Introduction

GrabDoc is a Blender 4+ add-on for quickly baking trim sheets and tileable texture maps.

After installation, run the one-click scene setup and then start modeling! GrabDoc provides a camera object with the ability to preview your rendered texture maps in real-time via custom shaders in Workbench, Eevee, and Cycles. Once satisfied you can bake all maps using in-house options or even utilizing Marmoset Toolbag 4's baker for the best results!

Features

Head to the [Gumroad](#) page for a full feature list!

Support

GrabDoc is a FOSS (Free and Open Source Software) project, which means I see very little return on my time spent developing and maintaining it.

About

GrabDoc is a trim baker for Blender 4.2-5.0 Beta
