Operation EMPEROR

Operation EMPEROR is a special circumstances long-term scientific observation program, with the eventual goal of priority biological sample extraction from Planet Of Interest ARDENNES-3 (HERCYNIA).

It is the united opinion of our Exotic Materials branch that the resultant biological samples will provide us with the means to form a coherent, lossless transfer of biologically encoded information (memory, personality, subjectivity) from one organic data substrate to another. Rather than the facsimile produced by our current means of subjectivity implantation, it is the belief of our Exotic Materials branch that **this would allow the true transplantation of a human intelligence from one brain to another.** The importance of this to SSC's lifelong mission should be, in the opinion of our Exotic Materials branch, plainly obvious to the Honored Directors, and with it the importance of Operation EMPEROR and the resultant risks to our Corpro's good standing.

Namo Eleon

CHIEF EXECUTIVE OFFICER OF THE EXOTIC
MATERIALS BRANCH AT SMITH-SHIMANO CORPRO.
