.

Additionally, when you deal enough damage to defeat an enemy, gain a Hope or clear a Stress.

REAPER'S STRIKE
Level 9 Blade Ability
Recall Cost: 3

Once per long rest, **spend a Hope** to make an attack roll. The GM tells you which targets within range it would succeed against. Choose one of these targets and force them to mark 5 Hit Points.

BATTLE MONSTER
Level 10 Blade Ability
Recall Cost: 0

When you make a successful attack against an adversary, you can **mark 4 Stress** to force the target to mark a number of Hit Points equal to the number of Hit Points you currently have marked instead of rolling for damage.

ONSLAUGHT
Level 10 Blade Ability
Recall Cost: 3

When you successfully make an attack with your weapon, you never deal damage beneath a target's Major damage threshold (the target always marks a minimum of 2 Hit Points).

Additionally, when a creature within your weapon's range deals damage to an ally with an attack that doesn't include you, you can **mark a Stress** to force them to make a Reaction Roll (15). On a failure, the target must mark a Hit Point.

BONE DOMAIN

DEFT MANEUVERS
Level 1 Bone Ability
Recall Cost: 0

Once per rest, **mark a Stress** to sprint anywhere within Far range without making an Agility Roll to get there.

If you end this movement within Melee range of an adversary and immediately make an attack against them, gain a +1 bonus to the attack roll.

I SEE IT COMING
Level 1 Bone Ability
Recall Cost: 1

When you're targeted by an attack made from beyond Melee range, you can **mark a Stress** to roll a **d4** and gain a bonus to your Evasion equal to the result against the attack.

UNTOUCHABLE
Level 1 Bone Ability
Recall Cost: 1

Gain a bonus to your Evasion equal to half your Agility.

FEROCITY
Level 2 Bone Ability
Recall Cost: 2

When you cause an adversary to mark 1 or more Hit Points, you can **spend 2 Hope** to increase your Evasion by the number of Hit Points they marked. This bonus lasts until after the next attack made against you.

STRATEGIC APPROACH
Level 2 Bone Ability
Recall Cost: 1

After a long rest, place a number of tokens equal to your Knowledge on this card (minimum 1). The first time you move within Close range of an adversary and make an attack against them, you can spend one token to choose one of the following options:

- You make the attack with advantage.
- You clear a Stress on an ally within Melee range of the adversary.
- You add a **d8** to your damage roll.

When you take a long rest, clear all unspent tokens.

BRACE
Level 3 Bone Ability
Recall Cost: 1

When you mark an Armor Slot to reduce incoming damage, you can **mark a Stress** to mark an additional Armor Slot.

TACTICIAN
Level 3 Bone Ability
Recall Cost: 1

When you Help an Ally, they can spend a Hope to add one of your Experiences to their roll alongside your advantage die.

When making a Tag Team Roll, you can roll a **d20** as your Hope Die.

BOOST
Level 4 Bone Ability
Recall Cost: 1

Mark a Stress to boost off a willing ally within Close range, fling yourself into the air, and perform an aerial attack against a target within Far range. You have advantage on the attack, add a **d10** to the damage roll, and end your move within Melee range of the target.

REDIRECT
Level 4 Bone Ability
Recall Cost: 1

When an attack made against you from beyond Melee range fails, roll a number of **d6s** equal to your Proficiency. If any roll a 6, you can **mark a Stress** to redirect the attack to damage an adversary within Very Close range instead.

KNOW THY ENEMY
Level 5 Bone Ability
Recall Cost: 1

When observing a creature, you can make an **Instinct Roll** against them. On a success, **spend a Hope** and ask the GM for one set of information about the target from the following options:

- Their unmarked Hit Points and Stress.
- Their Difficulty and damage thresholds.
- Their tactics and standard attack damage dice.
- Their features and Experiences.

Additionally on a success, you can **mark a Stress** to remove a Fear from the GM's Fear Pool.

SIGNATURE MOVE
Level 5 Bone Ability
Recall Cost: 1

Name and describe your signature combat move. Once per rest, when you perform this signature move as part of an action you're taking, you can roll a **d20** as your Hope Die. On a success, clear a Stress.

RAPID RIPOSTE
Level 6 Bone Ability
Recall Cost: 0

When an attack made against you from within Melee range fails, you can **mark a Stress** and seize the opportunity to deal the weapon damage of one of your active weapons to the attacker.

RECOVERY
Level 6 Bone Ability
Recall Cost: 1

During a short rest, you can choose a long rest downtime move instead. You can **spend a Hope** to let an ally do the same.

BONE-TOUCHED
Level 7 Bone Ability
Recall Cost: 2

When 4 or more of the domain cards in your loadout are from the Bone domain, gain the following benefits:

- +1 bonus to Agility
- Once per rest, you can **spend 3 Hope** to cause an attack that succeeded against you to fail instead.

CRUEL PRECISION
Level 7 Bone Ability
Recall Cost: 1

When you make a successful attack with a weapon, gain a bonus to your damage roll equal to either your Finesse or Agility.

BREAKING BLOW
Level 8 Bone Ability
Recall Cost: 3

When you make a successful attack, you can **mark a Stress** to make the next successful attack against that same target deal an extra **2d12** damage.

WRANGLE
Level 8 Bone Ability
Recall Cost: 1

Make an Agility Roll against all targets within Close range. **Spend a Hope** to move targets you succeed against, and any willing allies within Close range, to another point within Close range.

ON THE BRINK
Level 9 Bone Ability
Recall Cost: 1

When you have 2 or fewer Hit Points unmarked, you don't take Minor damage.

SPLINTERING STRIKE
Level 9 Bone Ability
Recall Cost: 3

Spend a Hope and make an attack against all adversaries within your weapon's range. Once per long rest, on a success against any targets, add up the damage dealt, then redistribute that damage however you wish between the targets you succeeded against. When you deal damage to a target, roll an additional damage die and add its result to the damage you deal to that target.

DEATHRUN
Level 10 Bone Ability
Recall Cost: 1

Spend 3 Hope to run a straight path through the battlefield to a point within Far range, making an attack against all adversaries within your weapon's range along that path. Choose the order in which you deal damage to the targets you succeeded against. For the first, roll your weapon damage with a +1 bonus to your Proficiency. Then remove a die from your damage roll and deal the remaining damage to the next target. Continue to remove a die for each subsequent target until you have no more damage dice or adversaries.

You can't target the same adversary more than once per attack.

SWIFT STEP
Level 10 Bone Ability
Recall Cost: 2

When an attack made against you fails, clear a Stress. If you can't clear a Stress, gain a Hope.

CODEX DOMAIN

BOOK OF AVA
Level 1 Codex Grimoire
Recall Cost: 2

Power Push: Make a **Spellcast Roll** against a target within Melee range. On a success, they're knocked back to Far range and take **d10+2** magic damage using your Proficiency.

Tava's Armor: **Spend a Hope** to give a target you can touch a +1 bonus to their Armor Score until their next rest or you cast Tava's Armor again.

Ice Spike: Make a **Spellcast Roll (12)** to summon a large ice spike within Far range. If you use it as a weapon, make the Spellcast Roll against the target's Difficulty instead. On a success, deal **d6** physical damage using your Proficiency.

BOOK OF ILLIAT
Level 1 Codex Grimoire
Recall Cost: 2

Slumber: Make a **Spellcast Roll** against a target within Very Close range. On a success, they're *Asleep* until they take damage or the GM spends a Fear on their turn to clear this condition.

Arcane Barrage: Once per rest, **spend any number of Hope** and shoot magical projectiles that strike a target of your choice within Close range. Roll a number of **d6s** equal to the Hope spent and deal that much magic damage to the target.

Telepathy: **Spend a Hope** to open a line of mental communication with one target you can see. This connection lasts until your next rest or you cast Telepathy again.

BOOK OF TYFAR
Level 1 Codex Grimoire
Recall Cost: 2

Wild Flame: Make a **Spellcast Roll** against up to three adversaries within Melee range. Targets you succeed against take **2d6** magic damage and must mark a Stress as flames erupt from your hand.

Magic Hand: You conjure a magical hand with the same size and strength as your own within Far range.

Mysterious Mist: Make a **Spellcast Roll (13)** to cast a temporary thick fog that gathers in a stationary area within Very Close range. The fog heavily obscures this area and everything in it.

BOOK OF SITIL
Level 2 Codex Grimoire
Recall Cost: 2

Adjust Appearance: You magically shift your appearance and clothing to avoid recognition.

Parallela: **Spend 2 Hope** to cast this spell on yourself or an ally within Close range. The next time the target makes an attack, they can hit an additional target within range that their attack roll would succeed against. You can only hold this spell on one creature at a time.

Illusion: Make a **Spellcast Roll (14)**. On a success, create a temporary visual illusion no larger than you within Close range that lasts for as long as you look at it. It holds up to scrutiny until an observer is within Melee range.

BOOK OF VAGRAS
Level 2 Codex Grimoire
Recall Cost: 2

Runic Lock: Make a **Spellcast Roll (15)** on an object you're touching that can close (such as a lock, chest, or box). Once per rest on a success, you can lock the object so it can only be opened by creatures of your choice. Someone with access to magic and an hour of time to study the spell can break it.

Arcane Door: When you have no adversaries within Melee range, make a **Spellcast Roll (13)**. On a success, **spend a Hope** to create a portal from where you are to a point within Far range you can see. It closes once a creature has passed through it.

Reveal: Make a **Spellcast Roll**. If there is anything magically hidden within Close range, it is revealed.

BOOK OF KORVAX
Level 3 Codex Grimoire
Recall Cost: 2

Levitation: Make a **Spellcast Roll** to temporarily lift a target you can see up into the air and move them within Close range of their original position.

Recant: **Spend a Hope** to force a target within Melee range to make a Reaction Roll (15). On a failure, they forget the last minute of your conversation.

Rune Circle: **Mark a Stress** to create a temporary magical circle on the ground where you stand. All adversaries within Melee range, or who enter Melee range, take **2d12+4** magic damage and are knocked back to Very Close range.

BOOK OF NORAI
Level 3 Codex Grimoire
Recall Cost: 2

Mystic Tether: Make a **Spellcast Roll** against a target within Far range. On a success, they're temporarily *Restrained* and must mark a Stress. If you target a flying creature, this spell grounds and temporarily *Restrains* them.

Fireball: Make a **Spellcast Roll** against a target within Very Far range. On a success, hurl a sphere of fire toward them that explodes on impact. The target and all creatures within Very Close range of them must make a Reaction Roll (13). Targets who fail take **d20+5** magic damage using your Proficiency. Targets who succeed take half damage.

BOOK OF EXOTA
Level 4 Codex Grimoire
Recall Cost: 3

Repudiate: You can interrupt a magical effect taking place. Make a reaction roll using your Spellcast trait. Once per rest on a success, the effect stops and any consequences are avoided.

Create Construct: **Spend a Hope** to choose a group of objects around you and create an animated construct from them that obeys basic commands. Make a **Spellcast Roll** to command them to take action. When necessary, they share your Evasion and traits and their attacks deal **2d10+3** physical damage. You can only maintain one construct at a time, and they fall apart when they take any amount of damage.

BOOK OF GRYNN
Level 4 Codex Grimoire
Recall Cost: 2

Arcane Deflection: Once per long rest, spend a Hope to negate the damage of an attack targeting you or an ally within Very Close range.

Time Lock: Target an object within Far range. That object stops in time and space exactly where it is until your next rest. If a creature tries to move it, make a **Spellcast Roll** against them to maintain this spell.

Wall of Flame: Make a **Spellcast Roll (15)**. On a success, create a a wall of magical flame between two points within Far range. All creatures in its path must choose a side to be on, and anything that subsequently passes through the wall takes **4d10+3** magic damage.

MANIFEST WALL
Level 5 Codex Spell
Recall Cost: 2

Make a **Spellcast Roll (15)**. Once per rest on a success, **spend a Hope** to create a temporary magical wall between two points within Far range. It can be up to 50 feet high and form at any angle. Creatures or objects in its path are shunted to a side of your choice. The wall stays up until your next rest or you cast Manifest Wall again.

TELEPORT
Level 5 Codex Spell
Recall Cost: 2

Once per long rest, you can instantly teleport yourself and any number of willing targets within Close range to a place you've been before. Choose one of the following options, then make a **Spellcast Roll (16)**:

- If you know the place very well, gain a +3 bonus.
- If you've visited the place frequently, gain a +1 bonus.
- If you've visited the place infrequently, gain no modifier.
- If you've only been there once, gain a –2 penalty.

On a success, you appear where you were intending to go. On a failure, you appear off course, with the range of failure determining how far off course.

BANISH
Level 6 Codex Spell
Recall Cost: 0

Make a **Spellcast Roll** against a target within Close range. On a success, roll a number of **d20s** equal to your Spellcast trait. The target must make a reaction roll with a Difficulty equal to your highest result. On a success, the target must mark a Stress but isn't banished. Once per rest on a failure, they are banished from this realm.

When the PCs roll with Fear, the Difficulty gains a –1 penalty and the target makes another reaction roll. On a success, they return from banishment.

SIGIL OF RETRIBUTION
Level 6 Codex Spell
Recall Cost: 2

Mark an adversary within Close range with a sigil of retribution. The GM gains a Fear. When the marked adversary deals damage to you or your allies, place a **d8** on this card. You can hold a number of **d8s** equal to your level. When you successfully attack the marked adversary, roll the dice on this card and add the total to your damage roll, then clear the dice. This effect ends when the marked adversary is defeated or you cast Sigil of Retribution again.

BOOK OF HOMET
Level 7 Codex Grimoire
Recall Cost: 0

Pass Through: Make a **Spellcast Roll (13)**. Once per rest on a success, you and all creatures touching you can pass through a wall or door within Close range. The effect ends once everyone is on the other side.

Plane Gate: Make a **Spellcast Roll (14)**. Once per long rest on a success, open a gateway to a location in another dimension or plane of existence you've been to before. This gateway lasts until your next rest.

CODEX-TOUCHED
Level 7 Codex Ability
Recall Cost: 2

When 4 or more of the domain cards in your loadout are from the Codex domain, gain the following benefits:

- You can **mark a Stress** to add your Proficiency to a Spellcast Roll.
- Once per rest, replace this card with any card from your vault without paying its Recall Cost.

BOOK OF VYOLA
Level 8 Codex Grimoire
Recall Cost: 2

Memory Delve: Make a **Spellcast Roll** against a target within Far range. On a success, peer into the target's mind and ask the GM a question. The GM describes any memories the target has pertaining to the answer.

Shared Clarity: Once per long rest, **spend a Hope** to choose two willing creatures. When one of them would mark Stress, they can choose between the two of them who marks it. This spell lasts until their next rest.

SAFE HAVEN
Level 8 Codex Spell
Recall Cost: 3

When you have a few minutes of calm to focus, you can **spend 2 Hope** to summon your Safe Haven, a large interdimensional home where you and your allies can take shelter. When you do, a magical door appears somewhere within Close range. Only creatures of your choice can enter. Once inside, you can make the entrance invisible. You and anyone else inside can always exit. Once you leave, the doorway must be summoned again.

When you take a rest within your own Safe Haven, you can choose an additional downtime move.

BOOK OF RONIN
Level 9 Codex Grimoire
Recall Cost: 4

Transform: Make a **Spellcast Roll (15)**. On a success, transform into an inanimate object no larger than twice your normal size. You can remain in this shape until you take damage.

Eternal Enervation: Once per long rest, make a **Spellcast Roll** against a target within Close range. On a success, they become permanently *Vulnerable*. They can't clear this condition by any means.

DISINTEGRATION WAVE
Level 9 Codex Spell
Recall Cost: 4

Make a **Spellcast Roll (18)**. Once per long rest on a success, the GM tells you which adversaries within Far range have a Difficulty of 18 or lower. **Mark a Stress** for each one you wish to hit with this spell. They are killed and can't come back to life by any means.

BOOK OF YARROW
Level 10 Codex Grimoire
Recall Cost: 2

Timejammer: Make a **Spellcast Roll (18)**. On a success, time temporarily slows to a halt for everyone within Far range except for you. It resumes the next time you make an action roll that targets another creature.

Magic Immunity: **Spend 5 Hope** to become immune to magic damage until your next rest.

TRANSCENDENT UNION
Level 10 Codex Spell
Recall Cost: 1

Once per long rest, **spend 5 Hope** to cast this spell on two or more willing creatures. Until your next rest, when a creature connected by this union would mark Stress or Hit Points, the connected creatures can choose who marks it.

GRACE DOMAIN

DEFT DECEIVER
Level 1 Grace Ability
Recall Cost: 0

Spend a Hope to gain advantage on a roll to deceive or trick someone into believing a lie you tell them.

ENRAPTURE
Level 1 Grace Spell
Recall Cost: 0

Make a **Spellcast Roll** against a target within Close range. On a success, they become temporarily *Enraptured*. While *Enraptured*, a target's attention is fixed on you, narrowing their field of view and drowning out any sound but your voice. Once per rest on a success, you can **mark a Stress** to force the *Enraptured* target to mark a Stress as well.

INSPIRATIONAL WORDS
Level 1 Grace Ability
Recall Cost: 1

Your speech is imbued with power. After a long rest, place a number of tokens on this card equal to your Presence. When you speak with an ally, you can spend a token from this card to give them one benefit from the following options:

- Your ally clears a Stress.
- Your ally clears a Hit Point.
- Your ally gains a Hope.

When you take a long rest, clear all unspent tokens.

TELL NO LIES
Level 2 Grace Spell
Recall Cost: 1

Make a **Spellcast Roll** against a target within Very Close range. On a success, they can't lie to you while they remain within Close range, but they are not compelled to speak. If you ask them a question and they refuse to answer, they must mark a Stress and the effect ends. The target is typically unaware this spell has been cast on them until it causes them to utter the truth.

TROUBLEMAKER
Level 2 Grace Ability
Recall Cost: 2

When you taunt or provoke a target within Far range, make a **Presence Roll** against them. Once per rest on a success, roll a number of **d4s** equal to your Proficiency. The target must mark Stress equal to the highest result rolled.

HYPNOTIC SHIMMER
Level 3 Grace Spell
Recall Cost: 1

Make a **Spellcast Roll** against all adversaries in front of you within Close range. Once per rest on a success, create an illusion of flashing colors and lights that temporarily *Stuns* targets you succeed against and forces them to mark a Stress. While *Stunned*, they can't use reactions and can't take any other actions until they clear this condition.

INVISIBILITY
Level 3 Grace Spell
Recall Cost: 1

Make a **Spellcast Roll (10)**. On a success, **mark a Stress** and choose yourself or an ally within Melee range to become *Invisible*. An *Invisible* creature can't be seen except through magical means and attack rolls against them are made with disadvantage. Place a number of tokens on this card equal to your Spellcast trait. When the *Invisible* creature takes an action, spend a token from this card. After the action that spends the last token is resolved, the effect ends.

You can only hold Invisibility on one creature at a time.

■ SOOTHING SPEECH
Level 4 Grace Ability
Recall Cost: 1

During a short rest, when you take the time to comfort another character while using the Tend to Wounds downtime move on them, clear an additional Hit Point on that character. When you do, you also clear 2 Hit Points.

■ THROUGH YOUR EYES
Level 4 Grace Spell
Recall Cost: 1

Choose a target within Very Far range. You can see through their eyes and hear through their ears. You can transition between using your own senses or the target's freely until you cast another spell or until your next rest.

■ THOUGHT DELVER
Level 5 Grace Spell
Recall Cost: 2

You can peek into the minds of others. **Spend a Hope** to read the vague surface thoughts of a target within Far range. Make a **Spellcast Roll** against the target to delve for deeper, more hidden thoughts.

On a roll with Fear, the target might, at the GM's discretion, become aware that you're reading their thoughts.

■ WORDS OF DISCORD
Level 5 Grace Spell
Recall Cost: 1

Whisper words of discord to an adversary within Melee range and make a **Spellcast Roll (13)**. On a success, the target must mark a Stress and make an attack against another adversary instead of against you or your allies.

Once this attack is over, the target realizes what happened. The next time you cast Words of Discord on them, gain a −5 penalty to the Spellcast Roll.

■ NEVER UPSTAGED
Level 6 Grace Ability
Recall Cost: 2

When you mark 1 or more Hit Points from an attack, you can **mark a Stress** to place a number of tokens equal to the number of Hit Points you marked on this card. On your next successful attack, gain a +5 bonus to your damage roll for each token on this card, then clear all tokens.

■ SHARE THE BURDEN
Level 6 Grace Spell
Recall Cost: 0

Once per rest, take on the Stress from a willing creature within Melee range. The target describes what intimate knowledge or emotions telepathically leak from their mind in this moment between you. Transfer any number of their marked Stress to you, then gain a Hope for each Stress transferred.

■ ENDLESS CHARISMA
Level 7 Grace Ability
Recall Cost: 1

After you make an action roll to persuade, lie, or garner favor, you can **spend a Hope** to reroll the Hope or Fear Die.

■ GRACE-TOUCHED
Level 7 Grace Ability
Recall Cost: 2

When 4 or more of the domain cards in your loadout are from the Grace domain, gain the following benefits:

- You can **mark an Armor Slot** instead of marking a Stress.
- When you would force a target to mark a number of Hit Points, you can choose instead to force them to mark that number of Stress.

■ ASTRAL PROJECTION
Level 8 Grace Spell
Recall Cost: 0

Once per long rest, **mark a Stress** to create a projected copy of yourself that can appear anywhere you've been before.

You can see and hear through the projection as though it were you and affect the world as though you were there. A creature investigating the projection can tell it's of magical origin. This effect lasts until your next rest or your projection takes any damage.

■ MASS ENRAPTURE
Level 8 Grace Spell
Recall Cost: 3

Make a **Spellcast Roll** against all targets within Far range. Targets you succeed against become temporarily *Enraptured*. While *Enraptured*, a target's attention is fixed on you, narrowing their field of view and drowning out any sound but your voice. **Mark a Stress** to force all *Enraptured* targets to mark a Stress, ending this spell.

■ COPYCAT
Level 9 Grace Spell
Recall Cost: 3

Once per long rest, this card can mimic the features of another domain card of level 8 or lower in another player's loadout. **Spend Hope equal to half the card's level** to gain access to the feature. It lasts until your next rest or they place the card in their vault.

■ MASTER OF THE CRAFT
Level 9 Grace Ability
Recall Cost: 0

Gain a permanent +2 bonus to two of your Experiences or a permanent +3 bonus to one of your Experiences. Then place this card in your vault permanently.

■ ENCORE
Level 10 Grace Spell
Recall Cost: 1

When an ally within Close range deals damage to an adversary, you can make a **Spellcast Roll** against that same target. On a success, you deal the same damage to the target that your ally dealt. If your Spellcast Roll succeeds with Fear, place this card in your vault.

■ NOTORIOUS
Level 10 Grace Ability
Recall Cost: 0

People know who you are and what you've done, and they treat you differently because of it. When you leverage your notoriety to get what you want, you can **mark a Stress** before you roll to gain a +10 bonus to the result. Your food and drinks are always free wherever you go, and everything else you buy is reduced in price by one bag of gold (to a minimum of one handful).

This card doesn't count against your loadout's domain card maximum of 5 and can't be placed in your vault.

PICK AND PULL
Level 1 Midnight Ability
Recall Cost: 0

You have advantage on action rolls to pick nonmagical locks, disarm nonmagical traps, or steal items from a target (either through stealth or by force).

RAIN OF BLADES
Level 1 Midnight Spell
Recall Cost: 1

Spend a Hope to make a **Spellcast Roll** and conjure throwing blades that strike out at all targets within Very Close range. Targets you succeed against take **d8+2** magic damage using your Proficiency.

If a target you hit is *Vulnerable*, they take an extra **1d8** damage.

UNCANNY DISGUISE
Level 1 Midnight Spell
Recall Cost: 0

When you have a few minutes to prepare, you can **mark a Stress** to don the facade of any humanoid you can picture clearly in your mind. While disguised, you have advantage on Presence Rolls to avoid scrutiny.

Place a number of tokens equal to your Spellcast trait on this card. When you take an action while disguised, spend a token from this card. After the action that spends the last token is resolved, the disguise drops.

MIDNIGHT SPIRIT
Level 2 Midnight Spell
Recall Cost: 1

Spend a Hope to summon a humanoid-sized spirit that can move or carry things for you until your next rest.

You can also send it to attack an adversary. When you do, make a **Spellcast Roll** against a target within Very Far range. On a success, the spirit moves into Melee range with that target. Roll a number of **d6s** equal to your Spellcast trait and deal that much magic damage to the target. The spirit then dissipates. You can only have one spirit at a time.

SHADOWBIND
Level 2 Midnight Spell
Recall Cost: 0

Make a **Spellcast Roll** against all adversaries within Very Close range. Targets you succeed against are temporarily *Restrained* as their shadow binds them in place.

CHOKEHOLD
Level 3 Midnight Ability
Recall Cost: 1

When you position yourself behind a creature who's about your size, you can **mark a Stress** to pull them into a chokehold, making them temporarily *Vulnerable*.

When a creature attacks a target who is *Vulnerable* in this way, they deal an extra **2d6** damage.

VEIL OF NIGHT
Level 3 Midnight Spell
Recall Cost: 1

Make a **Spellcast Roll (13)**. On a success, you can create a temporary curtain of darkness between two points within Far range. Only you can see through this darkness. You're considered *Hidden* to adversaries on the other side of the veil, and you have advantage on attacks you make through the darkness. The veil remains until you cast another spell.

STEALTH EXPERTISE
Level 4 Midnight Ability
Recall Cost: 0

When you roll with Fear while attempting to move unnoticed through a dangerous area, you can **mark a Stress** to roll with Hope instead.

If an ally within Close range is also attempting to move unnoticed and rolls with Fear, you can **mark a Stress** to change their result to a roll with Hope.

GLYPH OF NIGHTFALL
Level 4 Midnight Spell
Recall Cost: 1

Make a **Spellcast Roll** against a target within Very Close range. On a success, **spend a Hope** to conjure a dark glyph upon their body that exposes their weak points, temporarily reducing the target's Difficulty by a value equal to your Knowledge (minimum 1).

HUSH
Level 5 Midnight Spell
Recall Cost: 1

Make a **Spellcast Roll** against a target within Close range. On a success, **spend a Hope** to conjure suppressive magic around the target that encompasses everything within Very Close range of them and follows them as they move.

The target and anything within the area is *Silenced* until the GM spends a Fear on their turn to clear this condition, you cast Hush again, or you take Major damage. While *Silenced*, they can't make noise and can't cast spells.

PHANTOM RETREAT
Level 5 Midnight Spell
Recall Cost: 2

Spend a Hope to activate Phantom Retreat where you're currently standing. **Spend another Hope** at any time before your next rest to disappear from where you are and reappear where you were standing when you activated Phantom Retreat. This spell ends after you reappear.

DARK WHISPERS
Level 6 Midnight Spell
Recall Cost: 0

You can speak into the mind of any person with whom you've made physical contact. Once you've opened a channel with them, they can speak back into your mind. Additionally, you can **mark a Stress** to make a **Spellcast Roll** against them. On a success, you can ask the GM one of the following questions and receive an answer:

- Where are they?
- What are they doing?
- What are they afraid of?
- What do they cherish most in the world?

MASS DISGUISE
Level 6 Midnight Spell
Recall Cost: 0

When you have a few minutes of silence to focus, you can **mark a Stress** to change the appearance of all willing creatures within Close range. Their new forms must share a general body structure and size, and can be somebody or something you've seen before or entirely fabricated. A disguised creature has advantage on Presence Rolls to avoid scrutiny.

Activate a Countdown (8). It ticks down as a consequence the GM chooses. When it triggers, the disguise drops.

■ MIDNIGHT-TOUCHED
Level 7 Midnight Ability
Recall Cost: 2

When 4 or more of the domain cards in your loadout are from the Midnight domain, gain the following benefits:

- Once per rest, when you have 0 Hope and the GM would gain a Fear, you can gain a Hope instead.
- When you make a successful attack, you can **mark a Stress** to add the result of your Fear Die to your damage roll.

■ VANISHING DODGE
Level 7 Midnight Spell
Recall Cost: 1

When an attack made against you that would deal physical damage fails, you can **spend a Hope** to envelop yourself in shadow, becoming *Hidden* and teleporting to a point within Close range of the attacker. You remain *Hidden* until the next time you make an action roll.

■ SHADOWHUNTER
Level 8 Midnight Ability
Recall Cost: 2

Your prowess is enhanced under the cover of shadow. While you're shrouded in low light or darkness, you gain a +1 bonus to your Evasion and make attack rolls with advantage.

■ SPELLCHARGE
Level 8 Midnight Spell
Recall Cost: 1

When you take magic damage, place tokens equal to the number of Hit Points you marked on this card. You can store a number of tokens equal to your Spellcast trait.

When you make a successful attack against a target, you can spend any number of tokens to add a **d6** for each token spent to your damage roll.

■ NIGHT TERROR
Level 9 Midnight Spell
Recall Cost: 2

Once per long rest, choose any targets within Very Close range to perceive you as a nightmarish horror. The targets must succeed on a Reaction Roll (16) or become temporarily *Horrified*. While *Horrified*, they're *Vulnerable*. Steal a number of Fear from the GM equal to the number of targets that are *Horrified* (up to the number of Fear in the GM's pool). Roll a number of **d6s** equal to the number of stolen Fear and deal the total damage to each *Horrified* target. Discard the stolen Fear.

■ TWILIGHT TOLL
Level 9 Midnight Ability
Recall Cost: 1

Choose a target within Far range. When you succeed on an action roll against them that doesn't result in making a damage roll, place a token on this card. When you deal damage to this target, spend any number of tokens to add a **d12** for each token spent to your damage roll. You can only hold Twilight Toll on one creature at a time.

When you choose a new target or take a rest, clear all unspent tokens.

■ ECLIPSE
Level 10 Midnight Spell
Recall Cost: 2

Make a **Spellcast Roll (16)**. Once per long rest on a success, plunge the entire area within Far range into complete darkness only you and your allies can see through. Attack rolls have disadvantage when targeting you or an ally within this shadow.

Additionally, when you or an ally succeeds with Hope against an adversary within this shadow, the target must mark a Stress.

This spell lasts until the GM spends a Fear on their turn to clear this effect or you take Severe damage.

■ SPECTER OF THE DARK
Level 10 Midnight Spell
Recall Cost: 1

Mark a Stress to become *Spectral* until you make an action roll targeting another creature. While *Spectral*, you're immune to physical damage and can float and pass through solid objects. Other creatures can still see you while you're in this form.

SAGE DOMAIN
GIFTED TRACKER
Level 1 Sage Ability
Recall Cost: 0

When you're tracking a specific creature or group of creatures based on signs of their passage, you can **spend any number of Hope** and ask the GM that many questions from the following list.

- What direction did they go?
- How long ago did they pass through?
- What were they doing in this location?
- How many of them were here?

When you encounter creatures you've tracked in this way, gain a +1 bonus to your Evasion against them.

NATURE'S TONGUE
Level 1 Sage Ability
Recall Cost: 0

You can speak the language of the natural world. When you want to speak to the plants and animals around you, make an **Instinct Roll (12)**. On a success, they'll give you the information they know. On a roll with Fear, their knowledge might be limited or come at a cost.

Additionally, before you make a Spellcast Roll while within a natural environment, you can **spend a Hope** to gain a +2 bonus to the roll.

VICIOUS ENTANGLE
Level 1 Sage Spell
Recall Cost: 1

Make a **Spellcast Roll** against a target within Far range. On a success, roots and vines reach out from the ground, dealing **1d8+1** physical damage and temporarily *Restraining* the target.

Additionally on a success, you can **spend a Hope** to temporarily *Restrain* another adversary within Very Close range of your target.

CONJURE SWARM
Level 2 Sage Spell
Recall Cost: 1

Tekaira Armored Beetles: **Mark a Stress** to conjure armored beetles that encircle you. When you next take damage, reduce the severity by one threshold. You can **spend a Hope** to keep the beetles conjured after taking damage.

Fire Flies: Make a **Spellcast Roll** against all adversaries within Close range. **Spend a Hope** to deal **2d8+3** magic damage to targets you succeeded against.

NATURAL FAMILIAR
Level 2 Sage Spell
Recall Cost: 1

Spend a Hope to summon a small nature spirit or forest critter to your side until your next rest, you cast Natural Familiar again, or the familiar is targeted by an attack. If you **spend an additional Hope**, you can summon a familiar that flies. You can communicate with them, make a **Spellcast Roll** to command them to perform simple tasks, and **mark a Stress** to see through their eyes.

When you deal damage to an adversary within Melee range of your familiar, you add a **d6** to your damage roll.

CORROSIVE PROJECTILE
Level 3 Sage Spell
Recall Cost: 1

Make a **Spellcast Roll** against a target within Far range. On a success, deal **d6+4** magic damage using your Proficiency. Additionally, **mark 2 or more Stress** to make them permanently *Corroded*. While a target is *Corroded*, they gain a −1 penalty to their Difficulty for every 2 Stress you spent. This condition can stack.

TOWERING STALK
Level 3 Sage Spell
Recall Cost: 1

Once per rest, you can conjure a thick, twisting stalk within Close range that can be easily climbed. Its height can grow up to Far range.

Mark a Stress to use this spell as an attack. Make a **Spellcast Roll** against an adversary or group of adversaries within Close range. The erupting stalk lifts targets you succeed against into the air and drops them, dealing **d8** physical damage using your Proficiency.

DEATH GRIP
Level 4 Sage Spell
Recall Cost: 1

Make a **Spellcast Roll** against a target within Close range and choose one of the following options:

- You pull the target into Melee range or pull yourself into Melee range of them.
- You constrict the target and force them to mark 2 Stress.
- All adversaries between you and the target must succeed on a Reaction Roll (13) or be hit by vines, taking **3d6+2** physical damage.

On a success, vines reach out from your hands, causing the chosen effect and temporarily *Restraining* the target.

HEALING FIELD
Level 4 Sage Spell
Recall Cost: 2

Once per long rest, you can conjure a field of healing plants around you. Everywhere within Close range of you bursts to life with vibrant nature, allowing you and all allies in the area to clear a Hit Point.

Spend 2 Hope to allow you and all allies to clear 2 Hit Points instead.

THORN SKIN
Level 5 Sage Spell
Recall Cost: 1

Once per rest, **spend a Hope** to sprout thorns all over your body. When you do, place a number of tokens equal to your Spellcast trait on this card. When you take damage, you can spend any number of tokens to roll that number of **d6s**. Add the results together and reduce the incoming damage by that amount. If you're within Melee range of the attacker, deal that amount of damage back to them.

When you take a rest, clear all unspent tokens.

WILD FORTRESS
Level 5 Sage Spell
Recall Cost: 1

Make a **Spellcast Roll (13)**. On a success, **spend 2 Hope** to grow a natural barricade in the shape of a dome that you and one ally can take cover within. While inside the dome, a creature can't be targeted by attacks and can't make attacks. Attacks made against the dome automatically succeed. The dome has the following damage thresholds and lasts until it marks 3 Hit Points. Place tokens on this card to represent marking Hit Points.

Thresholds: 15/30

CONJURED STEEDS
Level 6 Sage Spell
Recall Cost: 0

Spend any number of Hope to conjure that many magical steeds (such as horses, camels, or elephants) that you and your allies can ride until your next long rest or the steeds take any damage. The steeds double your land speed while traveling and, when in danger, allow you to move within Far range without having to roll. Creatures riding a steed gain a −2 penalty to attack rolls and a +2 bonus to damage rolls.

FORAGER
Level 6 Sage Ability
Recall Cost: 1

As an additional downtime move you can choose, roll a d6 to see what you forage. Work with the GM to describe it and add it to your inventory as a consumable. Your party can carry up to five foraged consumables at a time.
1. A unique food (Clear 2 Stress)
2. A beautiful relic (Gain 2 Hope)
3. An arcane rune (+2 to a Spellcast Roll)
4. A healing vial (Clear 2 Hit Points)
5. A luck charm (Reroll any die)
6. Choose one of the options above.

SAGE-TOUCHED
Level 7 Sage Ability
Recall Cost: 2

When 4 or more of the domain cards in your loadout are from the Sage domain, gain the following benefits:
- While you're in a natural environment, you gain a +2 bonus to your Spellcast Rolls.
- Once per rest, you can double your Agility or Instinct when making a roll that uses that trait. You must choose to do this before you roll.

WILD SURGE
Level 7 Sage Spell
Recall Cost: 2

Once per long rest, **mark a Stress** to channel the natural world around you and enhance yourself. Describe how your appearance changes, then place a **d6** on this card with the 1 value facing up.

While the Wild Surge Die is active, you add its value to every action roll you make. After you add its value to a roll, increase the Wild Surge Die's value by one. When the die's value would exceed 6 or you take a rest, this form drops and you must **mark an additional Stress**.

FOREST SPRITES
Level 8 Sage Spell
Recall Cost: 2

Make a **Spellcast Roll (13)**. On a success, **spend any number of Hope** to create an equal number of small forest sprites who appear at points you choose within Far range, providing the following benefits:

- Your allies gain a +3 bonus to attack rolls against adversaries within Melee range of a sprite.
- An ally who marks an Armor Slot while within Melee range of a sprite can mark an additional Armor Slot.

A sprite vanishes after granting a benefit or taking any damage.

REJUVENATION BARRIER
Level 8 Sage Spell
Recall Cost: 1

Make a **Spellcast Roll (15)**. Once per rest on a success, create a temporary barrier of protective energy around you at Very Close range. You and all allies within the barrier when this spell is cast clear **1d4** Hit Points. While the barrier is up, you and all allies within have resistance to physical damage from outside the barrier.

When you move, the barrier follows you.

FANE OF THE WILDS
Level 9 Sage Ability
Recall Cost: 2

After a long rest, place a number of tokens equal to the number of Sage domain cards in your loadout and vault on this card.

When you would make a Spellcast Roll, you can spend any number of tokens after the roll to gain a +1 bonus for each token spent.

When you critically succeed on a Spellcast Roll for a Sage domain spell, gain a token.

When you take a long rest, clear all unspent tokens.

PLANT DOMINION
Level 9 Sage Spell
Recall Cost: 1

Make a **Spellcast Roll (18)**. Once per long rest on a success, you reshape the natural world, changing the surrounding plant life anywhere within Far range of you. For example, you can grow trees instantly, clear a path through dense vines, or create a wall of roots.

FORCE OF NATURE
Level 10 Sage Spell
Recall Cost: 2

Mark a Stress to transform into a hulking nature spirit, gaining the following benefits:

- When you succeed on an attack or Spellcast Roll, gain a +10 bonus to the damage roll.
- When you deal enough damage to defeat a creature within Close range, you absorb them and clear an Armor Slot.
- You can't be *Restrained*.

Before you make an action roll, you must **spend a Hope**. If you can't, you revert to your normal form.

TEMPEST
Level 10 Sage Spell
Recall Cost: 2

Choose one of the following tempests and make a **Spellcast Roll** against all targets within Far range. Targets you succeed against experience its effects until the GM spends a Fear on their turn to end this spell.

- *Blizzard*: Deal **2d20+8** magic damage and targets are temporararily *Vulnerable*.
- *Hurricane*: Deal **3d10+10** magic damage and choose a direction the wind is blowing. Targets can't move against the wind.
- *Sandstorm*: Deal **5d6+9** magic damage. Attacks made from beyond Melee range have disadvantage.

SPLENDOR DOMAIN

BOLT BEACON
Level 1 Splendor Spell
Recall Cost: 1

Make a **Spellcast Roll** against a target within Far range. On a success, **spend a Hope** to send a bolt of shimmering light toward them, dealing **d8+2** magic damage using your Proficiency. The target becomes temporarily *Vulnerable* and glows brightly until this condition is cleared.

MENDING TOUCH
Level 1 Splendor Spell
Recall Cost: 1

You lay your hands upon a creature and channel healing magic to close their wounds. When you can take a few minutes to focus on the target you're helping, you can **spend 2 Hope** to clear a Hit Point or a Stress on them.

Once per long rest, when you spend this healing time learning something new about them or revealing something about yourself, you can clear 2 Hit Points or 2 Stress on them instead.

REASSURANCE
Level 1 Splendor Ability
Recall Cost: 0

Once per rest, after an ally attempts an action roll but before the consequences take place, you can offer assistance or words of support. When you do, your ally can reroll their dice.

FINAL WORDS
Level 2 Splendor Spell
Recall Cost: 1

You can infuse a corpse with a moment of life to speak with it. Make a **Spellcast Roll (13)**. On a success with Hope, the corpse answers up to three questions. On a success with Fear, the corpse answers one question. The corpse answers truthfully, but it can't impart information it didn't know in life. On a failure, or once the corpse has finished answering your questions, the body turns to dust.

HEALING HANDS
Level 2 Splendor Spell
Recall Cost: 1

Make a **Spellcast Roll (13)** and target a creature other than yourself within Melee range. On a success, **mark a Stress** to clear 2 Hit Points or 2 Stress on the target. On a failure, **mark a Stress** to clear a Hit Point or a Stress on the target. You can't heal the same target again until your next long rest.

SECOND WIND
Level 3 Splendor Ability
Recall Cost: 2

Once per rest, when you succeed on an attack against an adversary, you can clear 3 Stress or a Hit Point. On a success with Hope, you also clear 3 Stress or a Hit Point on an ally within Close range of you.

VOICE OF REASON
Level 3 Splendor Ability
Recall Cost: 1

You speak with an unmatched power and authority. You have advantage on action rolls to de-escalate violent situations or convince someone to follow your lead.

Additionally, you're emboldened in moments of duress. When all of your Stress slots are marked, you gain a +1 bonus to your Proficiency for damage rolls.

DIVINATION
Level 4 Splendor Spell
Recall Cost: 1

Once per long rest, **spend 3 Hope** to reach out to the forces beyond and ask one "yes or no" question about an event, person, place, or situation in the near future. For a moment, the present falls away and you see the answer before you.

LIFE WARD
Level 4 Splendor Spell
Recall Cost: 1

Spend 3 Hope and choose an ally within Close range. They are marked with a glowing sigil of protection. When this ally would make a death move, they clear a Hit Point instead.

This effect ends when it saves the target from a death move, you cast Life Ward on another target, or you take a long rest.

SHAPE MATERIAL
Level 5 Splendor Spell
Recall Cost: 1

Spend a Hope to shape a section of natural material you're touching (such as stone, ice, or wood) to suit your purpose. The area of the material can be no larger than you. For example, you can form a rudimentary tool or create a door.

You can only affect the material within Close range of where you're touching it.

SMITE
Level 5 Splendor Spell
Recall Cost: 2

Once per rest, **spend 3 Hope** to charge your powerful smite. When you next successfully attack with a weapon, double the result of your damage roll. This attack deals magic damage regardless of the weapon's damage type.

RESTORATION
Level 6 Splendor Spell
Recall Cost: 2

After a long rest, place a number of tokens equal to your Spellcast trait on this card. Touch a creature and spend any number of tokens to clear 2 Hit Points or 2 Stress for each token spent.

You can also spend a token from this card when touching a creature to clear the *Vulnerable* condition or heal a physical or magical ailment (the GM might require additional tokens depending on the strength of the ailment).

When you take a long rest, clear all unspent tokens.

ZONE OF PROTECTION
Level 6 Splendor Spell
Recall Cost: 2

Make a **Spellcast Roll (16)**. Once per long rest on a success, choose a point within Far range and create a visible zone of protection there for all allies within Very Close range of that point. When you do, place a **d6** on this card with the 1 value facing up. When an ally in this zone takes damage, they reduce it by the die's value. You then increase the die's value by one. When the die's value would exceed 6, this effect ends.

HEALING STRIKE
Level 7 Splendor Spell
Recall Cost: 1

When you deal damage to an adversary, you can **spend 2 Hope** to clear a Hit Point on an ally within Close range.

SPLENDOR-TOUCHED
Level 7 Splendor Ability
Recall Cost: 2

When 4 or more of the domain cards in your loadout are from the Splendor domain, gain the following benefits:

- +3 bonus to your Severe damage threshold
- Once per long rest, when incoming damage would require you to mark a number of Hit Points, you can choose to mark that much Stress or spend that much Hope instead.

SHIELD AURA
Level 8 Splendor Spell
Recall Cost: 2

Mark a Stress to cast a protective aura on a target within Very Close range. When the target marks an Armor Slot, they reduce the severity of the attack by an additional threshold. If this spell causes a creature who would be damaged to instead mark no Hit Points, the effect ends.

You can only hold Shield Aura on one creature at a time.

STUNNING SUNLIGHT
Level 8 Splendor Spell
Recall Cost: 2

Make a **Spellcast Roll** to unleash powerful rays of burning sunlight against all adversaries in front of you within Far range. On a success, **spend any number of Hope** and force that many targets you succeeded against to make a Reaction Roll (14).

Targets who succeed take **3d20+3** magic damage. Targets who fail take **4d20+5** magic damage and are temporarily *Stunned*. While *Stunned*, they can't use reactions and can't take any other actions until they clear this condition.

OVERWHELMING AURA
Level 9 Splendor Spell
Recall Cost: 2

Make a **Spellcast Roll (15)** to magically empower your aura. On a success, **spend 2 Hope** to make your Presence equal to your Spellcast trait until your next long rest.

While this spell is active, an adversary must mark a Stress when they target you with an attack.

SALVATION BEAM
Level 9 Splendor Spell
Recall Cost: 2

Make a **Spellcast Roll (16)**. On a success, **mark any number of Stress** to target a line of allies within Far range. You can clear Hit Points on the targets equal to the number of Stress marked, divided among them however you'd like.

INVIGORATION
Level 10 Splendor Spell
Recall Cost: 3

When you or an ally within Close range has used a feature that has an exhaustion limit (such as once per rest or once per session), you can **spend any number of Hope** and roll that many **d6s**. If any roll a 6, the feature can be used again.

RESURRECTION
Level 10 Splendor Spell
Recall Cost: 2

Make a **Spellcast Roll (20)**. On a success, restore one creature who has been dead no longer than 100 years to full strength. Then roll a **d6**. On a result of 5 or lower, place this card in your vault permanently.

On a failure, you can't cast Resurrection again for a week.

VALOR DOMAIN

BARE BONES
Level 1 Valor Ability
Recall Cost: 0

When you choose not to equip armor, you have a base Armor Score of 3 + your Strength and use the following as your base damage thresholds:

- *Tier 1*: 9/19
- *Tier 2*: 11/24
- *Tier 3*: 13/31
- *Tier 4*: 15/38

FORCEFUL PUSH
Level 1 Valor Ability
Recall Cost: 0

Make an attack with your primary weapon against a target within Melee range. On a success, you deal damage and knock them back to Close range. On a success with Hope, add a **d6** to your damage roll.

Additionally, you can **spend a Hope** to make them temporarily *Vulnerable*.

I AM YOUR SHIELD
Level 1 Valor Ability
Recall Cost: 1

When an ally within Very Close range would take damage, you can **mark a Stress** to stand in the way and make yourself the target of the attack instead. When you take damage from this attack, you can mark any number of Armor Slots.

BODY BASHER
Level 2 Valor Ability
Recall Cost: 1

You use the full force of your body in a fight. On a successful attack using a weapon with a Melee range, gain a bonus to your damage roll equal to your Strength.

BOLD PRESENCE
Level 2 Valor Ability
Recall Cost: 0

When you make a Presence Roll, you can **spend a Hope** to add your Strength to the roll.

Additionally, once per rest when you would gain a condition, you can describe how your bold presence aids you in the situation and avoid gaining the condition.

CRITICAL INSPIRATION
Level 3 Valor Ability
Recall Cost: 1

Once per rest, when you critically succeed on an attack, all allies within Very Close range can clear a Stress or gain a Hope.

LEAN ON ME
Level 3 Valor Ability
Recall Cost: 1

Once per long rest, when you console or inspire an ally who failed an action roll, you can both clear 2 Stress.

GOAD THEM ON
Level 4 Valor Ability
Recall Cost: 1

Describe how you taunt a target within Close range, then make a **Presence Roll** against them. On a success, the target must mark a Stress, and the next time the GM spotlights them, they must target you with an attack, which they make with disadvantage.

SUPPORT TANK
Level 4 Valor Ability
Recall Cost: 2

When an ally within Close range fails a roll, you can **spend 2 Hope** to allow them to reroll either their Hope or Fear Die.

ARMORER
Level 5 Valor Ability
Recall Cost: 1

While you're wearing armor, gain a +1 bonus to your Armor Score.

During a rest, when you choose to repair your armor as a downtime move, your allies also clear an Armor Slot.

ROUSING STRIKE
Level 5 Valor Ability
Recall Cost: 1

Once per rest, when you critically succeed on an attack, you and all allies who can see or hear you can clear a Hit Point or **1d4** Stress.

INEVITABLE
Level 6 Valor Ability
Recall Cost: 1

When you fail an action roll, your next action roll has advantage.

RISE UP
Level 6 Valor Ability
Recall Cost: 2

Gain a bonus to your Severe threshold equal to your Proficiency.

When you mark 1 or more Hit Points from an attack, clear a Stress.

SHRUG IT OFF
Level 7 Valor Ability
Recall Cost: 1

When you would take damage, you can **mark a Stress** to reduce the severity of the damage by one threshold. When you do, roll a **d6**. On a result of 3 or lower, place this card in your vault.

VALOR-TOUCHED
Level 7 Valor Ability
Recall Cost: 1

When 4 or more of the domain cards in your loadout are from the Valor domain, gain the following benefits:

- +1 bonus to your Armor Score
- When you mark 1 or more Hit Points without marking an Armor Slot, clear an Armor Slot.

FULL SURGE
Level 8 Valor Ability
Recall Cost: 1

Once per long rest, **mark 3 Stress** to push your body to its limits. Gain a +2 bonus to all of your character traits until your next rest.

GROUND POUND
Level 8 Valor Ability
Recall Cost: 2

Spend 2 Hope to strike the ground where you stand and make a **Strength Roll** against all targets within Very Close range. Targets you succeed against are thrown back to Far range and must make a Reaction Roll (17). Targets who fail take **4d10+8** damage. Targets who succeed take half damage.

HOLD THE LINE
Level 9 Valor Ability
Recall Cost: 1

Describe the defensive stance you take and **spend a Hope**. If an adversary moves within Very Close range, they're pulled into Melee range and *Restrained*.

This condition lasts until you move or fail a roll with Fear, or the GM spends 2 Fear on their turn to clear it.

LEAD BY EXAMPLE
Level 9 Valor Ability
Recall Cost: 3

When you deal damage to an adversary, you can **mark a Stress** and describe how you encourage your allies. The next PC to make an attack against that adversary can clear a Stress or gain a Hope.

UNBREAKABLE
Level 10 Valor Ability
Recall Cost: 4

When you mark your last Hit Point, instead of making a death move, you can roll a **d6** and clear a number of Hit Points equal to the result. Then place this card in your vault.

UNYIELDING ARMOR
Level 10 Valor Ability
Recall Cost: 1

When you would mark an Armor Slot, roll a number of **d6s** equal to your Proficiency. If any roll a 6, reduce the severity by one threshold without marking an Armor Slot.

CHARACTER SHEET SIDECAR

This section denotes your **class**. Each class is made up of two **domains**. You choose your **abilities and spells** from these domains.

This section gives you a place to record your **name, pronouns, heritage** (the combination of your community and ancestry), and **subclass**. There is also a space to record your **level**.

Evasion represents your ability to avoid an attack. The GM rolls against this number when determining if an adversary hits you. If you do get hit, you can choose to mark an **Armor Slot** (the small empty shields to the right of the large "Armor" shield) to reduce the severity of the incoming damage by one threshold. You have a number of available slots equal to your **Armor Score** (the number in the large "Armor" shield).

This area contains your **six character traits**. You use these as your primary modifiers on action rolls. The descriptions beneath each trait remind you how to use them.

The two smaller boxes are your **damage thresholds**. These come from your armor, and you always add your level to their value. When you take damage, compare it to the numbers here. If the incoming damage is **Minor,** you **mark a Hit Point**. If it is **Major**, you **mark 2 Hit Points**. If it is **Severe**, you **mark 3 Hit Points**. If you ever need to mark Stress and can't, **mark a Hit Point.** If you ever mark your last Hit Point, you must make a **death move**.

This is the section for your **active weapons**. Along with a **name**, weapons have an associated **trait** that you roll when using them for an attack. They also have a **range** (*Melee, Very Close, Close, Far, or Very Far*). The GM tells you what range a target is at relative to your character. **Damage dice** are the kind of dice you roll when you make a successful attack, and the damage type is either **physical** or **magic**. **Proficiency** tells you how many damage dice you roll. A weapon's **feature** describes its special abilities or the requirements to use it.

Weapons are either one-handed or two-handed. Fill in the appropriate number of hands based on the weapons you take.

This is where you record your **Hope**. You spend Hope to use an **Experience** (details below), **Help an Ally**, use a **Hope Feature**, or initiate a **Tag Team Roll**. When you Help an Ally, you explain how you're aiding them and **roll a d6 advantage die** they add to their action roll total. **You start with 2 Hope marked.**

Your class's unique Hope Feature is in this section as well.

This is the section for your **armor**. Along with a **name**, armor has **base thresholds** that contribute to your damage thresholds, and a **base score** that contributes to your Armor Score. The armor's **feature** describes its special abilities or the requirements to use it.

Experience represents your character's particular specializations your character has. These are narrative tags that you create to reflect what your character is skilled in. When they apply to the scene, you can **spend a Hope** before the action roll to add an Experience's value as a modifier. You earn more Experiences throughout a campaign.

This is where you keep track of your **gold** during a campaign. If you would mark your tenth handful, you instead mark a **bag** and erase all your handfuls. If you would mark your tenth bag, you instead mark a **chest** and erase your bags. **You start with one handful of gold.**

Your **inventory** is where you store **items** and **consumables**.

Each class starts with a unique **class feature** that sets them apart from other classes. Make sure to read through them before you begin playing.

This is where you store **weapons** you want to carry but not have active. While a weapon is in your inventory, you can't benefit from its feature.

◀◀ **SLIDE THIS SIDE OUT TO THE LEFT OF YOUR CHARACTER SHEET.**

SLIDE THIS SIDE OUT TO THE RIGHT OF YOUR CHARACTER SHEET. ▶▶

CHARACTER SHEET

When you multiclass, take one of that class's foundation cards and place it in your loadout. Then choose one domain to expand into and record it below.

_____

DOMAIN

When leveling up, you can take domain cards from this domain at half your level or lower (rounded up).

MULTICLASS FEATURE

NOTES

CHARACTER CREATION

1 CHOOSE A CLASS

Your class represents the kind of character you'll be playing and gives you access to certain abilities and spells during the game. Take the character sheet specific to this class.

Each class has a number of subclasses to choose from that help define what kind of focus you'd like your character to have. Take the foundation card for your chosen subclass.

2 CHOOSE A HERITAGE

Your character's heritage is made up of both an ancestry and a community card. These two cards establish your character's physical appearance and the environment they grew up in.

3 ASSIGN CHARACTER TRAITS

Distribute the values −1, 0, 0, +1, +1, +2 across your character traits. When rolling, you'll add the value of that character trait to the roll.

4 RECORD CHARACTER INFORMATION

Next, record your starting Evasion. Additionally, gain 2 Hope to start the game.

5 CHOOSE STARTING EQUIPMENT

Decide which weapons you want to start the game with and record their details in the appropriate spaces in the "Active Weapons" section.

Next, take one of the available options for starting armor and record its details in the appropriate spaces. Your armor comes with its own damage thresholds and base armor score. Record this alongside your selection under "Active Armor." Add your thresholds to your level and record those numbers under the "Damage & Health" section. Also record the Base Armor Score, plus modifiers from any features, in the large shield labeled "Armor" at the top of the sheet.

The starting inventory for your class is listed on your character guide. Record those items in the "Inventory" section of your character sheet.

6 CREATE YOUR BACKGROUND

Make description choices from the available options on your character guide (or create your own). This will help you start to build out your character's look and attitude.

Then use the background questions on your character guide as a jumping-off point to build out your character's history (or create your own questions).

Finally, name your character and choose which pronouns they use.

7 CREATE YOUR EXPERIENCES

Use all the choices and backstory you've made about your character so far to generate their starting two Experiences, a set of narrative words or phrases that represent what they've learned or become on their journey so far. Assign both a modifier of +2.

8 CHOOSE DOMAIN DECK CARDS

Each class is made up of two different domains, which are listed below the class name on the character sheet. Choose two cards total from the level 1 cards in those domains. You can share these decks with other players. If you do, make sure to talk with them about which cards they're interested in.

9 CREATE CONNECTIONS

Ask any of the Connection questions on your character guide to the other players at the table (or generate your own questions). Use this as an opportunity to also discuss how your characters all met, what brought them together, and why they've decided to travel as a party.
FIRST NAMES

Alucard, Ambrose, Ash, Bellamy, Calder, Calypso, Chartreuse, Clover, Dahlia, Darrow, Deacon, Elowen, Emrys, Fable, Fiorella, Flynn, Gatlin, Gerard, Hadron, Harlow, Indigo, Isla, Jaden, Kai, Kismet, Leo, Mika, Moon, Nyx, Orna, Phaedra, Quill, Rani, Raphael, Reza, Roux, Saffron, Sierra, Skye, Talon, Thea, Triton, Vala, Velo, Wisteria, Yanelle, Zahara

REGION NAMES

Alvyon, Bloomfare, Bonecross, Branishar, Cloud Isles, Davesh Pass, End of Journeys, Fearhold, Ir'thandir, Mountains of Creation, Nocturne, Revenance, Shattered Peaks, South Choir, Sunbearer's Crescent, Watcher's Ravine, Wilting Valley, Xuria

FAMILY NAMES

Abbot, Advani, Agoston, Baptiste, Belgarde, Blossom, Chance, Covault, Dawn, Dennison, Drayer, Emrick, Foley, Fury, Grove, Hartley, Humfleet, Hyland, Ikeda, Jones, Jordon, Kaan, Knoth, Lagrange, Lockamy, Lyon, Marche, Merrell, Newland, Novak, Orwick, Overholt, Pray, Rathbone, Rose, Seagrave, Spurlock, Thorn, Tringle, Vasquez, Warren, Worth, York

PLACE NAMES

Bodyguard, Con Artist, Merchant, Noble, Pirate

Characteristics like:
Affable, Intimidating, Sticky Fingers, Survivor

Specialties like:
Healer, Inventor, Navigator, Swashbuckler

Skills like:
Barter, Quick Hands, Repair, Tracker

Phrases like:
Catch Me If You Can, Hold the Line, Nature's Friend, This Is Not a Negotiation

PLAY GUIDE

ACTION ROLLS

Describe what you want to do and work with the GM to determine whether a roll is necessary to accomplish it. If it is...

AGILITY +1, THIEF +2

Decide which modifiers apply. Spend a Hope to add an Experience.

Roll your Duality Dice and add them together along with your modifiers.

"21 WITH FEAR!"

Tell the GM the result and which Duality Die rolled higher.

CRITICAL SUCCESS!

If the Hope and Fear Die both land on the same number, it's a critical success.

ACTION ROLL RESULTS

- **On a critical success,** you get what you want and a little extra. You gain a Hope and clear a Stress.
- **On a success with Hope,** you pull it off well and get what you want. You gain a Hope.
- **On a success with Fear,** you get what you want, but it comes with a cost or consequence. You might get attacked, get limited information, attract danger, or face another complication. The GM gains a Fear.
- **On a failure with Hope,** things don't go to plan. You probably don't get what you want and there are consequences, but you gain a Hope.
- **On a failure with Fear,** things go very badly. You probably don't get what you want, and a major consequence or complication occurs because of it. The GM gains a Fear.

DAMAGE ROLLS

After a successful attack, roll a number of your weapon's damage dice equal to your Proficiency and add them together.

If your attack roll critically succeeds, your attack deals extra damage! Start with the highest possible value the damage dice can roll, and then make a damage roll as usual, adding it to that value.

REACTION ROLLS

Reaction rolls work similarly to action rolls, except they don't generate Hope, Fear, or additional GM moves.

USING ARMOR

Your Armor Score represents how many Armor Slots you have available. When you take damage, you can mark an Armor Slot to reduce the severity by one threshold. You can only mark 1 Armor Slot per incoming attack.

QUICK REFERENCE

Advantage: Add a **d6** advantage die to your roll.

Disadvantage: Subtract a **d6** disadvantage die from your roll.

Help an Ally: Spend a Hope and roll a **d6** advantage die to add to an ally's roll. If the ally has gained advantage on a roll from multiple sources, they only add the highest result to their roll.

Group Action: Nominate a leader of the action. All other participants in the group action roll make a reaction roll using whichever traits they and the GM decide best fit (they don't need to use the same traits). The leader then makes an action roll. Their action roll gains a +1 bonus for each reaction roll that succeeds and a −1 penalty for each reaction roll that fails.

Tag Team Roll: Once per session, each player can choose to **spend 3 Hope** and initiate a Tag Team Roll between their character and another PC. When you do, work with the other character's player to describe how you combine your actions in a unique and exciting way. You both make separate action rolls, but before resolving the roll's outcome, choose one of the rolls to apply for both of your results. On a roll with Hope, all PCs involved gain a Hope. On a roll with Fear, the GM gains a Fear for each PC involved. If you succeed on a Tag Team Roll attack, you both roll damage, then add it together to determine the damage dealt.

Vulnerable: When a creature has the *Vulnerable* condition, all rolls against them have advantage.

Restrained: When a creature has the *Restrained* condition, they can't move, but they can still take actions from their current position.

Hidden: While you're out of sight from all foes and they don't know where you are, you gain the *Hidden* condition. While you're *Hidden*, any rolls against you have disadvantage.

Direct Damage: Armor Slots can't be marked to reduce this damage.

DOWNTIME

| Level 1 ▶ Tier 1 | Levels 2–4 ▶ Tier 2 | Levels 5–7 ▶ Tier 3 | Levels 8–10 ▶ Tier 4 |

Downtime represents moments of respite within the perilous journey the characters are on together. It's not only an opportunity to recover and prepare for what lies ahead, but also a time to share more quiet, intimate scenes that help to build or showcase the relationships characters have with one another.

SHORT REST

Each player can swap any domain cards in their loadout for cards in their vault, then choose two of the following moves (or choose the same move twice). The GM gains 1d4 Fear.

- **Tend to Wounds**
  Describe how you hastily patch yourself up, then clear a number of Hit Points equal to 1d4 + your tier. You can do this to an ally instead.
- **Clear Stress**
  Describe how you blow off steam or pull yourself together, then clear a number of Stress equal to 1d4 + your tier.
- **Repair Armor**
  Describe how you quickly repair your armor, then clear a number of Armor Slots equal to 1d4 + your tier. You can do this to an ally's armor instead.
- **Prepare**
  Describe how you prepare yourself for the path ahead, then gain a Hope. If you choose to Prepare with one or more members of your party, you each gain 2 Hope.

LONG REST

Each player can swap any domain cards in their loadout for cards in their vault, then choose two of the following moves (or choose the same move twice). The GM gains an amount of Fear equal to the number of PCs + 1d4 and can advance a long-term countdown.

- **Tend to All Wounds**
  Describe how you patch yourself up, then clear all Hit Points. You can do this to an ally instead.
- **Clear All Stress**
  Describe how you blow off steam or pull yourself together, then clear all Stress.
- **Repair All Armor**
  Describe how you spend time repairing your armor, then clear all Armor Slots. You can do this to an ally's armor instead.
- **Prepare**
  Describe how you prepare for the next day's adventure, then gain a Hope. If you choose to Prepare with one or more members of your party, you each gain 2 Hope.
- **Work on a Project**
  Establish or continue work on a project. The GM might ask for a roll to determine how much to tick down the progress countdown.

EQUIPMENT

STARTING PRIMARY WEAPONS — PHYSICAL

Name	Trait	Range	Damage	Burden	Feature
Broadsword	Agility	Melee	d8 phy	One-Handed	*Reliable:* +1 to attack rolls
Longsword	Agility	Melee	d8+3 phy	Two-Handed	—
Battleaxe	Strength	Melee	d10+3 phy	Two-Handed	—
Greatsword	Strength	Melee	d10+3 phy	Two-Handed	*Massive:* −1 to Evasion; on a successful attack, roll an additional damage die and discard the lowest result.
Mace	Strength	Melee	d8+1 phy	One-Handed	—
Warhammer	Strength	Melee	d12+3 phy	Two-Handed	*Heavy:* −1 to Evasion
Dagger	Finesse	Melee	d8+1 phy	One-Handed	—
Quarterstaff	Instinct	Melee	d10+3 phy	Two-Handed	—
Cutlass	Presence	Melee	d8+1 phy	One-Handed	—
Rapier	Presence	Melee	d8 phy	One-Handed	*Quick:* When you make an attack, you can mark a Stress to target another creature within range.
Halberd	Strength	Very Close	d10+2 phy	Two-Handed	*Cumbersome:* −1 to Finesse
Spear	Finesse	Very Close	d10+2 phy	Two-Handed	*Cumbersome:* −1 to Finesse
Shortbow	Agility	Far	d6+3 phy	Two-Handed	—
Crossbow	Finesse	Far	d6+1 phy	One-Handed	—
Longbow	Agility	Very Far	d8+3 phy	Two-Handed	*Cumbersome:* −1 to Finesse

STARTING PRIMARY WEAPONS — MAGIC

Name	Trait	Range	Damage	Burden	Feature
Arcane Gauntlets	Strength	Melee	d10+3 mag	Two-Handed	—
Hallowed Axe	Strength	Melee	d8+1 mag	One-Handed	—
Glowing Rings	Agility	Very Close	d10+1 mag	Two-Handed	—
Hand Runes	Instinct	Very Close	d10 mag	One-Handed	—
Returning Blade	Finesse	Close	d8 mag	One-Handed	*Returning:* When this weapon is thrown within its range, it appears in your hand immediately after the attack.
Shortstaff	Instinct	Close	d8+1 mag	One-Handed	—
Dualstaff	Instinct	Far	d6+3 mag	Two-Handed	—
Scepter	Presence	Far	d6 mag	Two-Handed	*Versatile:* This weapon can also be used with these statistics—Presence, Melee, d8.
Wand	Knowledge	Far	d6+1 mag	One-Handed	—
Greatstaff	Knowledge	Very Far	d6 mag	Two-Handed	*Powerful:* On a successful attack, roll an additional damage die and discard the lowest result.

STARTING SECONDARY WEAPONS

Name	Trait	Range	Damage	Burden	Feature
Shortsword	Agility	Melee	d8 phy	One-Handed	*Paired:* +2 to primary weapon damage to targets within Melee range
Round Shield	Strength	Melee	d4 phy	One-Handed	*Protective:* +1 to Armor Score
Tower Shield	Strength	Melee	d6 phy	One-Handed	*Barrier:* +2 to Armor Score; −1 to Evasion
Small Dagger	Finesse	Melee	d8 phy	One-Handed	*Paired:* +2 to primary weapon damage to targets within Melee range
Whip	Presence	Very Close	d6 phy	One-Handed	*Startling:* Mark a Stress to crack the whip and force all adversaries within Melee range back to Close range.
Grappler	Finesse	Close	d6 phy	One-Handed	*Hooked:* On a successful attack, you can pull the target into Melee range.
Hand Crossbow	Finesse	Far	d6+1 phy	One-Handed	—

STARTING ARMOR

Name	Base Thresholds	Base Score	Feature
Gambeson Armor	5 / 11	3	*Flexible:* +1 to Evasion
Leather Armor	6 / 13	3	—
Chainmail Armor	7 / 15	4	*Heavy:* −1 to Evasion
Full Plate Armor	8 / 17	4	*Very Heavy:* −2 to Evasion; −1 to Agility

GM GUIDE

GM Principles: *Begin and end with the fiction - Collaborate at all times, especially during conflict - Fill the world with life, wonder, and danger - Ask questions and incorporate the answers - Make every roll important - Play to find out what happens - Hold on gently*

GM Best Practices: *Cultivate a curious table - Gain your players' trust - Keep the story moving forward - Cut to the action - Help the players use the game - Create a meta conversation - Tell them what they would know - Ground the world in motive - Bring the game's mechanics to life - Reframe rather than reject - Work in moments and montages*

ACTION ROLLS

Call for an action roll when a character takes an action where the outcome is in question and the success or failure is interesting to the story.

1. Pick a character trait.
2. Decide on a Difficulty.
3. Establish the stakes of the roll with the player.
4. Assign advantage or disadvantage if applicable.
5. Tell the player to roll the Duality Dice.
6. Resolve the situation based on the result of their roll.

ACTION ROLL RESULTS
- **Critical Success:** They get what they wanted and a little extra. They gain a Hope and clear a Stress.
- **Success with Hope:** They get what they wanted and they gain a Hope.
- **Success with Fear:** They get what they want, but it comes with a consequence. You gain a Fear.
- **Failure with Hope:** They probably don't get what they want and there are consequences, but they gain a Hope.
- **Failure with Fear:** They don't get what they wanted and things go very badly. You gain a Fear.

CHARACTER TRAITS

- **AGILITY**
  Sprint, Leap, Maneuver
- **STRENGTH**
  Lift, Smash, Grapple
- **FINESSE**
  Control, Hide, Tinker
- **INSTINCT**
  Perceive, Sense, Navigate
- **PRESENCE**
  Charm, Perform, Deceive

  Recall, Analyze, Comprehend

DIFFICULTY

5	10	15	20	25	30
VERY EASY	EASY	AVERAGE	HARD	VERY HARD	NEARLY IMPOSSIBLE

HOPE & FEAR

On a roll with Hope, the player gains a Hope.
They can spend Hope to:
- Help an Ally
- Utilize an Experience
- Initiate a Tag Team Roll
- Activate a Hope Feature

On a roll with Fear, you gain a Fear.
You can spend a Fear to:
- Interrupt the players to make a move.
- Make an additional GM move.
- Spotlight an additional adversary during a battle.
- Use an adversary's Fear feature.
- Use an environment's Fear feature.
- Add an adversary's Experience to a roll.

SPOTLIGHTING ADVERSARIES

When you spotlight an adversary, you might have them:
- Move within Close range and make a weapon attack
- Move within Close range and use an adversary action
- End a temporary condition or effect
- Sprint somewhere else on the battlefield

GM MOVES

Make a move whenever:
- They roll with Fear on an action roll.
- They fail an action roll.
- They do something that would have consequences.
- They give you a golden opportunity.
- They look to you for what happens next.

EXAMPLE GM MOVES

- **Show how the world reacts.**
  "The kick shatters the door. Light spills in from the barracks as a half-dozen sleepy soldiers stumble to their feet, looking worried."
  ....

- **Ask a question and build on the answer.**
  "How is it that you notice the assassin lurking in the treetops?"
  ....

- **Make an NPC act in accordance with their motive.**
  "The Jagged Knife Bandit snips the gold purse off the merchant's hip and attempts to escape."
  ....

- **Lean on the character's goals to drive them to action.**
  "The relic you've been trying to recover for your people floats ominously in the center of the altar, surrounded by cultists preparing to drain its power."
  ....

- **Signal an imminent off-screen threat.**
  "You hear the crashing of falling trees and shattered branches as thundering steps approach. What do you do?"
  ....

- **Reveal an unwelcome truth or unexpected danger.**
  "He reaches into his cloak and produces the Orb of Vengeance as you realize that he was the necromancer the entire time."
  ....

- **Force the group to split up.**
  "The elementals are scattering—two heading for the town, three bearing down on the mill. What do you do?"
  ....

- **Make a PC mark Stress as a consequence for their actions.**
  "You can pull the baron to safety if you mark a Stress. Otherwise you can only get yourself out of the way. What do you do?"

- **Make a move the characters don't see.**
  "You brace for the alarm... but the door clicks open and everything seems fine... for now."
  ....

- **Show the collateral damage.**
  "The Minotaur Wrecker barrels into the street, shattering a vegetable cart, sending cabbages flying and knocking the merchant into the wall."
  ....

- **Clear a temporary condition or effect.**
  "The guard cuts through the vines that are holding her legs in place. She looks around to find her next target and raises her sword."
  ....

- **Shift the environment.**
  "As soon as you cross, the ancient rope bridge snaps, leaving you stranded."
  ....

- **Spotlight an adversary.**
  "As the Skeleton Dredge shambles forward to strike you, you see the two others on their flank turn their attention toward you as well."
  ....

- **Capture someone or something important.**
  "The thief slides past you and jumps into the cart, grabbing the idol from the seat and stuffing it into their pouch."
  ....

- **Use a PC's backstory against them.**
  "Your mentor sighs, drawing their blade. 'I wish it didn't come to this, child. But you still don't understand what sacrifices are required to maintain the peace.'"
  ....

- **Take away an opportunity permanently.**
  "The door slams shut, cutting you off from the vault as the temple continues to collapse. You'll need to find another exit if you want to make it out alive."

■ AGILE SCOUT
(Fox, Mouse, Weasel, etc.)

Agility +1 │ Evasion +2
Melee Agility d4 phy

Gain advantage on: deceive, locate, sneak

Agile: Your movement is silent, and you can **spend a Hope** to move up to Far range without rolling.

Fragile: When you take Major or greater damage, you drop out of Beastform.

■ HOUSEHOLD FRIEND
(Cat, Dog, Rabbit, etc.)

Instinct +1 │ Evasion +2
Melee Instinct d6 phy

Gain advantage on: climb, locate, protect

Companion: When you Help an Ally, you can roll a **d8** as your advantage die.

Fragile: When you take Major or greater damage, you drop out of Beastform.

■ NIMBLE GRAZER
(Deer, Gazelle, Goat, etc.)

Agility +1 │ Evasion +3
Melee Agility d6 phy

Gain advantage on: leap, sneak, sprint

Elusive Prey: When an attack roll against you would succeed, you can **mark a Stress** and roll a **d4**. Add the result to your Evasion against this attack.

Fragile: When you take Major or greater damage, you drop out of Beastform.

■ PACK PREDATOR
(Coyote, Hyena, Wolf, etc.)

Strength +2 │ Evasion +1
Melee Strength d8+2 phy

Gain advantage on: attack, sprint, track

Hobbling Strike: When you succeed on an attack against a target within Melee range, you can **mark a Stress** to make the target temporarily *Vulnerable*.

Pack Hunting: When you succeed on an attack against the same target as an ally who acts immediately before you, add a **d8** to your damage roll.

■ AQUATIC SCOUT
(Eel, Fish, Octopus, etc.)

Agility +1 │ Evasion +2
Melee Agility d4 phy

Gain advantage on: navigate, sneak, swim

Aquatic: You can breathe and move naturally underwater.

Fragile: When you take Major or greater damage, you drop out of Beastform.

■ STALKING ARACHNID
(Tarantula, Wolf Spider, etc.)

Finesse +1 │ Evasion +2
Melee Finesse d6+1 phy

Gain advantage on: attack, climb, sneak

Venomous Bite: When you succeed on an attack against a target within Melee range, the target becomes temporarily *Poisoned*. A *Poisoned* creature takes **1d10** direct physical damage each time they act.

Webslinger: You can create a strong web material useful for both adventuring and battle. The web is resilient enough to support one creature. You can temporarily *Restrain* a target within Close range by succeeding on a Finesse Roll against them.

■ ARMORED SENTRY
(Armadillo, Pangolin, Turtle, etc.)

Strength +1 │ Evasion +1
Melee Strength d8+2 phy

Gain advantage on: dig, locate, protect

Armored Shell: Your hardened exterior gives you resistance to physical damage. Additionally, **mark an Armor Slot** to retract into your shell. While in your shell, physical damage is reduced by a number equal to your Armor Score (after applying resistance), but you can't perform other actions without leaving this form.

Cannonball: **Mark a Stress** to allow an ally to throw or launch you at an adversary. To do so, the ally makes an attack roll using Agility or Strength (their choice) against a target within Close range. On a success, the adversary takes **d12+2** physical damage using the thrower's Proficiency. You can **spend a Hope** to target an additional adversary within Very Close range of the first. The second target takes half the damage dealt to the first target.

■ POWERFUL BEAST
(Bear, Bull, Moose, etc.)

Strength +1 │ Evasion +3
Melee Strength d10+4 phy

Gain advantage on: navigate, protect, scare

Rampage: When you roll a 1 on a damage die, you can roll a **d10** and add the result to the damage roll. Additionally, before you make an attack roll, you can **mark a Stress** to gain a +1 bonus to your Proficiency for that attack.

Thick Hide: You gain a +2 bonus to your damage thresholds.

■ MIGHTY STRIDER
(Camel, Horse, Zebra, etc.)

Agility +1 │ Evasion +2
Melee Agility d8+1 phy

Gain advantage on: leap, navigate, sprint

Carrier: You can carry up to two willing allies with you when you move.

Trample: **Mark a Stress** to move up to Close range in a straight line and make an attack against all targets within Melee range of the line. Targets you succeed against take **d8+1** physical damage using your Proficiency and are temporarily *Vulnerable*.

■ STRIKING SERPENT
(Cobra, Rattlesnake, Viper, etc.)

Finesse +1 │ Evasion +2
Very Close Finesse d8+4 phy

Gain advantage on: climb, deceive, sprint

Venomous Strike: Make an attack against any number of targets within Very Close range. On a success, a target is temporarily *Poisoned*. A *Poisoned* creature takes **1d10** physical direct damage each time they act.

Warning Hiss: **Mark a Stress** to force any number of targets within Melee range to move back to Very Close range.

■ POUNCING PREDATOR
(Cheetah, Lion, Panther, etc.)

Instinct +1 │ Evasion +3
Melee Instinct d8+6 phy

Gain advantage on: attack, climb, sneak

Fleet: **Spend a Hope** to move up to Far range without rolling.

Takedown: **Mark a Stress** to move into Melee range of a target and make an attack roll against them. On a success, you gain a +2 bonus to your Proficiency for this attack and the target must mark a Stress.

■ WINGED BEAST
(Hawk, Owl, Raven, etc.)

Finesse +1 │ Evasion +3
Melee Finesse d4+2 phy

Gain advantage on: deceive, locate, scare

Bird's-Eye View: You can fly at will. Once per rest while you are airborne, you can ask the GM a question about the scene below you without needing to roll. The first time a character makes a roll to act on this information, they gain advantage on the roll.

Hollow Bones: You gain a −2 penalty to your damage thresholds.

DRUID
BEASTFORM

TIER 3

■ GREAT PREDATOR
(Dire Wolf, Velociraptor, Sabertooth Tiger, etc.)

Strength +2 │ Evasion +2
Melee Strength d12+8 phy

Gain advantage on: attack, sneak, sprint

Carrier: You can carry up to two willing allies with you when you move.

Vicious Maul: When you succeed on an attack against a target, you can **spend a Hope** to make them temporarily *Vulnerable* and gain a +1 bonus to your Proficiency for this attack.

■ MIGHTY LIZARD
(Alligator, Crocodile, Gila Monster, etc.)

Instinct +2 │ Evasion +1
Melee Instinct d10+7 phy

Gain advantage on: attack, sneak, track

Physical Defense: You gain a +3 bonus to your damage thresholds.

Snapping Strike: When you succeed on an attack against a target within Melee range, you can **spend a Hope** to clamp that opponent in your jaws, making them temporarily *Restrained* and *Vulnerable.*

■ GREAT WINGED BEAST
(Giant Eagle, Falcon, etc.)

Finesse +2 │ Evasion +3
Melee Finesse d8+6 phy

Gain advantage on: deceive, distract, locate

Bird's-Eye View: You can fly at will. Once per rest while you are airborne, you can ask the GM a question about the scene below you without needing to roll. The first time a character makes a roll to act on this information, they gain advantage on the roll.

Carrier: You can carry up to two willing allies with you when you move.

■ AQUATIC PREDATOR
(Dolphin, Orca, Shark etc.)

Agility +2 │ Evasion +4
Melee Agility d10+6 phy

Gain advantage on: attack, swim, track

Aquatic: You can breathe and move naturally underwater.

Vicious Maul: When you succeed on an attack against a target, you can **spend a Hope** to make them temporarily *Vulnerable* and gain a +1 bonus to your Proficiency for this attack.

■ LEGENDARY BEAST
(Upgraded Tier 1 Options)

Evolved: Pick a Tier 1 Beastform option and become a larger, more powerful version of that creature. While you're in this form, you retain all traits and features from the original form and gain the following bonuses:

- A +6 bonus to damage rolls
- A +1 bonus to the trait used by this form
- A +2 bonus to Evasion

■ LEGENDARY HYBRID
(Griffon, Sphinx, etc.)

Strength +2 │ Evasion +3
Melee Strength d10+8

Hybrid Features: To transform into this creature, **mark an additional Stress**. Choose any two Beastform options from Tiers 1–2. Choose a total of four advantages and two features from those options.

TIER 4

■ MASSIVE BEHEMOTH
(Elephant, Mammoth, Rhinoceros, etc.)

Strength +3 │ Evasion +1
Melee Strength d12+12 phy

Gain advantage on: locate, protect, scare, sprint

Carrier: You can carry up to four willing allies with you when you move.

Demolish: **Spend a Hope** to move up to Far range in a straight line and make an attack against all targets within Melee range of the line. Targets you succeed against take **d8+10** physical damage using your Proficiency and are temporarily *Vulnerable*.

Undaunted: You gain a +2 bonus to all your damage thresholds.

■ TERRIBLE LIZARD
(Brachiosaurus, Tyrannosaurus, etc.)

Strength +3 │ Evasion +2
Melee Strength d12+10 phy

Gain advantage on: attack, deceive, scare, track

Devastating Strikes: When you deal Severe damage to a target within Melee range, you can **mark a Stress** to force them to mark an additional Hit Point.

Massive Stride: You can move up to Far range without rolling. You ignore rough terrain (at the GM's discretion) due to your size.

■ MYTHIC AERIAL HUNTER
(Dragon, Pterodactyl, Roc, Wyvern, etc.)

Finesse +3 │ Evasion +4
Melee Finesse d10+11 phy

Gain advantage on: attack, deceive, locate, navigate

Carrier: You can carry up to three willing allies with you when you move.

Deadly Raptor: You can fly at will and move up to Far range as part of your action. When you move in a straight line into Melee range of a target from at least Close range and make an attack against that target in the same action, you can reroll all damage dice that rolled a result lower than your Proficiency.

■ EPIC AQUATIC BEAST
(Giant Squid, Whale, etc.)

Agility +3 │ Evasion +3
Melee Agility d10+10 phy

Gain advantage on: locate, protect, scare, track

Ocean Master: You can breathe and move naturally underwater. When you succeed on an attack against a target within Melee range, you can temporarily *Restrain* them.

Unyielding: When you would mark an Armor Slot, roll a **d6**. On a result of 5 or higher, reduce the severity by one threshold without marking an Armor Slot.

■ MYTHIC BEAST
(Upgraded Tier 1 or Tier 2 Options)

Evolved: Pick a Tier 1 or Tier 2 Beastform option and become a larger, more powerful version of that creature. While you're in this form, you retain all traits and features from the original form and gain the the following bonuses:

- A +9 bonus to damage rolls
- A +2 bonus to the trait used by this form
- A +3 bonus to Evasion
- Your damage die increases by one size (d6 becomes d8, d8 becomes d10, etc.)

■ MYTHIC HYBRID
(Chimera, Cockatrice, Manticore, etc.)

Strength +3 │ Evasion +2
Strength Melee d12+10 phy

Hybrid Features: To transform into this creature, **mark 2 additional Stress**. Choose any three Beastform options from Tiers 1–3. Choose a total of five advantages and three features from those options.

RANGER
COMPANION

COMPANION NAME

Work with the GM to decide what kind of animal you have as your companion. Give them a name and draw or attach a picture of them in the space above. Then create two Experiences for your companion based on their training and the history you have together. Finally, describe their method of dealing damage (their standard attack) and record it in the "Attack & Damage" section. Their damage starts at d6 and their range starts at Melee.

COMPANION EXPERIENCE

Start with +2 in two Experiences. Whenever you gain a new Experience, your companion also gains one. All new Experiences start at +2.

Example Companion Experiences

Bold Distraction, Expert Climber, Fetch, Friendly, Guardian of the Forest, Horrifying, Intimidating, Loyal Until the End, Navigation, Nimble, Nobody Left Behind, On High Alert, Protective, Royal Companion, Scout, Service Animal, Trusted Mount, Vigilant, We Always Find Them, You Can't Hit What You Can't Find

Make a **Spellcast Roll** to connect with your companion and command them to take action. **Spend a Hope** to add an applicable Companion Experience to the roll. On a success with Hope, if your next action builds on their success, you gain advantage on the roll.

ATTACK & DAMAGE

Standard Attack

○ d6   ○ d8

Range

○ d10   ○ d12

When you command your companion to attack, they gain any benefits that would normally only apply to you (such as the effects of "Ranger's Focus"). On a success, their damage roll uses your Proficiency and their damage die.

STRESS

STRESS: ☐ ☐ ☐ ☐ ☐ ☐

When your companion would take any amount of damage, they mark a Stress. When they mark their last Stress, they drop out of the scene (by hiding, fleeing, or a similar action). They remain unavailable until the start of your next long rest, where they return with 1 Stress cleared.

When you choose a downtime move that clears Stress on yourself, your companion clears an equal number of Stress.

TRAINING

When your character levels up, choose one available option for your companion from the following list and mark it here.

☐ ☐ ☐ **Intelligent:** Your companion gains a permanent +1 bonus to a Companion Experience of your choice.

☐ **Light in the Dark:** Use this as an additional Hope slot your character can mark.

☐ **Creature Comfort:** Once per rest, when you take time during a quiet moment to give your companion love and attention, you can gain a Hope or you can both clear a Stress.

☐ **Armored:** When your companion takes damage, you can **mark one of your Armor Slots** instead of marking one of their Stress.

☐ ☐ ☐ **Vicious:** Increase your companion's damage dice or range by one step (d6 to d8, Close to Far, etc.).

☐ ☐ ☐ **Resilient:** Your companion gains an additional Stress slot.

☐ **Bonded:** When you mark your last Hit Point, your companion rushes to your side to comfort you. Roll a number of **d6s** equal to the unmarked Stress slots they have and mark them. If any roll a 6, your companion helps you up. Clear your last Hit Point and return to the scene.

☐ ☐ ☐ **Aware:** Your companion gains a permanent +2 bonus to their Evasion.

AUGMENTS

☐☐ **Force:** +1 damage
3 gears, 2 lenses, 4 aluminum, 1 capacitor

☐☐ **Guard:** +1 Armor Score
3 wires, 2 silver, 2 platinum, 3 fuses

☐☐ **Converge:** +1 to attack rolls
4 coils, 2 crystals, 5 gold, 3 discs

☐ **Amplify:** On a successful attack, roll an additional damage die and drop the lowest result.
4 crystals, 4 cobalt, 4 copper, 4 capacitors

☐☐ **Scope:** Increase range by one step (Melee to Very Close, Close to Far, etc.).
5 lenses, 3 silver, 2 circuits, 2 relays

☐ **Deny:** +2 Armor Score
6 coils, 3 wire, 2 copper, 4 batteries

☐ **Target:** +2 to attack rolls
10 wires, 7 gold, 5 fuses, 5 circuits, 2 batteries

☐ **Split:** When you make an attack, mark a Stress to target another creature within range.
12 gears, 5 lenses, 15 aluminum, 9 relays

☐☐ **Fix:** When you deal Severe damage, clear a Hit Point.
6 coils, 4 wires, 1 crystal, 5 cobalt, 5 silver, 7 relays, 2 batteries

☐☐ **Scare:** When you critically succeed on an attack, the target must mark a Stress.
6 triggers, 8 copper, 9 aluminum, 10 discs

☐☐ **Sear:** +2 damage
11 triggers, 11 platinum, 11 circuits, 7 discs
Precompile: Tier 2

☐ **Absorb:** You can mark an additional Armor Slot against incoming damage.
26 gears, 13 gold, 15 relays, 8 batteries
Precompile: Tier 2

☐ **Kick:** On a successful attack, you can mark 2 Stress to force the target to mark an additional Hit Point.
33 triggers, 13 crystals, 23 cobalt, 16 discs
Precompile: Tier 2

☐ **Block:** +3 Armor Score; −1 Evasion
27 crystals, 67 aluminum, 33 relays, 4 capacitors, 5 batteries
Precompile: Tier 3

☐ **Zip:** Move up to Far range as part of an attack.
37 coils, 43 silver, 67 fuses, 12 capacitors
Precompile: Tier 3

☐☐ **Bury:** +3 damage
28 triggers, 28 circuits, 28 relays, 1 relic
Precompile: Tier 3

☐ **Follow:** Mark 2 Stress to reroll your attack.
75 gears, 67 lenses, 30 copper, 33 circuits
Precompile: Tier 4

☐ **Override:** Attack rolls have advantage.
63 wires, 71 gold, 58 discs, 5 relics
Precompile: Tier 4

HANDFULS   BAGS   CHEST

CLASS FEATURE

RALLY

Once per session, describe how you rally the party and give yourself and each of your allies a Rally Die. At level 1, your Rally Die is a **d6**. A PC can spend their Rally Die to roll it, adding the result to their action roll, reaction roll, damage roll, or to clear a number of Stress equal to the result. At the end of each session, clear all unspent Rally Dice.

At level 5, your Rally Die increases to a **d8**.

BARD
CHARACTER GUIDE

As a bard, you know how to get people to talk, bring attention to yourself, and use words or music to influence the world around you.

SUGGESTED TRAITS
0 Agility, −1 Strength, +1 Finesse,
0 Instinct, +2 Presence, +1 Knowledge

SUGGESTED PRIMARY WEAPON
Rapier - Presence Melee - d8 phy - One-Handed
Quick: When you make an attack, you can mark a Stress to target another creature within range.

SUGGESTED SECONDARY WEAPON
Small Dagger - Finesse Melee - d8 phy - One-Handed
Paired: +2 to primary weapon damage to targets within Melee range

SUGGESTED ARMOR
Gambeson Armor - Thresholds 5/11 - Score 3
Flexible: +1 to Evasion

INVENTORY
TAKE:
a torch, 50 feet of rope, basic supplies, and a handful of gold

THEN CHOOSE BETWEEN:
a Minor Health Potion **OR**
a Minor Stamina Potion

AND EITHER:
a romance novel **OR**
a letter never opened

THEN DECIDE WHAT YOU CARRY YOUR SPELLS IN:
songbook, journal, etc.

CHARACTER DESCRIPTION
Choose one (or more) from each line, or write your own description.

Clothes that are: extravagant, fancy, loud, oversized, ragged, sleek, wild

Eyes like: carnations, earth, endless ocean, fire, ivy, lilacs, night, seafoam, winter

Body that's: broad, carved, curvy, lanky, rotund, short, stocky, tall, thin, tiny, toned

Skin the color of: ashes, clover, falling snow, fine sand, obsidian, rose, sapphire, wisteria

Attitude like: a barkeep, a magician, a ringmaster, a rock star, a swashbuckler

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

Who from your community taught you to have such confidence in yourself?

You were in love once. Who did you adore, and how did they hurt you?

You've always looked up to another bard. Who are they, and why do you idolize them?

Then work with the GM to generate two starting Experiences for your character.

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

What made you realize we were going to be such good friends?

What do I do that annoys you?

Why do you grab my hand at night?

TIER 2: LEVELS 2–4

At level 2, gain an additional Experience at +2 and gain a +1 bonus to your Proficiency.

Choose two options from the list below and mark them.

☐☐☐ *Gain a +1 bonus to two unmarked character traits and mark them.*

☐☐ *Permanently gain one Hit Point slot.*

☐☐ *Permanently gain one Stress slot.*

☐ *Permanently gain a +1 bonus to two Experiences.*

☐ *Choose an additional domain card of your level or lower from a domain you have access to (up to level 4).*

☐ *Permanently gain a +1 bonus to your Evasion.*

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

TIER 3: LEVELS 5–7

At level 5, gain an additional Experience at +2 and clear all marks on character traits. Then gain a +1 bonus to your Proficiency.

Choose two options from the list below or any from the previous tier and mark them.

☐☐☐ *Gain a +1 bonus to two unmarked character traits and mark them.*

☐☐ *Permanently gain one Hit Point slot.*

☐☐ *Permanently gain one Stress slot.*

☐ *Permanently gain a +1 bonus to two Experiences.*

☐ *Choose an additional domain card of your level or lower from a domain you have access to (up to level 7).*

☐ *Permanently gain a +1 bonus to your Evasion.*

☐ *Take an upgraded subclass card. Then cross out the multiclass option for this tier.*

☐☐ *Increase your Proficiency by +1.*

☐☐ *Multiclass: Choose an additional class for your character, then cross out an unused "Take an upgraded subclass card" and the other multiclass option on this sheet.*

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

TIER 4: LEVELS 8–10

At level 8, gain an additional Experience at +2 and clear all marks on character traits. Then gain a +1 bonus to your Proficiency.

Choose two options from the list below or any from the previous tier and mark them.

☐☐☐ *Gain a +1 bonus to two unmarked character traits and mark them.*

☐☐ *Permanently gain one Hit Point slot.*

☐☐ *Permanently gain one Stress slot.*

☐ *Permanently gain a +1 bonus to two Experiences.*

☐ *Choose an additional domain card of your level or lower from a domain you have access to.*

☐ *Permanently gain a +1 bonus to your Evasion.*

☐ *Take an upgraded subclass card. Then cross out the multiclass option for this tier.*

☐☐ *Increase your Proficiency by +1.*

☐☐ *Multiclass: Choose an additional class for your character, then cross out an unused "Take an upgraded subclass card" and the other multiclass option on this sheet.*

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

Evolution: **Spend 3 Hope** to transform into Beastform without marking a Stress. When you do, choose one trait to raise by +1 until you drop out of that Beastform.

EXPERIENCE

GOLD

HANDFULS

BAGS

CHEST

CLASS FEATURE

BEASTFORM

Mark a Stress to magically transform into a creature of your tier or lower from the Beastform list. You can drop out of this form at any time. While transformed, you can't use weapons or cast spells from domain cards, but you can still use other features or abilities you have access to. Spells you cast before you transform stay active and last for their normal duration, and you can talk and communicate as normal. Additionally, you gain the Beastform's features, add their Evasion bonus to your Evasion, and use the trait specified in their statistics for your attack. While you're in a Beastform, your armor becomes part of your body and you mark Armor Slots as usual; when you drop out of a Beastform, those marked Armor Slots remain marked. If you mark your last Hit Point, you automatically drop out of this form.

WILDTOUCH

You can perform harmless, subtle effects that involve nature—such as causing a flower to rapidly grow, summoning a slight gust of wind, or starting a campfire—at will.

DRUID
CHARACTER GUIDE

As a druid, you are a force of nature, preserving the balance of life and death by channeling the wilds themselves through you.

SUGGESTED TRAITS
+1 Agility, 0 Strength, +1 Finesse,
+2 Instinct, −1 Presence, 0 Knowledge

SUGGESTED PRIMARY WEAPON
Shortstaff - Instinct Close - d8+1 mag - One-Handed

SUGGESTED SECONDARY WEAPON
Round Shield - Strength Melee - d4 phy - One-Handed
Protective: +1 to Armor Score

SUGGESTED ARMOR
Leather Armor - Thresholds 6/13 - Score 3

INVENTORY
TAKE:
a torch, 50 feet of rope, basic supplies,
and a handful of gold

THEN CHOOSE BETWEEN:
a Minor Health Potion **OR**
a Minor Stamina Potion

AND EITHER:
a small bag of rocks and bones **OR**
a strange pendant found in the dirt

CHARACTER DESCRIPTION
Choose one (or more) from each line, or write your own description.

Clothes that are: camouflaged, grown, loose, natural, patchwork, regal, scraps

Eyes like: carnations, earth, endless ocean, fire, ivy, lilacs, night, seafoam, winter

Body that's: broad, carved, curvy, lanky, rotund, short, stocky, tall, thin, tiny, toned

Skin the color of: ashes, clover, falling snow, fine sand, obsidian, rose, sapphire, wisteria

Attitude like: a firecracker, a fox, a guide, a hippie, a witch

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

Why was the community you grew up in so reliant on nature and its creatures?

Who was the first wild animal you bonded with? Why did your bond end?

Who has been trying to hunt you down? What do they want from you?

Then work with the GM to generate two starting Experiences for your character.

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

What did you confide in me that makes me leap into danger for you every time?

What animal do I say you remind me of?

What affectionate nickname have you given me?

TIER 2: LEVELS 2–4

At level 2, gain an additional Experience at +2 and gain a +1 bonus to your Proficiency.

Choose two options from the list below and mark them.

- ☐☐☐ *Gain a +1 bonus to two unmarked character traits and mark them.*
- ☐☐ *Permanently gain one Hit Point slot.*

Frontline Tank: **Spend 3 Hope** to clear 2 Armor Slots.

EXPERIENCE

GOLD

HANDFULS   BAGS   CHEST

CLASS FEATURE

UNSTOPPABLE

Once per long rest, you can become *Unstoppable*. You gain an Unstoppable Die. At level 1, your Unstoppable Die is a **d4**. Place it on this sheet in the space provided, starting with the 1 value facing up. After you make a damage roll that deals 1 or more Hit Points to a target, increase the Unstoppable Die value by one. When the die's value would exceed its maximum value or when the scene ends, remove the die and drop out of *Unstoppable*. At level 5, your Unstoppable Die increases to a **d6**.

While *Unstoppable*, you gain the following benefits:

- You reduce the severity of physical damage by one threshold (Severe to Major, Major to Minor, Minor to None).
- You add the current value of the Unstoppable Die to your damage roll.
- You can't be *Restrained* or *Vulnerable*.

CLASS FEATURE

PRAYER DICE

At the beginning of each session, roll a number of **d4s** equal to your subclass's Spellcast trait and place them on this sheet in the space provided. These are your Prayer Dice. You can spend any number of Prayer Dice to aid yourself or an ally within Far range. You can use a spent die's value to reduce incoming damage, add to a roll's result after the roll is made, or gain Hope equal to the result. At the end of each session, clear all unspent Prayer Dice.

SERAPH
CHARACTER GUIDE

As a seraph, you've taken a vow to a god who helps you channel sacred arcane power to keep your party on their feet.

SUGGESTED TRAITS
0 Agility, +2 Strength, 0 Finesse,
+1 Instinct, +1 Presence, −1 Knowledge

SUGGESTED PRIMARY WEAPON
Hallowed Axe - Strength Melee - d8+1 mag -
One-Handed

SUGGESTED SECONDARY WEAPON
Round Shield - Strength Melee - d4 phy - One-Handed
Protective: +1 to Armor Score

SUGGESTED ARMOR:
Chainmail Armor - Thresholds 7/15 - Score 4
Heavy: −1 to Evasion

INVENTORY
TAKE:
a torch, 50 feet of rope, basic supplies,
and a handful of gold

THEN CHOOSE BETWEEN:
a Minor Health Potion **OR**
a Minor Stamina Potion

AND EITHER:
a bundle of offerings **OR**
a sigil of your god

CHARACTER DESCRIPTION
Choose one (or more) from each line, or write your own description.

Clothes that are: glowing, rippling, ornate, tight, modest, strange, natural

Eyes like: carnations, earth, endless ocean, fire, ivy, lilacs, night, seafoam, winter

Body that's: broad, carved, curvy, lanky, rotund, short, stocky, tall, thin, tiny, toned

Skin the color of: ashes, clover, falling snow, fine sand, obsidian, rose, sapphire, wisteria

Attitude like: an angel, a doctor, an evangelist, a monk, a priest

BACKGROUND QUESTIONS

Answer any of the following background questions. You can also create your own questions.

Which god did you devote yourself to? What incredible feat did they perform for you in a moment of desperation?

How did your appearance change after taking your oath?

In what strange or unique way do you communicate with your god?

Then work with the GM to generate two starting Experiences for your character.

CONNECTIONS

Ask your fellow players one of the following questions for their character to answer, or create your own questions.

What promise did you make me agree to, should you die on the battlefield?

Why do you ask me so many questions about my god?

You've told me to protect one member of our party above all others, even yourself. Who are they and why?

TIER 2: LEVELS 2–4

At level 2, gain an additional Experience at +2 and gain a +1 bonus to your Proficiency.

Choose two options from the list below and mark them.

- ☐☐☐ Gain a +1 bonus to two unmarked character traits and mark them.
- ☐☐ Permanently gain one Hit Point slot.
- ☐☐ Permanently gain one Stress slot.
- ☐ Permanently gain a +1 bonus to two Experiences.
- ☐ Choose an additional domain card of your level or lower from a domain you have access to (up to level 4).
- ☐ Permanently gain a +1 bonus to your Evasion.

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

TIER 3: LEVELS 5–7

At level 5, gain an additional Experience at +2 and clear all marks on character traits. Then gain a +1 bonus to your Proficiency.

Choose two options from the list below or any from the previous tier and mark them.

- ☐☐☐ Gain a +1 bonus to two unmarked character traits and mark them.
- ☐☐ Permanently gain one Hit Point slot.
- ☐☐ Permanently gain one Stress slot.
- ☐ Permanently gain a +1 bonus to two Experiences.
- ☐ Choose an additional domain card of your level or lower from a domain you have access to (up to level 7).
- ☐ Permanently gain a +1 bonus to your Evasion.
- ☐ Take an upgraded subclass card. Then cross out the multiclass option for this tier.
- ☐☐ Increase your Proficiency by +1.
- ☐☐ Multiclass: Choose an additional class for your character, then cross out an unused "Take an upgraded subclass card" and the other multiclass option on this sheet.

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

TIER 4: LEVELS 8–10

At level 8, gain an additional Experience at +2 and clear all marks on character traits. Then gain a +1 bonus to your Proficiency.

Choose two options from the list below or any from the previous tier and mark them.

- ☐☐☐ Gain a +1 bonus to two unmarked character traits and mark them.
- ☐☐ Permanently gain one Hit Point slot.
- ☐☐ Permanently gain one Stress slot.
- ☐ Permanently gain a +1 bonus to two Experiences.
- ☐ Choose an additional domain card of your level or lower from a domain you have access to.
- ☐ Permanently gain a +1 bonus to your Evasion.
- ☐ Take an upgraded subclass card. Then cross out the multiclass option for this tier.
- ☐☐ Increase your Proficiency by +1.
- ☐☐ Multiclass: Choose an additional class for your character, then cross out an unused "Take an upgraded subclass card" and the other multiclass option on this sheet.

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

CHARACTER GUIDE

*As a sorcerer, you were born with innate magical power,
and you've learned how to wield that power to get what you want.*

SUGGESTED TRAITS
0 Agility, −1 Strength, +1 Finesse,
+2 Instinct, +1 Presence, 0 Knowledge

SUGGESTED PRIMARY WEAPON
Dualstaff - Instinct Far - d6+3 mag - Two-Handed

SUGGESTED ARMOR
Gambeson Armor - Thresholds 5/11 - Score 3
Flexible: +1 to Evasion

INVENTORY
TAKE:
a torch, 50 feet of rope, basic supplies,
and a handful of gold

THEN CHOOSE BETWEEN:
a Minor Health Potion **OR**
a Minor Stamina Potion

AND EITHER:
a whispering orb **OR**
a family heirloom

CHARACTER DESCRIPTION
**Choose one (or more) from each line,
or write your own description.**

Clothes that are: always moving, flamboyant,
inconspicuous, layered, ornate, tight

Eyes like: carnations, earth, endless ocean, fire,
ivy, lilacs, night, seafoam, winter

Body that's: broad, carved, curvy, lanky, rotund,
short, stocky, tall, thin, tiny, toned

Skin the color of: ashes, clover, falling snow,
fine sand, obsidian, rose, sapphire, wisteria

Attitude like: a celebrity, a commander,
a politician, a prankster, a wolf in sheep's clothing

BACKGROUND QUESTIONS

*Answer any of the following background questions.
You can also create your own questions.*

What did you do that made the people in your community wary of you?

**What mentor taught you to control your untamed magic, and
why are they no longer able to guide you?**

**You have a deep fear you hide from everyone.
What is it, and why does it scare you?**

Then work with the GM to generate two starting Experiences for your character.

CONNECTIONS

*Ask your fellow players one of the following questions for
their character to answer, or create your own questions.*

Why do you trust me so deeply?

What did I do that makes you cautious around me?

Why do we keep our shared past a secret?

TIER 2: LEVELS 2–4

*At level 2, gain an additional
Experience at +2 and gain a
+1 bonus to your Proficiency.*

Choose two options from the list below and
mark them.

WIZARD
CHARACTER GUIDE

As a wizard, you've become familiar with the arcane through the relentless study of grimoires and other tools of magic.

SUGGESTED TRAITS
−1 Agility, 0 Strength, 0 Finesse,
+1 Instinct, +1 Presence, +2 Knowledge

SUGGESTED PRIMARY WEAPON
Greatstaff - Knowledge Very Far - d6 mag - Two-Handed
Powerful: On a successful attack, roll an additional damage die and discard the lowest result.

SUGGESTED ARMOR
Leather Armor - Thresholds 6/13 - Score 3

INVENTORY
TAKE:
a torch, 50 feet of rope, basic supplies, and a handful of gold

THEN CHOOSE BETWEEN:
a Minor Health Potion **OR** a Minor Stamina Potion

AND EITHER:
a book you're trying to translate **OR** a tiny, harmless elemental pet

THEN DECIDE WHAT YOU CARRY YOUR SPELLS IN:
large tomes, tarot cards, etc.

CHARACTER DESCRIPTION
Choose one (or more) from each line, or write your own description.

Clothes that are: beautiful, clean, common, flowing, layered, patchwork, tight

Eyes like: carnations, earth, endless ocean, fire, ivy, lilacs, night, seafoam, winter

Body that's: broad, carved, curvy, lanky, rotund, short, stocky, tall, thin, tiny, toned

Skin the color of: ashes, clover, falling snow, fine sand, obsidian, rose, sapphire, wisteria

Attitude like: an eccentric, a librarian, a lit fuse, a philosopher, a professor

BACKGROUND QUESTIONS
Answer any of the following background questions. You can also create your own questions.

What responsibilities did your community once count on you for? How did you let them down?

You've spent your life searching for a book or object of great significance. What is it, and why is it so important to you?

You have a powerful rival. Who are they, and why are you so determined to defeat them?

Then work with the GM to generate two starting Experiences for your character.

CONNECTIONS
Ask your fellow players one of the following questions for their character to answer, or create your own questions.

What favor have I asked of you that you're not sure you can fulfill?

What weird hobby or strange fascination do we both share?

What secret about yourself have you entrusted only to me?

TIER 2: LEVELS 2–4

At level 2, gain an additional Experience at +2 and gain a +1 bonus to your Proficiency.

Choose two options from the list below and mark them.

- ☐☐☐ *Gain a +1 bonus to two unmarked character traits and mark them.*
- ☐☐ *Permanently gain one Hit Point slot.*
- ☐☐ *Permanently gain one Stress slot.*
- ☐ *Permanently gain a +1 bonus to two Experiences.*

Update your level and adjust your damage thresholds accordingly. Take an additional domain card of your level or lower from a domain you have access to.

RUNE WARD

SPELL — 1 · 0⚡

You have a deeply personal trinket that can be infused with protective magic and held as a ward by you or an ally. Describe what it is and why it's important to you. The ward's holder can spend a Hope to reduce incoming damage by **1d8**.

If the Ward Die result is 8, the ward's power ends after it reduces damage this turn. It can be recharged for free on your next rest.

Laura Marie Neal — DH Core 082/270 | Daggerheart © Darrington Press 2025

UNLEASH CHAOS

SPELL — 1 · 1⚡

At the beginning of a session, place a number of tokens equal to your Spellcast trait on this card.

Make a **Spellcast Roll** against a target within Far range and spend any number of tokens to channel raw energy from within yourself to unleash against them. On a success, roll a number of **d10s** equal to the tokens you spent and deal that much magic damage to the target. **Mark a Stress** to replenish this card with tokens (up to your Spellcast trait).

At the end of each session, clear all unspent tokens.

Ernanda Souza — DH Core 083/270 | Daggerheart © Darrington Press 2025
WALL WALK

SPELL — 1 · 1⚡

Spend a Hope to allow a creature you can touch to climb on walls and ceilings as easily as walking on the ground. This lasts until the end of the scene or you cast Wall Walk again.

Julia Metzger — DH Core 084/270 | Daggerheart © Darrington Press 2025
GET BACK UP

ABILITY — 1 · 1⚡

When you take Severe damage, you can **mark a Stress** to reduce the severity by one threshold.

Jenny Tan — DH Core 103/270 | Daggerheart © Darrington Press 2025

NOT GOOD ENOUGH

ABILITY — 1 · 1⚡

When you roll your damage dice, you can reroll any 1s or 2s.

Juan Salvador Almencion — DH Core 104/270 | Daggerheart © Darrington Press 2025

WHIRLWIND

ABILITY — 1 · 0⚡

When you make a successful attack against a target within Very Close range, you can **spend a Hope** to use the attack against all other targets within Very Close range. All additional adversaries you succeed against with this ability take half damage.

Mike Pape — DH Core 105/270 | Daggerheart © Darrington Press 2025
DEFT MANEUVERS

ABILITY — 1 · 0⚡

Once per rest, **mark a Stress** to sprint anywhere within Far range without making an Agility Roll to get there.

If you end this movement within Melee range of an adversary and immediately make an attack against them, gain a +1 bonus to the attack roll.

Tamara Osborn — DH Core 124/270 | Daggerheart © Darrington Press 2025

I SEE IT COMING

ABILITY — 1 · 1⚡

When you're targeted by an attack made from beyond Melee range, you can **mark a Stress** to roll a **d4** and gain a bonus to your Evasion equal to the result against the attack.

Mat Wilma — DH Core 125/270 | Daggerheart © Darrington Press 2025

UNTOUCHABLE

ABILITY — 1 · 1⚡

Gain a bonus to your Evasion equal to half your Agility.

Henry Peters — DH Core 126/270 | Daggerheart © Darrington Press 2025

BOOK OF AVA

GRIMOIRE

Power Push: Make a **Spellcast Roll** against a target within Melee range. On a success, they're knocked back to Far range and take **d10+2** magic damage using your Proficiency.

Tava's Armor: **Spend a Hope** to give a target you can touch a +1 bonus to their Armor Score until their next rest or you cast Tava's Armor again.

Ice Spike: Make a **Spellcast Roll (12)** to summon a large ice spike within Far range. If you use it as a weapon, make the Spellcast Roll against the target's Difficulty instead. On a success, deal **d6** physical damage using your Proficiency.

Laura Galli — DH Core 145/270 | Daggerheart © Darrington Press 2025

BOOK OF ILLIAT

GRIMOIRE

Slumber: Make a **Spellcast Roll** against a target within Very Close range. On a success, they're *Asleep* until they take damage or the GM spends a Fear on their turn to clear this condition.

Arcane Barrage: Once per rest, **spend any number of Hope** and shoot magical projectiles that strike a target of your choice within Close range. Roll a number of **d6s** equal to the Hope spent and deal that much magic damage to the target.

Telepathy: **Spend a Hope** to open a line of mental communication with one target you can see. This connection lasts until your next rest or you cast Telepathy again.

Ernanda Souza — DH Core 146/270 | Daggerheart © Darrington Press 2025
BOOK OF TYFAR

GRIMOIRE

Wild Flame: Make a **Spellcast Roll** against up to three adversaries within Melee range. Targets you succeed against take **2d6** magic damage and must mark a Stress as flames erupt from your hand.

Magic Hand: You conjure a magical hand with the same size and strength as your own within Far range.

Mysterious Mist: Make a **Spellcast Roll (13)** to cast a temporary thick fog that gathers in a stationary area within Very Close range. The fog heavily obscures this area and everything in it.

Kristina Carroll — DH Core 147/270 | Daggerheart © Darrington Press 2025

DEFT DECEIVER

ABILITY

Spend a Hope to gain advantage on a roll to deceive or trick someone into believing a lie you tell them.

Simon Pape — DH Core 166/270 | Daggerheart © Darrington Press 2025
ENRAPTURE

SPELL

Make a **Spellcast Roll** against a target within Close range. On a success, they become temporarily *Enraptured*. While *Enraptured*, a target's attention is fixed on you, narrowing their field of view and drowning out any sound but your voice. Once per rest on a success, you can **mark a Stress** to force the *Enraptured* target to mark a Stress as well.

Letícia Freitas — DH Core 167/270 | Daggerheart © Darrington Press 2025
INSPIRATIONAL WORDS

ABILITY

Your speech is imbued with power. After a long rest, place a number of tokens on this card equal to your Presence. When you speak with an ally, you can spend a token from this card to give them one benefit from the following options:

• Your ally clears a Stress.
• Your ally clears a Hit Point.
• Your ally gains a Hope.

When you take a long rest, clear all unspent tokens.

Mat Wilma — DH Core 168/270 | Daggerheart © Darrington Press 2025
PICK AND PULL

ABILITY

You have advantage on action rolls to pick nonmagical locks, disarm nonmagical traps, or steal items from a target (either through stealth or by force).

Benjamin Ee — DH Core 187/270 | Daggerheart © Darrington Press 2025
RAIN OF BLADES

SPELL

Spend a Hope to make a **Spellcast Roll** and conjure throwing blades that strike out at all targets within Very Close range. Targets you succeed against take **d8+2** magic damage using your Proficiency.

If a target you hit is *Vulnerable*, they take an extra **1d8** damage.

Linda Lithén — DH Core 188/270 | Daggerheart © Darrington Press 2025
UNCANNY DISGUISE

SPELL

When you have a few minutes to prepare, you can **mark a Stress** to don the facade of any humanoid you can picture clearly in your mind. While disguised, you have advantage on Presence Rolls to avoid scrutiny.

Place a number of tokens equal to your Spellcast trait on this card. When you take an action while disguised, spend a token from this card. After the action that spends the last token is resolved, the disguise drops.

Linda Lithén — DH Core 189/270 | Daggerheart © Darrington Press 2025

GIFTED TRACKER

1 — **0⚡**
ABILITY

When you're tracking a specific creature or group of creatures based on signs of their passage, you can **spend any number of Hope** and ask the GM that many questions from the following list.

• What direction did they go?
• How long ago did they pass through?
• What were they doing in this location?
• How many of them were here?

When you encounter creatures you've tracked in this way, gain a +1 bonus to your Evasion against them.

NATURE'S TONGUE

1 — **0⚡**
ABILITY

You can speak the language of the natural world. When you want to speak to the plants and animals around you, make an **Instinct Roll (12)**. On a success, they'll give you the information they know. On a roll with Fear, their knowledge might be limited or come at a cost.

Additionally, before you make a Spellcast Roll while within a natural environment, you can **spend a Hope** to gain a +2 bonus to the roll.

VICIOUS ENTANGLE

1 — **1⚡**
SPELL

Make a **Spellcast Roll** against a target within Far range. On a success, roots and vines reach out from the ground, dealing **1d8+1** physical damage and temporarily *Restraining* the target.

Additionally on a success, you can **spend a Hope** to temporarily *Restrain* another adversary within Very Close range of your target.

BOLT BEACON

1 — **1⚡**
SPELL

Make a **Spellcast Roll** against a target within Far range. On a success, **spend a Hope** to send a bolt of shimmering light toward them, dealing **d8+2** magic damage using your Proficiency. The target becomes temporarily *Vulnerable* and glows brightly until this condition is cleared.

MENDING TOUCH

1 — **1⚡**
SPELL

You lay your hands upon a creature and channel healing magic to close their wounds. When you can take a few minutes to focus on the target you're helping, you can **spend 2 Hope** to clear a Hit Point or a Stress on them.

Once per long rest, when you spend this healing time learning something new about them or revealing something about yourself, you can clear 2 Hit Points or 2 Stress on them instead.

REASSURANCE

1 — **0⚡**
ABILITY

Once per rest, after an ally attempts an action roll but before the consequences take place, you can offer assistance or words of support. When you do, your ally can reroll their dice.

BARE BONES

1 — **0⚡**
ABILITY

When you choose not to equip armor, you have a base Armor Score of 3 + your Strength and use the following as your base damage thresholds:

• *Tier 1:* 9/19
• *Tier 2:* 11/24
• *Tier 3:* 13/31
• *Tier 4:* 15/38

FORCEFUL PUSH

1 — **0⚡**
ABILITY

Make an attack with your primary weapon against a target within Melee range. On a success, you deal damage and knock them back to Close range. On a success with Hope, add a **d6** to your damage roll.

Additionally, you can **spend a Hope** to make them temporarily *Vulnerable*.

I AM YOUR SHIELD

1 — **1⚡**
ABILITY

When an ally within Very Close range would take damage, you can **mark a Stress** to stand in the way and make yourself the target of the attack instead. When you take damage from this attack, you can mark any number of Armor Slots.

CINDER GRASP

2 ⋇ | **1** ⚡

Make a **Spellcast Roll** against a target within Melee range. On a success, the target instantly bursts into flames, takes **1d20+3** magic damage, and is temporarily lit *On Fire*.

When a creature acts while *On Fire*, they must take an extra **2d6** magic damage if they are still *On Fire* at the end of their action.

SPELL

FLOATING EYE

2 ✦ | **0** ⚡

Spend a Hope to create a single, small floating orb that you can move anywhere within Very Far range. While this spell is active, you can see through the orb as though you're looking out from its position. You can transition between using your own senses and seeing through the orb freely. If the orb takes damage or moves out of range, the spell ends.

SPELL

A SOLDIER'S BOND

2 ↗ | **1** ⚡

Once per long rest, when you compliment someone or ask them about something they're good at, you can both gain 3 Hope.

ABILITY

RECKLESS

2 ↗ | **1** ⚡

Mark a Stress to gain advantage on an attack.

ABILITY

FEROCITY

2 ⚔ | **2** ⚡

When you cause an adversary to mark 1 or more Hit Points, you can **spend 2 Hope** to increase your Evasion by the number of Hit Points they marked. This bonus lasts until after the next attack made against you.

ABILITY

STRATEGIC APPROACH

2 ⚔ | **1** ⚡

After a long rest, place a number of tokens equal to your Knowledge on this card (minimum 1). The first time you move within Close range of an adversary and make an attack against them, you can spend one token to choose one of the following options:

- You make the attack with advantage.
- You clear a Stress on an ally within Melee range of the adversary.
- You add a **d8** to your damage roll.

When you take a long rest, clear all unspent tokens.

ABILITY

BOOK OF SITIL

2 | **2** ⚡

Adjust Appearance: You magically shift your appearance and clothing to avoid recognition.

Parallela: Spend 2 Hope to cast this spell on yourself or an ally within Close range. The next time the target makes an attack, they can hit an additional target within range that their attack roll would succeed against. You can only hold this spell on one creature at a time.

Illusion: Make a **Spellcast Roll (14)**. On a success, create a temporary visual illusion no larger than you within Close range that lasts for as long as you look at it. It holds up to scrutiny until an observer is within Melee range.

GRIMOIRE

BOOK OF VAGRAS

2 | **2** ⚡

Runic Lock: Make a **Spellcast Roll (15)** on an object you're touching that can close (such as a lock, chest, or box). Once per rest on a success, you can lock the object so it can only be opened by creatures of your choice. Someone with access to magic and an hour of time to study the spell can break it.

Arcane Door: When you have no adversaries within Melee range, make a **Spellcast Roll (13)**. On a success, **spend a Hope** to create a portal from where you are to a point within Far range you can see. It closes once a creature has passed through it.

Reveal: Make a **Spellcast Roll**. If there is anything magically hidden within Close range the roll would succeed against, it is revealed.

GRIMOIRE

TELL NO LIES

2 ✶ | **1** ⚡

Make a **Spellcast Roll** against a target within Very Close range. On a success, they can't lie to you while they remain within Close range, but they are not compelled to speak. If you ask them a question and they refuse to answer, they must mark a Stress and the effect ends. The target is typically unaware this spell has been cast on them until it causes them to utter the truth.

SPELL

TROUBLEMAKER

2 | **2⚡**

ABILITY

When you taunt or provoke a target within Far range, make a **Presence Roll** against them. Once per rest on a success, roll a number of **d4s** equal to your Proficiency. The target must mark Stress equal to the highest result rolled.

Anthony Jones | DH Core 170/270 | Daggerheart © Darrington Press 2025

MIDNIGHT SPIRIT

2 | **1⚡**

SPELL

Spend a Hope to summon a humanoid-sized spirit that can move or carry things for you until your next rest.

You can also send it to attack an adversary. When you do, make a **Spellcast Roll** against a target within Very Far range. On a success, the spirit moves into Melee range with that target. Roll a number of **d6s** equal to your Spellcast trait and deal that much magic damage to the target. The spirit then dissipates. You can only have one spirit at a time.

Reiko Murakami | DH Core 190/270 | Daggerheart © Darrington Press 2025

SHADOWBIND

2 | **0⚡**

SPELL

Make a **Spellcast Roll** against all adversaries within Very Close range. Targets you succeed against are temporarily *Restrained* as their shadow binds them in place.

Adam Barker | DH Core 191/270 | Daggerheart © Darrington Press 2025

CONJURE SWARM

2 | **1⚡**

SPELL

Tekaira Armored Beetles: **Mark a Stress** to conjure armored beetles that encircle you. When you next take damage, reduce the severity by one threshold. You can **spend a Hope** to keep the beetles conjured after taking damage.

Fire Flies: Make a **Spellcast Roll** against all adversaries within Close range. **Spend a Hope** to deal **2d8+3** magic damage to targets you succeeded against.

Jen Estirdalin Pattison | DH Core 211/270 | Daggerheart © Darrington Press 2025

NATURAL FAMILIAR

2 | **1⚡**

SPELL

Spend a Hope to summon a small nature spirit or forest critter to your side until your next rest, you cast Natural Familiar again, or the familiar is targeted by an attack. If you **spend an additional Hope**, you can summon a familiar that flies. You can communicate with them, make a **Spellcast Roll** to command them to perform simple tasks, and **mark a Stress** to see through their eyes.

When you deal damage to an adversary within Melee range of your familiar, you add a **d6** to your damage roll.

Leesha Hannigan | DH Core 212/270 | Daggerheart © Darrington Press 2025

FINAL WORDS

2 | **1⚡**

SPELL

You can infuse a corpse with a moment of life to speak with it. Make a **Spellcast Roll (13)**. On a success with Hope, the corpse answers up to three questions. On a success with Fear, the corpse answers one question. The corpse answers truthfully, but it can't impart information it didn't know in life. On a failure, or once the corpse has finished answering your questions, the body turns to dust.

Bear Frymire | DH Core 232/270 | Daggerheart © Darrington Press 2025

HEALING HANDS

2 | **1⚡**

SPELL

Make a **Spellcast Roll (13)** and target a creature other than yourself within Melee range. On a success, **mark a Stress** to clear 2 Hit Points or 2 Stress on the target. On a failure, **mark a Stress** to clear a Hit Point or a Stress on the target. You can't heal the same target again until your next long rest.

Samantha Kung | DH Core 233/270 | Daggerheart © Darrington Press 2025

BODY BASHER

2 | **1⚡**

ABILITY

You use the full force of your body in a fight. On a successful attack using a weapon with a Melee range, gain a bonus to your damage roll equal to your Strength.

Ilya Royz | DH Core 253/270 | Daggerheart © Darrington Press 2025

BOLD PRESENCE

2 | **0⚡**

ABILITY

When you make a Presence Roll, you can **spend a Hope** to add your Strength to the roll.

Additionally, once per rest when you would gain a condition, you can describe how your bold presence aids you in the situation and avoid gaining the condition.

Bear Frymire | DH Core 254/270 | Daggerheart © Darrington Press 2025

COUNTERSPELL

3 ⚡2

SPELL

You can interrupt a magical effect taking place by making a reaction roll using your Spellcast trait. On a success, the effect stops and any consequences are avoided, and this card is placed in your vault.

Dominik Mayer — DH Core 087/270 | Daggerheart © Darrington Press 2025

FLIGHT

3 ⚡1

SPELL

Make a **Spellcast Roll (15)**. On a success, place a number of tokens equal to your Agility on this card (minimum 1). When you make an action roll while flying, spend a token from this card. After the action that spends the last token is resolved, you descend to the ground directly below you.

Samantha Kung — DH Core 088/270 | Daggerheart © Darrington Press 2025

SCRAMBLE

3 ⚡1

ABILITY

Once per rest, when a creature within Melee range would deal damage to you, you can avoid the attack and safely move out of Melee range of the enemy.

Ilya Royz — DH Core 108/270 | Daggerheart © Darrington Press 2025

VERSATILE FIGHTER

3 ⚡1

ABILITY

You can use a different character trait for an equipped weapon, rather than the trait the weapon calls for.

When you deal damage, you can **mark a Stress** to use the maximum result of one of your damage dice instead of rolling it.

KarrahE — DH Core 109/270 | Daggerheart © Darrington Press 2025

BRACE

3 ⚡1

ABILITY

When you mark an Armor Slot to reduce incoming damage, you can **mark a Stress** to mark an additional Armor Slot.

Rick Hefner — DH Core 129/270 | Daggerheart © Darrington Press 2025

TACTICIAN

3 ⚡1

ABILITY

When you Help an Ally, they can spend a Hope to add one of your Experiences to their roll alongside your advantage die.

When making a Tag Team Roll, you can roll a **d20** as your Hope Die.

Kristina Gehrmann — DH Core 130/270 | Daggerheart © Darrington Press 2025

BOOK OF KORVAX

3 ⚡2

GRIMOIRE

Levitation: Make a **Spellcast Roll** to temporarily lift a target you can see up into the air and move them within Close range of their original position.

Recant: **Spend a Hope** to force a target within Melee range to make a Reaction Roll (15). On a failure, they forget the last minute of your conversation.

Rune Circle: **Mark a Stress** to create a temporary magical circle on the ground where you stand. All adversaries within Melee range, or who enter Melee range, take **2d12+4** magic damage and are knocked back to Very Close range.

Rick Hefner — DH Core 150/270 | Daggerheart © Darrington Press 2025

BOOK OF NORAI

3 ⚡2

GRIMOIRE

Mystic Tether: Make a **Spellcast Roll** against a target within Far range. On a success, they're temporarily *Restrained* and must mark a Stress. If you target a flying creature, this spell grounds and temporarily *Restrains* them.

Fireball: Make a **Spellcast Roll** against a target within Very Far range. On a success, hurl a sphere of fire toward them that explodes on impact. The target and all creatures within Very Close range of them must make a Reaction Roll (13). Targets who fail take **d20+5** magic damage using your Proficiency. Targets who succeed take half damage.

Simon Pape — DH Core 151/270 | Daggerheart © Darrington Press 2025

HYPNOTIC SHIMMER

3 ⚡1

SPELL

Make a **Spellcast Roll** against all adversaries in front of you within Close range. Once per rest on a success, create an illusion of flashing colors and lights that temporarily *Stuns* targets you succeed against and forces them to mark a Stress. While *Stunned*, they can't use reactions and can't take any other actions until they clear this condition.

Edgar Cardona — DH Core 171/270 | Daggerheart © Darrington Press 2025

INVISIBILITY

3 | **1⚡**

SPELL

Make a **Spellcast Roll (10)**. On a success, **mark a Stress** and choose yourself or an ally within Melee range to become *Invisible*. An *Invisible* creature can't be seen except through magical means and attack rolls against them are made with disadvantage. Place a number of tokens on this card equal to your Spellcast trait. When the *Invisible* creature takes an action, spend a token from this card. After the action that spends the last token is resolved, the effect ends.

You can only hold Invisibility on one creature at a time.

Bear Frymire — DH Core 172/270 | Daggerheart © Darrington Press 2025

CHOKEHOLD

3 | **1⚡**

ABILITY

When you position yourself behind a creature who's about your size, you can **mark a Stress** to pull them into a chokehold, making them temporarily *Vulnerable*.

When a creature attacks a target who is *Vulnerable* in this way, they deal an extra **2d6** damage.

Anthony Jones — DH Core 192/270 | Daggerheart © Darrington Press 2025

VEIL OF NIGHT

3 | **1⚡**

SPELL

Make a **Spellcast Roll (13)**. On a success, you can create a temporary curtain of darkness between two points within Far range. Only you can see through this darkness. You're considered *Hidden* to adversaries on the other side of the veil, and you have advantage on attacks you make through the darkness. The veil remains until you cast another spell.

Joshua Rodriguez — DH Core 193/270 | Daggerheart © Darrington Press 2025
CORROSIVE PROJECTILE

3 | **1⚡**

SPELL

Make a **Spellcast Roll** against a target within Far range. On a success, deal **d6+4** magic damage using your Proficiency. Additionally, **mark 2 or more Stress** to make them permanently *Corroded*. While a target is *Corroded*, they gain a −1 penalty to their Difficulty for every 2 Stress you spent. This condition can stack.

Anthony Jones — DH Core 213/270 | Daggerheart © Darrington Press 2025

TOWERING STALK

3 | **1⚡**

SPELL

Once per rest, you can conjure a thick, twisting stalk within Close range that can be easily climbed. Its height can grow up to Far range.

Mark a Stress to use this spell as an attack. Make a **Spellcast Roll** against an adversary or group of adversaries within Close range. The erupting stalk lifts targets you succeed against into the air and drops them, dealing **d8** physical damage using your Proficiency.

Anthony Avon — DH Core 214/270 | Daggerheart © Darrington Press 2025

SECOND WIND

3 | **2⚡**

ABILITY

Once per rest, when you succeed on an attack against an adversary, you can clear 3 Stress or a Hit Point. On a success with Hope, you also clear 3 Stress or a Hit Point on an ally within Close range of you.

Mauro Alocci — DH Core 234/270 | Daggerheart © Darrington Press 2025

VOICE OF REASON

3 | **1⚡**

ABILITY

You speak with an unmatched power and authority. You have advantage on action rolls to de-escalate violent situations or convince someone to follow your lead.

Additionally, you're emboldened in moments of duress. When all of your Stress slots are marked, you gain a +1 bonus to your Proficiency for damage rolls.

Stanislav Sherbakov — DH Core 235/270 | Daggerheart © Darrington Press 2025

CRITICAL INSPIRATION

3 | **1⚡**

ABILITY

Once per rest, when you critically succeed on an attack, all allies within Very Close range can clear a Stress or gain a Hope.

Suzanne Helmigh — DH Core 255/270 | Daggerheart © Darrington Press 2025
LEAN ON ME

3 | **1⚡**

ABILITY

Once per long rest, when you console or inspire an ally who failed an action roll, you can both clear 2 Stress.

Jenny Tan — DH Core 256/270 | Daggerheart © Darrington Press 2025

BLINK OUT

SPELL

Make a **Spellcast Roll (12)**. On a success, **spend a Hope** to teleport to another point you can see within Far range. If any willing creatures are within Very Close range, **spend an additional Hope** for each creature to bring them with you.

PRESERVATION BLAST

SPELL

Make a **Spellcast Roll** against all targets within Melee range. Targets you succeed against are forced back to Far range and take **d8+3** magic damage using your Spellcast trait.

DEADLY FOCUS

ABILITY

Once per rest, you can apply all your focus toward a target of your choice. Until you attack another creature, you defeat the target, or the battle ends, gain a +1 bonus to your Proficiency.

FORTIFIED ARMOR

ABILITY

While you are wearing armor, gain a +2 bonus to your damage thresholds.

BOOST

ABILITY

Mark a Stress to boost off a willing ally within Close range, fling yourself into the air, and perform an aerial attack against a target within Far range. You have advantage on the attack, add a **d10** to the damage roll, and end your move within Melee range of the target.

REDIRECT

ABILITY

When an attack made against you from beyond Melee range fails, roll a number of **d6s** equal to your Proficiency. If any roll a 6, you can **mark a Stress** to redirect the attack to damage an adversary within Very Close range instead.

BOOK OF EXOTA

GRIMOIRE

Repudiate: You can interrupt a magical effect taking place. Make a reaction roll using your Spellcast trait. Once per rest on a success, the effect stops and any consequences are avoided.

Create Construct: **Spend a Hope** to choose a group of objects around you and create an animated construct from them that obeys basic commands. Make a **Spellcast Roll** to command them to take action. When necessary, they share your Evasion and traits and their attacks deal **2d10+3** physical damage. You can only maintain one construct at a time, and they fall apart when they take any amount of damage.

BOOK OF GRYNN

GRIMOIRE

Arcane Deflection: Once per long rest, **spend a Hope** to negate the damage of an attack targeting you or an ally within Very Close range.

Time Lock: Target an object within Far range. That object stops in time and space exactly where it is until your next rest. If a creature tries to move it, make a **Spellcast Roll** against them to maintain this spell.

Wall of Flame: Make a **Spellcast Roll (15)**. On a success, create a wall of magical flame between two points within Far range. All creatures in its path must choose a side to be on, and anything that subsequently passes through the wall takes **4d10+3** magic damage.
SOOTHING SPEECH

ABILITY

During a short rest, when you take the time to comfort another character while using the Tend to Wounds downtime move on them, clear an additional Hit Point on that character. When you do, you also clear 2 Hit Points.

THROUGH YOUR EYES

Choose a target within Very Far range. You can see through their eyes and hear through their ears. You can transition between using your own senses or the target's freely until you cast another spell or until your next rest.

STEALTH EXPERTISE

When you roll with Fear while attempting to move unnoticed through a dangerous area, you can **mark a Stress** to roll with Hope instead.

If an ally within Close range is also attempting to move unnoticed and rolls with Fear, you can **mark a Stress** to change their result to a roll with Hope.

GLYPH OF NIGHTFALL

Make a **Spellcast Roll** against a target within Very Close range. On a success, **spend a Hope** to conjure a dark glyph upon their body that exposes their weak points, temporarily reducing the target's Difficulty by a value equal to your Knowledge (minimum 1).

DEATH GRIP

Make a **Spellcast Roll** against a target within Close range and choose one of the following options:

• You pull the target into Melee range or pull yourself into Melee range of them.
• You constrict the target and force them to mark 2 Stress.
• All adversaries between you and the target must succeed on a Reaction Roll (13) or be hit by vines, taking **3d6+2** physical damage.

On a success, vines reach out from your hands, causing the chosen effect and temporarily *Restraining* the target.

HEALING FIELD

Once per long rest, you can conjure a field of healing plants around you. Everywhere within Close range of you bursts to life with vibrant nature, allowing you and all allies in the area to clear a Hit Point.

Spend 2 Hope to allow you and all allies to clear 2 Hit Points instead.

DIVINATION

Once per long rest, **spend 3 Hope** to reach out to the forces beyond and ask one "yes or no" question about an event, person, place, or situation in the near future. For a moment, the present falls away and you see the answer before you.

LIFE WARD

Spend 3 Hope and choose an ally within Close range. They are marked with a glowing sigil of protection. When this ally would make a death move, they clear a Hit Point instead.

This effect ends when it saves the target from a death move, you cast Life Ward on another target, or you take a long rest.
GOAD THEM ON

Describe how you taunt a target within Close range, then make a **Presence Roll** against them. On a success, the target must mark a Stress, and the next time the GM spotlights them, they must target you with an attack, which they make with disadvantage.

SUPPORT TANK

When an ally within Close range fails a roll, you can **spend 2 Hope** to allow them to reroll either their Hope or Fear Die.

CHAIN LIGHTNING

5 | **1⚡**

SPELL

Mark 2 Stress to make a **Spellcast Roll**, unleashing lightning on all targets within Close range. Targets you succeed against must make a reaction roll with a Difficulty equal to the result of your Spellcast Roll. Targets who fail take **2d8+4** magic damage. Additional adversaries not already targeted by Chain Lightning and within Close range of previous targets who took damage must also make the reaction roll. Targets who fail take **2d8+4** magic damage. This chain continues until there are no more adversaries within range.

Bear Frymire — DH Core 091/270 | Daggerheart © Darrington Press 2025

PREMONITION

5 | **2⚡**

SPELL

You can channel arcane energy to have visions of the future. Once per long rest, immediately after the GM conveys the consequences of a roll you made, you can rescind the move and consequences like they never happened and make another move instead.

Ivan Koltovich — DH Core 092/270 | Daggerheart © Darrington Press 2025

CHAMPION'S EDGE

5 | **1⚡**

ABILITY

When you critically succeed on an attack, you can **spend up to 3 Hope** and choose one of the following options for each Hope spent:

• You clear a Hit Point.
• You clear an Armor Slot.
• The target must mark an additional Hit Point.

You can't choose the same option more than once.

Samantha B. Lucas — DH Core 112/270 | Daggerheart © Darrington Press 2025

VITALITY

5 | **0⚡**

ABILITY

When you choose this card, permanently gain two of the following benefits:

• One Stress slot
• One Hit Point slot
• +2 bonus to your damage thresholds

Then place this card in your vault permanently.

Juan Salvador Almencion — DH Core 113/270 | Daggerheart © Darrington Press 2025

KNOW THY ENEMY

5 | **1⚡**

ABILITY

When observing a creature, you can make an **Instinct Roll** against them. On a success, **spend a Hope** and ask the GM for one set of information about the target from the following options:

• Their unmarked Hit Points and Stress.
• Their Difficulty and damage thresholds.
• Their tactics and standard attack damage dice.
• Their features and Experiences.

Additionally on a success, you can **mark a Stress** to remove a Fear from the GM's Fear Pool.

Grant Griffin — DH Core 133/270 | Daggerheart © Darrington Press 2025

SIGNATURE MOVE

5 | **1⚡**

ABILITY

Name and describe your signature combat move. Once per rest, when you perform this signature move as part of an action you're taking, you can roll a **d20** as your Hope Die. On a success, clear a Stress.

Bear Frymire — DH Core 134/270 | Daggerheart © Darrington Press 2025

MANIFEST WALL

5 | **2⚡**

SPELL

Make a **Spellcast Roll (15)**. Once per rest on a success, **spend a Hope** to create a temporary magical wall between two points within Far range. It can be up to 50 feet high and form at any angle. Creatures or objects in its path are shunted to a side of your choice. The wall stays up until your next rest or you cast Manifest Wall again.

Ilya Royz — DH Core 154/270 | Daggerheart © Darrington Press 2025

TELEPORT

5 | **2⚡**

SPELL

Once per long rest, you can instantly teleport yourself and any number of willing targets within Close range to a place you've been before. Choose one of the following options, then make a **Spellcast Roll (16)**:

• If you know the place very well, gain a +3 bonus.
• If you've visited the place frequently, gain a +1 bonus.
• If you've visited the place infrequently, gain no modifier.
• If you've only been there once, gain a −2 penalty.

On a success, you appear where you were intending to go. On a failure, you appear off course, with the range of failure determining how far off course.

Henry Peters — DH Core 155/270 | Daggerheart © Darrington Press 2025

THOUGHT DELVER

5 | **2⚡**

SPELL

You can peek into the minds of others. **Spend a Hope** to read the vague surface thoughts of a target within Far range. Make a **Spellcast Roll** against the target to delve for deeper, more hidden thoughts.

On a roll with Fear, the target might, at the GM's discretion, become aware that you're reading their thoughts.

Cybercatbug — DH Core 175/270 | Daggerheart © Darrington Press 2025
WORDS OF DISCORD

5 | **1⚡**

SPELL

Whisper words of discord to an adversary within Melee range and make a **Spellcast Roll (13)**. On a success, the target must mark a Stress and make an attack against another adversary instead of against you or your allies.

Once this attack is over, the target realizes what happened. The next time you cast Words of Discord on them, gain a −5 penalty to the Spellcast Roll.

Anthony Jones — DH Core 176/270 | Daggerheart © Darrington Press 2025

HUSH

5 | **1⚡**

SPELL

Make a **Spellcast Roll** against a target within Close range. On a success, **spend a Hope** to conjure suppressive magic around the target that encompasses everything within Very Close range of them and follows them as they move.

The target and anything within the area is *Silenced* until the GM spends a Fear on their turn to clear this condition, you cast Hush again, or you take Major damage. While *Silenced*, they can't make noise and can't cast spells.

Laura Galli — DH Core 196/270 | Daggerheart © Darrington Press 2025

PHANTOM RETREAT

5 | **2⚡**

SPELL

Spend a Hope to activate Phantom Retreat where you're currently standing. **Spend another Hope** at any time before your next rest to disappear from where you are and reappear where you were standing when you activated Phantom Retreat. This spell ends after you reappear.

José Muñoz — DH Core 197/270 | Daggerheart © Darrington Press 2025

THORN SKIN

5 | **1⚡**

SPELL

Once per rest, **spend a Hope** to sprout thorns all over your body. When you do, place a number of tokens equal to your Spellcast trait on this card. When you take damage, you can spend any number of tokens to roll that number of **d6s**. Add the results together and reduce the incoming damage by that amount. If you're within Melee range of the attacker, deal that amount of damage back to them.

When you take a rest, clear all unspent tokens.

Jack Jones — DH Core 217/270 | Daggerheart © Darrington Press 2025

WILD FORTRESS

5 | **1⚡**

SPELL

Make a **Spellcast Roll (13)**. On a success, **spend 2 Hope** to grow a natural barricade in the shape of a dome that you and one ally can take cover within. While inside the dome, a creature can't be targeted by attacks and can't make attacks. Attacks made against the dome automatically succeed. The dome has the following damage thresholds and lasts until it marks 3 Hit Points. Place tokens on this card to represent marking Hit Points.

MINOR DAMAGE	15	MAJOR DAMAGE	30	SEVERE DAMAGE
Mark 1 HP		Mark 2 HP		Mark 3 HP

Bear Frymire — DH Core 218/270 | Daggerheart © Darrington Press 2025

SHAPE MATERIAL

5 | **1⚡**

SPELL

Spend a Hope to shape a section of natural material you're touching (such as stone, ice, or wood) to suit your purpose. The area of the material can be no larger than you. For example, you can form a rudimentary tool or create a door.

You can only affect the material within Close range of where you're touching it.

Ilya Royz — DH Core 238/270 | Daggerheart © Darrington Press 2025

SMITE

5 | **2⚡**

SPELL

Once per rest, **spend 3 Hope** to charge your powerful smite. When you next successfully attack with a weapon, double the result of your damage roll. This attack deals magic damage regardless of the weapon's damage type.

Geoffrey Ernault — DH Core 239/270 | Daggerheart © Darrington Press 2025

ARMORER

5 | **1⚡**

ABILITY

While you're wearing armor, gain a +1 bonus to your Armor Score.

During a rest, when you choose to repair your armor as a downtime move, your allies also clear an Armor Slot.

Alex Konstad — DH Core 259/270 | Daggerheart © Darrington Press 2025

ROUSING STRIKE

5 | **1⚡**

ABILITY

Once per rest, when you critically succeed on an attack, you and all allies who can see or hear you can clear a Hit Point or **1d4** Stress.

Ilya Royz — DH Core 260/270 | Daggerheart © Darrington Press 2025

RIFT WALKER

6 · 2⚡

SPELL

Make a **Spellcast Roll (15)**. On a success, you place an arcane marking on the ground where you currently stand. The next time you successfully cast Rift Walker, a rift in space opens up, providing safe passage back to the exact spot where the marking was placed. This rift stays open until you choose to close it or you cast another spell.

You can drop the spell at any time to cast Rift Walker again and place the marking somewhere new.

TELEKINESIS

6 · 0⚡

SPELL

Make a **Spellcast Roll** against a target within Far range. On a success, you can use your mind to move them anywhere within Far range of their original position. You can throw the lifted target as an attack by making an additional Spellcast Roll against the second target you're trying to attack. On a success, deal **d12+4** physical damage to the second target using your Proficiency. This spell then ends.

BATTLE-HARDENED

6 · 2⚡

ABILITY

Once per long rest when you would make a Death Move, you can **spend a Hope** to clear a Hit Point instead.

RAGE UP

6 · 1⚡

ABILITY

Before you make an attack, you can **mark a Stress** to gain a bonus to your damage roll equal to twice your Strength.

You can Rage Up twice per attack.

RAPID RIPOSTE

6 · 0⚡

ABILITY

When an attack made against you from within Melee range fails, you can **mark a Stress** and seize the opportunity to deal the weapon damage of one of your active weapons to the attacker.

RECOVERY

6 · 1⚡

ABILITY

During a short rest, you can choose a long rest downtime move instead. You can **spend a Hope** to let an ally do the same.

BANISH

6 · 0⚡

SPELL

Make a **Spellcast Roll** against a target within Close range. On a success, roll a number of **d20s** equal to your Spellcast trait. The target must make a reaction roll with a Difficulty equal to your highest result. On a success, the target must mark a Stress but isn't banished. Once per rest on a failure, they are banished from this realm.

When the PCs roll with Fear, the Difficulty gains a −1 penalty and the target makes another reaction roll. On a success, they return from banishment.

SIGIL OF RETRIBUTION

6 · 2⚡

SPELL

Mark an adversary within Close range with a sigil of retribution. The GM gains a Fear. When the marked adversary deals damage to you or your allies, place a **d8** on this card. You can hold a number of **d8s** equal to your level. When you successfully attack the marked adversary, roll the dice on this card and add the total to your damage roll, then clear the dice. This effect ends when the marked adversary is defeated or you cast Sigil of Retribution again.

NEVER UPSTAGED

6 · 2⚡

ABILITY

When you mark 1 or more Hit Points from an attack, you can **mark a Stress** to place a number of tokens equal to the number of Hit Points you marked on this card. On your next successful attack, gain a +5 bonus to your damage roll for each token on this card, then clear all tokens.

SHARE THE BURDEN

6 — **0**

SPELL

Once per rest, take on the Stress from a willing creature within Melee range. The target describes what intimate knowledge or emotions telepathically leak from their mind in this moment between you. Transfer any number of their marked Stress to you, then gain a Hope for each Stress transferred.

Eliot Baum — DH Core 178/270 | Daggerheart © Darrington Press 2025

DARK WHISPERS

6 — **0**

SPELL

You can speak into the mind of any person with whom you've made physical contact. Once you've opened a channel with them, they can speak back into your mind. Additionally, you can **mark a Stress** to make a **Spellcast Roll** against them. On a success, you can ask the GM one of the following questions and receive an answer:

• Where are they?
• What are they doing?
• What are they afraid of?
• What do they cherish most in the world?

Jenny Tan — DH Core 198/270 | Daggerheart © Darrington Press 2025

MASS DISGUISE

6 — **0**

SPELL

When you have a few minutes of silence to focus, you can **mark a Stress** to change the appearance of all willing creatures within Close range. Their new forms must share a general body structure and size, and can be somebody or something you've seen before or entirely fabricated. A disguised creature has advantage on Presence Rolls to avoid scrutiny.

Activate a Countdown (8). It ticks down as a consequence the GM chooses. When it triggers, the disguise drops.

Anthony Jones — DH Core 199/270 | Daggerheart © Darrington Press 2025

CONJURED STEEDS

6 — **0**

SPELL

Spend any number of Hope to conjure that many magical steeds (such as horses, camels, or elephants) that you and your allies can ride until your next long rest or the steeds take any damage. The steeds double your land speed while traveling and, when in danger, allow you to move within Far range without having to roll. Creatures riding a steed gain a −2 penalty to attack rolls and a +2 bonus to damage rolls.

Juan Salvador Almencion — DH Core 219/270 | Daggerheart © Darrington Press 2025

FORAGER

6 — **1**

ABILITY

As an additional downtime move you can choose, roll a **d6** to see what you forage. Work with the GM to describe it and add it to your inventory as a consumable. Your party can carry up to five foraged consumables at a time.

Result	Consumable	Effect
1	A unique food	Clear 2 Stress
2	A beautiful relic	Gain 2 Hope
3	An arcane rune	+2 to a Spellcast Roll
4	A healing vial	Clear 2 Hit Points
5	A luck charm	Reroll any die
6	*Choose one of the options above.*	

Anthony Jones — DH Core 220/270 | Daggerheart © Darrington Press 2025

RESTORATION

6 — **2**

SPELL

After a long rest, place a number of tokens equal to your Spellcast trait on this card. Touch a creature and spend any number of tokens within Close range to clear 2 Hit Points or 2 Stress for each token spent.

You can also spend a token from this card when touching a creature to clear the *Vulnerable* condition or heal a physical or magical ailment (the GM might require additional tokens depending on the strength of the ailment).

When you take a long rest, clear all unspent tokens.

Mat Wilma — DH Core 240/270 | Daggerheart © Darrington Press 2025

ZONE OF PROTECTION

6 — **2**

SPELL

Make a **Spellcast Roll (16)**. Once per long rest on a success, choose a point within Far range and create a visible zone of protection there for all allies within Very Close range of that point. When you do, place a **d6** on this card with the 1 value facing up. When an ally in this zone takes damage, they reduce it by the die's value. You then increase the die's value by one. When the die's value would exceed 6, this effect ends.

Anthony Jones — DH Core 241/270 | Daggerheart © Darrington Press 2025

INEVITABLE

6 — **1**

ABILITY

When you fail an action roll, your next action roll has advantage.

Ivan Koltovich — DH Core 261/270 | Daggerheart © Darrington Press 2025

RISE UP

6 — **2**

ABILITY

Gain a bonus to your Severe threshold equal to your Proficiency.

When you mark 1 or more Hit Points from an attack, clear a Stress.

Ana Amaral — DH Core 262/270 | Daggerheart © Darrington Press 2025

ARCANA-TOUCHED

7 · 2⚡

When 4 or more of the domain cards in your loadout are from the Arcana domain, gain the following benefits:

- +1 bonus to your Spellcast Rolls
- Once per rest, you can switch the results of your Hope and Fear Dice.

CLOAKING BLAST

7 · 2⚡ · SPELL

When you make a successful **Spellcast Roll** to cast a different spell, you can **spend a Hope** to become *Cloaked*. While *Cloaked*, you remain unseen if you are stationary when an adversary moves to where they would normally see you. When you move into or within an adversary's line of sight or make an attack, you are no longer *Cloaked*.

BLADE-TOUCHED

7 · 1⚡ · ABILITY

When 4 or more of the domain cards in your loadout are from the Blade domain, gain the following benefits:

- +2 bonus to your attack rolls
- +4 bonus to your Severe damage threshold

GLANCING BLOW

7 · 1⚡ · ABILITY

When you fail an attack, you can **mark a Stress** to deal weapon damage using half your Proficiency.

BONE-TOUCHED

7 · 2⚡ · ABILITY

When 4 or more of the domain cards in your loadout are from the Bone domain, gain the following benefits:

- +1 bonus to Agility
- Once per rest, you can **spend 3 Hope** to cause an attack that succeeded against you to fail instead.

CRUEL PRECISION

7 · 1⚡ · ABILITY

When you make a successful attack with a weapon, gain a bonus to your damage roll equal to either your Finesse or Agility.

BOOK OF HOMET

7 · 0⚡ · GRIMOIRE

Pass Through: Make a **Spellcast Roll (13)**. Once per rest on a success, you and all creatures touching you can pass through a wall or door within Close range. The effect ends once everyone is on the other side.

Plane Gate: Make a **Spellcast Roll (14)**. Once per long rest on a success, open a gateway to a location in another dimension or plane of existence you've been to before. This gateway lasts until your next rest.

CODEX-TOUCHED

7 · 2⚡ · ABILITY

When 4 or more of the domain cards in your loadout are from the Codex domain, gain the following benefits:

- You can **mark a Stress** to add your Proficiency to a Spellcast Roll.
- Once per rest, replace this card with any card from your vault without paying its Recall Cost.

ENDLESS CHARISMA

7 · 1⚡ · ABILITY

After you make an action roll to persuade, lie, or garner favor, you can **spend a Hope** to reroll the Hope or Fear Die.

GRACE-TOUCHED

ABILITY

When 4 or more of the domain cards in your loadout are from the Grace domain, gain the following benefits:

- You can **mark an Armor Slot** instead of marking a Stress.
- When you would force a target to mark a number of Hit Points, you can choose instead to force them to mark that number of Stress.

MIDNIGHT-TOUCHED

ABILITY

When 4 or more of the domain cards in your loadout are from the Midnight domain, gain the following benefits:

- Once per rest, when you have 0 Hope and the GM would gain a Fear, you can gain a Hope instead.
- When you make a successful attack, you can **mark a Stress** to add the result of your Fear Die to your damage roll.

VANISHING DODGE

SPELL

When an attack made against you that would deal physical damage fails, you can **spend a Hope** to envelop yourself in shadow, becoming *Hidden* and teleporting to a point within Close range of the attacker. You remain *Hidden* until the next time you make an action roll.

SAGE-TOUCHED

ABILITY

When 4 or more of the domain cards in your loadout are from the Sage domain, gain the following benefits:

- While you're in a natural environment, you gain a +2 bonus to your Spellcast Rolls.
- Once per rest, you can double your Agility or Instinct when making a roll that uses that trait. You must choose to do this before you roll.

WILD SURGE

SPELL

Once per long rest, **mark a Stress** to channel the natural world around you and enhance yourself. Describe how your appearance changes, then place a **d6** on this card with the 1 value facing up.

While the Wild Surge Die is active, you add its value to every action roll you make. After you add its value to a roll, increase the Wild Surge Die's value by one. When the die's value would exceed 6 or you take a rest, this form drops and you must **mark an additional Stress**.

HEALING STRIKE

SPELL

When you deal damage to an adversary, you can **spend 2 Hope** to clear a Hit Point on an ally within Close range.

SPLENDOR-TOUCHED

ABILITY

When 4 or more of the domain cards in your loadout are from the Splendor domain, gain the following benefits:

- +3 bonus to your Severe damage threshold
- Once per long rest, when incoming damage would require you to mark a number of Hit Points, you can choose to mark that much Stress or spend that much Hope instead.

SHRUG IT OFF

ABILITY

When you would take damage, you can **mark a Stress** to reduce the severity of the damage by one threshold. When you do, roll a **d6**. On a result of 3 or lower, place this card in your vault.

VALOR-TOUCHED

ABILITY

When 4 or more of the domain cards in your loadout are from the Valor domain, gain the following benefits:

- +1 bonus to your Armor Score
- When you mark 1 or more Hit Points without marking an Armor Slot, clear an Armor Slot.

ARCANE REFLECTION

8 | **1⚡** | SPELL

When you would take magic damage, you can **spend any number of Hope** to roll that many **d6s**. If any roll a 6, the attack is reflected back to the caster, dealing the damage to them instead.

CONFUSING AURA

8 | **2⚡** | SPELL

Make a **Spellcast Roll (14)**. Once per long rest on a success, you create a layer of illusion over your body that makes it hard to tell exactly where you are. **Mark any number of Stress** to make that many additional layers. When an adversary makes an attack against you, roll a number of **d6s** equal to the number of layers currently active. If any roll a 5 or higher, one layer of the aura is destroyed and the attack fails. If all the results are 4 or lower, you take the damage and this spell ends.

BATTLE CRY

8 | **2⚡** | ABILITY

Once per long rest, while you're charging into danger, you can muster a rousing call that inspires your allies. All allies who can hear you each clear a Stress and gain a Hope. Additionally, your allies gain advantage on attack rolls until you or an ally rolls a failure with Fear.

FRENZY

8 | **3⚡** | ABILITY

Once per long rest, you can go into a *Frenzy* until there are no more adversaries within sight.

While *Frenzied*, you can't use Armor Slots, and you gain a +10 bonus to your damage rolls and a +8 bonus to your Severe damage threshold.

BREAKING BLOW

8 | **3⚡** | ABILITY

When you make a successful attack, you can **mark a Stress** to make the next successful attack against that same target deal an extra **2d12** damage.

WRANGLE

8 | **1⚡** | ABILITY

Make an Agility Roll against all targets within Close range. **Spend a Hope** to move targets you succeed against, and any willing allies within Close range, to another point within Close range.

BOOK OF VYOLA

8 | **2⚡** | GRIMOIRE

Memory Delve: Make a **Spellcast Roll** against a target within Far range. On a success, peer into the target's mind and ask the GM a question. The GM describes any memories the target has pertaining to the answer.

Shared Clarity: Once per long rest, **spend a Hope** to choose two willing creatures. When one of them would mark Stress, they can choose between the two of them who marks it. This spell lasts until their next rest.

SAFE HAVEN

8 | **3⚡** | SPELL

When you have a few minutes of calm to focus, you can **spend 2 Hope** to summon your Safe Haven, a large interdimensional home where you and your allies can take shelter. When you do, a magical door appears somewhere within Close range. Only creatures of your choice can enter. Once inside, you can make the entrance invisible. You and anyone else inside can always exit. Once you leave, the doorway must be summoned again.

When you take a rest within your own Safe Haven, you can choose an additional downtime move.

ASTRAL PROJECTION

8 | **0⚡** | SPELL

Once per long rest, **mark a Stress** to create a projected copy of yourself that can appear anywhere you've been before.

You can see and hear through the projection as though it were you and affect the world as though you were there. A creature investigating the projection can tell it's of magical origin. This effect lasts until your next rest or your projection takes any damage.

MASS ENRAPTURE

8 · **3⚡**

Make a **Spellcast Roll** against all targets within Far range. Targets you succeed against become temporarily *Enraptured*. While *Enraptured*, a target's attention is fixed on you, narrowing their field of view and drowning out any sound but your voice. **Mark a Stress** to force all *Enraptured* targets to mark a Stress, ending this spell.

SHADOWHUNTER

8 · **2⚡**

Your prowess is enhanced under the cover of shadow. While you're shrouded in low light or darkness, you gain a +1 bonus to your Evasion and make attack rolls with advantage.

SPELLCHARGE

8 · **1⚡**

When you take magic damage, place tokens equal to the number of Hit Points you marked on this card. You can store a number of tokens equal to your Spellcast trait.

When you make a successful attack against a target, you can spend any number of tokens to add a **d6** for each token spent to your damage roll.

FOREST SPRITES

8 · **2⚡**

Make a **Spellcast Roll (13)**. On a success, **spend any number of Hope** to create an equal number of small forest sprites who appear at points you choose within Far range, providing the following benefits:

• Your allies gain a +3 bonus to attack rolls against adversaries within Melee range of a sprite.
• An ally who marks an Armor Slot while within Melee range of a sprite can mark an additional Armor Slot.

A sprite vanishes after granting a benefit or taking any damage.

REJUVENATION BARRIER

8 · **1⚡**

Make a **Spellcast Roll (15)**. Once per rest on a success, create a temporary barrier of protective energy around you at Very Close range. You and all allies within the barrier when this spell is cast clear **1d4** Hit Points. While the barrier is up, you and all allies within have resistance to physical damage from outside the barrier.

When you move, the barrier follows you.

SHIELD AURA

8 · **2⚡**

Mark a Stress to cast a protective aura on a target within Very Close range. When the target marks an Armor Slot, they reduce the severity of the attack by an additional threshold. If this spell causes a creature who would be damaged to instead mark no Hit Points, the effect ends.

You can only hold Shield Aura on one creature at a time.

STUNNING SUNLIGHT

8 · **2⚡**

Make a **Spellcast Roll** to unleash powerful rays of burning sunlight against all adversaries in front of you within Far range. On a success, **spend any number of Hope** and force that many targets you succeeded against to make a Reaction Roll (14).

Targets who succeed take **3d20+3** magic damage. Targets who fail take **4d20+5** magic damage and are temporarily *Stunned*. While *Stunned*, they can't use reactions and can't take any other actions until they clear this condition.

FULL SURGE

8 · **1⚡**

Once per long rest, **mark 3 Stress** to push your body to its limits. Gain a +2 bonus to all of your character traits until your next rest.

GROUND POUND

8 · **2⚡**

Spend 2 Hope to strike the ground where you stand and make a **Strength Roll** against all targets within Very Close range. Targets you succeed against are thrown back to Far range and must make a Reaction Roll (17). Targets who fail take **4d10+8** damage. Targets who succeed take half damage.

EARTHQUAKE

SPELL

9 · 2⚡

Make a **Spellcast Roll (16)**. Once per rest on a success, all targets within Very Far range who aren't flying must make a Reaction Roll (18). Targets who fail take **3d10+8** physical damage and are temporarily *Vulnerable*. Targets who succeed take half damage.

Additionally, when you succeed on the Spellcast Roll, all terrain within Very Far range becomes difficult to move through and structures within this range might sustain damage or crumble.

Eliot Baum — DH Core 099/270 | Daggerheart © Darrington Press 2025

SENSORY PROJECTION

SPELL

9 · 0⚡

Once per rest, make a **Spellcast Roll (15)**. On a success, drop into a vision that lets you clearly see and hear any place you have been before as though you are standing there in this moment. You can move freely in this vision and are not constrained by the physics or impediments of a physical body. This spell cannot be detected by mundane or magical means. You drop out of this vision upon taking damage or casting another spell.

Anthony Jones — DH Core 100/270 | Daggerheart © Darrington Press 2025

GORE AND GLORY

ABILITY

9 · 2⚡

When you critically succeed on a weapon attack, gain an additional Hope or clear an additional Stress.

Additionally, when you deal enough damage to defeat an enemy, gain a Hope or clear a Stress.

Simon Pape — DH Core 120/270 | Daggerheart © Darrington Press 2025

REAPER'S STRIKE

ABILITY

9 · 3⚡

Once per long rest, **spend a Hope** to make an attack roll. The GM tells you which targets within range it would succeed against. Choose one of these targets and force them to mark 5 Hit Points.

Ilya Royz — DH Core 121/270 | Daggerheart © Darrington Press 2025

ON THE BRINK

ABILITY

9 · 1⚡

When you have 2 or fewer Hit Points unmarked, you don't take Minor damage.

Juan Salvador Almencion — DH Core 141/270 | Daggerheart © Darrington Press 2025

SPLINTERING STRIKE

ABILITY

9 · 3⚡

Spend a Hope and make an attack against all adversaries within your weapon's range. Once per long rest, on a success against any targets, add up the damage dealt, then redistribute that damage however you wish between the targets you succeeded against. When you deal damage to a target, roll an additional damage die and add its result to the damage you deal to that target.

Gaboleps — DH Core 142/270 | Daggerheart © Darrington Press 2025

BOOK OF RONIN

GRIMOIRE

9 · 4⚡

Transform: Make a **Spellcast Roll (15)**. On a success, transform into an inanimate object no larger than twice your normal size. You can remain in this shape until you take damage.

Eternal Enervation: Once per long rest, make a **Spellcast Roll** against a target within Close range. On a success, they become permanently *Vulnerable*. They can't clear this condition by any means.

Jenny Tan — DH Core 162/270 | Daggerheart © Darrington Press 2025

DISINTEGRATION WAVE

SPELL

9 · 4⚡

Make a **Spellcast Roll (18)**. Once per long rest on a success, the GM tells you which adversaries within Far range have a Difficulty of 18 or lower. **Mark a Stress** for each one you wish to hit with this spell. They are killed and can't come back to life by any means.

Nick Acuna — DH Core 163/270 | Daggerheart © Darrington Press 2025

COPYCAT

SPELL

9 · 3⚡

Once per long rest, this card can mimic the features of another domain card of level 8 or lower in another player's loadout. **Spend Hope equal to half the card's level** to gain access to the feature. It lasts until your next rest or they place the card in their vault.

Cybercatbug — DH Core 183/270 | Daggerheart © Darrington Press 2025

MASTER OF THE CRAFT

9 | **0⚡**
ABILITY

Gain a permanent +2 bonus to two of your Experiences or a permanent +3 bonus to one of your Experiences. Then place this card in your vault permanently.

Anthony Jones · DH Core 184/270 · Daggerheart © Darrington Press 2025

NIGHT TERROR

9 | **2⚡**
SPELL

Once per long rest, choose any targets within Very Close range to perceive you as a nightmarish horror. The targets must succeed on a Reaction Roll (16) or become temporarily *Horrified*. While *Horrified*, they're *Vulnerable*. Steal a number of Fear from the GM equal to the number of targets that are *Horrified* (up to the number of Fear in the GM's pool). Roll a number of **d6s** equal to the number of stolen Fear and deal the total damage to each *Horrified* target. Discard the stolen Fear.

Anthony Jones · DH Core 204/270 · Daggerheart © Darrington Press 2025

TWILIGHT TOLL

9 | **1⚡**
ABILITY

Choose a target within Far range. When you succeed on an action roll against them that doesn't result in making a damage roll, place a token on this card. When you deal damage to this target, spend any number of tokens to add a **d12** for each token spent to your damage roll. You can only hold Twilight Toll on one creature at a time.

When you choose a new target or take a rest, clear all unspent tokens.

Rafater · DH Core 205/270 · Daggerheart © Darrington Press 2025

FANE OF THE WILDS

9 | **2⚡**
ABILITY

After a long rest, place a number of tokens equal to the number of Sage domain cards in your loadout and vault on this card.

When you would make a Spellcast Roll, you can spend any number of tokens after the roll to gain a +1 bonus for each token spent.

When you critically succeed on a Spellcast Roll for a Sage domain spell, gain a token.

When you take a long rest, clear all unspent tokens.

Anthony Avon · DH Core 225/270 · Daggerheart © Darrington Press 2025

PLANT DOMINION

9 | **1⚡**
SPELL

Make a **Spellcast Roll (18)**. Once per long rest on a success, you reshape the natural world, changing the surrounding plant life anywhere within Far range of you. For example, you can grow trees instantly, clear a path through dense vines, or create a wall of roots.

Anthony Jones · DH Core 226/270 · Daggerheart © Darrington Press 2025

OVERWHELMING AURA

9 | **2⚡**
SPELL

Make a **Spellcast Roll (15)** to magically empower your aura. On a success, **spend 2 Hope** to make your Presence equal to your Spellcast trait until your next long rest.

While this spell is active, an adversary must mark a Stress when they target you with an attack.

Eliot Baum · DH Core 246/270 · Daggerheart © Darrington Press 2025

SALVATION BEAM

9 | **2⚡**
SPELL

Make a **Spellcast Roll (16)**. On a success, **mark any number of Stress** to target a line of allies within Far range. You can clear Hit Points on the targets equal to the number of Stress marked, divided among them however you'd like.

Daarken · DH Core 247/270 · Daggerheart © Darrington Press 2025

HOLD THE LINE

9 | **1⚡**
ABILITY

Describe the defensive stance you take and **spend a Hope**. If an adversary moves within Very Close range, they're pulled into Melee range and *Restrained*.

This condition lasts until you move or fail a roll with Fear, or the GM spends 2 Fear on their turn to clear it.

Laura Galli · DH Core 267/270 · Daggerheart © Darrington Press 2025

LEAD BY EXAMPLE

9 | **3⚡**
ABILITY

When you deal damage to an adversary, you can **mark a Stress** and describe how you encourage your allies. The next PC to make an attack against that adversary can clear a Stress or gain a Hope.

Jenny Tan · DH Core 268/270 · Daggerheart © Darrington Press 2025

ADJUST REALITY

10 | 1⚡

After you or a willing ally make any roll, you can **spend 5 Hope** to change the numerical result of that roll to a result of your choice instead. The result must be plausible within the range of the dice.

SPELL

FALLING SKY

10 | 1⚡

Make a **Spellcast Roll** against all adversaries within Far range. **Mark any number of Stress** to make shards of arcana rain down from above. Targets you succeed against take **1d20+2** magic damage for each Stress marked.

SPELL

BATTLE MONSTER

10 | 0⚡

When you make a successful attack against an adversary, you can **mark 4 Stress** to force the target to mark a number of Hit Points equal to the number of Hit Points you currently have marked instead of rolling for damage.

ABILITY

ONSLAUGHT

10 | 3⚡

When you successfully make an attack with your weapon, you never deal damage beneath a target's Major damage threshold (the target always marks a minimum of 2 Hit Points).

Additionally, when a creature within your weapon's range deals damage to an ally with an attack that doesn't include you, you can **mark a Stress** to force them to make a Reaction Roll (15). On a failure, the target must mark a Hit Point.

ABILITY

DEATHRUN

10 | 1⚡

Spend 3 Hope to run a straight path through the battlefield to a point within Far range, making an attack against all adversaries within your weapon's range along that path. Choose the order in which you deal damage to the targets you succeeded against. For the first, roll your weapon damage with a +1 bonus to your Proficiency. Then remove a die from your damage roll and deal the remaining damage to the next target. Continue to remove a die for each subsequent target until you have no more damage dice or adversaries.

You can't target the same adversary more than once per attack.

ABILITY

SWIFT STEP

10 | 2⚡

When an attack made against you fails, clear a Stress. If you can't clear a Stress, gain a Hope.

ABILITY

BOOK OF YARROW

10 | 2⚡

Timejammer: Make a **Spellcast Roll (18)**. On a success, time temporarily slows to a halt for everyone within Far range except for you. It resumes the next time you make an action roll that targets another creature.

Magic Immunity: **Spend 5 Hope** to become immune to magic damage until your next rest.

GRIMOIRE

TRANSCENDENT UNION

10 | 1⚡

Once per long rest, **spend 5 Hope** to cast this spell on two or more willing creatures. Until your next rest, when a creature connected by this union would mark Stress or Hit Points, the connected creatures can choose who marks it.

SPELL

ENCORE

10 | 1⚡

When an ally within Close range deals damage to an adversary, you can make a **Spellcast Roll** against that same target. On a success, you deal the same damage to the target that your ally dealt. If your Spellcast Roll succeeds with Fear, place this card in your vault.

SPELL

NOTORIOUS

People know who you are and what you've done, and they treat you differently because of it. When you leverage your notoriety to get what you want, you can **mark a Stress** before you roll to gain a +10 bonus to the result. Your food and drinks are always free wherever you go, and everything else you buy is reduced in price by one bag of gold (to a minimum of one handful).

This card doesn't count against your loadout's domain card maximum of 5 and can't be placed in your vault.

Arturo Gutiérrez González   DH Core 186/270 | Daggerheart © Darrington Press 2025

ECLIPSE

Make a **Spellcast Roll (16)**. Once per long rest on a success, plunge the entire area within Far range into complete darkness only you and your allies can see through. Attack rolls have disadvantage when targeting you or an ally within this shadow.

Additionally, when you or an ally succeeds with Hope against an adversary within this shadow, the target must mark a Stress.

This spell lasts until the GM spends a Fear on their turn to clear this effect or you take Severe damage.

Arturo Gutiérrez González   DH Core 206/270 | Daggerheart © Darrington Press 2025

SPECTER OF THE DARK

Mark a Stress to become *Spectral* until you make an action roll targeting another creature. While *Spectral*, you're immune to physical damage and can float and pass through solid objects. Other creatures can still see you while you're in this form.

Alex Konstad   DH Core 207/270 | Daggerheart © Darrington Press 2025

FORCE OF NATURE

Mark a Stress to transform into a hulking nature spirit, gaining the following benefits:

• When you succeed on an attack or Spellcast Roll, gain a +10 bonus to the damage roll.
• When you deal enough damage to defeat a creature within Close range, you absorb them and clear an Armor Slot.
• You can't be *Restrained*.

Before you make an action roll, you must **spend a Hope**. If you can't, you revert to your normal form.

Carlos C Díaz   DH Core 227/270 | Daggerheart © Darrington Press 2025

TEMPEST

Choose one of the following tempests and make a **Spellcast Roll** against all targets within Far range. Targets who succeed against experience its effects until the GM spends a Fear on their turn to end this spell.

• *Blizzard:* Deal **2d20+8** magic damage and targets are temporarily *Vulnerable*.
• *Hurricane:* Deal **3d10+10** magic damage and choose a direction the wind is blowing. Targets can't move against the wind.
• *Sandstorm:* Deal **5d6+9** magic damage. Attacks made from beyond Melee range have disadvantage.

Samantha Kung   DH Core 228/270 | Daggerheart © Darrington Press 2025

INVIGORATION

When you or an ally within Close range has used a feature that has an exhaustion limit (such as once per rest or once per session), you can **spend any number of Hope** and roll that many **d6s**. If any roll a 6, the feature can be used again.

Jenny Tan   DH Core 248/270 | Daggerheart © Darrington Press 2025
RESURRECTION

Make a **Spellcast Roll (20)**. On a success, restore one creature who has been dead no longer than 100 years to full strength. Then roll a **d6**. On a result of 5 or lower, place this card in your vault permanently.

On a failure, you can't cast Resurrection again for a week.

Dominik Mayer   DH Core 249/270 | Daggerheart © Darrington Press 2025

UNBREAKABLE

When you mark your last Hit Point, instead of making a death move, you can roll a **d6** and clear a number of Hit Points equal to the result. Then place this card in your vault.

Luísa Costa   DH Core 269/270 | Daggerheart © Darrington Press 2025

UNYIELDING ARMOR

When you would mark an Armor Slot, roll a number of **d6s** equal to your Proficiency. If any roll a 6, reduce the severity by one threshold without marking an Armor Slot.

Samantha Kung   DH Core 270/270 | Daggerheart © Darrington Press 2025

TROUBADOUR
Foundation

SPELLCAST TRAIT: PRESENCE

Gifted Performer: Describe how you perform for others. You can play each song once per long rest:

- **Relaxing Song:** You and all allies within Close range clear a Hit Point.
- **Epic Song:** Make a target within Close range temporarily *Vulnerable*.
- **Heartbreaking Song:** You and all allies within Close range gain a Hope.

Bear Frymire DH Core 001/270 | Daggerheart © Darrington Press 2025

WORDSMITH
Foundation

SPELLCAST TRAIT: PRESENCE

Rousing Speech: Once per long rest, you can give a heartfelt, inspiring speech. All allies within Far range clear 2 Stress.

Heart of a Poet: After you make an action roll to impress, persuade, or offend someone, you can **spend a Hope** to add a **d4** to the roll.

Nikki Dawes DH Core 004/270 | Daggerheart © Darrington Press 2025

WARDEN OF THE ELEMENTS
Foundation

SPELLCAST TRAIT: INSTINCT

Elemental Incarnation: Mark a Stress to *Channel* one of the following elements until you take Severe damage or until your next rest:

- **Fire:** When an adversary within Melee range deals damage to you, they take **1d10** magic damage.
- **Earth:** Gain a bonus to your damage thresholds equal to your Proficiency.
- **Water:** When you deal damage to an adversary within Melee range, all other adversaries within Very Close range must mark a Stress.
- **Air:** You can hover, gaining advantage on Agility Rolls.

Zoe Badini DH Core 007/270 | Daggerheart © Darrington Press 2025

WARDEN OF RENEWAL
Foundation

SPELLCAST TRAIT: INSTINCT

Clarity of Nature: Once per long rest, you can create a space of natural serenity within Close range. When you spend a few minutes resting within the space, clear Stress equal to your Instinct, distributed as you choose between you and your allies.

Regeneration: Touch a creature and **spend 3 Hope**. That creature clears **1d4** Hit Points.

Ilya Royz DH Core 010/270 | Daggerheart © Darrington Press 2025

STALWART
Foundation

Unwavering: Gain a permanent +1 bonus to your damage thresholds.

Iron Will: When you take physical damage, you can **mark an additional Armor Slot** to reduce the severity.

Reiko Murakami DH Core 013/270 | Daggerheart © Darrington Press 2025

VENGEANCE
Foundation

At Ease: Gain an additional Stress slot.

Revenge: When an adversary within Melee range succeeds on an attack against you, you can **mark 2 Stress** to force the attacker to mark a Hit Point.

Linda Lithén DH Core 016/270 | Daggerheart © Darrington Press 2025

BEASTBOUND
Foundation

SPELLCAST TRAIT: AGILITY

Companion: You have an animal companion of your choice (at the GM's discretion). They stay by your side unless you tell them otherwise.

Take the Ranger Companion sheet. When you level up your character, choose a level-up option for your companion from this sheet as well.

Jenny Tan DH Core 019/270 | Daggerheart © Darrington Press 2025

WAYFINDER
Foundation

SPELLCAST TRAIT: AGILITY

Ruthless Predator: When you make a damage roll, you can **mark a Stress** to gain a +1 bonus to your Proficiency. Additionally, when you deal Severe damage to an adversary, they must mark a Stress.

Path Forward: When you're traveling to a place you've previously visited or you carry an object that has been at the location before, you can identify the shortest, most direct path to your destination.

Simon Pape DH Core 022/270 | Daggerheart © Darrington Press 2025

NIGHTWALKER
Foundation

SPELLCAST TRAIT: FINESSE

Shadow Stepper: You can move from shadow to shadow. When you move into an area of darkness or a shadow cast by another creature or object, you can **mark a Stress** to disappear from where you are and reappear inside another shadow within Far range. When you reappear, you are *Cloaked*.

Juan Salvador Almencion DH Core 025/270 | Daggerheart © Darrington Press 2025
ROGUE

SYNDICATE
Foundation
SPELLCAST TRAIT: FINESSE

Well-Connected: When you arrive in a prominent town or environment, you know somebody who calls this place home. Give them a name, note how you think they could be useful, and choose one fact from the following list:

• They owe me a favor, but they'll be hard to find.
• They're going to ask for something in exchange.
• They're always in a great deal of trouble.
• We used to be together. It's a long story.
• We didn't part on great terms.

SERAPH

DIVINE WIELDER
Foundation
SPELLCAST TRAIT: STRENGTH

Spirit Weapon: When you have an equipped weapon with a range of Melee or Very Close, it can fly from your hand to attack an adversary within Close range and then return to you. You can **mark a Stress** to target an additional adversary within range with the same attack roll.

Sparing Touch: Once per long rest, touch a creature and clear 2 Hit Points or 2 Stress from them.

SERAPH

WINGED SENTINEL
Foundation
SPELLCAST TRAIT: STRENGTH

Wings of Light: You can fly. While flying, you can do the following:

• **Mark a Stress** to pick up and carry another willing creature approximately your size or smaller.
• **Spend a Hope** to deal an extra **1d8** damage on a successful attack.

SORCERER

ELEMENTAL ORIGIN
Foundation
SPELLCAST TRAIT: INSTINCT

Elementalist: Choose one of the following elements at character creation:

AIR · EARTH · FIRE · LIGHTNING · WATER

You can shape this element into harmless effects. Additionally, **spend a Hope** and describe how your control over this element helps an action roll you're about to make, then either gain a +2 bonus to the roll or a +3 bonus to the roll's damage.

SORCERER

PRIMAL ORIGIN
Foundation
SPELLCAST TRAIT: INSTINCT

Manipulate Magic: Your primal origin allows you to modify the essence of magic itself. After you cast a spell or make an attack using a weapon that deals magic damage, you can **mark a Stress** to do one of the following:

• Extend the spell or attack's reach by one range
• Gain a +2 bonus to the action roll's result
• Double a damage die of your choice
• Hit an additional target within range

WARRIOR

CALL OF THE BRAVE
Foundation

Courage: When you fail a roll with Fear, you gain a Hope.

Battle Ritual: Once per long rest, before you attempt something incredibly dangerous or face off against a foe who clearly outmatches you, describe what ritual you perform or preparations you make. When you do, clear 2 Stress and gain 2 Hope.

WARRIOR

CALL OF THE SLAYER
Foundation

Slayer: You gain a pool of dice called Slayer Dice. On a roll with Hope, you can place a **d6** on this card instead of gaining a Hope, adding the die to the pool. You can store a number of Slayer Dice equal to your Proficiency. When you make an attack roll or damage roll, you can spend any number of these Slayer Dice, rolling them and adding their result to the roll. At the end of each session, clear any unspent Slayer Dice on this card and gain a Hope per die cleared.

WIZARD

SCHOOL OF KNOWLEDGE
Foundation
SPELLCAST TRAIT: KNOWLEDGE

Prepared: Take an additional domain card of your level or lower from a domain you have access to.

Adept: When you Utilize an Experience, you can **mark a Stress** instead of spending a Hope. If you do, double your Experience modifier for that roll.

WIZARD

SCHOOL OF WAR
Foundation
SPELLCAST TRAIT: KNOWLEDGE

Battlemage: You've focused your studies on becoming an unconquerable force on the battlefield. Gain an additional Hit Point slot.

Face Your Fear: When you succeed with Fear on an attack roll, you deal an extra **1d10** magic damage.

BARD

TROUBADOUR
Specialization

Maestro: Your rallying songs steel the courage of those who listen. When you give a Rally Die to an ally, they can gain a Hope or clear a Stress.

BARD

WORDSMITH
Specialization

Eloquent: Your moving words boost morale. Once per session, when you encourage an ally, you can do one of the following:

• Allow them to find a mundane object or tool they need.
• Help an Ally without spending Hope.
• Give them an additional downtime move during their next rest.

DRUID

WARDEN OF THE ELEMENTS
Specialization

Elemental Aura: Once per rest while *Channeling*, you can assume an aura matching your element. The aura affects targets within Close range until your *Channeling* ends.

• **Fire:** When an adversary marks 1 or more Hit Points, they must also mark a Stress.
• **Earth:** Your allies gain a +1 bonus to Strength.
• **Water:** When an adversary deals damage to you, you can **mark a Stress** to move them anywhere within Very Close range of where they are.
• **Air:** When you or an ally takes damage from an attack beyond Melee range, reduce the damage by **1d8**.

DRUID

WARDEN OF RENEWAL
Specialization

Regenerative Reach: You can target creatures within Very Close range with your "Regeneration" feature.

Warden's Protection: Once per long rest, **spend 2 Hope** to clear 2 Hit Points on **1d4** allies within Close range.

GUARDIAN

STALWART
Specialization

Unrelenting: Gain a permanent +2 bonus to your damage thresholds.

Partners-in-Arms: When an ally within Very Close range takes damage, you can **mark an Armor Slot** to reduce the severity by one threshold.

GUARDIAN

VENGEANCE
Specialization

Act of Reprisal: When an adversary damages an ally within Melee range, you gain a +1 bonus to your Proficiency for the next successful attack you make against that adversary.

RANGER

BEASTBOUND
Specialization

Expert Training: Choose an additional level-up option for your companion.

Battle-Bonded: When an adversary attacks you while they're within your companion's Melee range, you gain a +2 bonus to your Evasion against the attack.

RANGER

WAYFINDER
Specialization

Elusive Predator: When your *Focus* makes an attack against you, you gain a +2 bonus to your Evasion against the attack.

ROGUE

NIGHTWALKER
Specialization

Dark Cloud: Make a **Spellcast Roll (15)**. On a success, create a temporary dark cloud that covers any area within Close range. Anyone in this cloud can't see outside of it, and anyone outside of it can't see in. You're considered *Cloaked* from any adversary for whom the cloud blocks line of sight.

Adrenaline: While you're *Vulnerable*, add your level to your damage rolls.

SYNDICATE
Specialization

Contacts Everywhere: Once per session, you can briefly call on a shady contact. Choose one of the following benefits and describe what brought them here to help you in this moment:

- They provide 1 handful of gold, a unique tool, or a mundane object that the situation requires.
- On your next action roll, their help provides a +3 bonus to the result of your Hope or Fear Die.
- The next time you deal damage, they snipe from the shadows, adding **2d8** to your damage roll.

DIVINE WIELDER
Specialization

Devout: When you roll your Prayer Dice, you can roll an additional die and discard the lowest result. Additionally, you can use your "Sparing Touch" feature twice instead of once per long rest.

WINGED SENTINEL
Specialization

Ethereal Visage: Your supernatural visage strikes awe and fear. While flying, you have advantage on Presence Rolls. When you succeed with Hope on a Presence Roll, you can remove a Fear from the GM's Fear pool instead of gaining Hope.

ELEMENTAL ORIGIN
Specialization

Natural Evasion: You can call forth your element to protect you from harm. When an attack roll against you succeeds, you can **mark a Stress** and describe how you use your element to defend you. When you do, roll a **d6** and add its result to your Evasion against the attack.
PRIMAL ORIGIN
Specialization

Enchanted Aid: You can enhance the magic of others with your essence. When you Help an Ally with a Spellcast Roll, you can roll a **d8** as your advantage die. Once per long rest, after an ally has made a Spellcast Roll with your help, you can swap the results of their Duality Dice.

CALL OF THE BRAVE
Specialization

Rise to the Challenge: You are vigilant in the face of mounting danger. While you have 2 or fewer Hit Points unmarked, you can roll a **d20** as your Hope Die.

CALL OF THE SLAYER
Specialization

Weapon Specialist: You can wield multiple weapons with dangerous ease. When you succeed on an attack, you can **spend a Hope** to add one of the damage dice from your secondary weapon to the damage roll. Additionally, once per long rest when you roll your Slayer Dice, reroll any 1s.

SCHOOL OF KNOWLEDGE
Specialization

Accomplished: Take an additional domain card of your level or lower from a domain you have access to.

Perfect Recall: Once per rest, when you recall a domain card in your vault, you can reduce its Recall Cost by 1.

SCHOOL OF WAR
Specialization

Conjure Shield: You can maintain a protective barrier of magic. While you have at least 2 Hope, you add your Proficiency to your Evasion.

Fueled by Fear: The extra magic damage from your "Face Your Fear" feature increases to **2d10**.

TROUBADOUR
Mastery

Virtuoso: You are among the greatest of your craft and your skill is boundless. You can perform each of your "Gifted Performer" feature's songs twice instead of once per long rest.

WORDSMITH
Mastery

Epic Poetry: Your Rally Die increases to a **d10**. Additionally, when you Help an Ally, you can narrate the moment as if you were writing the tale of their heroism in a memoir. When you do, roll a **d10** as your advantage die.

WARDEN OF THE ELEMENTS
Mastery

Elemental Dominion: You further embody your element. While *Channeling*, you gain the following benefit:

- **Fire:** You gain a +1 bonus to your Proficiency for attacks and spells that deal damage.
- **Earth:** When you would mark Hit Points, roll a **d6** per Hit Point marked. For each result of 6, reduce the number of Hit Points you mark by 1.
- **Water:** When an attack against you succeeds, you can **mark a Stress** to make the attacker temporarily *Vulnerable*.
- **Air:** You gain a +1 bonus to your Evasion and can fly.

WARDEN OF RENEWAL
Mastery

Defender: Your animal transformation embodies a healing guardian spirit. When you're in Beastform and an ally within Close range marks 2 or more Hit Points, you can **mark a Stress** to reduce the number of Hit Points they mark by 1.

STALWART
Mastery

Undaunted: Gain a permanent +3 bonus to your damage thresholds.

Loyal Protector: When an ally within Close range has 2 or fewer Hit Points and would take damage, you can **mark a Stress** to sprint to their side and take the damage instead.

VENGEANCE
Mastery

Nemesis: Spend **2 Hope** to *Prioritize* an adversary until your next rest. When you make an attack against your *Prioritized* adversary, you can swap the results of your Hope and Fear Dice. You can only *Prioritize* one adversary at a time.

BEASTBOUND
Mastery

Advanced Training: Choose two additional level-up options for your companion.

Loyal Friend: Once per long rest, when the damage from an attack would mark your companion's last Stress or your last Hit Point and you're within Close range of each other, you or your companion can rush to the other's side and take that damage instead.

WAYFINDER
Mastery

Apex Predator: Before you make an attack roll against your *Focus*, you can **spend a Hope**. On a successful attack, you remove a Fear from the GM's Fear pool.

NIGHTWALKER
Mastery

Fleeting Shadow: Gain a permanent +1 bonus to your Evasion. You can use your "Shadow Stepper" feature to move within Very Far range.

Vanishing Act: Mark a Stress to become *Cloaked* at any time. When *Cloaked* from this feature, you automatically clear the *Restrained* condition if you have it. You remain *Cloaked* in this way until you roll with Fear or until your next rest.

ROGUE

SYNDICATE
Mastery

Reliable Backup: You can use your "Contacts Everywhere" feature three times per session. The following options are added to the list of benefits you can choose from when you use that feature:

• When you mark 1 or more Hit Points, they can rush out to shield you, reducing the Hit Points marked by 1.
• When you make a Presence Roll in conversation, they back you up. You can roll a **d20** as your Hope Die.

SERAPH

DIVINE WIELDER
Mastery

Sacred Resonance: When you roll damage for your "Spirit Weapon" feature, if any of the die results match, double the value of each matching die. For example, if you roll two 5s, they count as two 10s.

SERAPH

WINGED SENTINEL
Mastery

Ascendant: Gain a permanent +4 bonus to your Severe damage threshold.

Power of the Gods: While flying, you deal an extra **1d12** damage instead of 1d8 from your "Wings of Light" feature.

SORCERER

ELEMENTAL ORIGIN
Mastery

Transcendence: Once per long rest, you can transform into a physical manifestation of your element. When you do, describe your transformation and choose two of the following benefits to gain until your next rest:

• +4 bonus to your Severe threshold
• +1 bonus to a character trait of your choice
• +1 bonus to your Proficiency
• +2 bonus to your Evasion
SORCERER

PRIMAL ORIGIN
Mastery

Arcane Charge: You can gather magical energy to enhance your capabilities. When you take magic damage, you become *Charged*. Alternatively, you can **spend 2 Hope** to become *Charged*. When you successfully make an attack that deals magic damage while *Charged*, you can clear your *Charge* to either gain a +10 bonus to the damage roll or gain a +3 bonus to the Difficulty of a reaction roll the spell causes the target to make. You stop being *Charged* at your next long rest.

WARRIOR

CALL OF THE BRAVE
Mastery

Camaraderie: Your unwavering bravery is a rallying point for your allies. You can initiate a Tag Team Roll one additional time per session. Additionally, when an ally initiates a Tag Team Roll with you, they only need to spend 2 Hope to do so.

WARRIOR

CALL OF THE SLAYER
Mastery

Martial Preparation: You're an inspirational warrior to all who travel with you. Your party gains access to the Martial Preparation downtime move. To use this move during a rest, describe how you instruct and train with your party. You and each ally who chooses this downtime move gain a **d6** Slayer Die. A PC with a Slayer Die can spend it to roll the die and add the result to an attack or damage roll of their choice.

WIZARD

SCHOOL OF KNOWLEDGE
Mastery

Brilliant: Take an additional domain card of your level or lower from a domain you have access to.

Honed Expertise: When you use an Experience, roll a **d6**. On a result of 5 or higher, you can use it without spending Hope.

WIZARD

SCHOOL OF WAR
Mastery

Thrive in Chaos: When you succeed on an attack, you can **mark a Stress** after rolling damage to force the target to mark an additional Hit Point.

Have No Fear: The extra magic damage from your "Face Your Fear" feature increases to **3d10**.

HIGHBORNE

Being part of a highborne community means you're accustomed to a life of elegance, opulence, and prestige within the upper echelons of society.

Privilege: You have advantage on rolls to consort with nobles, negotiate prices, or leverage your reputation to get what you want.

Julia Metzger — DH Core 073/270 | Daggerheart © Darrington Press 2025

LOREBORNE

Being part of a loreborne community means you're from a society that favors strong academic or political prowess.

Well-Read: You have advantage on rolls that involve the history, culture, or politics of a prominent person or place.

Juan Gutierrez — DH Core 074/270 | Daggerheart © Darrington Press 2025

ORDERBORNE

Being part of an orderborne community means you're from a collective that focuses on discipline or faith, and you uphold a set of principles that reflect your experience there.

Dedicated: Record three sayings or values your upbringing instilled in you. Once per rest, when you describe how you're embodying one of these principles through your current action, you can roll a **d20** as your Hope Die.

Rafater — DH Core 075/270 | Daggerheart © Darrington Press 2025

RIDGEBORNE

Being part of a ridgeborne community means you've called the rocky peaks and sharp cliffs of the mountainside home.

Steady: You have advantage on rolls to traverse dangerous cliffs and ledges, navigate harsh environments, and use your survival knowledge.

Daarken — DH Core 076/270 | Daggerheart © Darrington Press 2025

SEABORNE

Being part of a seaborne community means you lived on or near a large body of water.

Know the Tide: You can sense the ebb and flow of life. When you roll with Fear, place a token on this card. You can hold a number of tokens equal to your level. Before you make an action roll, you can spend any number of these tokens to gain a +1 bonus to the roll for each token spent. At the end of each session, clear all unspent tokens.

Sam Key — DH Core 077/270 | Daggerheart © Darrington Press 2025

SLYBORNE

Being part of a slyborne community means you come from a group that operates outside the law, including all manner of criminals, grifters, and con artists.

Scoundrel: You have advantage on rolls to negotiate with criminals, detect lies, or find a safe place to hide.

Paul Scott Canavan — DH Core 078/270 | Daggerheart © Darrington Press 2025

UNDERBORNE

Being part of an underborne community means you're from a subterranean society.

Low-Light Living: When you're in an area with low light or heavy shadow, you have advantage on rolls to hide, investigate, or perceive details within that area.

Irina Nordsol — DH Core 079/270 | Daggerheart © Darrington Press 2025

WANDERBORNE

Being part of a wanderborne community means you've lived as a nomad, forgoing a permanent home and experiencing a wide variety of cultures.

Nomadic Pack: Add a Nomadic Pack to your inventory. Once per session, you can **spend a Hope** to reach into this pack and pull out a mundane item that's useful to your situation. Work with the GM to figure out what item you take out.

Paul Scott Canavan — DH Core 080/270 | Daggerheart © Darrington Press 2025
WILDBORNE

Being part of a wildborne community means you lived deep within the forest.

Lightfoot: Your movement is naturally silent. You have advantage on rolls to move without being heard.

Andreas Rocha — DH Core 081/270 | Daggerheart © Darrington Press 2025

CLANK
ANCESTRY

Clanks are sentient mechanical beings built from a variety of materials, including metal, wood, and stone.

Purposeful Design: Decide who made you and for what purpose. At character creation, choose one of your Experiences that best aligns with this purpose and gain a permanent +1 bonus to it.

Efficient: When you take a short rest, you can choose a long rest move instead of a short rest move.

Mat Wilma — DH Core 056/270 | Daggerheart © Darrington Press 2025

DRAKONA
ANCESTRY

Drakona resemble wingless dragons in humanoid form and possess a powerful elemental breath.

Scales: Your scales act as natural protection. When you would take Severe damage, you can **mark a Stress** to mark 1 fewer Hit Points.

Elemental Breath: Choose an element for your breath (such as electricity, fire, or ice). You can use this breath against a target or group of targets within Very Close range, treating it as an Instinct weapon that deals **d8** magic damage using your Proficiency.

Mat Wilma — DH Core 057/270 | Daggerheart © Darrington Press 2025
DWARF
ANCESTRY

Dwarves are most easily recognized as short humanoids with square frames, dense musculature, and thick hair.

Thick Skin: When you take Minor damage, you can **mark 2 Stress** instead of marking a Hit Point.

Increased Fortitude: **Spend 3 Hope** to halve incoming physical damage.

*Mat Wilma* — DH Core 058/270 | Daggerheart © Darrington Press 2025

ELF
ANCESTRY

Elves are typically tall humanoids with pointed ears and acutely attuned senses.

Quick Reactions: **Mark a Stress** to gain advantage on a reaction roll.

Celestial Trance: During a rest, you can drop into a trance to choose an additional downtime move.

Mat Wilma — DH Core 059/270 | Daggerheart © Darrington Press 2025
FAERIE
ANCESTRY

Faeries are winged humanoid creatures with insectile features.

Luckbender: Once per session, after you or a willing ally within Close range makes an action roll, you can **spend 3 Hope** to reroll the Duality Dice.

Wings: You can fly. While flying, you can **mark a Stress** after an adversary makes an attack against you to gain a +2 bonus to your Evasion against that attack.

Anthony Jones — DH Core 060/270 | Daggerheart © Darrington Press 2025

FAUN
ANCESTRY

Fauns resemble humanoid goats with curving horns, square pupils, and cloven hooves.

Caprine Leap: You can leap anywhere within Close range as though you were using normal movement, allowing you to vault obstacles, jump across gaps, or scale barriers with ease.

Kick: When you succeed on an attack against a target within Melee range, you can **mark a Stress** to kick yourself off them, dealing an extra **2d6** damage and knocking back either yourself or the target to Very Close range.

Jessketchin — DH Core 063/270 | Daggerheart © Darrington Press 2025

FIRBOLG
ANCESTRY

Firbolgs are bovine humanoids typically recognized by their broad noses and long, drooping ears.

Charge: When you succeed on an Agility Roll to move from Far or Very Far range into Melee range with one or more targets, you can **mark a Stress** to deal **1d12** physical damage to all targets within Melee range.

Unshakable: When you would mark a Stress, roll a **d6**. On a result of 6, don't mark it.

Anthony Jones — DH Core 061/270 | Daggerheart © Darrington Press 2025

FUNGRIL
ANCESTRY

Fungril resemble humanoid mushrooms.

Fungril Network: Make an **Instinct Roll (12)** to use your mycelial array to speak with others of your ancestry. On a success, you can communicate across any distance.

Death Connection: While touching a corpse that died recently, you can **mark a Stress** to extract one memory from the corpse related to a specific emotion or sensation of your choice.

Anthony Jones — DH Core 062/270 | Daggerheart © Darrington Press 2025

GALAPA
ANCESTRY

Galapa resemble anthropomorphic turtles with large, domed shells into which they can retract.

Shell: Gain a bonus to your damage thresholds equal to your Proficiency.

Retract: **Mark a Stress** to retract into your shell. While in your shell, you have resistance to physical damage, you have disadvantage on action rolls, and you can't move.

*Jessketchin* — DH Core 064/270 | Daggerheart © Darrington Press 2025

GIANT

Giants are towering humanoids with broad shoulders, long arms, and one to three eyes.

Endurance: Gain an additional Hit Point slot at character creation.

Reach: Treat any weapon, ability, spell, or other feature that has a Melee range as though it has a Very Close range instead.
GOBLIN

Goblins are small humanoids easily recognizable by their large eyes and massive membranous ears.

Surefooted: You ignore disadvantage on Agility Rolls.

Danger Sense: Once per rest, **mark a Stress** to force an adversary to reroll an attack against you or an ally within Very Close range.

HALFLING

Halflings are small humanoids with large hairy feet and prominent rounded ears.

Luckbringer: At the start of each session, everyone in your party gains a Hope.

Internal Compass: When you roll a 1 on your Hope Die, you can reroll it.

HUMAN

Humans are most easily recognized by their dexterous hands, rounded ears, and bodies built for endurance.

High Stamina: Gain an additional Stress slot at character creation.

Adaptability: When you fail a roll that utilized one of your Experiences, you can **mark a Stress** to reroll.

INFERNIS

Infernis are humanoids who possess sharp canine teeth, pointed ears, and horns. They are the descendants of demons from the Circles Below.

Fearless: When you roll with Fear, you can **mark 2 Stress** to change it into a roll with Hope instead.

Dread Visage: You have advantage on rolls to intimidate hostile creatures.
KATARI

Katari are feline humanoids with retractable claws, vertically slit pupils, and high, triangular ears.

Feline Instincts: When you make an Agility Roll, you can **spend 2 Hope** to reroll your Hope Die.

Retracting Claws: Make an **Agility Roll** to scratch a target within Melee range. On a success, they become temporarily *Vulnerable*.
ORC

Orcs are humanoids most easily recognized by their square features and boar-like tusks that protrude from their lower jaw.

Sturdy: When you have 1 Hit Point remaining, attacks against you have disadvantage.

Tusks: When you succeed on an attack against a target within Melee range, you can **spend a Hope** to gore the target with your tusks, dealing an extra **1d6** damage.

RIBBET

Ribbets resemble anthropomorphic frogs with protruding eyes and webbed hands and feet.

Amphibious: You can breathe and move naturally underwater.

Long Tongue: You can use your long tongue to grab onto things within Close range. **Mark a Stress** to use your tongue as a Finesse Close weapon that deals **d12** physical damage using your Proficiency.

SIMIAH

Simiah resemble anthropomorphic monkeys and apes with long limbs and prehensile feet.

Natural Climber: You have advantage on Agility Rolls that involve balancing and climbing.

Nimble: Gain a permanent +1 bonus to your Evasion at character creation.
